[1] Includes iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, as listed, with the exception of electric light and power. [2] Mainly hotels and restaurants and laundry and dry cleaning plants.

TABLE C-6.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners) SOURCE: Average Hours Worked and Average Hourly Earnings, D.B.S.

Tables C-6 to C-9 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-4 They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-4 relate to salaried employees as well as to all wage-earners of the co-operative firms.

Week of	Average Hours Worked			Average Hourly Earnings

* Durable manufactured goods industries.

[1] Based upon June 1, 1941, as 100 p.c., the index numbers of average hourly earnings of wage-earners employed by eight establishments manufacturing heavy electrical apparatus are as follows: 1950, Oct. 1, 251·0; Nov. 1, 254·5; and Dec. 1, 254·6; 1949, Dec. 1, 231·5

[2] Chiefly street and electric railways.

G—Strikes and Lockouts

TABLE G-1.—STRIKES AND LOCKOUTS IN CANADA, JANUARY, 1951, JANUARY AND DECEMBER, 1950†

Date	Number of Strikes and Lockouts		Number of Workers Involved		Time Loss	
	Commencing During Month	In Existence	Commencing During Month	In Existence	In Man-Working Days	Per Cent of Estimated Working Time
January, 1951*	17‡	17	6,253‡	6,253	16,763	0·02
December, 1950*	6	13	1,138	2,562	8,438	0·01
January, 1950*	9‡	9	2,456‡	2,456	39,488	0·05

* Preliminary figures.

‡ Strikes unterminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, JANUARY, 1951(1)

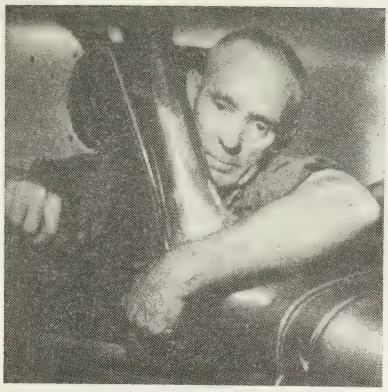
Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars(2)
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to January, 1951				
MINING—				
Coal miners, Lethbridge, Alta.	2	364	7,200	Commenced December 21, 1950; protest by contract miners against pushing cars to coal face; terminated January 29; negotiations; in favour of workers.
MANUFACTURING—				
Textiles, Clothing, etc.—				
Cotton and rayon underwear factory workers, Sherbrooke, P.Q.	1	40	400	Commenced May 11, 1950; for a new agreement providing for increased wages, following reference to court of referees; unterminated.
Strikes and Lockouts Commencing During January, 1951				
MANUFACTURING—				
Vegetable Foods, etc.—				
Flour mill and bag factory workers, Port Colborne, Ont.	2	450	700	Commenced January 19: for a new agreement providing for increased wages, 44-hour week, cost-of-living escalator clause, and union shop; terminated January 20; return of workers pending further negotiations; indefinite.
Rubber and Its Products—				
Tire builders, Kitchener, Ont.	1	(3) 289	289	Commenced January 19; dispute over one-day lay-off of eight tire builders while equipment repairs made; terminated January 19; return of workers; in favour of employer.
Boots and Shoes (Leather)—				
Shoe factory workers, Quebec, P.Q.	1	(4) 76	152	Commenced January 16; for increased wages, piece rates; terminated January 17; negotiations; in favour of workers.
Shoe factory workers, Quebec, P.Q.	1	78	39	Commenced January 31; for increased wages, piece rates; unterminated.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, JANUARY, 1951[1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars[2]
	Establishments	Workers		
Strikes and Lockouts Commencing During January 1951—*Concluded*				
Metal Products—				
Brass and copper factory workers, New Toronto, Ont.	1	975	5,850	Commenced January 19; for a new agreement providing for increased wages, 40-hour week with the same take-home pay as for 44-48 hours, Rand formula for union dues, and payment for all statutory holidays; terminated January 25; conciliation, provincial; compromise.
Can and canning equipment factory workers, Toronto and New Toronto, Ont.	3	558	1,100	Commenced January 24; for inclusion of workers in Canadian plants in master agreement in effect in United States plants; terminated January 25; negotiations; compromise, master agreement covering Canadian plants only.
Farm implement factory workers, Toronto, Ont.	1	3,000	375	Commenced January 31; protest against terms of new tentative agreement, following provincial conciliation; terminated January 31; return of workers; in favour of employer.
Miscellaneous—				
Furniture and clothing factory workers, Victoria, B.C.	2	51	200	Commenced January 26; for implementation of unaminous award of conciliation board for increased wages in union agreement under negotiations; unterminated.
CONSTRUCTION—				
Buildings and Structures—				
Plumbers, Belleville, Ont.	6	40	40	Commenced January 18; for a new agreement providing for increased wages; terminated January 18; negotiations; in favour of workers.
Steel erectors, Toronto, Ont.	1	8	32	Commenced January 24; inter-union dispute—protest against working with carpenters of another affiliation; terminated January 29; return of workers; indefinite.
Carpenters, Fort William and Port Arthur, Ont.	5	40	120	Commenced January 29; jurisdictional dispute as to whether metal sheeting should be applied by carpenters or sheet metal workers; unterminated.
Miscellaneous—				
Subway construction rodmen, Toronto, Ont.	1	17	25	Commenced January 4; jurisdictional dispute re rodmen; terminated January 5; conciliation, provincial; in favour of workers.
TRADE—				
Milk salesmen, Timmins, Ont.	1	11	11	Commenced January 13; protest against discharge of a union worker; terminated January 13; negotiations; in favour of workers.
Wholesale auto parts distribution workers, Chatham, Ont.	2	240	180	Commenced January 16; protesting two-day suspension of a female worker for cause; terminated January 16; return of workers; in favour of employers.
SERVICE—				
Business and Personal—				
Hotel employees, Windsor, Ont.	1	16	50	Commenced January 6; for a closed shop clause in new agreement under negotiations; terminated January 10; negotiations; in favour of workers.

[1] Preliminary data based where possible on reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

[2] In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.



[3] 982 indirectly affected; [4] 64 indirectly affected.

CURRENT LABOUR CONDITIONS

This article summarizes the latest employment and labour information available at April 10, as the LABOUR GAZETTE *went to press. It was prepared by the Economics and Research Branch, Department of Labour.*

BY THE beginning of April, it was clear that the peak of the seasonal unemployment for Canada as a whole had been passed. A moderate increase in employment in the industrial areas as manufacturing and construction firms began their spring hiring, more than offset lay-offs of loggers in the rural districts.

The number of applications for employment on file at National Employment Service offices reached a peak of 303,700 on February 8. A drop of 7,000 had occurred by the end of February, with a further decline of 6,400 during March to a total of 290,300 at the end of the month. At the end of March, 1950, job applications at local employment offices totalled 428,300.

There was considerable variation in the employment situation between the different regions. In the Maritime Provinces and Quebec, unemployment was still increasing during March, as many thousands of woodsworkers were released at the end of the cutting season. In Ontario, unemployment declined as construction and manufacturing became more active. There was little change in the employment during the month in the Prairie Provinces, but in British Columbia logging was disrupted considerably by mid-month storms. Some areas in parts of the Maritime provinces, Quebec and British Columbia had substantial labour surpluses, while in some of the industrial centres of Ontario and Quebec, shortages of particular types of skilled labour continue.

Engineers, draughtsmen, as well as machinists, toolmakers and diesetters are still the skills in short supply. Records of the National Employment Service indicate that for these trades there are fewer applicants than vacancies. For the other metal working trades, vacancies reported have been on the increase since the beginning of February, while the number of applications registering has been declining. Job openings for farm workers and for unskilled labour, have also been on the increase.

The changes in the demand and supply of different classes of workers during March reflect in part the slow beginning of the annual spring increase in employment, which will gain momentum in April and May, with the large scale hiring in construction, agriculture and transportation. These seasonal industries will provide most of the jobs for the unskilled and semi-skilled workers who have made up the bulk of the unemployed this winter.

As well, many of those now working in logging will move into agriculture in the next month or so, although in many sections the cutting season has been extended because of the heavy demand for pulp.

The current employment situation also reflects not only defence spending, but also the current program of capital investment in new plant and equipment. Throughout 1951, both of these factors will make increasing demands on available supplies of labour. Defence expenditures in 1951 are expected to be more than twice those of last year. In 1951, projected capital investment by private industry and government, excluding military equipment, is estimated at $4·3 billions, an increase of 14 per cent in value and 6 per cent in volume over that accomplished in 1950. Of the total investment program, about $2·7 billion is intended for construction purposes, such as the erection of new plants and houses, power plants, oil pipe lines, roads, docks and airstrips. The remaining $1·6 billion, for new equipment and machinery, reflects the increase in plant expansion in manufacturing.

If all these investment plans are realized this year, the investment program would be the largest in Canadian history, and would mean that Canada will devote about 22 per cent of her gross national production in 1951 to an increase in capital equipment. The difficulty is that the capital investment program competes at many points with the projected defence program for both essential materials and skilled labour. The shipbuilding industry, for example, will require some of the same tradesmen needed in construction. Production of machinery for plant extensions and improvements demands the services of many of the same skilled men needed in defence plants. Although the total labour supply is expected to increase somewhat through natural increase and immigration, there will still be problems of conserving both labour and materials for defence production proper and for the more essential capital investment.

It is possible to distinguish between different types of capital investment, from the point of view of their contribution to preparedness. Development of natural resources, such as oil, iron ore, and base metals, will increase our ability to meet our defence commitments, while maintaining high levels of exports and non-defence production.

The recent credit restrictions and the priority system for basic materials will probably have the effect of diverting some available supplies of labour and materials to defence projects and capital investment which can contribute most to preparedness. To these measures have now been added new taxation devices. One of the more significant provisions in the recent budget was the withholding for four years of depreciation write-off for tax purposes on all new capital assets considered non-essential. In addition, the period in which taxation concessions can be obtained for oil developments and certain types of mines has been extended.

IN BRIEF . . .

The cost-of-living index rose from 175·2 to 179·7 between February 1 and March 1, 1951. All group indexes moved higher in February, although two-thirds of the total increase was due to higher food prices: the index for foods rose from 224·4 to 233·9 . . . . Wholesale prices of general and residential building materials moved to higher levels during February with the index of general building materials at 287·4 compared with 279·7 in January. The composite wholesale index of residential building materials was at 274·9 compared to the January index of 269·6 . . . . The estimated total of salaries and wages and supplementary labour income reached an all-time peak of $8,114,000,000 in 1950, exceeding by 6·3 per cent of the

Trade—				
Retail trade	January	$674,900,000	−28·3	+21·6
Exports	February	$233,900,000	−18·0	+17·2
Imports	February	$274,300,000	−16·2	+37·0

(a) Estimated on basis of sample labour force survey. Only those who did not do any work in the survey week are here classified as persons without jobs.

(b) Includes ordinary live claimants plus claimants for supplementary benefit.

(c) Includes $1,093,565 in supplementary benefit.

(d) This percentage compares the cumulative total to date from first of current year with total from same period previous year.

Data in this table are preliminary figures from regular reports compiled by various government agencies, including Dominion Bureau of Statistics, the Unemployment Insurance Commission, the Immigration Branch, Department of Citizenship and Immigration, and the Economics and Research Branch, Department of Labour. Detailed information can be found in the statistical appendix of the Labour Gazette.

Notes of Current Interest

CCL seeks funds to aid labour in Asia

On February 20, the Canadian Congress of Labour announced the launching of a campaign to provide funds for leadership training in trade unions of South-East Asia. CCL Secretary-Treasurer Pat Conroy stated that the action was being taken to make effective a policy declaration passed at the 10th annual convention of the Canadian Congress of Labour last September. In that statement the CCL dealt with the threat of Communism to the free peoples and said action, and not merely words, was needed to meet that threat (L.G., Nov., 1950, p. 1814).

The Canadian unions of the United Steelworkers of America, which are affiliated with the CCL, have already launched a drive for $25,000 to be used for trade union educational purposes in South-East Asia. The United Steelworkers' fund will form part of the Canadian Congress of Labour donation which will be spent through the International Confederation of Free Trade Unions. Countries expected to benefit from the plan include India, Pakistan, Burma, Indo-China, and Malaya. The ICFTU has already appointed a director of education and established an office in Singapore (L.G., Feb., 1951, p. 150).

In a letter to CCL unions across Canada announcing the campaign, Mr. Conroy said:—

"It is widely recognized that one of the chief weapons of democracy is education, allied with the organization of the workers into labour unions. Our Congress is deeply interested in the work of the International Confederation of Free Trade Unions, with which it is affiliated. Recently, a committee of the ICFTU visited South-East Asia, and recommended to the ICFTU Executive Board at its meeting in November that a program of action involving the education of leaders and the organization of workers be given immediate attention as an important part of the economic development of these countries in that area.

"The Congress believes that, in providing substantial support to the ICFTU program in South-East Asia, the Congress will be making an investment in world peace, as well as bringing inestimable benefits to the workers and the people of the countries immediately concerned. . . .

"If locals were to invest a few hundred dollars in the ICFTU program of organization and training for leadership, they would be doing more to help their fellow workers to obtain decent wages and working conditions, promote democracy and undermine Communism, than could be done in any other way. . . ."

Legislation confers emergency powers on Government

Bill 24, an Act to confer certain Emergency Powers upon the Governor in Council, was introduced by the Prime Minister on February 20, and passed by the House of Commons March 6.

The preamble to the Act states that since an international emergency exists that threatens the security of Canada, it is necessary that the Governor in Council have emergency powers to carry out adequate defence preparations, to regulate the economy to meet the needs of defence, and to stabilize the economy to safeguard it from disruption resulting from defence efforts here or elsewhere. The preamble indicates two reasons why emergency powers were sought through this Act rather than through the War Measures Act. It was considered better not to invoke the War Measures Act so long as present efforts to avert war were continuing, and it was not desirable that the wide powers conferred by the War Measures Act to interfere with the fundamental liberties of the individual should now be brought into operation.

The Act confers upon the Governor in Council power to take such action and make such orders and regulations as he may deem necessary or advisable for the "security, defence, peace, order and welfare of Canada". Six classes of subjects over which the power shall extend are enumerated, but the general power conferred is not limited to matters coming within these heads. The six classes of subjects are control and suppression of maps, plans and photographs; control of communications; control of harbours and shipping; transportation; trading, exportation, importation, production and manufacture; and collection of fees or charges established for the purposes of a scheme of control. During the discussion in Parliament, Government spokesmen indicated that the

power conferred was considered wide enough to cover price and wage controls and national registration of manpower.

The powers conferred on the Governor in Council do not include the power to make orders or regulations in relation to detention, exclusion or deportation, or censorship, or the expenditure of money not specifically provided by Parliament, except from a fund established by order or regulation for the purpose of a scheme of control.

Orders made by the Governor in Council under the Act must be laid before Parliament within five days of their making, and other regulations within fifteen days, or if Parliament is not in session, within a like period after the commencement of the next session. As introduced, the Bill required the tabling of Orders in Council in accordance with the Regulation Act. It was amended in committee to reduce the period for tabling as above, and to require tabling of all regulations whether made by the Governor in Council or another regulation making authority under the Act.

Parliament has the authority, by resolution of the Senate and the House of Commons, to annul any order or regulation under the Act within forty days after it is tabled. This latter section was changed in committee so that it applies to all regulations rather than to Orders in Council only, as was provided in the Bill as introduced.

The Governor in Council may prescribe penalties by way of fine or imprisonment for a term not exceeding five years, for violation of orders or regulations made under the Act.

The Act will expire on May 31, 1952, but it may be continued in force for a further period not exceeding one year, on a joint address of the House of Commons and the Senate to the Governor General.

The Act in no way prevents the War Measures Act from being invoked, and if this should be done, the Emergency Powers Act would be automatically repealed, but any orders or regulations would remain in effect under authority of the War Measures Act.

Fair employment practices and equal pay bills in Ontario

Two important anti-discrimination Bills, one, to bar discrimination in employment because of race, creed, colour or place of origin, and a second, to ensure equal pay for men and women doing the same work in the same establishment, were introduced at the 1951 session of the Ontario Legislature. These measures are the first of their kind in Canada but are similar in principle to laws in force in several states of the U.S.A. The Fair Employment Practices Bill was the second brought in by the Government during the session. The chief change from the earlier Bill, which was withdrawn, was with regard to administration.

The Fair Employment Practices Bill, citing in its preamble the Universal Declaration of Human Rights of the United Nations, prohibits employers from refusing to employ, from firing or from discriminating against any person because of race, creed, colour, nationality, ancestry or place of origin. Trade unions are forbidden to exclude from membership, expel, suspend or discriminate against any member or person for any of these reasons. The Bill also bans expressions of discrimination in employment applications and advertisements. Employers of fewer than five persons are excluded, as well as domestic servants and religious, philanthropic, educational, fraternal and social organizations not operated for private profit.

The Female Employees Fair Remuneration Bill, which will go into effect on January 1, 1952, forbids an employer to discriminate between male and female employees by paying a lower rate to a woman than to a man employed by him for the same work in the same establishment. A difference in the rate of pay between men and women employees based on any factor other than sex is not to be considered a breach of the Act.

Opposition members criticized the terms of the Bill and particularly the provision that pay would have to be equal only when men and women were doing "the same work". A CCF motion, which was defeated by a vote of 43 to 28, declared that legislation on equal pay for equal work should apply to work of "comparative character or on comparable operations or where comparable skills are involved, should protect workers who lodge complaints and should contain adequate enforcement procedures" and asked that the subject be referred to the Select Standing Committee on Labour to draw up a Bill which would meet these standards.

Both measures will be administered by a Fair Employment Practices Branch of the Department of Labour, headed by a Director. The Minister of Labour has announced that Mr. Louis Fine, Chief Conciliation Officer for the Department, will head the new Branch. The original Fair Employment Practices Bill was to have been administered by the Labour Relations Board.

The machinery proposed for dealing with charges of discrimination is the same under both Acts. To enquire into a written complaint of discrimination under either Act, the Minister of Labour, on the request of the Director, will appoint a Conciliation Officer. If he fails to settle the matter, the Minister may then appoint a Commission of one or more persons with the powers of a Conciliation Board under the Labour Relations Act. After hearing the parties, the Commission will recommend to the Director the course which should be taken, which may, in the case of a breach of the Fair Employment Practices Act, include reinstatement with or without compensation for loss of earnings. The Minister, on the recommendation of the Director, will then issue whatever Order he deems necessary and authorize a prosecution if he sees fit.

A maximum fine of $100 is provided for failure to comply with any provision of the equal pay Act or any order made under it. In the case of the Fair Employment Practices Act fines up to $50 for an individual and $100 for a corporation, trade union, employers' organization or employment agency may be imposed.

Commission proposes no change in railway wage policy

The Report of the Royal Commission on Transportation, appointed in December, 1948, under the chairmanship of Hon. W. F. A. Turgeon, was tabled in the House of Commons on March 15 by the Prime Minister, Rt. Hon. L. S. St. Laurent.

The Report (which is available from the King's Printer at a cost of one dollar) included the following among other recommendations: a broad program of freight rate equalization between all regions of Canada; establishment of a single central board to deal with all forms of transportation under federal jurisdiction and to replace the three separate boards now functioning; Canadian National Railways to pay interst on debt owed the Federal Government only when earned, with provision made for the CNR to accumulate a surplus fund for current needs; national transportation policy to continue to ensure the efficient and economic operation of the Canadian Pacific Railway under private enterprise.

Dealing with railway wage policy, the Commission turned down suggestions that the Board of Transport Commissioners be given any responsibility for the fixing of the level of railway wages, holding that the Board's duty is to fix just and reasonable rates. It recommended that no special legislation should be passed for the handling of railway wage disputes and the prevention of strikes or lockouts. "Such legislation," the Commission said, would be "highly provocative and in practice ineffective." The Report pointed out that the strike which took place in 1950 was the only general railway strike in Canada's history and expressed the hope that it would be the last.

In tabling the Report, the Prime Minister intimated that the Government would introduce legislation at the current session of Parliament based on its recommendations.

Further curbs on instalment plan buying

The Hon. Douglas Abbott, Minister of Finance, tabled in the House of Commons on March 14 an amendment to the Consumer Credit Regulations of last October. He said that the purpose of the move was to restrain inflationary credit expansion.

The new Regulations increase the down payment for most instalment plan purchases from 20 per cent to 33⅓ per cent of the cash price. The maximum period of credit is reduced from 18 to 12 months. The minimum down payment is raised from $5 to $10, and the minimum size of instalments is increased.

In the case of automobiles, the minimum down payment, which was formerly one-third of the cash price, is now one-half.

The restrictions will not apply to the sale of books.

"In their net effect," Mr. Abbott said, "the new Regulations will be much stiffer than those now in effect, but except in the case of motor cars they will be no stiffer, and in some cases not quite so stiff as those in effect during the war."

Position of employee organizations in public service

On February 21, the Prime Minister, Rt. Hon. L. S. St. Laurent, replied in the House of Commons to questions from Mr. Stanley Knowles (Winnipeg North Centre) regarding the organization of employees in the public service.

Mr. Knowles asked first: "Does the Federal Government recognize any organizations of its employees as bargaining agents in the terms or spirit of the Industrial Relations and Disputes Investigation Act?"

To this Mr. St. Laurent replied: "The answer to the question as drafted is no.

"The Civil Service of Canada is carried on under laws enacted by Parliament and is supervised by a commission set up by Parliament and which reports to Parlia-

ment. The commission and the Government can and do receive representations from organizations of employees, but there is no process of collective bargaining in the sense in which that term is used in industry.

"From the very nature of employment in the public service, there can be no bargaining agent for the nation comparable with the employer in industry who has at his disposal funds derived from payments for goods or services. The funds from which salaries are paid in the public service have to be voted by Parliament and Parliament alone can discharge that responsibility."

The second part of Mr. Knowles' question was as follows: "What steps are being taken by the Government to provide its employees with the same facilities for negotiation with respect to working conditions as are provided for the employees of private corporations under the terms of the Industrial Relations and Disputes Investigation Act?"

The Prime Minister stated, in reply to this question: "The answer is that no steps are being taken because it is considered that the appropriate machinery for these purposes was set up by P.C. 3676 of May 16, 1944 which established the National Joint Council of the Public Service of Canada and the subsequent Treasury Board minute of March 8, 1945, approving the constitution of the Council."

Finally Mr. Knowles asked whether any labour-management committees were operating in Government departments; and if so, how many, and in what departments or sections or branches.

Mr. St. Laurent replied to this by saying: "There is nothing which could properly be called a labour-management committee, but there is a Departmental Joint Council of the Public Service in the Department of Resources and Development and there are numerous staff associations in other departments who are concerned with and make representations on working conditions and welfare questions."

Bill to provide for check-off defeated

A bill to amend the Industrial Relations and Disputes Investigation Act by inserting a provision regarding the check-off of union dues was defeated in the House of Commons on February 28, by a vote of 127 to 67.

The bill was introduced by Mr. Stanley Knowles, Member for Winnipeg North Centre. Similar to bills introduced by Mr. Knowles at previous sessions of Parliament, it sought to require employers to institute a voluntary revocable check-off of union dues upon request of a union certified under the Act.

Master agreements cover both Canadian and U.S. workers

Press reports in the month of January described three cases of negotiation of master collective agreements covering employees of the same firm in both Canada and the United States. Early in January, the United Automobile Workers (CIO) and the Electric Auto-Lite Company negotiated an agreement covering an estimated 17,000 UAW members employed in both Canadian and American plants of the Company. According to the *Financial Post* the contract was agreed on at a negotiation conference attended by American and Canadian company and union representatives. It is said to provide for hourly increases for Canadian employees of 7·3 cents an hour more than for the American workers. Six cents of this is in lieu of a pension plan set up for U.S. workers. The other 1·3 cents is to bring Canadian wage rates into closer conformity with those in the U.S. plants.

The Canadian edition of *Steel Labour*, published by the United Steelworkers of America (CIO), reports the signing of a master agreement with American Can, applying to employees in Vancouver, B.C. as well as to employees in U.S. plants of the company. The agreement provides for wage increases, union shop, and the inclusion of Canadian workers in the company's non-contributory pension and health and life insurance plan.

Another master agreement of this type was negotiated in January by the Continental Can Company and the United Steelworkers. The contract is reported to provide average wage increases of 16 cents an hour to approximately 12,500 workers in 25 plants in the United States and Canada. The company has announced that in future all contracts will cover both American and Canadian employees.

American-Canadian labour union relations

"The Labour Union Link Between Canada and the United States" is the title of an article by Paul Norgren in the *Industrial and Labour Relations Review* of October, 1950. The magazine is issued quarterly by the New York State School of Industrial and Labour Relations, Cornell University.

Mr. Norgren is a research economist with Industrial Relations Counsellors, Inc.

Formerly on the faculty of Stanford University, he is the author of *The Swedish Collective Bargaining System.*

The article is a close analysis of the interplay of union activities and policies in the United States and Canada. Among other topics of common interest to organized labour in both countries, Mr. Norgren discusses the role of executive officers, relations between the federations, collective bargaining, anti-communist measures and living standards.

Labour in Montreal and Toronto discusses civil rights

During February, two-day meetings were held by labour groups, in Montreal and Toronto to discuss civil rights and racial tolerance. The Montreal meeting, according to press reports, was sponsored by the Trades and Labour Council (TLC) and the Montreal Labour Council (CCL).

The principal speakers were René Mankiewicz, Professor at McGill University, and Jacques Perrault, barrister and Professor at the University of Montreal, who discussed human rights.

The other speakers were Michel Rubinstein, Chairman of the Jewish Labour Committee, and Roméo Girard, Secretary of the Labour Committee on Racial Tolerance.

Mr. Rubinstein dealt with the attitude of minority groups and the treatment they have a right to expect from majorities. The speaker expressed the opinion that it is easy to judge the value of a democracy by its attitude towards its minority groups.

Mr. Girard urged that the taking on of workers be non-restrictive, that contracts for the purchase and sale of property be free of all racial and religious prejudice, and that all Canadian citizens be permitted to enjoy the same privileges throughout the country, irrespective of the province in which they live, or of their colour, religion, etc.

Number of married women disqualified from UI benefit

Information regarding the number of married women who were disqualified from receiving unemployment insurance benefit as a result of a recent amendment to the insurance regulations (L.G., Dec., 1950, p. 1988), was given in the House of Commons recently by Mr. Paul E. Coté, Parliamentary Assistant to the Minister of Labour, in response to a question from Mr. Stanley Knowles, Member for Winnipeg North Centre.

Mr. Coté said that from November 15, the effective date of the amendment, until the end of November, 7,109 married women were disqualified by the new benefit regulation 5A, while for December and January the numbers were 2,186 and 1,513 respectively, making a total of 10,808.

Mr. Coté continued: "The number of appeals from disqualification under benefit regulation 5A heard by courts of referees between November 15, 1950, and January 31, 1951, is as follows: November, 249; December, 374; January, 78; total, 701.

"The percentage of females who established benefit years during the period January 1 to November 30, 1950, who were married women was 44 per cent. From this it is estimated that the number of married women on ordinary active claims was as follows: on October 31, 1950, 16,416; on November 30, 1950, 17,767; on December 31, 1950, 17,030; on January 31, 1951, 18,807."

Adoption of Defence Production Act

Bill 77, an Act respecting the Department of Defence Production, was introduced by the Prime Minister on February 23, 1951, and was given third reading and passed by the House of Commons on March 9.

The Bill provides for establishing a department of defence production, confers powers on the minister with respect to procurement very similar to those formerly held by the Minister of Munitions and Supply, and gives the Governor in Council power to control essential materials in substantially the same terms as the Essential Materials (Defence) Act passed at the Special Session in September, 1950. The Act will extend over a five-year period, expiring on July 31, 1956. It will repeal the Essential Materials (Defence) Act.

Besides making the usual provision for departmental organization it provides that crown companies may be set up under the Act, and the Minister will be responsible for Canadian Arsenals Limited, Crown Assets Disposal Corporation, Defence Construction Limited, Polymer Corporation Limited, Eldorado Mining and Refining (1944) Limited, Northern Transportation Company (1947) Limited, and Canadian Commercial Corporation, which have been under the Minister of Trade and Commerce.

The Minister is given power to acquire, hold and dispose of defence supplies, or to manufacture them. The Act also covers construction and maintenance of defence projects. It provides for a defence produc-

tion revolving fund of one hundred million dollars to finance stockpiling, to make loans or advances in aid of defence procurement, and to make initial payments which will subsequently be repaid by the Department of National Defence.

Power to control essential materials is identical with the power given under the Essential Materials (Defence) Act. The Governor in Council may designate essential materials or services as necessary to meet defence requirements, and may make regulations in regard to such essential materials and services, and the Minister has wide powers of control over material and services so designated.

Rent control situation in Canada

With the expiration of the Wartime Leasehold Regulations on April 30, 1951, Federal rent controls will come to an end.

The Federal Government's intention not to continue rental control beyond this date was announced by the Minister of Finance in the House of Commons in March of last year (L.G., May, 1950, p. 608). "It is not usual," the Minister stated, "for a government to give notice so long in advance as to its intentions respecting future legislation, but the Government has decided to do so in this case in order that any province which may consider it desirable to assume some measure of rent control may have ample time to take such steps as may be deemed appropriate." At the same time, the Government renewed its previous offer to pay the cost of provincial rent control for a period of one year, beginning not later than April 1, 1950.

On March 8, 1951, the Prime Minister reasserted the Government's policy when questioned in the House of Commons. Mr. St. Laurent stated: "There has been no change in the policy of the government, announced several months ago, affecting nation-wide rent control, which will expire at the end of April. The information I have, obtained from the press rather than from official sources, is to the effect that most of the provincial governments are arranging to enter this field at that time."

The situation as it stands at the time of going to press is as follows:—

The Saskatchewan Provincial Government availed itself of the Federal Government's offer of financial assistance and enacted legislation setting up its own system of rent controls from April 1, 1950. Federal rent controls ceased to apply to the Province from that date.

In Alberta, "stand-by" legislation was passed, under the title of "The Rental Control Act," authorizing the Government to establish rent control regulations, to come into force on a date to be proclaimed.

The Quebec Provincial Legislature passed a Bill entitled, "An Act Respecting the Regulation of Rentals," which received the Royal Assent on March 7, 1951, authorizing the Government to assume certain controls on the expiration of Federal controls on April 30.

Legislation to give the Ontario Provincial Government power to control rents when Federal controls lapse was introduced in the Ontario Legislature on March 21. The bill provides for the adoption of controls as now federally enforced. It also grants the Provincial Government power to amend the legislation by Order in Council so that any injustices to landlords or tenants may be corrected.

Newfoundland, at the time of coming into the Confederation, had its own system of rent control, which it retained and was not, therefore, subject to Federal rental regulations.

Housing in Canada during 1950

The number of new dwelling units completed in Canada (excluding Newfoundland) last year was slightly lower than in 1949, while the number of starts was larger, according to preliminary estimates by the Dominion Bureau of Statistics in co-operation with the Central Mortgage and Housing Corporation. The carryover of dwellings in various stages of construction at the end of the year was consequently somewhat greater than a year earlier.

New units completed during the year totalled 87,299 in the nine provinces as compared to 87,533 in 1949, and starts numbered 90,441 as against 89,509. The number under construction at the year end was 58,850 compared to 58,169. Including Newfoundland, for which comparable 1949 figures are not available, completions for all Canada numbered 89,015, starts 92,531, and the carryover was 60,538 units.

While there was comparatively little change from 1949 in building activity for Canada as a whole, there were large regional differences. Except for a slightly larger number of starts in Alberta, substantial declines were recorded in the western provinces in both starts and completions. In Quebec and the Maritime Provinces increases were generally indicated, except that completions in Nova Scotia and starts in Prince Edward Island were down from 1949. Ontario showed a small decline in 1950 for both starts and completions. The number under construc-

tion at the end of the year was higher in Quebec, Nova Scotia, Ontario, Saskatchewan and Alberta.

Completions in Ontario in 1950 numbered 31,318 as compared with 31,440 in the preceding year, Quebec 27,237 compared with 22,912, British Columbia 8,560 (10,272), Alberta 7,266 (9,411), Manitoba 4,612 (4,807), Saskatchewan 2,813 (3,576), Nova Scotia 2,573 (3,056), New Brunswick 2,545 (1,801), Prince Edward Island 375 (258), and Newfoundland 1,716 (not available for 1949).

Starts in Ontario in 1950 totalled 33,430 as against 34,023 in the preceding year, Quebec 28,515 against 24,196, Alberta 8,623 (8,465), British Columbia 7,536 (9,702), Manitoba 4,072 (5,039), Saskatchewan 2,904 (3,061), Nova Scotia 2,705 (2,636), New Brunswick 2,323 (2,012), Prince Edward Island 333 (375), Newfoundland 2,090 (not available for 1949).

Dwellings under construction in Ontario at the end of 1950 totalled 24,331 as compared with 23,585 at the end of 1949, and in Quebec the number was 15,421 as compared with 14,984. In British Columbia there were 6,068 as compared with 7,166, Alberta 5,606 (4,309), Nova Scotia 2,432 (2,326), Manitoba 2,198 (2,731), Saskatchewan 1,502 (1,452), New Brunswick 1,029 (1,274), Prince Edward Island 263 (292), and Newfoundland 1,688 (not available for 1949).

Labour leaders present brief to Cabinet

On February 20, leaders of Canada's four major labour organizations presented a brief to the Prime Minister and members of the Cabinet, requesting immediate action by the Government to institute price controls in Canada. The occasion marked the first time in history that leaders of the major labour organizations have appeared personally to present a joint submission to the Government (see below). The group was headed by Percy Bengough, TLC president; A. R. Mosher, CCL president; Gérard Picard, president of the CCCL; A. J. Kelly, chairman of the Dominion Joint Legislative Committee of the Railway Brotherhoods; and senior officials of the four organizations.

The labour proposals were summarized in four points:—

(1) "Adequate rent control. If rents are allowed to continue to go the way other prices have gone, the already heavy burden of the increased cost of living will become, for hundreds of thousands of families, almost unbearable. They will be able to provide themselves with shelter only at the cost of severe cuts in other parts of their living standards including food."

(2) "Freezing of prices."

(3) "A public board to pass on all applications for price and rent increases."

(4) "Labour representation on that board. The absence of such representation on the Wartime Prices and Trade Board was a serious error, which should not be repeated."

The brief said that price controls were an immediate necessity but that there was no apparent need of wage controls at this time. If, however, wage stabilization was considered necessary, the brief said it should first be considered by a joint labour-government-management conference.

Dealing with the present world situation, the brief cited inflation as one of the dangers that must be avoided, if the fight against Communism is to be successful.

Discussing the arguments which had been advanced against price control, the labour group said that it was not necessary to wait until war production had reached its peak to impose controls. On the matter of wage stabilization, the brief said in part:—

"It is quite possible that if there had been as much control over prices as there already is over wages, price increases would have been much more moderate than they have been.

"If every firm or industry that wanted an increase had been obliged first to submit its case to a public board and to keep its prices as they were till the board had investigated and reported, price increases would certainly have been much slower and probably much smaller than they have been.

"The labour movement recognizes that wages could go up fast enough and far enough to break a price ceiling, though it sees no immediate danger of anything of the sort. It believes that the proper way to deal with this question is a government-labour-management conference to work out methods of wage stabilization. This offers a prospect of a wage policy which will do two things, both essential: (*a*) preserve the spirit, the principle, of collective bargaining, and (*b*) bring the experience of labour and management into the defence effort. If our Government institutes a general policy of price and production controls, labour is ready to take part in a joint government-labour-management conference to consider wage stabilization."

Following the meeting with the Prime Minister, the four organizations announced the setting up of a joint eight-man committee, made up of the president and secretary of each of the organizations. This committee will deal with matters of joint union interest.

Movement towards co-operation of labour bodies

The presentation of a joint brief to the Prime Minister on February 20, as described above, climaxed a movement towards closer relations between Canada's labour leaders that has been developing over the past three years.

Normally the four major labour groups in Canada make separate representations to the Government, in interviews which are held annually in late winter or early spring, and which cover a wide range of subjects. In addition the groups occasionally make separate representations at other times on special issues.

The year 1948 marked the first example of combined action by any of the labour groups in their approach to the Government. In June of that year a delegation representing the Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Railway Brotherhoods, appeared before the Minister of Justice and several of his colleagues to petition for disallowance of the Prince Edward Island Trade Union Act (L.G., 1948, p. 695).

Resolutions on labour unity adopted by the Conventions of the TLC and CCL in 1949 indicated the desire of both organizations for a closer measure of co-operation.

The struggle of both Congresses to rid themselves of Communist influences revealed an important field in which they shared a common objective. Also, about this time, the abandonment of the Communist-influenced World Federation of Trade Unions by the CCL and by labour groups in other democratic countries, paved the way for co-operation in a new anti-Communist international labour federation. Thus, late in 1949, delegates from both the CCL and the TLC attended the inaugural meeting of the International Confederation of Free Trade Unions in London, England, and found themselves working harmoniously to set up a world body which would resist totalitarianism and help to achieve the objectives of workers everywhere (L.G., Feb., 1950, p. 172).

On December 30, 1949, the presidents of the CCL and TLC sent a joint letter to the Prime Minister of Canada and members of the Cabinet, expressing concern with regard to the unemployment situation. A second joint statement on unemployment was issued by the two labour leaders early in 1950 (L.G., Feb., 1950, p. 167).

Participation of the two organizations in the ICFTU was a factor leading to another joint statement by Mr. Bengough and Mr. Mosher in August, 1950. This statement quoted the opposition of the ICFTU to Communist aggression in Korea, and called for full support by Canadian labour for the decisions and actions of the United Nations Security Council to meet the Korean situation. This statement also denounced the "phoney Stockholm Peace Pledge" and other Communist manoeuvres (L.G., Oct., 1950, p. 1625).

The first joint statement signed on behalf of all four labour organizations in Canada came as a result of the railway strike in the summer of 1950. It announced the opposition of all four groups to the principle of compulsory arbitration (L.G., Oct., 1950, p. 1647).

Early in December of 1950, the four organizations announced the launching of a nation-wide campaign for price and rent control. Several joint statements have been issued as part of this campaign, culminating in the preparation of a joint brief and its submission to Mr. St. Laurent and members of the Cabinet.

Old age and blind pensioners in Canada

The number of persons receiving old age pensions in Canada increased from 292,702 at September 30, 1950 to 298,473 as at the end of the quarter December 31, 1950.

The Federal Government's contributions under the Federal-Provincial scheme totalled $25,088,784.17 for the quarter ended December 31, 1950, as compared with $24,600,947.46 in the preceding quarter. Since the inception of the Act the Federal Government has contributed $708,640,847.86.

The average monthly pension in the provinces ranged between $34.49 and $38.31. In the Yukon Territory and the Northwest Territories the average was slightly higher.

In only four provinces was the number of pensioners higher than three per cent of the total population.

In addition to the above, pensions were being paid to 11,036 blind persons as at December 31, 1950, as compared with 10,880 at September 30, 1950.

The cost of pensions in respect of blindness to the Federal Government was $984,276.45 for the quarter ended Decem-

ber 31, 1950, and $969,361.68 for the quarter ended September 30, 1950. Since the inception of the Act, the Federal payments have totalled $21,930,270.63. The average monthly pension in the provinces was between $38.10 and $39.32. With only three blind pensions in the Yukon Territory and the Northwest Territories, the average was $40.

Workmen's compensation amendments in Ontario

Implementing in part the recommendations of Mr. Justice W. D. Roach, who recently conducted an inquiry into the Ontario Workmen's Compensation Act (L.G., March, 1951, p. 315), a Bill to amend the Act was introduced in the Legislature on February 5.

In accordance with Mr. Justice Roach's recommendations, the amending Bill will increase the maximum yearly earnings on which workmen's compensation is based from $3,000 to $4,000. The waiting period which must elapse before compensation is payable will be reduced from seven to five working days. Mr. Justice Roach recommended a waiting period of four working days. These two amendments will be effective from January 1, 1952.

Mr. Justice Roach found that the amount allowed by the Act for burial expenses was inadequate, and his recommendation that the maximum amount payable should be increased from $125 to $200 was accepted by the Government. Where the workmen's body has to be transported a considerable distance for burial, compensation includes a further sum for the necessary expenses involved. A further amendment removes the present maximum of $125 and permits the Workmen's Compensation Board to determine the sum which may be paid. Mr. Justice Roach recommended a limit of $175. Both amendments will go into effect when the Bill becomes law.

The Bill will also increase from $100 to $200 the immediate lump sum payable, in addition to all other compensation, to a widow. No recommendations were made in the Report with regard to the matter.

During the debate on second reading, all opposition groups, while approving the provisions of the Bill as far as they went, asked for wider implementation of the Commissioner's Report especially with respect to its recommendations on accident prevention. Chief among the recommendations were that accident prevention should be brought under the direct jurisdiction of the Workmen's Compensation Board and that there should be more active participation of labour in any organized system of accident prevention. On February 23, a private member's Bill was introduced to implement the specific recommendations of Mr. Justice Roach with regard to accident prevention. This Bill was given a six months' hoist on March 7, at which time the Minister of Labour, Mr. Daley, stated that the recommendations of the Commission with regard to this matter are being studied by his Department.

Wages, prices and disputes in U.K.

During 1950, weekly rates of wages in the United Kingdom showed an increase of about 4 per cent on the average, according to the British *Ministry of Labour Gazette;* this compared with a rise of between 1½ and 2 per cent in 1949, and 4 per cent in 1948. On the basis of June, 1947=100, the index number of weekly rates of wages was 114 at the end of December, 1950, compared with 109 at the end of 1949, and 107 at the end of 1948. It is estimated that about 7,350,000 workers received an increase of about £2,020,000 a week during the year. The corresponding figures for 1949 and 1948 were 5,200,000 and £1,076,000; and 7,750,000 and £1,900,000 respectively. There was little change in the normal weekly hours of work during 1950.

The average level of retail prices, as measured by the interim index, rose by about 3 per cent during the year. This was largely due to increases in the average level of food prices, but prices of clothing and of many other articles also showed substantial increases.

Stoppages of work, arising from industrial disputes, resulted in a loss during 1950 of nearly 1,400,000 working days at establishments where the stoppages occurred. This figure was the lowest recorded since 1941. The number of workpeople involved in all disputes, viz., just over 300,000, was the lowest since 1940. The figure of workpeople involved represented about one per cent of the total population in civil employment.

Report on conditions in British mines, 1949

In 1949 the accident rate in Great Britain's mines was the lowest ever recorded. The greatest single cause continued to be "falls of ground."

The report of the Chief Inspector of Mines for 1949 shows that the number of deaths in that year was 460, compared with 468 in 1948, and that serious injuries

totalled 2,180, a reduction of 211 over the previous year. The rate of accidents per 100,000 man-shifts remained constant at the 1948 record low level of 0·25. There was, however, a corresponding decline in the number of man-shifts worked.

Of the 18 minor explosions which occurred during the year, seven were caused by illegal smoking. Haulage accidents decreased by nearly 19 per cent, "reflecting among other things, the decline in the use of rope haulage and the increasing use of locomotives and conveyors."

Twelve persons were killed and 374 injured as a result of accidents arising from the use of explosives. These figures are "unsatisfactory and wholly unjustified by mining conditions and recent developments in shot-firing and mining practices," the report states. One of the most disturbing features, it adds, is an increase of nearly 40 per cent in the number of fatal accidents on the surface, "a very unsatisfactory state of affairs which is difficult to explain and still more difficult to excuse."

Experiments made with numerous methods of dust suppression, in an attempt to prevent and arrest the development of pneumoconiosis, were carried out with evident success, but because of the time factor in the development of the disease, and the fact that the benefit of the work being done will not be reflected for some years, the report points out that no improvement in the figures of casualties will be immediately apparent.

Defence mobilization in the United States

Following the proclamation by President Truman of a "state of emergency" on December 16, a number of Government agencies were created and controls enacted.

The main feature of the program was the establishment of an Office of Defence Mobilization and the appointment of Charles E. Wilson, formerly president of General Electric, as its head. The creation of this office centralized within one government agency control over a large part of American defence mobilization, including manpower, transportation, production, procurement, and economic stabilization.

Among the agencies reporting to Mr. Wilson is the Economic Stabilization Agency, whose head is Eric A. Johnston. Responsible to Mr. Johnston is the Office of Price Administration, headed by Michael V. DeSalle, and the Wage Stabilization Board, whose chairman is Cyrus Ching.

An Office of Defence Manpower has been established within the Department of Labour. This body has the task of meeting defence and essential civilian labour requirements, including the recruiting and training of manpower. It is responsible, through the Secretary of Labour, to the Office of Defence Mobilization.

President Truman announces manpower policy

On January 17, 1951, President Truman announced a National Manpower Mobilization Policy, under which the United States Government will impose controls on military and civilian manpower "when and to the extent needed to assure successful execution of the mobilization program."

The major aims of the manpower program are to: (1) provide the needed manpower for the armed forces; (2) furnish manpower for production of materials and services required by the armed forces, international aid programs and the civilian economy; and (3) expand the supply of persons with highly developed skills essential for civilian and military activities and for the protection of civilian health and welfare.

Recruitment, placement, distribution, training and utilization of the civilian labour force will be based primarily on voluntary measures, but government controls will be instituted as needed, and will apply to employers or to workers, or to both. The federal controls will include (1) restriction of indiscriminate labour turnover through control of separations; (2) putting employment ceilings on employers with respect to the total number of workers, the number of men or the number in particular skills; (3) controlling of employer hiring; and (4) enforcing adherence to utilization standards, including full use of women, the handicapped and minority groups.

The basic principles of manpower mobilization enunciated by the President are that each individual will be expected to serve in the capacity which will contribute most to the total program, employers will assure the full utilization of the abilities and skills of each person which will best serve the country's needs, and the government will develop and administer manpower programs designed to achieve the fullest possible support for the whole mobilization plan.

Economic stabilization measures in U.S.A.

On January 26, wage and price controls were introduced in the United States. Ceilings were ordered on prices for most commodities and services on the basis of prices in effect from December 19, 1950 to January 25, 1951. A month later, however,

the program was modified by an order restricting retailers on the amount of "mark-up" allowed between cost and selling price of some 200,000 retail items. The allowed mark-up was not to exceed that in effect on February 24. The Director of Price Stabilization, Michael V. DeSalle, predicted that under the new system some retail prices would "roll forward," others would "roll back" but ultimately stabilization of prices would be ensured.

The first wage control order, issued on January 26, forbade an employer to raise wages, salaries and other forms of compensation above the levels of January 25, 1951, without the approval of the Wage Stabilization Board. In mid-February a policy was adopted by the Board to permit general wage and salary increases of 10 per cent above the levels of January 15, 1950. This policy was, however, opposed by the labour members of the Board who, on instructions of the United Labour Policy Committee (L.G., Feb., 1951, p. 158) withdrew in protest. The labour members were reported to favour a formula which would provide increases of 12 per cent above the levels prevailing in June, 1950.

The Director of Economic Stabilization, Eric Johnston, approved the Board's policy a fortnight later, but amended it so as to permit cost-of-living "escalator" clauses signed before January 25, 1951, to continue until June 30, even though they exceeded the 10 per cent limit.

Up until late March, the labour representatives on the Board were continuing in their withdrawal, and the Board had held no further meetings.

Handbook of facts on women workers in U.S.A.

Comprehensive information concerning the employment of women in the United States is contained in a bulletin published recently by the Women's Bureau of the United States Department of Labour, under the title, *1950 Handbook of Facts on Women Workers.* Designed as a source book, it brings up to date the Bureau's handbook issued two years ago.

The information is arranged in sections under the following headlines: Employment of Women; Wages, Salaries and Income; Economic Responsibilities of Women Workers; Industrial Injuries to Women; Standards of Employment of Women; Summary of State Labour Laws for Women; Legislation Affecting Household Employees; Political and Civil Status of Women; Women's Educational and Vocational Training. The bulletin also includes a selected bibliography of basic sources regarding American women, a list of women's national organizations, and a list of current publications of the Women's Bureau.

In the section on employment, statistics are given showing the number of women in gainful employment from as far back as 1870—the year when the first U.S. full census of women workers was taken—up to and including 1949. The chief occupation and industry groups employing women are shown, and such other information as the age and marital status of women workers. The Women's Bureau plans to issue the handbook biennially.

Machinists union rejoins AFL

On January 4, the International Association of Machinists whose membership is reported to be about 600,000, reaffiliated with the American Federation of Labour. The formal reaffiliation marked the culmination of negotiations between the Association Executive and the AFL, which began in December, 1948.

During December, 1950, the Association membership voted on the proposed reaffiliation recommended by the Executive and approved it by a 3½ to 1 majority.

The IAM first left the AFL in 1943, and again in 1945, because of disputes over the jurisdiction of the AFL Building Trades Department.

Belgian opinion on employment of women

The *Revue du Travail* of the Department of Labour and Social Welfare in Belgium reported in its November, 1950, issue the results of a poll of public opinion held by the University Institute of Social and Economic Information. The questions were: Do you think women should receive the same wages as men for equal work? What is the understanding of the public as to the actual application of the "equal pay for equal work" principle? Is it preferable (or is it necessary) for married women to stay at home? Should married women have the opportunity of working outside the home? Are special facilities required for married women working outside the home? What should these facilities be?

The nature of the answers led to the conclusion that there is a greater degree of interest in this question than in the subject of most inquiries. There were very few "no opinion" answers, particularly

among women, although the experience in former polls is that women are usually less definite in their opinions than men.

The majority, 77·9 per cent of the women and 59·1 per cent of the men, were in favour of "equal pay for equal work"; 78·1 per cent of the women and 64·5 per cent of the men thought that married women should have the opportunity of working outside the home either because they wished to work or from necessity. Fewer women than men thought that it was preferable (or necessary) for women to remain at home.

More women than men thought that special facilities should be provided for married women working. The special provisions generally suggested were not of the type to change working conditions, such as half-time work, changes in working hours and in the hours of store opening, but rather of the type to relieve the housewife through infant nurseries, day nurseries for school age children, and meals at school. The order of preference was as follows: infant day nurseries, 69 per cent; meals at school, 66·3 per cent; day nurseries for school-age children, 54·6 per cent; day nurseries for pre-school children, 50·4 per cent.

The report indicates how opinion on this subject differs as between age groups as well as sex, and shows that there is a tendency for opinions to differ according to family, economic and social background.

The results of the poll showed a striking contrast between the general trend of opinion and the actual situation prevailing concerning employment of women outside the home, according to the *Revue*. From the comments which accompanied the replies, the *Revue* states, it seems evident that this trend of opinion already is, or is near to being, a strong general conviction.

Fund for workers' colleges in Denmark

At a Congress of the Danish Confederation of Trade Unions held on November 27, 1950, it was decided to establish a special fund for the building of workers' colleges. This fund, will be formed by a weekly contribution from each member of the Confederation, according to the January 15 issue of *Industry and Labour*, an ILO publication.

Before the war there were two workers' colleges in Denmark. The one at Esbjerg was destroyed during the war and plans are now underway for its reconstruction. With the completion of this college, considerable money will then have to be directed toward the reparation and modernization of the college at Roskilde.

The Danish trade union movement was urged by the Confederation president to make possible the building of a third college, probably at Arhus.

(Concluded from page 440)

preceding year's figure of $7,630,000,000. The estimated total in December amounted to $703,000,000, down $30,000,000 from November, but up $61,000,000 or 9·5 per cent over December, 1949 . . . . The value of Canada's retail trade in January 1951, was estimated at $675,000,000, a rise of 20 per cent over the January total in 1950. . . . . Domestic exports to all countries in February were valued at $233,910,000 as compared with $199,462,000 in the corresponding month last year, a rise of 17 per cent. Shipments to the United States in February increased nearly 18 per cent to $152,428,000 from $128,838,000 in February, 1950. . . . . Canadian production of silver, lead and zinc increased in January this year over the same month in 1950. The month's output of primary silver amounted to 2,114,940 fine ounces as compared with 1,195,677 in January last year. Production of primary lead in the month totalled 16,099 tons, sharply above the 9,558 tons produced a year earlier. Primary zinc production amounted to 25,708 tons as against 24,028 in January last year.

NATIONAL CONFERENCE ON REHABILITATION

Recognizing the need for a co-ordinated program of rehabilitation, the Ministers of National Health and Welfare, Veterans Affairs, and Labour co-operated to sponsor the National Conference on the Rehabilitation of Handicapped Persons.

The Conference, held in Toronto, February 1-3 was attended by representatives of federal, provincial, civic, and voluntary agencies and individuals engaged in all phases of rehabilitation work.

During the three-day deliberations, the delegates heard addresses on the different phases of rehabilitation work in Canada and the United States, and adopted a resolution proposing an integrated rehabilitation program which would utilize federal, provincial and voluntary services.

The Conference recommended the appointment of a National Co-ordinating Committee, representing provincial and federal governments, and other interested agencies; and appointment of a National Co-ordinator of Rehabilitation.

In the following pages appears an account of the proceedings, and a brief introductory summary of rehabilitation work in Canada, the United States and Great Britain.

Introduction:

Rehabilitation Services in Canada

The process of rehabilitation involves three distinct factors, namely: medical care; vocational guidance, counselling, and training; and placement in satisfactory employment. There are two main problems in the carrying out of this process in Canada at present. First, there is considerable variance in the services available to the disabled in different areas and provinces, and as a result, in some sections these services are fragmentary or non-existent. The second problem is the lack of co-ordination between the different types of services presently offered. There is, at the moment, a need for the co-ordination and integration of the work of medical, guidance, counselling and placement services.

Although Canada does not have a single program available for all citizens, there are a variety of federal, provincial, and voluntary agencies which are concerned with various aspects of the problem.*

* The source of the information in this section has been *The Rehabilitation of Disabled Persons,* the data book prepared for the Conference by the Research Division, Department of National Health and Welfare.

Federal Agencies

For veterans, the Department of Veterans Affairs has a completely co-ordinated system providing medical care, vocational guidance and training. Close co-operation is maintained between the department and the Employment Service to provide proper placement in employment.

The Department of National Health and Welfare has taken an increasingly active role in rehabilitation. Under the National Health Program, money has been appropriated for aid to crippled children, tuberculosis patients, and victims of mental illness, arthritic diseases, and poliomyelitis. In addition, the Department has provided grants of money for sickness surveys in all provinces, and recently completed health surveys will give a clearer picture of available rehabilitation services and facilities.

The Department of Labour provides a vocational training program under the Canadian Vocational Training Co-ordination Act, 1942. Under the general title of Canadian Vocational Training, the Department is responsible for administering several different types of training programs. This work is done on a co-operative financial basis with the provinces. While this program is not specifically designed for disabled persons, they are eligible to participate along with others.

Through its Special Placements Division, the National Employment Service makes its services available to all handicapped workers. Employment suitable to the physical capacities of the disabled is found by the Division. In carrying out this work, the Employment Service enlists the aid of many government and private organizations.

Provincial Programs

Rehabilitation services vary considerably from province to province. Generally speaking, public health services presently existing in the provinces which would be essential to a rehabilitation program are well-developed and widely available. Provincial health and education departments already possess facilities which could be utilized for medical aid, education, and training; and the facilities of the National Employment Service are available for placement work. For those injured in industrial employment, coming under the provisions of Workmen's Compensation Acts, provincial Compensation Boards provide rehabilitation services.

There is only one province-wide general civilian rehabilitation program presently operating in Canada. Saskatchewan, through the Civilian Rehabilitation Division of its Department of Social Welfare, provides a complete program of medical and diagnostic services, medical rehabilitation, vocational guidance and training, placement, and allowances for maintenance, clothing, transportation, tuition fees and other necessities.

The provinces also provide financial assistance for the provision of medical rehabilitation services in some specific disabilities. These services are often provided in co-operation with federal and voluntary agencies. In recent years, services have been developed in connection with provincial institutions for mental illness, tuberculosis, and hospital care for poliomyelitis. The provinces also make use of the federal-provincial vocational training program.

In Saskatchewan and British Columbia, almost the entire population is covered by compulsory hospital insurance programs, and over one-third of the population of Newfoundland is covered by prepaid hospital and medical care. In many provinces, the provincial governments assist financially in providing hospital care and service to social assistance recipients, old age and blind pensioners, and those receiving mother's allowances.

Workmen's Compensation Boards

Several Provincial Workmen's Compensation Boards have set up rehabilitation programs. Notable among these are those in Ontario, British Columbia and Quebec. Possibly the best known of these programs is the one operated by the Ontario Workmen's Compensation Board at its Centre in Malton. This Centre provides complete medical, guidance, and training care from the moment the worker is injured until he is able to return to employment.

The British Columbia and Quebec Rehabilitation Centres are well equipped and provide medical care, therapy, prosthetic appliances, and (in co-operation with the Employment Service) placement services.

In provinces having no rehabilitation centres, facilities available in general hospitals and Department of Veterans Affairs hospitals may be utilized, and if necessary, the injured workman may be sent outside the province for treatment and rehabilitation services. Alberta has established a reserve fund under its Workmen's Compensation Act, which is used to assist in retraining disabled workmen. The fund allows for payment of the cost of the course, and an allowance during the training period. The Saskatchewan Department of Social Welfare maintains a Rehabilitation Branch to which special

cases are referred for counselling, training and placement. The Workmen's Compensation Board assumes financial responsibility for these cases.

Compensation Boards in other provinces arrange for training and placement through provincial Canadian Vocational Training Courses and the Special Placements Division. Nova Scotia, Quebec, Ontario, Alberta, and British Columbia have established industrial health divisions in their departments of health, which act as consultants and advisers to the Compensation Boards.

Voluntary Agencies

The work of existing voluntary agencies has generally been of a very high level. The data book, issued for the Rehabilitation Conference, commenting on the work of these agencies said: "Complementing and supporting government effort, the network of voluntary agencies provides a wide range of services that touch on all aspects of the rehabilitation."

These voluntary agencies have played a varied role in rehabilitation work. There are the nationally organized groups organized to look after certain types of disability such as blindness, arthritis, poliomyelitis and tuberculosis. Local organizations, such as the Toronto Society for Crippled Civilians and the Windsor Curative Workshop are actively engaged in helping the disabled lead productive lives. Supplementing this work, both locally and nationally, is the work of service clubs, religious groups, and mutual self-help organizations, founded by the handicapped themselves.

Rehabilitation in the United States

The United States has several programs providing rehabilitation services. Many state, federal, and voluntary organizations provide these services. There is, however, a much greater degree of co-ordination of services than in Canada, and there has been some form of federal-state vocational rehabilitation program in existence since 1920. The plan operated by the Federal Office of Vocational Rehabilitation in close conjunction with state agencies is typical. The program is jointly financed by federal grants-in-aid and state contributions.

Under the plan now in operation, the Office of Vocational Rehabilitation, which was set up under the provisions of Public Bill 113 (The Barden-La Follette Act) in 1943, is a part of the Federal Security Agency.

The Office is responsible for the approval of state plans, certification of grants-in-aid, and for providing "leadership and technical assistance to the state offices to stimulate the establishment of adequate facilities and services." One important function performed by this federal agency is that of research and investigation, the results of which are made available to the state agencies.

State agencies have as their primary function and responsibility, the development of the vocational rehabilitation program. The essential state functions are directly related to the provision of services to the disabled individual. This includes case findings, the development of co-operation with other agencies, medical and vocational diagnosis, and other aspects of successful rehabilitation.

In addition to the federal-state program described above, there is the work of advisory bodies, the Veterans' Administration, federal and state health departments, education departments, and the many volunteer and private agencies interested in rehabilitation.

Rehabilitation in Great Britain

Great Britain, unlike Canada and the United States, is not a federal state, and the constitutional problems of creating an over-all system have not been so great. The basis for the British program is the Disabled Persons (Employment) Act of 1944. The program "attempts to cover the total needs of all disabled citizens, regardless of age, origin and type of disability, or war services requirements."

The ultimate end of all rehabilitation efforts is successful placement in satisfactory employment. No one is completely or successfully rehabilitated until they have once more resumed their place in the economic life of the community. Shown in the picture on the opposite page: a blind stenographer copying from braille; an instructress teaching a deaf-mute trainee the proper way to hem a towel; a blind worker assembling motor switches in a washing machine factory; a crippled worker rests his cane on his work bench; a paraplegic working in a large sporting goods firm; workers manufacturing ironing boards in a disabled civilians' workshop; a former pulpman, who lost an arm, shows how he successfully handles a new job in a lumberyard; and an amputee fitting a drawer into a chest he is making.

Between World War I and World War II, medical rehabilitation in Britain declined, but the need for improved methods and services was soon realized during World War II. In the post-war period, these services have grown and developed extensively. The British rehabilitation scheme has become an integral part of the social security system set up under the National Health Service Act (1946), The National Insurance Act (1946), and the National Assistance Act (1948). This rehabilitation program, based on several different statutes, is administered through several government departments, local authorities, and voluntary agencies. The plan provides for all phases of rehabilitation; medical care, counselling, guidance, the provision of prosthetic devices where necessary, and placement. In addition a scheme of disability benefits is provided.

One feature of the British system not found in either Canada or the United States, is the provision in the Disabled Persons (Employment) Act, which invokes a statutory obligation on employers of 20 or more workers to employ a quota of disabled persons from the employment register. The quota is fixed by the Minister of Labour and National Service in consultation with worker and employer representatives. He is also empowered to designate certain classes of employment for the exclusive reservation of vacancies to registered disabled persons.

Background of the Conference

The first Conference in Canada on the Vocational Rehabilitation of the Physically Handicapped was held in Toronto in September, 1943. This Conference, convened by the Employment Service and Unemployment Insurance Branch of the Department of Labour, was called for two major purposes. First, it was hoped that public attention would be focused on the contribution which the handicapped were making to Canada's war effort; and secondly it was hoped "to demonstrate the need for a program of civilian rehabilitation in Canada." A resolution passed by the Conference said in part:—

> This Conference respectfully urges that consideration be given to the development of both a comprehensive plan and actual facilities at the earliest possible moment in order that the needs of the handicapped may be more adequately met and the interest and co-operation of employers may be stimulated and broadened.

A series of meetings was also held in principal cities all across Canada, with the idea of promoting the placement in suitable employment of the handicapped, and at the same time, to look further into the need for rehabilitation facilities. Following a meeting held in Vancouver, the Council for the Guidance of the Handicapped was formed. The primary aim of this Council has been "to urge upon the Government of Canada the need for constructive legislation to assist the handicapped."

In 1946, the Council sponsored a conference in Vancouver attended by many interested individuals and organizations, including Canadian and American government officials. At this time a strong resolution was passed urging that a national conference be held as soon as possible. In August, 1947, an Order in Council was passed which recommended:—

> That a National Conference of three days duration be held in Ottawa during the month of October, 1947, under the auspices of the Department of Labour, to consider the vocational rehabilitation of the physically handicapped, said conference to be attended by delegates representing national, provincial, and local organizations working on behalf of the physically handicapped as well as representatives of the Dominion and Provincial Governments, and any other specialists in the field whose attendance may be deemed necessary . . .

It was not found possible to hold the conference at this time, and plans were formulated to hold a national conference, jointly sponsored by the Departments of National Health and Welfare, Veterans Affairs, and Labour, at a later date. It was decided that this conference would consider not only the vocational aspects of rehabilitation, but the physical, mental, social and economic factors as well. The conference was originally scheduled to be held in May, 1950 but was postponed because of the Winnipeg floods, and was held in Toronto, February 1-3, 1951.

Proceedings of the Conference

Sponsored by the Hon. Paul Martin, Minister of Health and Welfare, the Hon. Hugues Lapointe, Minister of Veterans Affairs, and the Hon. Milton F. Gregg, V.C., Minister of Labour, the National Conference on Rehabilitation of the Handicapped was held in Toronto, February 1-3. The Conference was attended by over 150 representatives of federal, provincial and voluntary agencies, as well as individuals interested in the rehabilitation problem in Canada.

The Conference opened with a plenary session during which a series of speakers described the work at present being done in various fields related to rehabilitation, and the needs that exist.

Subsequently, two working committees were set up, to formulate recommendations in regard to (*a*) medical rehabilitation, and (*b*) vocational guidance, training and placement.

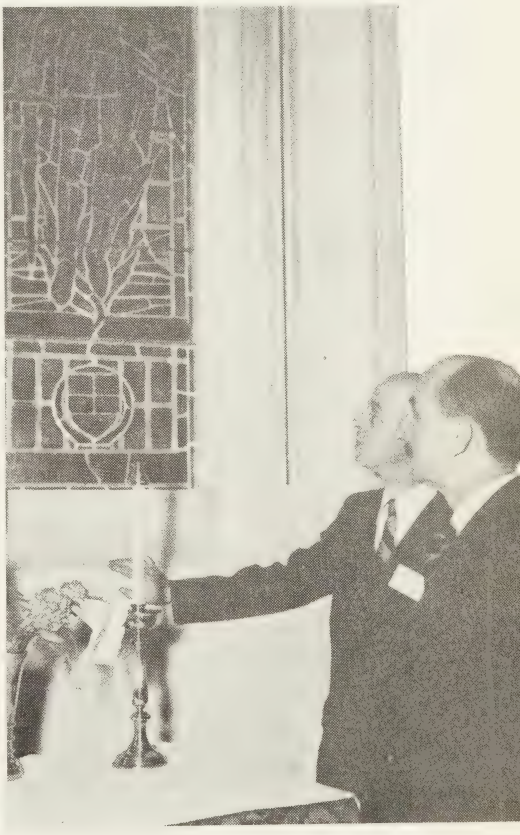
The reports of these Committees were later adopted by the Conference in plenary session.

The final Conference resolutions were forwarded to the Federal Government for consideration.

Hon. Milton F. Gregg acted as Conference president. Mr. A. MacNamara, Dr. G. D. Cameron, Dr. G. F. Davidson and Mr. E. L. M. Burns, Deputy Ministers of the sponsoring departments, acted as chairmen of the plenary sessions of the Conference.

Among the highlights of the Conference, was the screening of a film "The Road Back", which showed rehabilitation work being done in the United States. Another feature, was a tour of Sunnybrook Military Hospital.

Following this tour, the final plenary session of the Conference was held in the hospital auditorium, and it was here that the recommendations of the working committees were presented and discussed.



In addition to the speakers whose addresses are summarized below, Controller John M. Innes, representing Mayor Hiram MacCallum, welcomed the Conference to Toronto. Mr. E. A. Baker, Manager of the Canadian National Institute for the Blind, spoke on "The Place of Civilian Rehabilitation in Canada's Social Security Program" at a luncheon held on the opening day.

Mr. A. MacNamara, Deputy Minister of Labour

In opening the Conference, Mr. MacNamara placed the problem of rehabilitation in the perspective of the present world struggle between two great political-social forces. He urged the need "to make our way of life stand out above the other, to emphasize that at the top *we* place humanity." One way of doing this is to realize the special problems faced by the handicapped. We must consider the ways in which medical assistance, both mental and physical, can be utilized to solve these problems, Mr. MacNamara said. Parallel to this, we must explore employment possibilities for the rehabilitated.

A successful rehabilitation plan is important to the handicapped person, industry, and the nation as a whole. "Let us get clearly in our mind that the handicapped person is not a useless person. We learned during World War II quite the contrary. Many sightless and otherwise physically handicapped persons did excellent work in our war plants," Mr. MacNamara said.

Between 1945 and 1950, the National Employment Service, through its Special Placements Division and in conjunction with other agencies, found 80,000 jobs for handicapped persons. Mr. MacNamara pointed out that we are in a period of high employment, and any large increases in the working force needed to increase

Hon. Milton F. Gregg, Minister of Labour, and Mr. H. C. Hudson, Supervisor of Special Placements for the National Employment Service, examine the memorial window in the chapel at Sunnybrook Military Hospital, Toronto. The picture was taken during a tour of the hospital by delegates to the Conference.

production would necessitate utilizing the productive abilities of older workers, women, and the handicapped.

Turning to the achievements already accomplished by federal, provincial and private agencies in the rehabilitation field, Mr. MacNamara said that "it would not be fair . . . to leave an impression that we are starting out on this Conference to plan doing something new." He stressed the fact that the Conference would serve to emphasize what has been done, and point up those gaps still remaining.

Hon. Milton F. Gregg, Minister of Labour

The Hon. Mr. Gregg, on behalf of the Government of Canada, extended an official welcome to all those present. Mr. Gregg pointed out that circumstances had prevented the Conference meeting when originally planned, and paid tribute to the efforts of the late Hon. Humphrey Mitchell in participating in the early Conference arrangements.

Mr. Gregg said that while there were great dangers in the present situation which might lead some to say that "we should . . . postpone this Conference," he felt it was important to hold the Conference because if it were to wait "until all is peace and perfect harmony in the world," it would never be held.

There were many present at the Conference, "who in spite of handicaps have equipped themselves to perform in splendid fashion, tasks that are of prime importance to the welfare of Canada," Mr. Gregg said. Many disabled Canadians have had to undertake their own rehabilitation; others have received help from voluntary organizations; and still others have benefited from provincial compensation schemes, and the federal rehabilitation program for veterans, he said.

Mr. Gregg pointed out, however, that Canada still lacked an over-all co-ordinated scheme of rehabilitation. He said:—

> There is no co-ordinated plan in effect in Canada today for the benefit of those who have a handicap brought about by some event not connected with industry or with war service. In saying this I know of the work that has been started by one or two of the provinces, and also that carried out by certain voluntary agencies. Valuable as those efforts are, there is still a great gap to be filled. . . .
>
> There are thousands of our citizens who, because of their handicaps are now unemployed or under-employed because they are believed to be incapable of self-sustaining employment. As they are at present equipped the things they can do are so limited that attempts on their part alone to get work usually fail, or at best provide something quite inadequate. It is this latter group that we are chiefly concerned about this week . . .
>
> I wish to say a special word to those here from the voluntary agencies. I congratulate you upon your pioneer work. Whatever may come from this or later conferences I hope that one result will be the strengthening of your hands in this work, and the encouragement of those who support your agencies.

Mr. Gregg listed four factors as being of primary importance in a rehabilitation program. These are:—

> The removal or reduction of the disabilities, and a clear appraisal of existing or potential abilities;
>
> The provision of vocational guidance and training and individual attention to all factors related to the approach to the new employment;
>
> The promotion of employers' acceptance of handicapped as efficient workers until they have had ample time to prove their value;
>
> The encouragement of the spirit of independence of the handicapped, the discouragement of evidence of pity amongst their associates; and the realization that individual interest and human understanding are all important.

Hon. Leslie Frost, Premier of Ontario

The Hon. Leslie Frost, Premier of Ontario, welcomed the Conference to Toronto on behalf of the Province of Ontario. Premier Frost extended "the fullest co-operation of the Government of Ontario and all its departments" in the effort to establish a comprehensive program of rehabilitation.

Premier Frost emphasized the fact that experience in other countries has proven that the cost of successfully rehabilitating a disabled person is no more than that for one year of welfare care. Mentioning the work of the Ontario Workmen's Compensation Board at its Malton centre, he said that between three and four hundred injured workers were rehabilitated there each year. In 1947, only fifteen cases needed extra welfare care, Mr. Frost said.

Turning to the problem of the mentally afflicted Mr. Frost suggested that the time has come for a new approach. We must, he said, stress the rehabilitation and prevention function rather than the custodial and hospitalization function as at present. He said that the emphasis should be placed on keeping people out of mental institutions, rather than merely providing hospitals to look after them after they had become ill.

Hon. Paul Martin, Minister of National Health and Welfare

Stressing the complexity and importance of the disability problem, Mr. Martin told the Conference: "There are many types of disability—mental and social as well as physical. As a consequence, there must be a variety of rehabilitation services." The great need at present, Mr. Martin said, was for the integration and co-ordination of these services.

The results of a recent sickness survey conducted by his department, indicate that there are almost 900,000 people in Canada with some form of "permanent or extended disability," Mr. Martin said. However, many of these people do not require rehabilitation.

Mr. Martin reviewed the extent of existing rehabilitation programs. He said that despite the lack of a single over-all system, "some of the individual programs are outstanding in their way." At the provincial level, Workmen's Compensation Boards have made great progress in helping injured workmen. Mr. Martin also paid tribute to the voluntary agencies engaged in this type of work.

Mr. Martin suggested that the greatest need at present is for co-ordination. He said:—

> If we are to find a better solution of our rehabilitation problem, we must bring into clearer focus the whole picture of what now is being done. In this field of welfare action more perhaps than in any other, there is need for co-ordination of many disciplines and agencies. Through the multi-disciplined approach of specially-trained physicians, physio-therapists, experts in vocational guidance, special employment officers, and others making up the rehabilitation team, the best hope for success lies in unified action.
>
> I suggest that the most useful accomplishment of this Conference would be to encourage the integration and co-ordination of existing services in order to ensure that the considerable moneys now being expended for Canada's disabled are used to best effect. We might find some way in which to bring existing programs and personnel and services into a closer working relationship. At the same time, we might also correlate our planning so that our rehabilitation programs can achieve maximum coverage and effectiveness.
>
> It would, of course, be not only cumbersome and inefficient but a complete negation of the whole Canadian tradition to attempt to centralize rehabilitation services in Ottawa. We need the active participation of provincial governments, which, constitutionally, are more directly charged with this responsibility. We need the intimate knowledge of local conditions possessed by government at the community level. Above all, we need the inspired service of the voluntary agencies, which so often give leadership in this field by setting up pilot rehabilitation projects that, having proved their effectiveness, are then more widely developed on either the voluntary or governmental level.

Discussing the rehabilitation process, Mr. Martin emphasized that it must be viewed in its broadest terms. It should not be regarded as a series of isolated events, but as a planned and continuous procedure. Restoring the disabled individual to his place in society very often requires prolonged care. Mr. Martin described this process as "a complete physical, mental and even spiritual restoration of the individual to an effective, useful, and satisfying life."

A program such as this will require public education, Mr. Martin said. Public attitudes toward the disabled are most important, and it is essential that we adopt and use a sympathetic and intelligent approach to their problems.

Hon. Hugues Lapointe, Minister of Veterans Affairs

The Department of Veterans Affairs has both a legal and moral responsibility to reduce the disabilities of veterans to an absolute minimum, Mr. Lapointe said. The department strives "to assist the veteran to the full extent of our authority and our ability, to return to a life where he can be self-supporting—where he can make a contribution to the national economy."

Mr. Lapointe outlined the procedure developed by DVA in caring for disabled veterans. The keystone of this program is the restoration of the veteran's physical ability to the greatest extent possible. One important factor in the DVA program, has been the realization that teamwork is essential if rehabilitation is to be effective and successful. When the patient has shown sufficient physical improvement, the doctors, and the other members of the rehabilitation team, plan a program of training. This training "must be objective and directed towards an occupational goal," Mr. Lapointe said.

Outlining the procedure further, the Minister said:—

> Accordingly we have a program of planned training which starts in our treatment institutions. Courses must of necessity be selected with the co-operation of a vocational counsellor, because the ultimate target must always be productive, remunerative employment. These courses may be taken by correspondence. We may use special texts developed during World War II by the Canadian Legion, but always available is a tutor to help the veteran with the more difficult problems, and to keep his interest high.
>
> When the patient becomes mobile, we have even been able to arrange courses where he studies along with others.

The progress made during the hospitalized period has frequently been amazing, but this is not surprising. These veterans are people of maturity. They know they will have a residual handicap to overcome. The result is that they take this preliminary training seriously.

In many cases, of course, the veteran is ready for employment almost immediately upon discharge from hospital. In others, further training is required. When this is indicated it is arranged on our system of allowances and with fees paid.

I have not mentioned as yet another important member of the team. This is the casualty officer, whose responsibility it is to follow the veteran through his planning period into ultimate employment. He is indeed a most important member of the group, for it is he who makes sure that the training course will lead to employment. It is he who contacts employers and explains the disability which the veteran must overcome.

Despite the fact that the financial worries of the veteran patient are at a minimum during his treatment, the Department of Veterans Affairs has found that there are often other personal factors which may impede recovery. Mr. Lapointe said that it has been found advisable to add a medical-social worker to the team of experts to help with these problems of adjustment.

Praising the general desire of veterans to help themselves, Mr. Lapointe quoted some figures to illustrate the success of this program. He said that 35,700 veterans have registered with the Casualty Rehabilitation Section of DVA. This figure is not the total of all disabled veterans, since pensions are paid to about 95,000 World War II veterans, and some 66,000 from World War I. The majority of these pensioners suffer from disabilities of 20 per cent or less, but some 16,000 have been assessed at 80 per cent or more. Those registered with the Casualty Rehabilitation Section need special service to assist them in returning to a productive peacetime life.

Of the 35,700 registered, only 1,249 of those ready to work and desiring to work are unemployed. Nearly 28,000 have steady employment, although 4,000 of these are still receiving treatment or training, Mr. Lapointe said. There is a small group whose rehabilitation is not considered feasible for a variety of reasons. However, of the 16,000 veterans having 80 per cent or more disability, only 1,500 or less than 10 per cent are not gainfully employed.

Mr. Lapointe urged the delegates to remember that "a physical impairment does not necessarily mean a lowering in the economic position of the one who suffers it. In fact, our experience is directly to the contrary. Our figures show, that 40 per cent of those veterans who have suffered a physical disability, are actually in better positions today than when the impairment occurred. Training has played a part in many cases, but one essential must always be considerate employers, prepared to give a disabled applicant an opportunity to demonstrate that it is not what a man has lost that counts, but what he still has."

Keynote Speech
Dr. W. P. Warner

Dr. W. P. Warner, Director General of Treatment Services, Department of Veterans Affairs, delivered the Conference keynote address. He said that the keynote of any rehabilitation program is adequate medical care, applied through the various stages of rehabilitation.

There are two very important reasons for Canada to establish a rehabilitation program at this time, Dr. Warner said. Canada is facing a possible manpower shortage, and the successful rehabilitation of disabled citizens would provide untapped sources of manpower. Secondly, Dr. Warner noted the problem of geriatrics. Despite a lowered death rate, and increased life span, science has not done everything possible to alleviate the diseases of the older-aged, and to help these people live happy and productive lives.

In establishing a rehabilitation program, Dr. Warner said that the handicapped person must be the focal point of the plan. The doctor must evaluate and develop whatever assets the patient has left and then proceed with the job of rehabilitation. He should seek the advice of other specialists, and with them attempt to make the patient as physically fit as possible. In nine out of ten cases at present this is not being done. Dr. Warner said that the principle has not been firmly grasped that the medical function continues in all stages of rehabilitation, and is a never-ending process. Files on disabled persons should never be closed, he stressed, and periodic check-ups by the doctor and the other members of the team are essential to success.

Stressing the need for teamwork by all those engaged in rehabilitation work, Dr. Warner said that co-operation is essential from the active treatment phase to final placement in employment. He suggested that at present, only a small percentage of doctors are rehabilitation minded.

Turning to the problem of necessary personnel for the operation of any rehabilitation program, Dr. Warner said that it

was important to make maximum use of part-time employees in voluntary agencies. He also felt it would be cheaper and more efficient not to have too many full-time employees paid by governments. In the medical field, he recommended the maximum use of doctors on a part-time, fee-for-service basis. Any rehabilitation program should be closely associated with the colleges, Dr. Warner said. At present there is a need for people with post-graduate university training in rehabilitation work, and the universities would have a beneficial effect on the program and provide useful service.

There are two minimum steps which should be taken now, Dr. Warner felt. Rehabilitation sections should be set up in active treatment hospitals; and community rehabilitation centres established. These community centres could serve to co-ordinate rehabilitation work in the community, and to direct patients to specialists. They could also maintain continuing records, and provide necessary follow-up and checks, Dr. Warner said. In conjunction with these activities, an education program aimed at industry could be conducted. This program could begin on a relatively simple level, he said.

From his remarks, Dr. Warner drew three basic conclusions:—

1. Medical rehabilitation is the cornerstone of any rehabilitation program.
2. Teamwork is one of the essentials of such a program if it is to be successful.
3. The maximum utilization of part-time help in voluntary agencies will be a necessary adjunct of the program.

In a brief discussion which followed Dr. Warner's address, Dr. J. P. Meakins suggested that it is necessary to drop the idea of building more and more convalescent homes. He stressed the value of a dynamic approach aimed at restoring the disabled to useful lives as soon as possible. To do this, it is necessary to begin the rehabilitation process as soon as possible. Dr. Meakins also urged that greater attention be paid to utilizing preventive medicine in regard to the problems of the ageing process. He said that if some objective were found for these people, many of the economic and social hazards of ageing would be eliminated.

Special Placement of Handicapped Persons
Mr. H. C. Hudson

Mr. H. C. Hudson, Supervisor of Special Placements of the National Employment Service, Unemployment Insurance Commission, spoke on the work of the Employment Service in placing handicapped workers.* "During the past five years, it has been proven definitely that the disabled can compete in normal labour markets and work with full efficiency, without endangering their own safety or that of others, and with profit not only to the disabled person but to the employer and the community alike," Mr. Hudson said.

In special placement work there are two main points to be kept in mind:—

1. the individual must be considered as an individual in relation to the demands of individual job requirements;
2. emphasis must be placed on the individual's abilities and not on his disabilities.

There are at present three main placement services available to disabled persons seeking employment in Canada. These are the field staffs of Workmen's Compensation Boards; voluntary agencies working on behalf of groups with specific handicaps; and the National Employment Service. Mr. Hudson said that experience gained by these agencies has shown that "on the average, the injured workman can be placed in employment at wages equal to, or even higher than his earnings prior to the accident which caused his disability."

Mr. Hudson, describing the close liaison which the Employment Service maintained with other groups interested in the successful placement of the handicapped said, ". . . these organizations give tangible assistance in providing disabled persons with counselling, with prosthetic appliances and not infrequently, with actual opportunities for employment. They also render an invaluable service in keeping the problem of the placement of the handicapped prominently before the community as a whole, and in this way render a most useful service in the field of public relations."

The National Employment Service has the widest geographical coverage. "In the field of placement of the handicapped," Mr. Hudson told the Conference, Special Placements Officers confine their activities to those persons, "who, on account of injury or disease of a character which is likely to last for more than six months, or on account of congenital condition, are substantially handicapped in obtaining or keeping employment of a kind generally suited to their age, previous experience, and qualifications."

Mr. Hudson said that in choosing Special Placements Officers, every effort is made to choose people who have a genuine interest

* For a detailed account of N.E.S. work see L. G. June 1950, pp. 801-806.

Vocational training plays an important part in the rehabilitation of disabled veterans at Sunnybrook Military Hospital in Toronto. Delegates to the National Conference on Rehabilitation, are shown above, inspecting the work of one of the patients.

in the problems facing the disabled. Training for this work, is a combination of formal and on-the-job training. These officers are also encouraged to maintain a close working alliance "with all agencies in the community . . . engaged in any phase of rehabilitation work." In particular, close co-operation is maintained with the Department of Veterans Affairs; and of 11,382 placements of handicapped in 1949, approximately one-half were disabled veterans, the speaker said.

There are still gaps to be filled in the Employment Service, Mr. Hudson said. Outlining these gaps he said: "in the five provinces bordering on the Atlantic and Pacific oceans, we have at present less than two dozen men and women engaged in what we call Special Placements activities, and some of these officers have responsibilities towards entry applicants as well as the placement of the handicapped. As a matter of fact in the whole of Canada, although there are 181 offices in the entire employment chain, only 32 offices now have full time special placements staff. This specialized service should, accordingly, be expanded to possibly 75 other offices in smaller centres."

Mr. Hudson stressed several factors important to effective placement of the handicapped. The placement officer must first have a thorough understanding of the applicant's training, background, and physical capacities; handicapped persons must then be approached on an individual basis, and once the placement is made, continuous follow-up must be maintained. He pointed out the difficulty of laying down any specific rules as to the frequency of follow-up visits, but suggested two to three visits in subsequent months to see that the employee is satisfied, and that the man is well adjusted to his job. In closing, Mr. Hudson said that there must be more training facilities provided for rehabilitation workers.

Vocational Guidance and Counselling and the Training Process

Mr. Edward Dunlop

Mr. Edward Dunlop, Executive Secretary of the Canadian Arthritis and Rheumatism Society, spoke on the various phases of guidance, counselling, and training of the handicapped. He defined vocational guidance as a process of assisting the disabled to choose, prepare for and successfully enter employment fields. The guidance worker must not attempt to tell people what they should do, Mr. Dunlop said; but rather attempt to help the disabled reach a sound decision as to their vocational objective.

Vocational training must be part of any plan for the attainment of a suitable job objective. Mr. Dunlop said that many of the facilities presently existing could be used for this purpose. For example, DVA has made use of existing training schools, with little change or modification. However, while these facilities were available for rehabilitation work, they were of little use if not fully utilized, Mr. Dunlop said. He suggested that the provision of living and other allowances would increase the use made of them for this purpose.

"We may safely assume that between 100,000 and 150,000 disabled Canadians need rehabilitation," the speaker said. Canada needs a rehabilitation program and the opportunity for emancipation from the effects of injury should be regarded as "a fundamental right of citizenship," Mr. Dunlop told the Conference.

In his own opinion, surveys could not adequately establish the extent to which rehabilitatoin services are a need, Mr. Dunlop said. He proposed that the specifications of a minimum standard of services be decided upon, and that all interested groups, federal, provincial, and voluntary, should participate. ". . . I suggest the adoption of a frankly empirical approach. On the basis of a reasoned estimate of the numbers requiring service, the necessary rehabilitation facilities should be created . . . On this empirical basis, I suggest that provision be made at the outset sufficient for the rehabilitation of 15,000 disabled Canadians annually," Mr. Dunlop said.

The basic unit in such a program would be a provincial rehabilitation agency, authorized to provide all phases of a rehabilitation program. Mr. Dunlop said "constitutional considerations dictate, and practical considerations make it desirable, that the agency providing the basic rehabilitation services be operated by provincial governments." However, federal participation was essential to the success of such a plan, he said, and he recommended grants-in-aid, and conditional grants, as the best form of federal help.

Guidance would be closely related to all phases of the program. While there is a lack of trained guidance personnel, Mr. Dunlop warned that this lack should not be allowed to retard the program. Much of this personnel training could be performed on the job, he said.

Mr. E. J. Taylor

Mr. E. J. Taylor, of the staff of the *New York Times*, and Instructor in Physical Medicine and Rehabilitation at New York University, addressed the dinner meeting of the Conference. The Hon. Paul Martin welcomed the speaker to the Conference and briefly described Mr. Taylor's experience in the rehabilitation field. Mr. Martin said he felt the Conference had been a success and would produce notable results. All the eleven governments and the voluntary organizations would have responsibilities in any program formulated by the delegates, Mr. Martin said.

Mr. Taylor opened his remarks by calling attention to the current state of world affairs. It is necessary that the free countries remain strong, he said. One of the most important weapons in building a strong, free world would be the production potential of the United States. Manpower would therefore assume a role of increasing importance, and even now the United States' manpower situation was tightening, Mr. Taylor said. The United States would have to balance any manpower superiority possessed by a potential enemy with superior productive capacity.

As the available supply of manpower becomes more limited, there are three ancillary sources which could be utilized, he said. These are women, older workers, and the disabled. The greatest possible utilization of these sources is of utmost importance, the speaker said.

Praising the work of women who had come out of their homes to engage in war work during World War II, Mr. Taylor said the present situation was different. An actual state of war existed at that time, and the crisis was not in the nature of a long and uncertain cold war. Mr. Taylor stressed that it would not be right to take women out of their homes for a long unspecified time. It will be necessary he said to utilize the abilities of older workers and the disabled to a greater extent.

Mr. Taylor said that from the industrial viewpoint, few people are completely fit physically. Less than ten per cent of the working force are physically able to per-

form all types of work, and in addition, at least ten per cent have some impairments. A study recently made in Sweden indicated that there is actually some type of work within the abilities of practically everyone, he said.

It is impossible to know how many disabled there are in the United States, Mr. Taylor said, because it is not possible to define what handicap is. The only method of estimating the number of disabled is by sampling. Estimating that there were about 28 million people in the United States possessing some form of chronic disability, Mr. Taylor said that probably 2 to 3 million of these required specialized rehabilitation services.

Mr. Taylor mentioned some essential factors which must be borne in mind with regard to the disabled. These are:—

Physical disability is not an impairment if there is correct placement;

The overcompensated skills possessed by the disabled help to even up any differences between handicapped and non-handicapped;

The handicapped have the advantage of greater motivation in attaining their objective.

Better placement is essential.

Rehabilitation is essentially an effort to provide training and help, so that the disabled person can live as effectively as possible with the abilities that he has left, Mr. Taylor said. He urged that people consider the ability rather than the disability.

Doctors in the field of physical medicine have become greatly interested in rehabilitation, especially as a result of the work done with veterans, Mr. Taylor said. The medical profession is now treating each of these people as an individual problem. One very good feature of this new interest has been the increase in training facilities for doctors in the field of physical medicine. There are now 15 or 16 American medical schools giving training in this field, as compared to only 3 a few years ago. Mr. Taylor stressed that medicine is the key to the problem of rehabilitation.

Noting that age levels were becoming higher as medicine and science advanced, he said that chronic disabilities also increase as the death rate decreases, and thus a rehabilitation program becomes more essential.

Closing his remarks, Mr. Taylor said that while adequate physical facilities are necessary, we should make greater efforts in rebuilding the abilities of people. Institutions, he said, are not needed as much as good rehabilitation.

Decisions of the Conference

Working Committees

Following the opening speeches, the Conference was divided into two working committees. The committee on "Medical Rehabilitation in Canada" was under the chairmanship of Dr. J. P. Meakins, representing the Association of Canadian Universities. The second committee, on "Vocational Guidance, Training and Placement," was under the chairmanship of Dr. G. Fred McNally, representing the National Advisory Council of Vocational Education.

The reports of these two committees were subsequently adopted by the Conference in plenary session. Together with a few other resolutions approved by the Conference, they constitute a record of the views of the delegates as to the setting up of a rehabilitation program in Canada.

Summary of Conference Decisions

The Conference recommended the establishment of a civilian rehabilitation program, which would provide services comparable to those now received by veterans. This program would be a co-ordinated undertaking of all governments and voluntary agencies.

To provide the necessary degree of co-ordination and integration of services it was recommended that a National Advisory Committee be set up, and that the Federal Government appoint a National Co-ordinator of Rehabilitation. The duties of the proposed Co-ordinator would include those of secretary to the Committee, and general administrative functions in connection with its operation.

A resolution of the Vocational Guidance Committee recommended that government, labour and employer organizations, encourage the practice, adopted by some employees, of providing jobs for the handicapped. It was further suggested that more widespread training programs for the handicapped be instituted.

The Conference also recommended that the definition of medical rehabilitation should include "all physical and psychological factors which contribute to the restoration of the individual." The Medical

Committee resolutions defined in detail the role the physician should play in any rehabilitation program, and described the necessary facilities and training required for such a program.

Report of the Committee on Vocational Guidance

The report of the Vocational Guidance, Training and Placement Committee was presented by Dr. McNally, the Committee Chairman. The Conference adopted the report as a resolution. The resolution said:—

1. Feeling that the need is evident, this Conference wishes to record its conviction that there should be established forthwith a Canadian Rehabilitation Program for Handicapped Citizens, to be as adequate to the need as is the program of the Federal Government in the interests of the veterans.

2. The Conference recommends that in the establishment of such a Canadian Rehabilitation Program, the following principles to be observed:

(I) That the close co-ordination of effort through the Federal and Provincial Governments, as well as the efforts of all voluntary and private organizations interested, be enlisted in the program;

(II) That throughout there be recognized the necessity for integration and close co-ordination of the several phases of rehabilitation - medical care, vocational guidance and counselling and employment placement;

(III) That the practice of some employers, of making special efforts to accommodate handicapped persons within their employ in suitable positions, be strongly endorsed; and that by bringing this matter to the attention of government agencies, employers' and workers' organizations, an effort be made to encourage all industry to give careful and sympathetic consideration to the fitting of handicapped workers into employment vacancies suitable to their abilities and needs;

(IV) That the recommendations of the International Labour Conference on Vocational Training (1950) quoted on page IV-58 *et seq.* of the volume "Background Data for the National Conference on Rehabilitation" be endorsed, and as well, the recommendations under the Montreal Plan, appearing at page V-11 *et seq.* of the same volume;

(V) That Canada should declare each year one week to be "Employ the Physically Handicapped Week", with the dates to coincide with those of a similar week adopted in the United States, in order to focus public attention on the possibilities of employment of the handicapped;

(VI) That, recognizing the great worth of all measures to obviate accident and diseases, public attention should be called from time to time to the importance of the work being performed by those agencies or organizations having for their objective the prevention of accidents or the promotion of sound health.

3. Having regard to the administrative necessities of inaugurating and prosecuting a program as now endorsed the Conference recommends:

(1) That efforts be made to effect agreement between the federal and provincial authorities, to the end that it shall be possible for handicapped persons to obtain such training as may appear appropriate and suitable, and that adequate allowances may be available to handicapped trainees during training;

(II) That the Federal Government be requested to study the present adequacy of personnel and physical arrangements for interviewing and placing handicapped workers through the National Employment Service, with a view to ensuring that personnel shall be trained especially for their exacting duties, and that each local office, where the need be indicated, shall offer appropriate placement facilities for the handicapped;

(III) That all staff members associated with the Rehabilitation Program shall receive appropriate and adequate training;

(IV) That the formation of Provincial and Community Councils, to coordinate rehabilitation activities within the respective area, be given every encouragement;

(V) That the Government be requested to make available a sufficient number of copies of the volume of "Background Data", in order that copies may be provided to interested organizations in reasonable quantities, as the book contains very valuable material.

Report of the Committee on Medical Rehabilitation

The Committee on Medical Rehabilitation presented two reports to the Conference for its consideration. The first was a report of a medical sub-committee and the second the main report of the Committee itself, including resolutions. The Committee was of the opinion that it was necessary and advisable to pronounce general principles or concepts which should, in part at least, govern a rehabilitation program and in particular the medical side of such a program. The medical sub-committee of this Committee, made up of Doctors E. H. Botterell, Hoyle T. Campbell, Campbell Gardner, F. D. Mott, and K. C. Charron, arranged certain principles and concepts which were submitted as a report to the Committee on Medical Rehabilitation.

An agenda prepared for the use of the Medical Committee contained several defi-

nitions and ideas for the committee's use. Rehabilitation was defined as the restoration to a former capacity. This would be achieved by a process described as "the inter-relation of services needed for the successful establishment of disabled persons . . . which is to develop and restore the disabled individual to the fullest physical, mental, psychosocial, vocational and economic usefulness of which he is capable, within the restrictions inherent in his environment."

Report of Medical Sub-committee

The sub-committee believes that two of the absolute essentials of rehabilitation are:—

(1) The patient and the doctor must be convinced that rehabilitation is necessary and possible.

(2) An accurate assessment of the patient's medical state is necessary so that rehabilitation will not be wasted.

In order to simplify the problem of assessment, we suggest that illness might be divided into four categories:

(*a*) Those simple ailments which require no rehabilitation and following which the patient may return directly to his former occupation, e.g., an uncomplicated appendectomy.

(*b*) Those ailments associated with old age or occurring in the aged where it is obviously hopeless to expect any form of rehabilitation to fit the patient for future service to the community and therefore these patients can also return home and do not require rehabilitation.

(*c*) Those special problems which are of such magnitude as to require a special unit for their adequate rehabilitation —(blindness, paraplegia, tuberculosis, mental illness, arthritis of certain types, some varieties of deafness, spastic paralysis in the adult and other such conditions.

(*d*) All the remaining patients who are admitted to hospital.

It is obvious that some patients will be difficult to categorize and one group may merge into another. Our first duty would appear to be to train the medical and associated professions to adequately perform these functions.

Rehabilitation consists largely of motivating the patient and should start as soon as possible after commencement of his illness. We suggest that the responsibility for the patient's rehabilitation rests primarily with the attending physician or surgeon. However, full use should be made of specialists, such as orthopaedic surgeons, physiatrists and others, and when called in they should assume joint responsibility with the patient's

Adequate therapeutic treatment, under continuous medical supervision, is an essential of successful rehabilitation. The picture shows a patient receiving whirlpool bath treatment at the Rehabilitation Centre of the Quebec Workmen's Compensation Board in Montreal.

own doctor. It is the duty of the university and teaching hospitals to present this concept in their teaching.

This problem might be simplified by presenting it as follows:—

I. Rehabilitation in University Centres.
   (*a*) Teaching general hospitals.
   (*b*) Special Rehabilitation Centres.
II. Large General Hospitals (non-teaching) and Regional Units.
III. Small Hospitals.
IV. Special Disabilities.
V. Children.

I. *Rehabilitation in University Centres.*—It is recommended that rehabilitation units be established first in university teaching general hospitals. In addition, in order that this process may be carried out economically and efficiently, it would seem wise to construct in close proximity to the teaching general hospital and within its organizational framework, a unit or units which can continue the process either on an in-patient or an out-patient basis.

Should the patient then require prolonged hospitalization for purposes of retraining and rehabilitation, he may be transferred to one of these specially designed lower cost hospital beds, following which he will be referred to the out-patient department and followed there.

The concept of rehabilitation in teaching general hospitals as outlined above, in addition to providing the best possible facilities to rehabilitate the patient, is designed to train the medical and allied professions in the field of rehabilitation so that doctors, nurses, occupational and physical therapists, social workers, and others who go out into the community will further these aims.

In addition, following the institution of the above, we recommend the provision of a special unit associated with the university and available to all hospitals within its orbit, designed primarily to deal with the following problems:—

i. The long term group of patients.
ii. Geriatric problems which require rehabilitation.
iii. The severely disfigured.

II. *Large General Hospitals and Regional Units.*—The principles and resources in rehabilitation, similar to those described in a teaching general hospital, are necessary for this type of hospital, with the special personnel and facilities required for teaching excluded. This type of unit might be established also on a geographical basis throughout the country to serve populous regions. This regional unit should be associated with a hospital, and available not only to its staff but to the general practitioners in the area. The administration of this centre should be arranged so as to offer every facility and co-operation to the general practitioner.

III. *Small Hospitals.*—For the small hospital we would urge the creation of a section of physical medicine with whatever resources may become available and, in particular, the employment of a qualified occupational physical therapist under the direction of the medical board of the hospital.

IV. *Special Disabilities.*—These disabilities include blindness, paraplegia, tuberculosis, mental illness, arthritis, of certain types, some varieties of deafness, spastic paralysis in the adult and other such conditions.

We recommend that the existing special organizations and centres that have been evolved for the treatment of these profound disabilities, should be used to the maximum and where possible every effort should be made to avoid duplication of existing resources where they can be utilized for other allied disabilities. In certain circumstances it might be necessary to provide new facilities.

V. *Children.*—The same principles which have been outlined above, for the rehabilitation of adults, apply to children, with special emphasis on education and other details applicable to the young.

It was moved, seconded, and carried that the Conference receive, with its thanks and appreciation, the report of the sub-committee as approved by the Committee on Medical Rehabilitation and that the full report be incorporated in the proceedings of the Conference. It was further agreed that while limitations of time did not permit of detailed consideration of all the points raised in the report, the Conference should go on record as giving its specific approval to the section of the report marked 1 (*a*) and (*b*) Rehabilitation in University Centres.

Resolutions on Medical Rehabilitation

1. It was moved, seconded, and carried that the Conference go on record as approving the following:—

   (*a*) The definition of medical rehabilitation includes all those physical and psychological factors which contribute to the restoration of the individual. These factors include diagnosis, treatment and medical evaluation in relation to his previous status, other skills or occupations in order to prepare him physically, mentally, socially and vocationally for the fullest possible life compatible with his abilities and disabilities.

   (*b*) A primary concept of any rehabilitation program must be the provision of adequate preventive and curative services for children with congenital or acquired disabilities. Some of the major points for consideration are:

   i. Appropriate methods to insure early location and specialist diagnosis.

   ii. Adequate facilities for preventive measures and a complete treatment program which considers the child as a member of a family and the community.

2. It was moved, seconded, and carried that there should be medical supervision in vocational training, selective placement and employment and in the follow-up of employed and unemployed rehabilitants.

3. It was moved, seconded, and carried that:

   (*a*) The training of physicians, surgeons and specialists should include an appreciation of rehabilitation evaluation and methods; that the training of physiotherapists, occupational therapists, social workers, public health nurses, etc., should include objective methods and appreciation that rehabilitation is team work to restore the injured and crippled to maximum physical and psychological status.

   (*b*) The term "status" in its present function means all useful work under the following categories:

      (i) placement in competitive employment,

(ii) selective placement,

(iii) sheltered employment,

(iv) home duties and activities and/or self-care and services for children.

4. It was moved, seconded, and carried that ways and means, particularly in the way of bursaries, be made available for the further training of undergraduates and graduates of those professional disciplines concerned with rehabilitation.

5. It was moved, seconded, and carried that financial assistance through the Federal Hospital Construction Grant should be made available for the construction and equipping of special rehabilitation facilities including rehabilitation centres.

6. It was moved, seconded, and carried that:

(*a*) The medical profession has a responsibility for the prescription of, standards of, and supervision and training in the use of prostheses.

(*b*) Whereas prostheses are a necessary part of treatment, provision of prosthetic appliances should be considered an integral part of medical treatment and where necessary they should be supplied from public funds. Prostheses include any type of appliance or aid necessary to the rehabilitant.

7. It was moved, seconded, and carried that every effort should be made to co-ordinate medical rehabilitation facilities and other rehabilitation services on local, regional, provincial and national levels.

8. It was moved, seconded, and carried that there should be a federal-provincial program to provide funds on a shareable basis and administered provincially to foster, provide and purchase services as the provincial government sees fit through public, voluntary or other agencies.

9. It was moved, seconded, and carried that the Federal General Public Health and Public Health Research grants be interpreted as covering appropriate research in medical rehabilitation.

10. It was moved, seconded, and carried that sufficient moneys be made available through the National Research Council for fundamental research in rehabilitation.

11. It was moved, seconded, and carried that this Committee go on record as expressing the hope that this Conference would be reconvened annually.

Joint Resolutions

Following the presentation and acceptance of the individual reports and resolutions of the two committees, several joint resolutions, containing Conference recommendations for a Canadian Rehabilitation Program were approved. These resolutions forwarded for consideration by the Federal Cabinet were as follows:—

In order to promote local and provincial activity, in order to effect a reasonable degree of co-ordination among the component parts of the program, and in order to disseminate information in all areas, and otherwise to give leadership at the national level, the Conference recommends:

That the Federal Government be requested to appoint, as a full time Federal Official, a co-ordinator for the Canadian Rehabilitation Program for the Handicapped, together with such secretarial assistance as may be deemed advisable;

That the Federal Government be asked to appoint a National Advisory Committee on the Canadian Rehabilitation Program, to be composed of 35 members as follows:

One member from each Province, to be named after consultation with the Government of the Provinces;

Three members to represent the Federal Government;

Six members to represent various health and welfare voluntary agencies;

Four members to represent the medical and allied professions;

Four members to represent organized employers;

Four members to represent organized workers;

Four additional members to be selected by the Federal Government, some of whom shall represent the Universities, and others those persons or groups of persons especially interested in rehabilitation.

The responsibilities of the Committee shall include:

To elect annually its own officers, and to form an Executive Committee;

To review the recommendations of this Conference and to recommend appropriate action for their implementation;

From time to time to review existing rehabilitation facilities and to recommend steps to be taken for their most effective utilization and for their expansion where necessary;

To recommend preparation and distribution of informational material;

To instruct the Executive Committee on duties to be carried out in the intervals between Committee meetings;

To recommend the establishment of working sub-committees as may seem indicated;

To recommend on the subject of rehabilitation policies generally, whether in relation to Government action or the activities of voluntary agencies.

The duties of the Co-ordinator shall include:

Those of Secretary to the Committee;

Preparation of materials for meetings of the Committee and the Executive, including any necessary surveys of facilities or operations;

Other duties as assigned.

* * *

Be it resolved that this Conference record appreciation of the fine documentation which was prepared for use by the delegates, entitled "Rehabilitation of Disabled Persons", and request that it be made available in permanent form.

Be it further resolved that, in the view of all delegates, this Conference served a most useful purpose in advancing the cause on rehabilitation and it is the hope that similar conferences may be convened annually.

News of the accomplishments of Canadian Labour-Management Production Committees often travels beyond the country's boundaries. Recently, the Labour-Management Co-operation Service of the Department received a request for literature to assist in the setting up of a labour-management committee in a Wisconsin manufacturing plant. The company learned of the Canadian service, the personnel manager reported, through an official of the U.S. Federal Mediation and Conciliation Service.

Meanwhile, Canadian LMPC's continue to make notable contributions to increased productivity and better labour-management relations. Recent outstanding accomplishments include the following.

LMPC Studies Packaging

A western meat-packing house reports an improvement in the appearance of its meat products since the LMPC gave its attention to this feature. Committee members at the Winnipeg plant of Burns & Co. Limited study, at their twice-monthly meetings, samples of poorly-prepared or badly-packaged products, determine the causes of the defects and how to remedy them, then make known to the workers how to correct the errors. Local 224, United Packinghouse Workers of America (CIO-CCL), participates in this LMPC.

* * *

A Windsor, Ont., committee at its very first meeting, discussed nine suggestions dealing with ways to increase productivity, adopted three immediately and began investigation of the remainder. The committee is that operating in the plant of Phil Wood Industries Ltd., in which Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America (CIO-CCL), is the participating union.

Welding Courses Started

In order to give employees in the finishing trades a second trade, so that they could continue work during slack periods in their own departments, the LMPC at the Collingwood Shipyards Limited suggested that the local collegiate conduct twice-weekly night classes in welding. The shipyard provided two instructors. A large number of shipyard employees enrolled for the course, also some additional Collingwood residents. Labour representatives on this committee are members of Local 4, Industrial Union of Marine and Shipbuilding Workers (CCL).

* * *

Workers' suggestions at the Port Arthur Shipbuilding Company Limited are examined by the shipyard's LMPC. In its first six months of operations, the LMPC dealt with 106 suggestions, accepting 21 of them. Two of these were of sufficient calibre to be considered for the grand prize which will be presented for the best suggestion of the year. Five unions hold bargaining rights at this shipyard and participate in the LMPC, four AFL craft unions and one CCL union.

LMPC Helps in Production Problems

The St. Catharines, Ont., plant of Monarch Knitting Company Limited was recently faced with the problem of producing, on a limited number of machines, a sufficient quantity of a new line of hosiery to determine market acceptance. The union there—Local 800, Textile Workers' Union of America (CIO-CCL)—agreed to the operation of a continuous shift which keeps the machines operating 160 out of the 168 hours in each week, at the same time retaining the forty-hour week.

The company's industrial relations manager declares that the problem was solved only because of the well-founded mutual understanding developed in the mill by the LMPC. "Understanding is an everyday practice now," the manager explained.

A road machinery manufacturing company at Goderich, Ont., takes pride in the improved orderliness and efficiency resulting from a five-week good housekeeping contest. Judging was done by a three-member joint committee, with one member from management, one from the supervisory staff and one from the shop floor. The company is the Dominion Road Machinery Co. Ltd. The union supporting the LMPC is Lodge 1863, International Association of Machinists (AFL-TLC).

Establishment of Labour-Management Production Committees (LMPC's) is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions set up LMPC's, the Service provides publicity aids in the form of booklets, films and posters.

81108—3½

Collective Agreements in the Chemical Products Industry

Thirteen international unions as well as a number of regional and local unions act on behalf of employees in the Canadian Chemical Products Industry. The Labour Department has record of 113 agreements covering more than a third of the 44,000 workers employed in this industry. Almost all the agreements provide for grievance procedure, seniority, hours of work, wages, overtime, and holidays with pay. Some 83 per cent of the workers are covered by the check-off, but only 18 per cent by other forms of union security.

WORKERS IN THE CHEMICAL PRODUCTS INDUSTRY

Top left—winding cellulose film off a drum before cutting to standard lengths. Bottom left—mask and gloves are necessary to protect this worker from the substance he is handling. Centre—climbing the side of a huge ammonia tank. Right—examining powder used in the manufacture of smoke screens.

An interesting feature of collective bargaining in the Chemical Products Industry is the variety of unions which act as bargaining agents. Previous industries dealt with in this series of *Collective Agreement Studies** have had relatively few unions bargaining for employees. In contrast to this, at least thirteen international unions as well as many local or regional unions act as bargaining agents for workers in the Chemical Products Industry.

Unions formed primarily of chemical workers, including District 50, United Mine Workers of America (CCL), represent somewhat more than fifty per cent of the workers covered by agreements. Many unions which bargain mainly for employees in other industries also organize chemical workers. The diversification of products manufactured and the close association with many other industries to which chemical products are basic is, in part, responsible for the many unions in the industry. This is shown in the extreme by the organization of workers in one paint manufacturing plant by the Painters' and Decorators' union, an organization of construction workers. Other unions have been attracted to chemical plants through geographic proximity; for example, the United Automobile Workers of America (CCL-CIO) bargains for many chemical plants in the Windsor area where large automobile plants are also found.

No individual union holds a majority of the 113 agreements now in force. The largest number is held by the United Mine Workers of America District 50, and the International Chemical Workers' Union (TLC-AFL), each with more than twenty agreements. From five to ten agreements have been negotiated by each of the United Automobile Workers of America, the International Union of Mine, Mill and Smelter Workers (Ind.), and the group of local unions affiliated with the Canadian and Catholic Confederation of Labour. Other unions each hold four contracts or less. Similarly, no one union represents a majority of the 15,000 workers covered by agreements. District 50 of the United Mine Workers of America and the International Chemical Workers' Union each represents approximately one-fifth of the total number.

* Collective Agreement Study No. 15.

Approximately 44,000 workers are employed in the Canadian Chemical Products Industry. Workers are employed in plants producing basic chemicals or semi-finished chemicals or finished chemicals. Basic chemicals are produced on a large scale and include such products as acids, alkalis, salts, and organic chemicals. Semi-finished chemicals such as plastic materials, crude animal and vegetable oils, dry colours, and pigments undergo further processing in other industries. Finished or fine chemicals, used directly by consumers, include a large variety of products such as paints, medicines, soaps, matches, toilet preparations and photographic materials.

In contrast with the relatively standardized agreements of highly integrated industries in which single unions predominate, contract terms in the chemical industry, bargained by many unions, show considerable variance. In the sections of this article which follow, individual clauses of the contracts are discussed and their incidence shown in accompanying tables.

It should be recognized that in each case the contracts, with few exceptions, apply to all production workers of non-supervisory rank in a single plant. Multi-plant contracts are seldom found.

Duration of Agreements

Employers and employees are usually bound to agreement provisions for a period of one year. Only four contracts have been bargained for a longer term. The majority are automatically renewable from year to year unless the company or the union serves notice to the contrary within a specified time before the expiry date. A lesser number may be renewed from year to year subject to negotiation as illustrated by the following example.

> (*b*) Either party may on ten (10) clear days' notice in writing require the other party to enter into negotiations for the renewal of the agreement within the period of two (2) months prior to the expiry date and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such renewal.
>
> (*c*) The party giving the notice in accordance with clause (*b*) hereof shall at the same time as such notice is issued, and the party receiving the notice shall within ten (10) days of its receipt of such notice, respectively, present to the other party in writing any proposed modifications or revisions of this agreement.

A few agreements provide that, should the contract be renewed, it will remain effective indefinitely subject to a required number of days' notice. That is, a renewed contract may be terminated or modified at any time so long as the party desiring a change gives the stipulated notice.

For their duration, the bulk of agreements disallow strikes and lockouts and many give employers the right to discipline, by discharge or other means, employees who take part in such strikes. A further clause respecting strikes, found in approximately eleven per cent of the agreements, provides that, should a strike occur despite the contract prohibition, certain operations necessary for the safety and protection of company property will be continued. Ten contracts covering relatively small bargaining units do not contain a "no-stoppage" clause.

Grievance Procedure

All but two of the contracts establish procedures for dealing with grievances which may arise during the term of the agreement. Complaints may usually be carried through various levels of negotiation normally commencing with the immediate supervisor and ending with executive officers of a company. Time limits are frequently set for discussion at each step. Should these negotiations fail, one-hundred of the agreements provide for final and binding settlement through arbitration. Statistical data relative to grievance handling is shown in Table I.

Many contracts stipulate the number of union stewards to be recognized for purposes of the grievance procedure as well as the composition of the grievance committee. Others apparently leave such matters to the union since employee representatives are mentioned only in connection with the part they play at the various grievance stages. Approximately one-half of the agreements covering a like proportion of the workers under contract permit officers of the union, not necessarily plant employees, to assist in grievance adjustment. These may not usually be called upon until a complaint has reached negotiations between the union grievance committee and higher officials of the company concerned. Although union representatives are usually designated to act on behalf of employees in regard to grievances, thirty-eight contracts provide that any employee may take a complaint through the grievance procedure without union assistance if he desires.

Arbitration is the final step in the grievance procedure and is resorted to only after a complaint has progressed through all prior steps without a mutually acceptable solution having been attained. Arbitration decisions are to be final and binding on all parties to a contract.

In most agreements arbitration boards are to consist of three members, one representative of the union, one of the company, and a chairman to be agreed upon by these appointees. The union and the company representatives are to be appointed within a stated number of days and if they fail to agree upon a chairman within a time limit, the third party is to be named in most instances by the appropriate provincial Minister of Labour. A small number of contracts provide for the appointment of an impartial umpire to arbitrate disputes. Like the selection of a board chairman, if the company and the union cannot agree on an umpire, the services of a third party are called upon. Arbitration machinery is not detailed in the clauses of a minor number of agreements.

Any dissatisfaction with working conditions may constitute a greivance under the majority of agreements. The following clause is an example of a broad definition of disputes subject to the grievance procedure:—

> Any dispute, grievance or misunderstanding involving occupational classifications, wages, seniority, hours or other working conditions which any employees or group of employees may desire to discuss and adjust with the Company shall be handled as follows.

Other contracts apparently limit the scope of the grievance procedure to disputes involving interpretation or application of contract terms as exemplified by the following clause:—

> Any dispute, grievance, or misunderstanding arising out of the interpretation or application of any of the terms of this agreement, which any employee or group of employees may desire to discuss, and adjust with the Company, shall be handled as hereinafter set forth.

No reference is made to the categories of complaints which may be classed as grievances in a substantial proportion of the contracts. It should be noted, however, that among contracts which do not specify the classes of disputes which may be taken up as a grievance or which specify that a broad range of disputes relative to working conditions may constitute grievances, the majority limit the powers of the arbitrators by requiring that their decisions conform to the terms of the contract. A sample clause of this type states:—

> In arriving at a decision, the Arbitration Board shall not in any way change, add to or disregard any of the provisions of this contract.

In certain disputes some deflection from the standard contract grievance procedure is permitted under many contracts. Differences arising directly between the company and the union are subject to negotiation between the parties themselves, without resort to various grievance stages, before referral to arbitration. A relatively small number of contracts do not refer to differences arising directly between the company and the union but provide for the lodging of grievances by the companies through the regular channels, omitting certain of the preliminary steps.

Contracts do not generally dictate terms of settlement in adjusting grievances. But a substantial proportion establish the principle of reinstatement with back pay for employees found to have been unjustly discharged. Most of these state that in such circumstances employees must be returned to their former jobs without loss of pay. The remainder stipulate that the question of back pay is to be considered as part of the grievance. To constitute a grievance a discharge must be taken up within a time limit prescribed in the contract.

Grievances settled in favour of employees which result in pay increases must apply retroactively in a small proportion of the contracts analysed, usually to the date the complaint was presented in writing.

The question of pay for employees engaged in grievance handling during working hours is considered in the majority of chemical agreements and none expressly state that such will not be paid time. Generally, designated employees are to be allowed "reasonable time off" without loss of pay for purposes of processing complaints, provided permission is obtained from immediate supervisors. Reasonable time is defined in a number of contracts, for example, one hour per day or five hours per week.

Union Security

The great bulk of employees in organized chemical plants (as indicated in Table II) are not required to become union members. Under only six contracts is a standard union shop established. Approximately twice this number of contracts applying to small bargaining units establish a modified union shop requiring employees hired subsequent to the contract's effective date to join the union and employee members at the effective date to remain so for the life of the agreement. Maintenance of membership is found by itself in ten contracts. These clauses provide that, although no employee is required to join, employees who do join the union must continue their membership.

Union members may voluntarily subscribe to a check-off of union dues as detailed in the greater proportion of contracts. Both the revokable and the irrevocable types of dues deduction are found fairly evenly throughout these agreements. In addition, a compulsory check-off, applicable to all eligible employees, is prescribed in a few contracts, most of which also are union shop agreements.

Seniority

Newly hired workers are considered probationary employees under most seniority provisions and during the probationary months these employees have no seniority. Usually employers are free to dismiss, transfer or otherwise direct probationers without violating any clause of a contract subject, of course, to the rights of employees having seniority. On completion of the probationary term employees acquire full seniority status (see Table III).

Seniority may be estabilshed on a plant-wide basis, on a departmental basis, or on a combination of the two. Most agreements specify the plant-wide type although, on the basis of workers covered, combined plant and department seniority is the more important. Most of the contracts examined cover small bargaining units of 100 employees or less and plant seniority is generally found in this group. Combined plant and department seniority is normally found in larger bargaining units having more distinct departmental divisions.

Consideration of the seniority standing of individuals is called for in layoffs, rehiring, promotions, and in the scheduling of annual vacations. Seldom is seniority the sole consideration in layoffs, rehiring and promotions, individual skills and abilities being also considered. In fact, only when skills and abilities are relatively equal does seniority become the prime factor.

As shown in Table III, the number of contracts which contain clauses covering rehiring is small in proportion to the number establishing rules for layoffs. It seems reasonable to assume, however, that where staffs are increased after a slack period, laid-off employees would be rehired, their seniority being taken into account.

Details of the application of seniority principles are, in general, not extensively covered. Few agreements set out a definite order of procedure to be followed in laying off and rehiring. Nor is the part played

by both departmental and plant-wide seniority always made clear in units which combine the two types of seniority, although more than one-half of these specify that in layoffs plant seniority governs while promotions are to be conducted on a departmental basis. A few specify only the manner in which one of the types is to be applied. A super-seniority clause found in some agreements states that plant officers of locals are to be retained in employment during periods of layoff despite a lack of seniority.

Almost all agreements under which department seniority only is in operation make provision concerning the seniority of employees transferred between departments. An employee's seniority may be immediately transferred to his new department or may be retained in his former department for a limited period. Occasionally a clause is found which states that a transferred employee's seniority will be retained indefinitely in his former department. Among units in which combined seniority is in practice, about one-half discuss transfers. The predominant clause stipulates that seniority will be retained in the former department for a time, most frequently three months.

With regard to promotions, a fairly common provision requires employers to post notices of vacancies some days in advance. During this period, frequently five days, employees may bid for vacant jobs which are to be filled, if possible, from among the applicants. Only a few contracts make it mandatory that promoted employees be allowed a qualifying trial period on new jobs.

Leaves of absence without loss of seniority will be granted under terms of most agreements as indicated in Table III. The necessity of attending union conferences and of taking part in other union affairs gives rise to a leave of absence clause in sixty-two agreements. Such provisions normally permit two or three employees "reasonable time off" during a year for such purposes. A total of four days ranging upwards to three months is held to be reasonable under contracts which limit the time, two or four weeks being most common. Depending on individual agreements, the number of employees who may obtain such leave at any one time is two, three or five. Employees designated for permanent union jobs are to be granted leave for the duration of the contract under a clause found in sixteen agreements.

Agreements which make provision for personal leaves of absence usually state in effect that employees may obtain reasonable leave for justifiable reason upon written application. Only a few mention time limits which will usually be extended if the leave request is made on account of illness.

Actions that will result in loss of seniority are discussed in many contracts. Termination of employment by quit or discharge, absence without permission for a stated number of days and failure to return, or to acknowledge receipt of notice to return, within a specified time after a layoff are common reasons for striking employees from seniority rosters. In addition, employees who remain continuously laid off for a longer period than that specified in the contract lose their previously accumulated seniority. Most commonly the continuous period of layoff during which seniority will be retained is one year. In other contracts the time ranges from six to eighteen months.

Hours of Work

As will be noted from the accompanying Table IV, weekly hours of work vary considerably among chemical agreements. Work weeks of forty, forty-four, forty-five and forty-eight hours are common. Similarly weekly work days of five, five and one-half and six are frequent, five being in the majority. While the five-day week is standard in most agreements and for the majority of workers covered by agreements, weekly hours of more than forty predominate, forty-four or forty-five hours constituting the normal work week for the greater proportion of employees and in the greater proportion of contracts.

Wage Rates

Payment by the hour is the normal method of remuneration, and rates for the various classifications of labour are detailed in the vast majority of contracts. It is not uncommon for newly hired employees to be paid somewhat less than standard rates, but after a period ranging from one to six months standard job rates are applicable. Progressive increases to the job rate become common where the beginner period is longer than three months.

Wage rates established by agreement normally remain in effect for the duration of contracts. Only a small proportion of workers are covered by contracts which permit a general rate adjustment during the contract term. Another small group are entitled to bonuses above standard wages through an "escalator" clause based on the official cost-of-living index.

Only a few contracts make specific provision for adjusting rates when employees

are required to work in more than one job classification during a shift. In such circumstances the standard job rate becomes the rate for the highest paid operation performed, a complete shift to be paid for at that rate. Eight contracts covering 1,207 workers contain a provision of this nature.

A variety of clauses (Table V) were found dealing with wage rates to be paid on transfer. Rate adjustments for employees transferred temporarily to either a higher or lower paid job, found in thirty-two agreements, stipulate that on temporary transfer to a higher rated job an employee must be paid the higher rate. On the other hand, on temporary transfer to a lower rated job, the old job rate is to apply in practically all of these contracts. Twelve, among the same agreements, deal with rate adjustment on permanent transfer. Most frequently, the rate for the job to which an employee is transferred is to apply, although a few require that on permanent transfer to a lower rated job, an employee's previous rate will be paid for a short period.

A small number of transfer clauses do not differentiate between temporary and permanent transfers. Clauses of this nature state that if an employee is required to work on a lower rated job he must be reclassified within a limited time. These clauses vary where the transfer is to a higher rated job, some requiring the higher rate to be paid immediately, others requiring that an employee be reclassified after a period of the same length as that applicable to transfers to lower paid classifications.

The continuous nature of many processes in chemical manufacturing necessitates operation on a shift basis in much of the industry. More than two-thirds of the contracts analysed make reference to shift operation and it is evident that in the majority of these, three shifts in twenty-four hours are worked. Employees assigned to afternoon and night shifts usually receive a bonus in addition to basic job rates. Although the amount varies, five cents per hour is common. Shift provisions may call for a larger bonus for third shift hours than for second. In the fourteen clauses of this type the bonus for the second shift ranges between three cents and five cents and for the third between five and ten cents (see Table VI).

In two circumstances employees are guaranteed a minimum number of hours pay even though they may not have worked that number of hours. First, employees in approximately fifty per cent of the bargaining units, who report for work at the regular time are guaranteed a minimum number of hours of work, or pay for that number of hours, if dismissed for the day for reasons beyond their control. The most frequently found clause in this category sets the minimum at four hours (Table VII). Second, about two-thirds of the employees under agreement are covered by a minimum pay allowance if called to work after having been sent home for that day. Clauses of this nature commonly state that overtime rates will apply with a minimum guarantee of three, four or five hours at the straight time rate or from one and one-half to four hours at the overtime rate depending on the individual agreement.

Overtime and Weekend Premiums

Practically all employees covered by agreements receive premium rates for overtime work. Time and one-half must be paid for hours worked beyond scheduled hours in any day and beyond standard weekly hours in any week under the largest number of contracts, a number of which add a clause stating that overtime rates will not be paid on both bases for the same hours. A lesser number of contracts, but covering a larger proportion of the workers, mention daily overtime but not weekly overtime. In the smallest group, the time and one-half rate is paid only if standard weekly hours are exceeded. In eleven of the contracts allowing time and one-half for overtime, double time applies if a period of overtime exceeds a stipulated number of hours. For example, double time may apply after four hours of overtime work in any day.

Only a few contracts make particular reference to premium rates for Saturday work, or the sixth working day in the week, and these specify that the normal time and one-half overtime rate will apply. A much larger number of agreements deal with rates for Sunday work, or the seventh day, and these divide fairly evenly between time and one-half and double time. The numbers of agreements and the numbers of employees covered by various premium pay provisions are shown in Table VIII.

Rest Periods, Statutory Holidays, Annual Vacations

Daily rest periods receive no consideration in the contracts of the largest proportion of workers. Among contracts which do mention break periods a ten-minute rest twice a day predominates (Table IX).

The number of statutory holidays observed during a year varies from eight downward, although employees in only a small number of bargaining units are entitled to less than

six. It is not uncommon, as is shown in Table IX, for the number of paid holidays to be less than the number of holidays observed. In fact, under a few contracts, it is not stated that any of the days will be paid holidays. Practically all those contracts, under which some or all holidays are not paid for, stipulate that employees required to work on an unpaid holiday will be entitled to premium rates, usually time and one-half. Where all or a portion of the days are paid holidays, premium rates normally apply for work on such days, double time being the predominant rate.

It is notable (Table IX) that contracts covering a substantial portion of chemical workers make no reference to annual vacation periods. This does not mean that employees under these agreements do not receive vacations. In all probability company vacation plans have not been incorporated into the collective bargaining agreements. Furthermore, the plants covered by these agreements are located in provinces which by law require that employees with one year's service be granted a vacation of at least one week.

Among vacation arrangements outlined in contracts, two general types are in evidence, least frequent of which is a uniform vacation arrangement. These provide that employees are entitled to vacations of the same length regardless of individual service. Eligibility is usually obtained after one year of continuous service in line with the requirements of provincial laws and the length of vacation is either one week or two weeks.

The most common type of vacation arrangement is the graduated plan in which the length of a vacation period depends on an employee's service with a company. Seventy-eight of the vacation plans are of this type as compared to eleven uniform plans. Among graduated plans, the majority allow a maximum vacation of two weeks. Employees under a substantial number may qualify for three weeks' vacation annually and rarely is the maximum more than three weeks. Few of the graduated plans allow a vacation of two weeks after one year of service, a third week to be granted after an additional period of employment. An initial vacation of one week after one year's service is the normal arrangement, a second week to be granted after from two to ten years of service depending on individual contracts, two, three, or five years being the most common requirement. Employees covered by agreements which provide a progression to three weeks are required to serve from fifteen to twenty-five years to qualify for the third week, with the exception of those covered by a small number of contracts which specify five, twenty or twenty-one years. In the small number of agreements providing a greater maximum, employees with twenty-five years' service are entitled to a four weeks' vacation, three weeks having been granted after fifteen years.

Under many contracts, employees who have not qualified for the initial vacation still receive consideration. Contracts often state that employees who have completed the necessary service at a particular date are entitled to a full vacation and employees who have worked for several months but have not attained necessary service standing are to receive a vacation, or pay in lieu of vacation, proportionate to their service. It should be borne in mind that under most provincial laws if an employee terminates his employment during a year he is entitled to vacation pay pro-rated on his employment during the year. This provision applies even though an employee has not completed his first year of employment with a firm.

It is to be noted that in order to qualify for a specific vacation, an employee's service must be continuous. Twenty-four agreements set forth certain service rules, a number extensively, establishing the basis for loss or reduction of vacation periods or vacation pay resulting from non-continuity of service. Wide variance was found among clauses of this nature as the following samples indicate:—

Example I—

> An employee shall be deemed to have complied with the requirement above of one year's service with the Company to qualify him for vacation pay if (1) he was in the employ of the Company on the first day of July of the year preceding and (2) within the ensuing fifty-two (52) weeks he shall have performed work at least during forty-three (43) thereof. The same principle shall govern in determining whether an employee has met the requirements of three (3) years' continuous service. Time lost from work by an employee as a result of physical disability covered by the Workmen's Compensation Act shall not be deducted in computing such service credit. Time not exceeding four (4) weeks continuously lost from work by reason of physical disability not covered by the Workmen's Compensation Act shall not be deducted in computing such service credit provided the employee furnishes the Company with proof of such disability and the Company, after investigation, is satisfied that the loss of time was warranted.

Example II—

> Continuous or intermittent absence totalling less than three months . . . will not

affect adversely an employee's eligibility for or participation in the Vacation Plan.

(*a*) In the case of an employee who has not attained eligibility, continuous or intermittent absence totalling three months or more will postpone vacation eligibility for a period equivalent to the absence in excess of three months. Having thus been penalized for absence in excess of three months by postponement of his eligibility date, his participation in the Vacation Plan will not be subject to the further penalty in (*b*) below.

(*b*) An employee who has attained vacation eligibility but who has intermittent or continuous absence totalling more than three months during the twelve months preceding his anniversary date of employment will have his next vacation reduced one-twelfth for each month of such accumulated absence in excess of three months. All absences are to be counted but a fraction of a month in the total of all absences will be disregarded when calculating such reduction. The deduction may be made either in vacation pay or in vacation time as mutually agreed upon by the employee and the Management.

In no case in applying the provisions of . . . (*a*) and (*b*) above should a statutory vacation (one week or less than one week in the case of terminations) be reduced to less than the applicable statutory vacation or allowance by reason of any authorized absence or absence due to illness.

Example III—

Continuous service means active service without interruption except when due to illness, injury or other authorized absence. The vacation period will be computed on a pro-rata basis when approved leave of absence has been granted for thirty (30) days or more.

Example IV—

An employee who has had one month or more on leave of absence other than for sickness or accident shall have deducted one day for each month of leave.

Example V—

Continuity of service shall not be considered interrupted by lay-offs due to lack of work.

The method of computing vacation pay is not always dealt with in the contracts, but among those which do, three methods prevail. The most popular vacation pay clause provides that an employee will be paid the amount of his normal weekly hours at his regular rate. Other contracts specify that employees will receive a percentage—two per cent for one week's vacation, four per cent for two weeks, six per cent for three weeks—of earnings during the preceding year. In other contracts, pay is to be computed by both the above methods, the larger of the two amounts to be paid.

Agreements applying to more than one-third of the organized workers provide that employees leaving the service of a company are entitled to the benefits of unused vacation credits. In such circumstances, employees are usually entitled to pay in lieu of vacation calculated to the date of separation.

Only a small proportion of contracts analysed state that extra vacation privileges will be extended where one of the recognized statutory holidays falls within a vacation period. In such cases an employee will receive either an extra day's holiday or an extra day's pay.

Paid Sick Leave, Group Insurance, Pensions

Paid sick leave is an uncommon feature of chemical industry contracts, and the small number of agreements which mention sick leave plans do not supply detailed information on their operation. They usually specify that lost time resulting from illness will be paid time for a limited period each year. Group insurance health and welfare plans are also relatively uncommon. Where they exist, life insurance and sickness benefits are usually provided. The method of financing plans is not clearly stated in most cases. Eight agreements draw attention to the existence of a pension plan but details are not included in the agreements.

Disciplinary Measures

Penalties to be applied by companies against employees for certain misdemeanors are set forth in less than one-half of the contracts as is shown in Table X. The majority of these deal with dismissals, by which companies are assured of their right to discharge employees for just cause. A list of actions on the part of employees which will result in discharge, with a statement indicating that "just cause" is not limited to the listed actions, may form part of an agreement. The only cause for discharge specifically mentioned in nine contracts is excessive absenteeism. Eleven contracts prescribe the penalty of time dockage for lateness.

Company-Union Consultation

Almost one-half the chemical agreements make certain changes in working conditions subject to consultation between managements and unions. Matters for consultation are generally those for which standard rules would be difficult to adopt or matters where a degree of flexibility is desirable. The various subjects for consultation and their frequency of occurrence among contracts are indicated in Table XI.

TABLE I—GRIEVANCE PROCEDURE

Number of Agreements and Number of Workers Affected by Specified Types of Grievance Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
No Grievance Procedure	2	470
Grievance Procedure	111	14,530
Arbitration Provided	100	13,213
Three-member board	87	11,691
Umpire	7	812
Method not outlined	6	710
Union Representation	111	14,530
Stewards and grievance committee	96	13,073
Grievance committee only	12	1,253
Stewards only	3	204
Scope of Grievance Procedure	111	14,530
All complaints relative to employer-employee relations	58	7,723
Interpretation and application of contract	28	3,870
Not defined	25	2,937
Union and Company Grievances	33	5,549
Direct negotiation between parties	22	3,908
Company may initiate grievances against employees or union	11	1,641
Unjust Dismissal	44	6,869
Reinstatement with back pay	34	4,559
Reinstatement, back pay to be settled as part of grievance	10	2,310
Rate Adjustment Grievance	12	2,909
Retroactive to presentation in writing	8	2,278
Other	4	631
Other Clauses:—		
May request complaining employee's presence at any stage	16	2,796
Employee may process grievance without union assistance	38	5,354
Outside union official may be called at later stages	55	7,359
Pay for grievance handling during working hours	67	8,933

TABLE II—UNION SECURITY

Number of Agreements and Number of Workers Affected by Specified Types of Union Security Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Union Membership Provision	29	2,740
Union shop	6	1,228
Union shop (new employees)	13	692
Maintenance of membership only	10	820
Dues Deduction Provision	87	12,450
Voluntary revokable	36	5,848
Voluntary irrevocable	25	3,700
Voluntary (revocation not covered)	15	1,110
Voluntary (optional as to revocation)	6	990
Compulsory	5	802

TABLE III—SENIORITY

Number of Agreements and Number of Workers Affected by Specified Types of Seniority Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Probation Period Provision	95	13,523
One month	16	1,435
Two months	31	2,760
Three months	35	6,523
Other	13	2,805
Seniority Provision	110	14,430
Plant wide	62	6,116
Combination, plant and department	31	6,702
Department wide only	14	1,312
Other	3	300
Transfer Provisions	26	4,205
Seniority retained in former department (2 weeks to 6 months)	16	3,002
Seniority retained in former department (no time limit)	5	931
Seniority moves with employee	5	272
Seniority Application Provisions	108	13,910
Layoffs	104	13,735
Rehiring	64	8,025
Promotions	96	12,287
Choice of vacation period	43	6,362
Superseniority Provisions	23	3,406
Leaves of Absence Provisions	87	12,562
Union business, reasonable time	62	8,315
Union officials, extended time	16	1,439
Personal leaves	58	8,503
Loss of Seniority Provision	91	11,695
Voluntary quit	82	9,371
Dismissal	82	9,371
Unauthorized absence, stated number of days	42	4,553
Failure upon notice to return to work or notify company within stated time limit	53	7,013
Laid-Off Workers, Seniority Status Provision	72	10,355
Seniority retained, one year	55	6,300
Seniority retained, other length	17	4,055

TABLE IV—HOURS OF WORK

Number of Agreements and Number of Workers Affected by Specified Types of Work-Week Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Five-Day Week	58	7,832
Forty-hours or less	21	2,860
Forty to forty-four hours	6	1,539
Forty-four hours	14	1,925
Forty-five hours	15	1,390
Forty-eight hours	2	118
Five and One-Half-Day Week	27	3,211
Forty-four hours	17	2,284
Forty-five hours	3	376
Forty-eight hours or more	7	551
Six-Day Week	22	3,277
Forty-eight hours	22	3,277
Days per Week and/or Weekly Hours not set forth	6	680

TABLE V—WAGE RATES

Number of Agreements and Number of Workers Affected by Specified Types of Wage Rate Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Rate Scale:—		
Wage rate schedule in agreement	102	13,332
Wage rate schedule not in agreement	6	1,420
Wage rates not covered in agreement	5	248
Lower Hiring Rates	49	5,584
Applicable for three months or less	16	980
Applicable for six months	4	407
Periodic increases to job rate	11	1,968
Range of rates applied on basis of service	15	2,116
Other	3	113
Wage Rate on Transfer	49	7,671
Temporary to higher rated job, paid new job rate	37	5,532
Temporary to lower rated job, paid former job rate	31	5,191
Temporary to lower rated job, paid new job rate	2	251
Permanent to higher or lower rate job, paid job rate immediately	8	1,181
Permanent to lower rated job, paid former rate for limited period	4	954
Employee required to work on lower rated job to be reclassified within stated period	11	1,730
Employee required to work on higher rated job to be paid new job rate immediately	5	1,225
Employee required to work on higher rated job to be reclassified within stated period	2	67

TABLE VI—SHIFT WORK

Number of Agreements and Number of Workers Affected by Specified Types of Shift Work Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
No Reference to Shift Work	32	2,651
Shift Work Indicated, Number of Shifts not Stated	31	4,921
No shift bonus clause	7	273
Shift bonus clause	24	4,648
Five cents per hour	20	2,537
Other	4	2,111
Three Shift System Indicated	50	7,428
No shift bonus clause	9	1,080
Equal bonus second and third shifts	27	4,047
Five cents per hour	21	2,738
Other	6	1,309
Unequal Bonus second and third shifts	14	2,301
Less than five cents per hour second shift	10	2,138
Five cents per hour second shift	4	163
Five to eight cents per hour third shift	10	752
Eight to ten cents per hour third shift	4	1,549

TABLE VII—REPORTING PAY AND MINIMUM CALL PAY

Number of Agreements and Number of Workers Affected by Specified Types of Reporting Pay and Minimum Call Pay in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Reporting Pay Provision	55	8,819
Four hours at regular rate	38	4,071
Three hours at regular rate	8	2,349
Two hours at regular rate	9	2,399
Minimum Call Pay Provision	69	10,498
Less than four hours at regular rate	6	157
Four hours at regular rate	20	3,643
More than four hours at regular rate	4	1,538
Less than two hours at overtime rate	4	142
Two hours at overtime rate	20	2,501
More than two hours at overtime rate	9	1,659
Other arrangement	6	858

TABLE VIII—PREMIUM PAY

Number of Agreements and Number of Workers Affected by Specified Types of Premium Pay Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Overtime		
No Provision	7	745
Time and One-Half	106	14,255
After standard weekly hours	5	425
After standard daily hours	48	8,140
After standard daily and weekly hours	53	5,690
Double Time After Specified Period at Time and One-Half	11	1,180
After stipulated number of hours of overtime	4	450
After midnight (except night shift)	7	730
Weekend Premiums		
Saturday or Alternate Day*	17	2,529
Time and one-half	15	2,465
Other	2	64
Sunday or Alternate Day	84	12,017
Time and one-half all hours	39	6,922
Double time all hours	45	5,095

* Applies all day Saturday where the five-day week is standard and Saturday afternoon where the five and one-half day week is standard.

TABLE IX—REST PERIODS, STATUTORY HOLIDAYS, VACATIONS WITH PAY

Number of Agreements and Number of Workers Affected by Specified Types of Rest Period, Statutory Holidays, and Vacations With Pay Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Rest Periods		
No Provision	65	8,189
Two Ten-Minute Rest Periods Each Shift	36	4,586
Other	12	2,225
Statutory Holidays		
No Provision	3	550
Eight Observed Days	59	8,319
Eight paid days	42	5,167
Seven paid days	3	452
Six paid days	3	253
Less than six paid days	11	2,447
Seven Observed Days	21	2,757
Seven paid days	17	1,915
Less than seven paid days	4	842
Six Observed Days	26	2,963
Six paid days	21	2,791
Less than six paid days	5	172
Less than Six Observed Days	4	411
Agreements in Which Some or all Days are Unpaid	27	4,215
Premium Pay Provision for Work on Unpaid Holiday	26	4,203
Time and one-half	20	3,960
Double time	6	243
Agreements in Which Some or all Days are Paid	101	13,093
Premium Pay Provision for Work on Paid Holiday	98	12,723
Time and one-half	5	1,244
Double time	80	9,752
Double time and one-half	13	1,727
Vacations with Pay		
No Provision	20	3,573
Uniform Plan	11	509
One week	6	165
Two weeks	5	344
Gradated Plan	78	10,853
Two weeks maximum vacation	43	3,909
Three weeks maximum vacation	33	6,134
Four weeks maximum vacation	2	810
No Details of Vacation Plan	4	65
Other Vacation Provisions:—		
Proportionate vacation or pay, employees with less than one year's service	43	5,679
Method of payment provision	66	9,392
Percentage of earnings during previous year	20	1,674
Normal hours at regular rate	37	5,675
Either of the above, whichever is greater	9	2,043
Unused credits payable on separation	34	4,961
Statutory holiday within vacation period	16	2,362
Extra day	9	1,405
Extra day's pay	3	704
Either	4	253

TABLE X—DISCIPLINE

Number of Agreements and Number of Workers Affected by Specified Types of Disciplinary Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Disciplinary Provisions	38	4,919
Dismissal for just cause, list of reasons	23	3,061
Dismissal, persistent absence	9	942
Time dockage, lateness	11	1,229

TABLE XI—UNION-MANAGEMENT CONSULTATION

Number of Agreements and Number of Workers Affected by Specified Types of Union-Management Consultation Provisions in Collective Bargaining Agreements of the Chemical Products Industry.

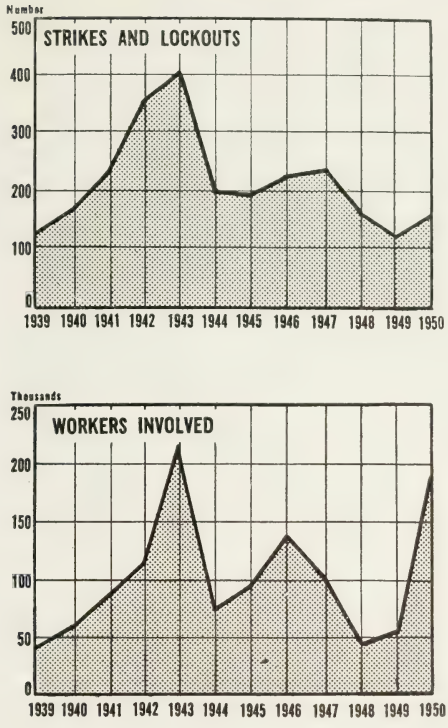
Clause	Number of Agreements Containing Clause	Number of Workers Covered by These Agreements
Consultation Provisions	46	7,653
Proposed changes in hours schedules	27	5,411
Altering and correcting seniority lists	15	2,896
Proposed changes in job content, classifications, and setting rates for new jobs	7	759
Filling vacancies and upgrading	4	1,103
Proposed changes in employee comfort, health and safety facilities	4	429
Possible work sharing to avoid lay-offs	3	902
Other	4	311

STRIKES AND LOCKOUTS IN CANADA, DURING 1950*

The outstanding feature of the year was Canada's first nation-wide railway strike. This nine-day work stoppage in August of 128,000 non-operating railway workers caused a time loss of a million days. According to a supplement* to this issue of the LABOUR GAZETTE, with the exception of the railway dispute, strike idleness during the year was moderate. Only five other stoppages showed losses greater than 20,000 days and none of these was over 30,000 days.

There were 161 strikes and lockouts in 1950, an increase of 15 per cent over the previous year, but less than the annual average of 230 for the preceding 10 years. In 1950, only 55 strikes and lockouts arose out of disputes over renewals of existing contracts, the great majority of agreements having been negotiated without resort to strike action. The latest figures available show that in 1949 collective agreements in effect covered more than 1,224,000 workers (L.G., Dec., 1950, p. 2023).

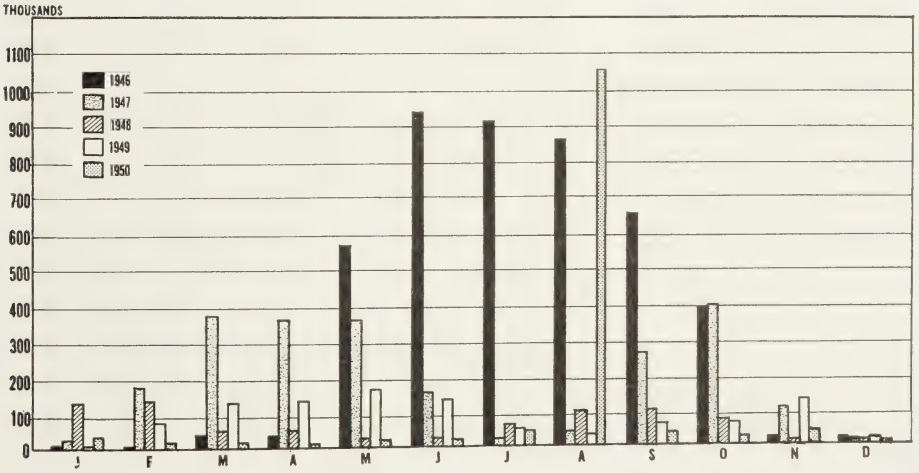
For the past five years the impact of steadily rising prices on the family budget of the Canadian worker has been reflected in the number and importance of strikes and lockouts arising out of demands for increased wages. In 1950, this demand for higher wage rates, frequently accompanied by other issues affecting unionism and working conditions, was the central cause of 48 per cent of the strikes and lockouts, affected 82 per cent of the total workers and caused 94 per cent of the total time loss. In 1949, 84 per cent of the total loss resulted from disputes over wage increases, 83 per cent in 1948, 91 per cent in 1947, and 96 per cent in 1946.



In 1950, the time loss of over a million days in the transportation industry was the greatest ever recorded. Other years with a high time loss in this group were: 1908, 442,000 days; 1901, 300,000 days; 1903, 196,000 days; and 1918 and 1919, 129,000 days each. There were few strikes in 1950 in the mining industry and little time was lost, less than four per cent of the total for the year. In 1949, the greatest loss was in the mining industry, caused by a strike of asbestos miners and mill workers in various centres in Quebec. In 1947, the largest amount of strike idleness was also in the mining industry, because of a prolonged strike of coal miners in Nova Scotia and New Brunswick. With the exception of 1950, 1949 and 1947, during the last nine years the time lost in manufacturing, with the largest working force of any industry, has been greater than in all other industries combined. In 1950, the time lost in manufacturing was less than 18 per cent of the total and was the lowest recorded since 1941. There were few strikes in the construction industry and the time lost was only two per cent of the total.

The average loss of time for each worker involved in strikes and lockouts was about seven days in 1950, as compared with an average of more than 22 days for the preceding five years. In 1950, about 67 per cent of the stoppages, involving 95 per cent of the workers, and causing 78 per cent of the loss, were settled within 10 days. Eleven per cent of the strikes, involving less than two per cent of the workers, and causing four per cent of the total loss lasted between 10 and 25 days; twelve per cent of the strikes, involving less than three per cent of the workers and causing almost 11 per cent of the loss, lasted between 25 and 50 days; and about seven per cent of the stoppages, involving less than one per cent of the workers and causing five per cent of the loss, lasted longer than 50 days.

* Strikes and Lockouts in Canada During 1950, with Information for Certain Other Countries.



Year	Number Beginning During the Year	Strikes and Lockouts in Existence During Year						
		All Industries						
		Number of Strikes and Lockouts	Number of Employers	Number of Workers Involved	Time Loss

STRIKES AND LOCKOUTS IN CANADA, 1939-1950

TIME LOSS IN MAN-WORKING DAYS

By Months 1946-1950

LABOUR AND THE 1951 CENSUS OF CANADA

Many of the questions to be asked in the 1951 Census will have a special interest for labour. The findings will help to indicate long-term trends of employment and earnings in particular industries and occupations. The census will also tell about steadiness of employment. The following article, by Mr. Herbert Marshall, Dominion Statistician, describes the labour questions that will be asked.

In June of this year the Ninth Decennial Census of Canada will be taken. There will be not only a census of population but also censuses of housing, agriculture, fisheries and distribution (wholesale and retail trades and services). Supplementary information will be obtained about the blind and deaf, irrigation, and livestock and greenhouses elsewhere than on farms.

Many of the questions that will be asked will have a special interest for labour.

Employment and Earnings

On the population document there are nine questions which are primarily concerned with labour force participation and salary or wages to be asked of all persons 14 years of age and over. "What did this person do mostly during the week ending June 2, 1951?" is question 20. This is a question designed to measure the labour force at a point in time that is thought most suitable for providing the best results. The enumerator will check the reply in the appropriate space on the card as "Worked", "With a job but not at work", "Looked for work", "Keeping house", "Going to school", "Retired or voluntarily idle", "Other", and "Permanently unable to work". The tabulations resulting from the answers to this question will be based on a complete survey of Canada and will supply data for small economic areas or regions that the labour force survey* cannot provide. Question 21 calls for a direct reply, "Yes" or "No", from those who do not fall within the first and last categories under question 20. It merely asks "In addition did this person do any work for pay or profit?". Question 22 is "How many hours did this person work?". Replies will be recorded in one of four groups: 1-14 hours, 15-24, 25-34, and 35 hours or more.

Once it has been definitely established who is in the labour force, the question of their industry and occupation arises. Industry is the productive activity toward which each person contributes. The answer to the industry question will tell how many Canadians work on farms, in textile mills, automobile plants, building, retail stores, etc. It will not, however, tell what they do at these plants.

For this the occupation question will provide such counts as number of machine operators, truck drivers, plasterers, sales clerks, etc. The pertinent questions relating to industry and occupation in the census of population document are questions 24 and 25, which are grouped with questions 23 and 26.

For those in the first three categories in question 20 (i.e., for those who worked, had a job but did not work, or looked for work during the week ending June 2, 1951) and for those who, in reply to question 21, say that, in addition, they worked for pay or profit, there are questions on "Name of firm or business—for whom did this person work?" (question 23), "Industry—what kind of business or industry is this? e.g., rubber shoe manufacturing, drug retail trade, grain farming, etc." (question 24), "Occupation—what kind of work did this person do in this industry? e.g., office clerk, sales clerk, auto mechanic, iron moulder, graduate nurse, etc." (question 25), "Is the occupation reported in question 25 the person's usual occupation?" (question 26). Question 27 classifies all persons 14 years of age and over as wage or salary earners, own account, employer or working for no pay. Those who are in receipt of salary or wages are asked in question 28 the number of weeks worked for wages and salary during the twelve months prior to June, 1951. Replies are marked in one of ten categories. The last question on the population document (question 29) asks the wage and salary earnings during the

* The quarterly labour force survey of the Dominion Bureau of Statistics, whose findings are published regularly in the LABOUR GAZETTE is based on a sample of the population.

twelve months prior to June, 1951. Replies fall into ten groups ranging from "none" to $6,000 and over". Wages and salaries should be the amount before deductions are made—not merely "take-home" pay.

These earnings figures will reflect the great rise which has taken place since 1941 in earnings from salaries and wages, already indicated in other statistical sources. The census of population, however, will permit this rise to be related to age, education, birthplace, language spoken, place of residence, and other census variables, so that we can identify the characteristics of the people whose wage and salary earnings have shown the greatest increase and those that have shown the least.

Steadiness of Employment

The census of population will also tell about steadiness of employment; what the average weeks worked during the year are for plumbers, say, as against accountants. Wide variation between different occupations has been shown in previous censuses; in 1951, variation will be limited by the fact that employment has been universally high.

Farm and Fishery Workers

The general farm schedule of the census of agriculture asks how many persons were working for wages at farm work on each farm during the week ending June 2, 1951. Specifically, the enumerator will ask how many were hired the year round, how many were hired by the month as seasonal labour, how many were hired by the day, and how many were hired hourly, on piece work, on contract, etc. Under the heading "Part-time Work", the schedule has two questions: (1) was the amount received from the sale of agricultural products of this farm greater than the income the operator received from all other sources in 1950, excluding income from investments?, and (2) how many days in 1950 did the operator work at non-farm work and at farm work off this farm? Under the heading "Farm Expenditures", there are questions on the wages paid in cash or in kind to hired farm labour (excluding housework and construction labour), and the value of house rent or room and board furnished hired workers.

The census of fisheries will be conducted in two parts. First, in conjunction with the population census in June, which includes everyone, a list will be compiled of all commercial fishermen, classified on three significant bases: number of days fishing; whether fishing on own account, as a partner or on shares, or for wages; and within which of four income-size groups their income from fishing falls.

The second stage of the census of the fisheries will be carried out at appropriate dates later in the season when fishing activities are at a minimum. This will enable a detailed study of the industry to be made. The end product will be information on the number engaged in this important industry, the degree of their dependence on fishing, supplementary sources of income, etc.

Census of Distribution

The census of distribution, like the census of the fisheries, will be in two parts. The first stage, coinciding with the census of population in June, will merely record the names, addresses and a few other data of wholesale, retail and service establishments such as sales-size, etc. Nothing of direct interest to labour will be asked at this stage. The second part will be taken early in 1952. One question, not applicable to incorporated companies, will ask the number of male and female working proprietors, i.e., those actively engaged in the business in 1951. The enumerators will also ask the minimum and maximum numbers of paid employees during 1951 and the months in which these maxima and minima occurred. Only the larger retail stores, i.e., those with annual sales of $150,000 and over, and 10 per cent of those with annual sales of between $30,000 and $150,000, and the wholesale firms will be asked to report seasonal maximum employment by months. The enumerators will ask the total amount paid to all employees during 1951 in salaries, wages, commissions and bonuses. This total amount will be the full amount before deductions for income tax, unemployment insurance and retirement or pension schemes. Value of payments in kind, i.e., meals, lodging, etc., are also to be included. The minimum and maximum numbers of unpaid family or other workers during 1951, including all family members or other persons who worked in the business but did not receive a stated salary or wage, are to be given.

Uses of Labour Force Information

While the Census cannot make a detailed investigation of the skill of each Canadian, it will give much useful information on our human resources. In giving for each part of the country the number of doctors and nurses, carpenters and electricians, housemaids and stenographers, with information for each on age, education, language spoken and other facts, the census will provide a unique record of our manpower

and its skills. The value of such a record will be partly to those who are concerned with public interest in maintaining numbers, for example, of bricklayers, machinists, etc. They will find out whether the age distribution is one in which older members are being replaced by younger men as they retire.

Personnel officers in industry whose job is to recruit for various kinds of work will find it useful to know how many people there are who are skilled in those kinds of work. On the other side, those choosing a career will be given guidance on the kinds of occupations which are being followed, and some indication of the earning levels and regularity of employment in each. Vocational guidance counsellors can do their most useful work when they are supported by a knowledge of the various occupations, the numbers engaged in them in different parts of the country, their ages and other characteristics. The guidance they give depends not only on the aptitudes of the person being guided but on the number of people for whom there appears to be room in the occupation considered. The work of trade unions and any study of the trend of their activities must make use of the census data on numbers of those engaged in the relevant occupations, without which the trend in numbers unionized is not significant.

* * *

An article entitled *The Canadian Labour Force*, which appeared in the January, 1950, issue of the LABOUR GAZETTE, was based partly on information derived from earlier censuses. Reference to this article gives a further indication of the kind of information to be derived from the 1951 Census.

ACTIVITIES OF PROVINCIAL LABOUR ORGANIZATIONS

The submission of annual briefs to provincial governments and the holding of conventions have highlighted the recent activities of provincial labour organizations.

Summarized below are the contents of briefs presented by organizations affiliated with the TLC and CCL in New Brunswick, Alberta, Saskatchewan, British Columbia, and Manitoba.

The proceedings of conventions of the Ontario Federation of Labour (CCL), and the Industrial Federation of Labour of Alberta (CCL) are also summarized.

New Brunswick Federation of Labour (TLC)

In its annual memorandum of proposed legislation submitted to the Premier and Executive Council of New Brunswick, the New Brunswick Federation of Labour (TLC) presented its requests for amendments to provincial legislation in several fields. The brief expressed disappointment that the Government had not seen fit to institute any of the changes proposed by the Federation in its 1950 brief.

The memorandum suggested that the New Brunswick Labour Relations Act (and other labour legislation) be amended to bring employees of the Government, provincial boards and commissions, and civic and municipal governing bodies, under its provisions. The Federation felt that the exclusion of such employees from the provisions of the Act was unfair.

The Federation said that Section 4 (Unfair Labour Practices) of the Act was inadequate to deal with cases of intimidation or interference in a representation vote ordered by the Board. The brief asked that this section be strengthened to prevent these alleged practices.

The brief asked that three subsections be added to Section 9. These proposed amendments would read as follows:—

> If on an examination the Board is satisfied that not less than forty-five per centum and not more than fifty-five per centum of the employees in the bargaining unit are members of the trade union, the Board shall, and if the Board is satisfied that more than fifty-five per centum of such employees are members of the trade union, the Board may direct that a representation vote be taken.
>
> In determining the number of eligible voters for the purpose of subsection ...., employees who are absent from work during voting hours and who do not cast their ballots shall not be counted as eligible.
>
> If on an examination under subsection .... the Board is satisfied that more than fifty per centum of the employees in the bargaining unit are members of the trade union and that the true wishes of the employees are not likely to be disclosed by a representation vote, the Board may certify the trade union as bargaining agent without a representation vote.

The New Brunswick Government was asked to bring its influence to bear to have price controls imposed. In the rent control field, the Federation urged "that legislation be adopted . . . that can and will be put into immediate effect in this Province if the Federal Government carries out its expressed intention to abolish the remaining controls." The brief also asked that the Provincial Government in co-operation with local authorities make use of Federal funds available for housing to provide a low-cost housing program, and that strict rental controls be a part of this program.

The brief asked that legislation be passed in New Brunswick which would make it compulsory for all employers to grant their employees one day's rest in seven. This proposal specifically mentioned certain service establishments where a seven-day week is observed. Provincial legislation providing a 5-day, 40-hour week, and vacations with pay was also requested by the Federation.

Amendments were requested as well, to the Workmen's Compensation Act and the Industrial Standards and Minimum Wage Acts.

The brief also requested:—

> That inquests be held into all fatal industrial accidents;
>
> Labour representation on all public boards and commissions;
>
> A contributory old age pension scheme providing pensions of $65 a month at age 65 (60 for females), without a means test. (Other recommendations on pensions followed resolutions passed at the parent TLC Convention in September. See L.G., Nov., 1950, p. 1804.)

The Federation also protested against the four per cent sales tax introduced in New Brunswick last year, and suggested that "some other more equitable source (of taxation) should be found."

Alberta Federation of Labour (TLC)

The Executive Council of the Alberta Federation of Labour (TLC) presented its annual brief containing legislative requests, as passed at the Federation's Annual Convention (L.G., Jan., 1951, p. 38) to the Alberta Government. The brief dealt with collective bargaining, hours of work and wages, labour welfare, pensions and social security, the provincial department of labour, workmen's compensation, highway traffic regulations, public utilities and other matters of interest to the Federation.

The Federation asked that the Alberta Labour Act be completely amended and revised so that "provision would be made whereby a trade union would be legally certified and entitled to carry on collective bargaining in its true sense without having to fight the employer every inch of the way. . . ."

Specifically, the brief requested amendment to that section of the Act which, the Federation claimed, allows an employer "to borrow or procure employees who have been engaged in the industry for the required time from another shop, for the purpose of getting them to vote against the union which has made . . . (an) application for certification."

Several other recommendations in the collective bargaining field were presented for the Government's consideration. The Federation asked:—

> That the Labour Act be amended so that the union shop and union security could be granted if a majority of employees in a plant asked for it;
>
> That all votes "should be determined on the basis of a majority of those voting and not on the majority of those affected as at present;"
>
> That awards by arbitration be "retroactive in all cases to the date of application for the appointment of a conciliation commissioner, or to such earlier date as may be fixed by the award board."

The brief also reiterated the Federation's strong stand against compulsory arbitration which was passed at its 30th Convention in October.

Claiming that the "shorter work week is essential to the well being and the advancement of the standard of living of our people," the Federation asked the Alberta

Government for legislation establishing the five-day, forty-hour week without reduction in take home pay. The brief also asked for a minimum wage of 85 cents per hour.

Under the heading of labour welfare, the Federation asked the Government to increase the number of inspectors under the Hours of Work, and Minimum Wage Acts, and to provide more severe penalties for infractions of the Acts.

The brief also suggested a joint "Management-Labour-Government meeting, to be called and held annually," to review and amend the Labour Act. A request was also made for a five cent per hour premium for all afternoon and night shifts, and complete abolition of split-shifts.

In the field of pensions and social security, the brief urged adoption of a $65 a month contributory old age pension, payable at 65 without a means test. The policy of the Alberta Federation on social security is the same as that passed by the parent TLC at its Convention in September. See L.G., Nov., 1950, p. 1804.

Other legislative proposals included:—

A request for the creation of an Alberta Department of Labour;

A request that the Workmen's Compensation Act be amended "to provide for 100 per cent compensation on the earnings received by the worker in the class of work in which he was engaged at the time of accident, the same to become effective from the hour the injury is sustained."

Saskatchewan Federation of Labour (CCL)

The Saskatchewan Federation of Labour (CCL) recently presented a brief to the Saskatchewan Government concerning matters of provincial labour interest.

The Federation asked that the Government take measures to inaugurate the 40-hour week in the province. The brief suggested that the 40-hour week be inaugurated in three steps over a three-year period. The organization recommended that the shorter work week begin in all cities in 1951; in all towns of one thousand and over in 1952; and in all other localities in 1953.

The Federation recorded its complete opposition to compulsory arbitration in any form, and described it as being "extremely dangerous" and providing "no genuine solution to the problem." The brief asked that the Saskatchewan minimum wage law be amended to provide a minimum hourly wage of 85 cents. Other requests included one asking for more inspectors to enforce labour laws; and amendments to the Trade Union Act, The Fair Wage Act and the Workmen's Compensation Act.

Saskatchewan Executive of TLC

The Saskatchewan Executive of the Trades and Labour Congress commended the Government for "legislation beneficial to the workers" passed in the province during the year. The brief particularly noted changes made in the Trade Union Act, the inauguration of health services, and the government's policy of engaging services and goods, "only from such firms and individual business establishments having collective bargaining agreements with *bona fide* trade unions. . . ."

Among the requests submitted for consideration were: a recommendation that the administration of the Apprenticeship Act be revamped to provide for more efficient operation; a request that the Saskatchewan Trade Union Act be amended so that legal counsel could not appear before the Labour Relations Board except on the agreement of both parties concerned; recommendations that the Hours of Work Act, the Holidays With Pay Act and several other Acts be amended.

The Federation also endorsed a brief from the Saskatchewan Fire Fighters' Association, which asked the Government to amend several clauses of the Fire Departments' Platoon Act so that "in negotiating future agreements between the organized firemen and their respective administrations . . . such findings or awards of such an arbitration board shall be made binding upon both parties concerned."

British Columbia Executive of TLC

The British Columbia Executive of the Trades and Labour Congress of Canada, submitted its annual memorandum to the British Columbia Government, presenting its requests for changes and amendments in British Columbia labour laws.

Some sections of the present labour code were described as being "impractical and of no value to either labour or industry." Specifically, the TLC asked for abolition of the supervised strike vote and a shortening of the present cooling-off period

during a dispute. Tightening of the union security provisions of the code was also asked for, and it was suggested that trade unions be restricted to those unions chartered by national organizations.

An amendment to the Annual Holidays Act which would require employers to contribute an amount equal to four per cent of an employee's wages for vacation pay, was requested. It was also suggested that farm and domestic workers be included under the Act.

Other suggestions included in the brief were:—

Abolition of the means test for old age pensions, and increased pensions for the aged;

Provision by law for the five-day, forty-hour week;

Elimination of the mandatory time limit of April 15 for negotiations on municipal employees' wages and working conditions;

Removal of the three per cent sales tax from restaurant meals;

Enactment of a tradesmen's qualification act.

Manitoba Provincial Executive of TLC

In a brief presented to the Manitoba Government, the Provincial Executive of the Trades and Labour Congress and several affiliated organizations asked for new legislation and amendments to present laws.

The Manitoba Government was asked "to impress upon the Dominion Government the dire need for early implementation" of a social security plan. This plan would be on a contributory basis, and cover all types of social security including medical care, 100 per cent compensation for injury, unemployment insurance, widows' maintenance, children's allowances and blind pensions. Under this plan, assistance would also be given to municipalities to provide medical, surgical and dental facilities. The Executive asked the Manitoba Government to increase the present old age pension by ten dollars a month as an interim measure until such a plan is introduced.

The memorandum asked that the Manitoba Labour Board be given power to collect overtime pay due to workmen, and that an investigator be appointed to "enforce observance" of The Hours of Work Act. Reduction of maximum hours of work from 48 to 40, and rigid enforcement, were also asked.

Among the other proposals were:—

A minimum wage of 85 cents an hour for all workers, and the appointment of more inspectors to enforce the regulations;

Amendment of the Fair Wages Act "to bring all Manitoba industries" within its scope;

Improved standards of education for the province;

Increased federal income tax exemptions to $1,200 for single persons and $2,400 for married persons;

A slum clearance program;

Continued rent controls and reimposed price controls;

Labour representation on government boards;

Extensive amendment to the Labour Relations Act;

Legislation providing two weeks' vacation with pay and eight paid statutory holidays.

Industrial Federation of Labour of Alberta (CCL)

The 3rd Annual Convention of the Industrial Federation of Labour of Alberta (CCL) which was held in Edmonton, considered 62 resolutions dealing with price controls, income tax deductions, higher excess profits taxes, a national health scheme and other matters.

The principal speaker at the Convention was Dr. J. L. Robinson, Alberta Minister of Labour. Dr. Robinson praised the organization for its efforts to settle labour-management problems peacefully. He told the Convention that trade unions had achieved the status of a socially recognized force, and must now accept the responsibility of producing more and better goods.

Resolutions

The resolution dealing with price controls asked—"that the Convention endorse the action of the Canadian Congress of Labour in their demands for institution of price controls to reduce the insecurity of the low wage-earner and provide an exact table on all articles remaining at the same price in all areas." The resolution also asked for Federation sponsorship of a publicity program designed to promote the campaign for price and rent control.

On the question of taxation, the Federation asked that union dues be allowed as income tax deductions. Another resolution urged the CCL to continue to press for higher excess profits taxes.

The Convention passed a resolution which asked the Federal Government to enact a national health insurance scheme designed to provide free medical, surgical, optical, dental and hospital care for all citizens. This resolution was patterned after one passed at the CCL Convention in Winnipeg last September (L.G., Nov., 1950, p. 1823).

Ontario Federation of Labour (CCL)

Over 250 delegates, representing Ontario unions affiliated with the Canadian Congress of Labour, met at the Annual Convention of the Ontario Federation of Labour in Toronto. Approximately 50 resolutions dealing with many matters of interest to the organization were dealt with during the two-day sessions.

Among the Convention speakers were Murray Cotterill, President of the Toronto Labour Council; A. R. Mosher, President of the Canadian Congress of Labour; H. W. Forster of the Ontario Workmen's Compensation Board; and E. B. Joliffe, Ontario CCF Leader.

Price and Rent Controls

Several resolutions demanding price controls were presented to the Convention, and consolidated into two resolutions. One resolution commended the action of the major labour organizations in forming a joint committee on price controls (L.G., Feb., 1951, p. 152). The second said in part: "Therefore be it resolved that this Convention of the Ontario Federation of Labour reiterate its demand for protection against the rising cost of living by the imposition of price controls by the Federal Government."

A resolution on housing and rentals asked the Government of Ontario "to call upon the Federal Government to act on the housing emergency by building housing projects for the workers at low cost rentals." A second resolution asked the Ontario Government "to take over rental control" when the Federal Government vacates the field on March 31.

Workmen's Compensation

The Convention passed the following resolutions recommending amendments to the Workmen's Compensation Act:—

> That the Federation urge the Ontario Government to amend the Act so that payment on re-opened claims would be "on the basis of the workers' earnings at the time of re-opening;" that the proposal in the Roach Report (L.G., March, 1951, p. 315) recommending the establishment of labour-management accident prevention committees in plants employing 20 or more employees be adopted.

The Federation also endorsed the recommendations in the Roach Report, and "will press for its acceptance." However, the CCL stand for 100 per cent coverage under the Act will not alter. (This was not recommended in the Report.)

Labour Relations

In the field of labour relations, the Convention recommended several changes in the Ontario Labour Relations Act. The Federation asked that the Act be amended to permit the Labour Relations Board to grant certification without a vote of employees, and that this certification be granted "regardless of the number of members in good standing produced by the union." This was requested because the Federation charged that "company or other interference with organizational activities of a union" often deterred employees from joining a union when they desired to do so. As a result, it was difficult to show 50 per cent or more membership in some plants, the resolution said.

The Convention also asked that the use of injunctions "to prevent peaceful picketing" be stopped.

Despite a strong protest from United Automobile Workers' delegates, a resolution was passed asking that in the arbitration of disputes, one arbitrator agreed to by both parties, be appointed, and paid for by the Ontario Government. The resolution suggested that if the parties could not reach agreement, the arbitrator should be chosen by the Minister of Labour. The resolution also opposed the appointment of Judges as arbitrators.

Hours and Working Conditions

The Convention passed resolutions on hours and working conditions asking:—

> That the Vacation With Pay Act, be amended to make vacation credits a part of wages earned;
>
> That legislation be enacted making statutory provision for payment for public holidays not worked;
>
> That the Hours of Work law, be amended to provide a 40-hour week;
>
> That statutory provision be made giving industrial workers with more than two years' service, two weeks' vacation, and three weeks after ten years.
>
> "That the worker be entitled to . . . vacation pay if he terminates his employment."

Canada Labour Relations Board

The Convention strongly opposed the action of the Canada Labour Relations Board in withdrawing trade union status from the Canadian Seamen's Union because of the union's Communist activities (L.G., Feb., 1951, p. 190). The Board action was defended by A. R. Mosher, President of the CCL, and a member of the Board. The resolution said:—

> Therefore be it resolved that this Convention objects to this decision handed down by the Canada Labour Relations Board and calls upon the Federal Government to revoke the decision of the Board.

The resolution was passed on the recommendation of the Resolutions Committee which reported its view that the Board's action was an assumption of the union's power to settle their own affairs.

Other Resolutions

A resolution was passed asking that the Ontario Government "enact a Labour Code in line with the demands of the Canadian Congress of Labour." Another asked that Canadian Arsenals Ltd., recognize "the legal right of workers employed at Canadian Arsenals Ltd." to have union representation.

The Convention also opposed the imposition of sales taxes and any other form of indirect taxation; and asked that the Ontario Department of Labour be raised to senior status.

A number of resolutions on international affairs submitted by the International Fur and Leather Workers' Union were rejected by the Convention.

Election of Officers

George Burt, Canadian Director of the UAW, was elected Federation President; and Arthur Williams and Sam Hughes were elected vice-presidents. Cleve Kidd, research director of the United Steelworkers of America was re-elected secretary-treasurer.

Memorandum of Legislative Proposals of the Federation

Following the Convention held in Toronto, the Executive of the Ontario Federation submitted its annual brief to the Ontario Government. The brief presented the Federation's legislative requests for 1951, based on the resolutions passed by the Convention delegates.

The Federation expressed dissatisfaction at the practice of allowing intervention in conciliation procedures. The brief said:—

> Our Federation believes that the Board should be instructed that intervention was not provided for in the Act, and it was not in the minds of the legislators that it should be used in this manner. While we appreciate the policy of non-interference in Board procedure by the Minister of Labour, we believe there are times when the legislature must make clear to its administrative boards exactly what was meant by certain sections of the Act.

The Federation also said that there was too much delay in the processing of conciliation matters and recommended that the present waiting period of fifty days should be reduced to fifteen. This procedure would be followed in cases where both parties agreed that "no agreement can be reached without conciliation." It was also suggested that "the final step in conciliation procedure be the conciliation officer," and that he be given the same authority to hear cases as a conciliation board. The brief said that this procedure would reduce costs, speed up the procedure, and solve "the question of neutral chairmen." This section of the memorandum also outlined to the Ontario Government, the CCL position on interference in organization, which the Federation adopted in Convention.

Other Federation requests for amendment to the labour code included:—

> Deletion of that section of the code which prohibits "guards employed to protect property" from membership in a trade union;
>
> Deletion of the section of the Municipal Affairs Act, which prohibits employees of municipalities, boards, commissions, and hospital trusts, from joining unions;
>
> Provision of the check-off;
>
> Deletion of those sections of the Act dealing with revocation of certification.

The Executive expressed the Federation's general satisfaction with the report of the Roach Commission on Workmen's Compensation, but said it was concerned over the Bill which has been drawn up to amend the present Act. The brief said that "the most important of the Roach recommendations is conspicuous by its absence in the Government Bill. We refer . . . to the proposed changes in the existing method of industrial accident prevention." (The Roach report had recommended a four-point program of accident prevention.)

The brief commended the Ontario Government for reducing the waiting period in compensation case from seven to five days, but said that "the Federation wants complete abolition of the waiting period." Failing this, it was suggested that a three-day waiting period be adopted. The raising of ceilings on compensable earnings to $4,000 and the increasing of basic allowances were also commended.

The Federation expressed pleasure at the announcement by the Ontario Government that rent control legislation would be enacted to replace federal rent controls when they are relaxed; but urged the establishment of "Rent Control Boards with labour representation, to which either landlord or tenant may apply to establish or maintain just rents."

Several other legislative proposals were presented to the Government for consideration. These proposals were all based on Convention resolutions, and dealt with such matters as sales taxes, old age pensions, mining, factory inspection, jury duty and hours of work and vacations with pay.

Canada Ratifies Four International Labour Conventions

On March 6, the Hon. Milton F. Gregg, Minister of Labour, announced that Canada had ratified four International Labour Conventions dealing with employment conditions on sea-going ships. The four Conventions were adopted at the 28th Session of the International Labour Conference.

Mr. Gregg pointed out that the Canada Shipping Act already contained provisions equivalent or superior to those of the Conventions.

Two of the Conventions dealt with shipboard food and ships' cooks. Countries ratifying these Conventions agreed to promote proper standards of food supply and catering services on sea-going ships, and to employ qualified inspectors to see that the standards were maintained. Only certified cooks were to be employed, and the authorities would arrange to examine cooks and issue certificates of qualification.

The third Convention provided that ratifying countries would arrange for the medical examination of seamen and would issue certificates attesting to each seaman's fitness of sight and hearing, and that he was not suffering from any disease which would make him unsuitable for work at sea or a danger to the health of others on board.

The last of the four Conventions provided for the examination of seamen who wished to qualify as able seamen, and the granting of certificates to successful candidates.

The Minister explained that these Conventions would come into force only after a specified period following ratification by a representative number of the leading maritime nations, including Canada.

Summary of Conventions

The following summary gives more detail concerning the four Conventions.

No. 68:

Convention Concerning Food and Catering for Crews on Board Ship

Adopted at the 28th IL Conference, Seattle, 1946. Previously ratified only by Bulgaria and France. Comes into force six months after being ratified by nine of the leading maritime nations including Canada.

Member States ratifying are required to promote proper standards of food supply and catering service for crews of sea-going vessels (whether publicly or privately owned), in close co-operation with organizations of shipowners and seafarers, and with national or local authorities who are concerned with questions of food and health. The competent authority shall make necessary regulations for food and water supplies, catering, galley facilities, store-rooms and refrigeration, and the certification of caterers. Qualified inspectors must be employed to make careful inspections of the above and to recommend improvements, with penalties for failure to comply. Courses of training for ships' caterers are to be arranged, and up to date information on nutrition and food handling prepared and made available.

No. 69:

Convention Concerning the Certification of Ships' Cooks

Adopted by the 28th IL Conference, Seattle, 1946. Previously ratified by Bulgaria, France and United Kingdom. Comes into force six months after ratification by nine of the leading maritime nations including Canada.

Member States ratifying are required to make sure that no person is engaged or employed as cook on a sea-going vessel unless he holds a proper certificate of qualifications, although exemptions can be granted if the supply of certified cooks is inadequate. The competent authority is to arrange for examinations, and the granting of certificates of qualifications based on certain standards.

No. 73:

Convention Concerning the Medical Examination of Seafarers

Adopted at the 28th IL Conference, Seattle, 1946. Previous ratifications by Bulgaria and France. Comes into force six months after ratification by seven of the leading maritime nations including Canada.

Member States ratifying shall make regulations covering all sea-going vessels (except vessels under two hundred tons, primitive wooden vessels, fishing vessels and estuarial craft) for the medical examination of all seafarers who are crew members. The competent authority shall, after consultation with organizations of employers and seafarers, arrange to issue a medical certificate to each seafarer after examination, attesting to his fitness of sight and hearing, and that he is not suffering from any disease likely to be aggravated by, or render him unfit for, service at sea, or likely to endanger the health of others on board. Such certificate shall remain in force for a period not exceeding two years.

No. 74:

Convention Concerning the Certification of Able Seamen

Adopted at the 28th IL Conference, Seattle, 1946. Previous ratifications by France and Netherlands. Comes into force July 14, 1951, one year after the second ratification (by Netherlands).

Member States ratifying are required to pass regulations that able seamen must be certified as qualified to perform any deck duties (except specialists' duties). The competent authority shall hold examinations and grant certificates as able seamen to men of minimum age and deck experience who are able to pass the examinations of the proficiency. The minimum period of deck experience for new applicants shall be 36 months, except for men who have taken an approved training course and who have 24 months at sea, or who have trained for 18 months in approved sea-going training ships.

List of Conventions Ratified by Canada

Canada has now ratified a total of 17 International Labour Conventions. These are listed below, by number, name and date, and with the number of the Session of the International Labour Conference at which they were adopted.

No. 1—Hours of Work (Industry) Convention, 1919—(First Session).

No. 7—Minimum Age (Sea) Convention, 1920—(Second Session).

No. 8—Unemployment Indemnity (Shipwreck) Convention, 1920—(Second Session).

No. 14—Weekly Rest (Industry) Convention, 1921—(Third Session).

No. 15—Minimum Age (Trimmers and Stokers) Convention, 1921—(Third Session).

No. 16—Medical Examination of Young Persons (Sea) Convention, 1921—(Third Session).

No. 22—Seamen's Articles of Agreement Convention, 1926—(Ninth Session).

No. 26—Minimum Wage-Fixing Machinery Convention, 1928—(Eleventh Session).

No. 27—Marking of Weight (Packages Transported by Vessels) Convention, 1929—(Twelfth Session).

No. 32—Protection Against Accidents (Dockers) Convention (Revised), 1932—(Sixteenth Session).

No. 63—Convention Concerning Statistics of Wages and Hours of Work, 1938—(Twenty-Fourth Session).

No. 68—Food and Catering (Ships' Crews) Convention, 1946—(Twenty-Eighth Session).

No. 69—Certification of Ships' Cooks Convention, 1946—(Twenty-Eighth Session).

No. 73—Medical Examination (Seafarers) Convention, 1946—(Twenty-Eighth Session).

No. 74—Certification of Able Seamen Convention, 1946—(Twenty-Eighth Session).

No. 80—Final Articles Revision Convention, 1946—(Twenty-Ninth Session).

No. 88—Employment Service Convention, 1948—(Thirty-First Session).

Thirty-fourth Session of International Labour Conference

Opening in Geneva, Switzerland, on June 6, the 34th Session of the International Labour Conference will bring together representatives of workers, employers and governments from most of the 62 member countries of the International Labour Organization.

Principal items on the agenda are as follows:—

Objectives and minimum standards of social security;

Industrial relations, including collective agreements and voluntary conciliation and arbitration;

Co-operation between public authorities and employers' and workers' organizations;

Equal remuneration for men and women workers for work of equal value;

Minimum wage fixing machinery in agriculture;

Holidays with pay in agriculture.

The Conference will also debate a report on world labour and social conditions to be submitted by the Director-General of the ILO. It will carry on its annual task of reviewing the way member countries are implementing the Conventions and Recommendations adopted at previous sessions of the Conference. It will also consider financial and budgetary questions.

Social Security

During the 1930's the ILO adopted a series of Conventions on various aspects of social security. However, in 1949 an ILO committee of social security experts expressed the view that these Conventions were now out of date.

"The concept of social insurance," according to an ILO memorandum dealing with the agenda of the forthcoming Conference, on which the Conventions and Recommendations adopted by the Organization in the past are based, has been undergoing rapid transformation into a new concept, that of social security. The original systems have been widely extended and fundamentally changed. Furthermore, the less developed countries have begun to legislate on social security and have encountered special difficulties which the

existing Conventions, drafted mainly on the basis of European experience, do not take fully into account. To enable the International Labour Organization to fulfil its responsibility as the international agency competent for social security questions, it is appropriate that the progress of the last few years and the needs and experience of all regions of the world should be reflected in new or revised international instruments, and that fresh impetus and new objectives should be given to the social security movement. It seems, however, that the first step in a program of revision of the Conventions relating to social security should be not the revision of any particular Convention but the consideration of a new general social security Convention. It has seemed essential that such a new Convention should take fully into account the extent to which action can be taken, now and in the near future, in countries in which social security legislation is highly developed, as well as in countries in which social security legislation is still in its first stages. For that reason, this item is worded: 'Objectives and Minimum Standards of Social Security'."

The item will be given "first discussion" only at the 1951 Conference, under the ILO "double discussion" procedure,* and will be considered further at a later session.

* The usual practice of the ILO, in formulating international regulations on labour questions, is to consider a subject at two successive Conferences before adopting a text in final form.

Industrial Relations

This subject was given "first discussion" at the 1950 Conference (L.G., Aug., 1950, p. 1152). This year's Conference will consider the adoption of two Recommendations, one concerning collective agreements, the other concerning voluntary conciliation and arbitration.

Co-operation

The subject of co-operation between public authorities and employers' and workers' organizations has been on the agenda of previous Conferences, but in each case discussion has had to be deferred owing to the pressure of other business. The question is to be given "first discussion" this year.

Equal Pay

The 1950 Conference gave "first discussion" to this subject, which is now to be considered with a view to the adoption of a Convention and/or a Recommendation. A report on last year's discussion appeared in the August, 1950 Labour Gazette (p. 1155).

Agriculture

Last year's Conference gave "first discussion" to the question of Minimum Wage Fixing Machinery in Agriculture, and the adoption of a Convention and a Recommendation is now to be considered.

Holidays with Pay in Agriculture will be given "first discussion" at the 1951 Conference.

ILO at Work on Technical Aid Projects

The International Labour Organization is now at work on a total of 59 projects as part of its contribution to the United Nations-Specialized Agencies Expanded Program of Technical Assistance for the Economic Development of Underdeveloped Countries, according to a report made public in March by the ILO Director-General, David A. Morse.

Work has already begun on a number of the projects, others will be launched shortly, while others are still in the planning stage.

The projects have originated in requests from governments in Asia, the Near and Middle East, Latin America and Africa. Twenty-nine of these requests were addressed directly to the ILO. The remainder were addressed to other organizations participating in the program but the ILO will co-operate in carrying them out.

The requests cover practically all fields of activity falling within the ILO's competence.

Those from Asia are for assistance on problems concerning amongst others manpower, co-operation, women and young workers, social security, labour legislation.

Requests from the Near and Middle East ask for help on social security, co-operation, conditions of work, manpower, women and young workers, agriculture, industrial hygiene, industrial safety, economics.

Latin-American countries have asked for aid in the fields of manpower, women and young workers, social security, economics, conditions of work, co-operation, agriculture.

African requests concern manpower, co-operation, agriculture, conditions of work, and labour legislation.

The report announces that a number of highly qualified experts will be required to carry out the projects. It is also expected that a certain number of fellowships will be granted so that officials of the less developed areas may study methods in the leading industrial countries.

Industrial Relations and Conciliation

Collective agreements were recently consummated covering both operating and non-operating employees in important segments of Canadian railway systems. The Supreme Court of Ontario dismissed during February an application by the Canadian Seamen's Union for the quashing of the Order of the Canada Labour Relations Board revoking the union's certification as bargaining agent for a unit of employees of Branch Lines, Limited.

Introduction

A settlement resulting from direct negotiations was announced early in March in connection with a wage dispute between the Canadian National Railways and three running trade unions, namely, the Brotherhood of Railroad Trainmen, the Order of Railway Conductors and the Brotherhood of Locomotive Firemen and Enginemen. The agreement applied to the employees represented by the three unions on the Atlantic and Central regions of the CNR system, and provided for a wage increase of 13·1 cents per hour for employees operating in passenger service and 14·5 cents per hour for employees operating in freight service. Changes in eight important working rules were also reported to have been agreed upon, but details of the modifications were not available at the time of writing.

An announcement was made at the end of January that the Canadian Pacific Railway Company and the Brotherhood of Locomotive Engineers had reached an agreement by direct negotiations providing for an increase of 11 per cent in basic wage rates for locomotive engineers employed on the Pacific and Prairie regions of the Company's system. It was anticipated that the settlement would provide a pattern for negotiations in other areas.

Arising out of the award of the Hon. Mr. Justice R. L. Kellock, the arbitrator appointed in the matter of The Maintenance of Railway Operation Act to deal with the recent dispute between the major Canadian railways and two groups of unions representing their non-operating employees, there was filed with the Department of Labour early in February a master agreement establishing principles based upon the said Act and the arbitration award thereunder. The master agreement was dated January 30, 1951, and was signed by officers of the four railways affected and of the fifteen non-operating railway labour organizations with international affiliations and the Canadian Brotherhood of Railway Employees and Other Transport Workers and the Brotherhood of Express Employees.

* * *

Following the unanimous adoption by the Canada Labour Relations Board of Reasons for Judgment revoking an order of November 20, 1947, certifying the Canadian Seamen's Union as the bargaining agent for the unlicensed employees of ships operated by Branch Lines, Limited, Sorel Que. (L.G., Feb., 1951, p. 190), an application was made by the Canadian Seamen's Union to the Supreme Court of Ontario by way of originating notice of motion for an order staying all proceedings and quashing the revocation order of the Board. The motion was made on the grounds that the Canada Labour Relations Board had no right or jurisdiction under the Industrial Relations and Disputes Investigation Act or otherwise to make the order of revocation, that the Board had no power to order decertification for the reasons given by it, that there was no evidence before the Board on which it could make the order revocation of certification, and that the Board's order was contrary to and constituted a denial or violation of natural justice.

The union's application was heard on February 7, 1951, and judgment was rendered by Hon. Mr. Justice Barlow on February 23 dismissing the application. In his written judgment, Mr. Justice Barlow examined in some detail the "very wide powers" given to the Canada Labour Rela-

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

tions Board under the Industrial Relations and Disputes Investigation Act and the Board's proceedings leading up to the revoking of the certification of the Canadian Seamen's Union in the Branch Lines, Limited, case. It was noted that the Board was given the widest possible latitude as to the evidence and information which it might receive and accept, and that it was not limited to such evidence as might be admissible in a court of law. The Board had revoked the certification of the Canadian Seamen's Union on the ground that the union was not an organization of employees formed for the purpose of regulating relations between employers and employees. The revocation order was made by the Board under the powers given to it by Section 61 of the Act, which provides in part that if in any proceeding before the Board a question arises under the Act as to whether an organization or association is . . . a trade union, the Board shall decide the question and its decision shall be final and conclusive for all the purposes of the Act. The Board was also empowered to reconsider any decision or order made by it, and to vary or revoke any decision.

Following "a most patient hearing" the Board had reserved its decision, and later, through its chief executive officer, had advised the solicitor for the Canadian Seamen's Union by letter that it had decided to accept as evidence a certain white paper of the British Government and certain reports and resolutions set out in the letter. It was also stated that the Board was prepared to receive any written representation with respect to the items mentioned which the union desired to submit for the Board's consideration. The solicitor for the union acknowledged the letter and the union's president wrote a letter in reply, but neither made any representations. The judgment of the Court found that the Board had proceeded within the four corners of the Act, in good faith and in a fair manner, and that it had given the parties an opportunity to be heard. Mr. Justice Barlow was satisfied that there was some evidence before the Board upon which it could make the revocation order, and that it was for the Board to decide the weight of evidence, not for the Court.

The judgment also dealt with the position of trade unions before the courts. In dismissing the union's application, Mr. Justice Barlow found that the Canadian Seamen's Union was not registered under The Trade Unions Act, RSC, 1927, c. 202, and that it was not a juridical entity and had no legal right to bring the application.

Notice of appeal to the Court of Appeal for Ontario from the judgment of the Hon. Mr. Justice Barlow was given by solicitors for the Canadian Seamen's Union in the early part of March. It was anticipated that the appeal would be heard during April or May.

The following statement concerns the scope and administration of the Industrial Relations and Disputes Investigation Act.

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The Branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the Board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certifications given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within Federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the Federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of Conciliation Officers, Conciliation Boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of

Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of February. The Board issued six certificates designating bargaining agents and ordered three representation votes. During the month, the Board received 10 applications for certification, three applications for revocation of certification and one application for the amendment of a provision prescribed for the final settlement of disputes concerning the interpretation or violation of a collective agreement.

Applications for Certification Granted

1. The Communications Workers of America, on behalf of a unit of employees of the Northern Telephone Company Limited, New Liskeard, Ontario, comprising exchange, office, plant, installation and maintenance employees in the provinces of Ontario and Quebec (L.G., Feb., 1951, p. 190).

2. The International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, on behalf of a unit of supplies branch and engineering employees of the British Overseas Airways Corporation employed at Hangar No. 4, Montreal Airport, Dorval, Quebec (L.G., March, 1951, p. 346).

3. The Canadian Air Line Pilots Association, on behalf of a unit of pilots and co-pilots employed by Queen Charlotte Airlines Limited, Vancouver (L.G., Feb., 1951, p. 190).

4. The Canadian Communications Association, Local No. 6, Radio and Cables Department, ACA-CCL, on behalf of a unit of operating and engineering employees of the Canadian Overseas Telecommunication Corporation (L.G., Feb., 1951, p. 190).

5. The Canadian Communications Association, Local No. 6, Radio and Cables Department, ACA-CCL, on behalf of a unit of clerical employees of the Canadian Overseas Telecommunication Corporation (L.G., March, 1950, p. 346).

6. The Brotherhood of Locomotive Firemen and Enginemen, on behalf of a unit of employees of the Canadian National Railways (Atlantic Region, Newfoundland District), comprising locomotive firemen, helpers, hostlers, and hostler helpers (L.G., Feb., 1951, p. 190).

Representation Votes Ordered

1. The Railway Station Employees' Local 526, Montreal, of the Hotel and Restaurant Employees and Bartenders International Union, applicant, and the Canadian Pacific Railway Company (Windsor Station restaurant personnel, Montreal), respondent (L.G., March, 1951, p. 346). The Board ordered the vote following an investigation of the application.

2. The Seafarers' International Union of North America, Canadian District, applicant, Victoria Tug Company Limited, Victoria, B.C., respondent, and the West Coast Seamen's Union (Canada), intervener (L.G., Feb., 1951, p. 190). The Board ordered the vote following an investigation of the application, the names of the applicant and intervener to appear on the ballot.

3. The Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen, applicants, and the Canadian National Railways (Atlantic Region, Newfoundland District), respondent (L.G., Feb., 1951, p. 190 and Jan., 1951, p. 55). The vote of the locomotive engineers affected was ordered by the Board following investigations of the application and a public hearing of the parties concerned, the names of both organizations to appear on the ballot.

81108—5

Applications for Certification Received

1. The National Association of Marine Engineers of Canada, Inc., on behalf of marine engineers employed on vessels of the British Columbia Steamship Company Limited, Vancouver (Investigating Officer: D. S. Tysoe).

2. Malt and Grain Process Workers (Local 105, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America), on behalf of employees of the Red River Grain Company Limited, St. Boniface, Manitoba (Investigating Officer: J. S. Gunn).

3. The National Catholic Syndicate of Longshoremen of Sorel, Inc., on behalf of longshoremen employed by the Eastern Canada Stevedoring Company Limited in the loading and unloading of vessels at Sorel, P.Q. (Investigating Officer: L. Pepin).

4. Local No. 38-163, International Longshoremen's Association, on behalf of longshoremen employed by General Sea Transportation Limited in the loading and unloading of vessels in the port of Vancouver (Investigating Officer: D. S. Tysoe).

5. Local No. 1, Flour and Feed Workers' Union, on behalf of employees of Great Star Flour Mills Limited, St. Mary's, Ontario (Investigating Officer: R. L. O'Neill).

6. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of freight handlers employed at Pointe au Pic, P.Q., by the Clarke Steamship Company Limited, Montreal (Investigating Officer: L. Pepin).

7. System Division No. 7, Order of Railroad Telegraphers, on behalf of a unit of employees in the Communications Department of the Canadian Pacific Railway Company (Investigating Officer: R. H. Hooper).

8. Detroit Local, American Federation of Radio Artists, on behalf of radio announcers employed by the Western Ontario Broadcasting Company Limited in the operation of radio station CKLW, Windsor, Ontario (Investigating Officer: R. L. O'Neill).

9. Division No. 282, Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of garage employees of the Quebec Central Transportation Company, Sherbrooke, P.Q. (Investigating Officer: C. E. Poirier).

10. Local No. 507, International Longshoremen's and Warehousemen's Union, on behalf of first aid attendants employed by H. King Limited on board vessels in the ports of Vancouver and New Westminster, B.C. (Investigating Officer: G. R. Currie).

Applications for Revocation of Certification Received

During the month, the Board received from S.S. Texaco Brave, Limited, S.S. Texaco Chief, Limited, and S.S. Texaco Warrior, Limited, applications for the revocation of decisions certifying the Canadian Seamen's Union as the bargaining agent of unlicensed employees of each of the Companies.

Application Under Section 19 Received

During the month, the Board received from the Brotherhood of Railroad Trainmen an application for an amendment to the provision prescribed on April 24, 1946, by the Wartime Labour Relations Board for the final settlement of differences concerning the meaning or violation of the collective agreement between the Brotherhood and the Wabash Railroad Company.

Conciliation and Other Proceedings Before the Minister of Labour

Conciliation Officer Appointed

On February 19, the Minister appointed a Conciliation Officer to deal with a dispute between Canada Steamship Lines and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, affecting seasonal waterfront freight handlers of the Company at Fort William and Port Arthur (Conciliation Officer: R. H. Hooper).

Settlements Effected by Conciliation Officer

1. On February 12, the Minister received a report from R. Trépanier, Conciliation Officer, indicating the settlement of matters in dispute between Trans-Canada Air Lines and the Canadian Air Line Flight Attendants Association (L.G., Feb., 1951, p. 193).

2. On February 19, the Minister received a report from R. H. Hooper, Conciliation

Officer, indicating the settlement of matters in dispute between DeLuxe Transportation Limited, North Bay, Ontario, and the Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., March, 1951, p. 346).

Conciliation Board Appointed

On February 14, the Minister appointed a Board of Conciliation and Investigation to deal with matters in dispute between the Gatineau Bus Company Limited, Hull, P.Q., and Division 591, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. The Board was appointed following receipt of the report of R. Trépanier, Conciliation Officer (L.G., March, 1951, p. 346).

Conciliation Board Fully Constituted

The Board of Conciliation and Investigation appointed by the Minister on December 27, 1950, to deal with matters in dispute between the Alberta Wheat Pool, Vancouver and Local No. 333, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America (L.G., Feb., 1951, p. 193), was fully constituted on February 8 with the appointment of G. E. Street, Vancouver, as Chairman. Mr. Street was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, J. P. MacKenzie and James Bury, both of Vancouver, who had previously been appointed on the nominations of the company and union respectively.

Conciliation Board Reports Received

1. On January 24, the Minister received the majority report and on February 7 the minority report of the Board of Conciliation and Investigation appointed to deal with matters in dispute between Canadian Pacific Air Lines Limited and the Canadian Air Line Pilots Association (L.G., July, 1950, p. 1044). The texts of the reports are reproduced below.

2. On February 10, the Minister received the majority and minority reports of the Boards of Conciliation and Investigation appointed to deal with methods in dispute between the Canadian Press and the American Newspaper Guild and between Press News Limited and the American Newspaper Guild (L.G., Dec., 1950, p. 2054). The texts of the reports are reproduced below.

Conciliation Board Reconvened

On February 26 the Minister reconvened the Board of Conciliation and Investigation which had dealt with matters in dispute between Local No. 13173, District 50, United Mine Workers of America, and Eldorado Mining and Refining (1944) Limited, Port Hope, Ont. (L.G., March, 1951, p. 347). The Board was reconvened on the joint request of the parties to the dispute, who desired clarification of the recommendation of the Board concerning shift differentials.

REPORT OF BOARD in dispute between

Canadian Pacific Air Lines Limited,
and
Canadian Air Line Pilots Association.

On February 7, 1951, the Minister of Labour received majority and minority reports from the Board of Conciliation and Investigation appointed to deal with a dispute between Canadian Pacific Air Lines Limited and the Canadian Air Line Pilots Association (L.G., July, 1950, p. 1044).

The Board was composed of J. E. Eades, Chairman, J. G. Gould, company's nominee, and Ian Cameron, employees' nominee. All members of the Board were of Vancouver.

The text of the Board's majority and minority reports are reproduced herewith.

The Board was appointed by the Hon. the Minister of Labour under date of March 20, 1950 and the Company having recommended the appointment of John Groves Gould of Vancouver, and the Pilots Association having recommended the appointment of Frank Robert Evans, K.C. of Winnipeg, the Minister on the 2nd of May, 1950 appointed James Edwin Eades as Chairman. The Winnipeg flood disaster at this time prevented Mr. Evans and the officers of the Pilots Association from attending a hearing and the parties agreed from time to time to delay same. At a later date Mr. Evans found that he could not be available and on August 15, 1950 on the recommendation of the Pilots Association the Minister appointed Mr. Ian Cameron to the Board in the place and stead of Mr. Evans.

A preliminary meeting of the Board was held on August 22, 1950 at Vancouver at which the members were sworn, the appointment of the Board and the appointment of the Chairman were filed, procedure was determined and after consultation with the representatives of the parties, place, dates and times were selected for the hearings. Sittings commenced September 5, 1950 at the Court House, Vancouver, B.C. and continued through to September 8. The Pilots Association was represented by its counsel, Walter C. Owen, Esq., K.C. and its President, Captain C. R. Robinson, and its Executive Vice-President, Mr. A. R. Eddie, and Captain H. O. Madden and Captain M. Knox were in attendance. The Company was represented by W. G. Townley, Esq., its General Manager of Operations, and by its solicitor, Mr. J. Clark, with Mr. K. Daykin, Manager of Personnel, Mr. H. Holleck Kenyon, Assistant Manager of Flight Operations, Mr. J. Gilmer, Assistant Comptroller, Mr. C. H. Pentland, Manager of Flight Operations, and Mr. F. Spencer of its Department of Public Relations in attendance. Both sides were given full opportunity to present their respective positions and to call evidence. Briefs were filed and a very large number of exhibits were filed and additional arguments submitted.

Following the sittings the Board conferred and was pleased to request the Chairman to consult with the representatives of the parties with a view to reaching an agreement satisfactory to both sides. The Chairman consulted with the representatives of the Pilots Association and the Company separately on the 11th, 12th and 13th days of September but although the ground appeared to be narrowed no agreement could be reached.

The members of the Board conferred on numerous occasions viz. September 27, October 4, October 6, October 19 and November 8. Delays were occasioned through members of the Board being engaged on other matters from time to time and being otherwise unable to attend but were with the knowledge and full approval of both parties which expressed the desire that ample opportunity should be given to the Board to canvass the issues and endeavour to reach a unanimous conclusion. The Minister, upon the request of the Chairman, was pleased from time to time to extend the time within which the Board should make its report and recommendations.

It was then reported to the Board that the Company purposed using four-engined equipment. Although the question of hours and wages for Canadair IV was dealt with in the material filed and had been discussed before the Conciliation Officer these questions by agreement were not argued before the Board since the Company did not contemplate using four-engine planes. The Company had now purchased two D.C.4 aircraft and intended using same domestically. The Board at the request of the parties re-convened the hearings but it was not until December 14 that the parties could be brought together. Further briefs were then presented by the Pilots Association and by the Company with some further exhibits and further additional argument. The Board has subsequently met on several occasions and it is regretted that the recommendations of the Board are not wholly concurred in by Mr. Cameron who is filing a minority report.

At the outset the Pilots Association took the position that during negotiations and before the Conciliation Officer agreement had been reached upon certain matters which were to be included in the new agreement. These matters were as follows:—

1. Definition—Captain, First Officer, Second Officer.
2. Certain aspects of hours of service (domestic).
3. Expenses and income tax allowance for pilots permanently transferred to bases abroad.
4. Seniority.
5. Seniority list.
6. Loss of seniority.
7. Filling of First Officer vacancies on domestic.
8. Clauses covering definition of mountain terrain.
9. Clause covering reserve captain length of service for pay purposes.

The Company took the position that these matters represented substantial concessions and were agreed upon only tentatively and upon the basis that they should be included in the revised agreement only if full agreement was reached on all points. After discussion it was finally agreed by the Company that the said matters (called Appendix A being Exhibit 18 in the Pilot Association's brief and Exhibit 11 as marked on the hearing) should constitute a firm agreement without prejudice to the issues set out in the Company's brief (page 8, Paragraph 18) and subject to elimination of Section 2 of said Appendix A dealing with Canadair IV. One of the said issues referred to as an exclusion by the Com-

pany deals with hours of service and since the Company has now two D.C.4 ready for service which may be flown domestically the Board is of opinion and recommends that all of the said matters called Appendix A should be included in the proposed new agreement between the parties and for better understanding these matters are quoted hereinafter in the words of the said Appendix save with respect to definition of four-engine aircraft:—

"Section 1—Definitions

(*a*) As used in this agreement, the term "Pilot" means Captain, Reserve Captain, First Officer and Second Officer, as defined herein.

(*b*) *Captain* means the pilot member of the flight crew first in command of the flight and who is responsible for the manipulation of, or who manipulates, the flight controls of an aircraft while under way, including take-off and landing of such aircraft, and who is properly qualified and designated by the Company to serve as, and holds currently effective Department of Transport certificates authorizing him to serve as such Captain.

(*c*) Unchanged.

(*d*) *First Officer* means the pilot member of the flight crew second in command of the flight and any part of whose duty is to assist or relieve the captain in the manipulation of the flight controls of an aircraft, and who is properly qualified to serve as, and holds currently effective Department of Transport certificates authorizing him to serve as such First Officer.

(*e*) *Second Officer* means the pilot member of the flight crew, third in command of the flight, and any part of whose duty is to assist or relieve the Captain and First Officer in the manipulation of the flight controls of an aircraft while under way, including take-off, landing, and navigational duties of such aircraft, and who is properly qualified to serve as, and holds currently effective, Department of Transport certificates authorizing him to serve as such Second Officer.

Present (*e*) becomes (*f*), etc.

Section 2—Hours of Service

(*a*) No pilot shall be allowed to exceed the air hours specified herein; except as provided in sub-paragraph (iii).

(i)

	Twin Engine Domestic Operations	
	Flat Terrain	Mountain Terrain
In any calendar month	85	75
In any calendar year	1,020	900

(ii)

	Four Engine Domestic Operations
In any calendar month	75
In any calendar year	900

(iii) It is mutually agreed that the monthly air hours may be extended to a maximum of 95 hours for twin engine flat terrain operations and to 84 hours for twin engine mountain operations and four engine domestic operations, but in no case shall the air hours in any calendar year exceed the amounts specified in sub-paragraphs (i) and (ii) of this Section.

(*b*) Part year maximum flying hours shall be based on:—

(i) For twin engine domestic flat terrain operations, 85 hours for each full month and 2:45 for each day of any part month remaining in the year at date of assignment to such operations.

(ii) For twin engine domestic mountain terrain operations and four engine domestic operations, 75 hours for each full month and 2:30 for each day of any part month remaining in the year at date of assignment to such operations.

Present (*b*) becomes (*c*).

(*d*) As present (*c*) unchanged, except specify Section 1, paragraph (*j*) instead of *Section 1*, paragraph (i).

(*e*) The Company specifically agrees that when a pilot reaches his maximum air hours as provided in paragraphs (*a*) and (*b*) of this Section he shall be relieved of all duty with the Company until the commencement of his next month or year as the case may be.

Section 3—Expenses

(*e*) Pilots permanently transferred to bases outside the territorial limits of Canada will be paid cost-of-living differential as established from time to time by Company policy, and the Company will advise the Association of its action in this regard, and will give consideration to any representations the Association may wish to make in this respect.

(*f*) When a Pilot's income taxes, on his compensation received from the Company, are increased by being based outside the territorial limits of Canada, the Company shall pay the difference between such taxes and the income taxes he would have paid on the same amount of compensation as a resident of Canada.

Section 4—Seniority

(*d*) When two or more pilots are employed by the Company as pilots on the same day, they shall be placed on the Pilots System Seniority List in accordance with the date of their first flight as an assigned pilot with the Company. If the date of their first flight is the same, the time (CMT) of departure shall apply.

Present (*d*) to become (*e*), etc.

Section 5—Pilots System Seniority List

(*a*) The Company shall on April 1 and November 1 of each year post on its bulletin boards at all stations where pilots are based a "Pilots System Seniority List" which will embrace all Domestic and Pacific Lines Pilots. The list shall be compiled in the following manner:—

Section 7—Loss of Seniority

Delete present (*b*) and substitute:

A pilot laid off through reduction of forces shall continue to accrue seniority for a period of ninety days from the date of layoff, and thereafter if still laid off shall cease to accrue seniority but shall retain his accumulated system seniority.

Section 9—Filling of Vacancies

(*f*) First Officer vacancies shall not be bulletined beyond one step.

(*l*) The permanent captain assignments at each base and the pilots holding them shall be posted by the Company at all bases where pilots are stationed, and such lists shall be brought up to date at the commencement of each quarter.

Section 17—Rates of Pay—Domestic Operations

(*a*) (iii) Amended to read:—

Mountain terrain shall apply to routes now flown between Fort Nelson, B.C., and Fairbanks, Alaska, and between Vancouver, B.C., and Fort Saint John, B.C. and/or other comparable terrain as mutually agreed upon between the Company and the Association, prior to the inauguration of such new flying routes.

(*b*) Add new subsection (iii) to read:—

A Reserve Captain's length of service for the purpose of computing the Captain's rate of pay to which he is entitled shall be calculated on the basis of the number of days paid as Captain or one-half the total length of service from the date of designation as Reserve Captain, whichever is the greater.

General

It is agreed that the Company will furnish the Association with letters covering sick leave, and pilots missing, interned, or prisoners of war.

It is also understood that although the wording covering day-to-day expenses has not been changed, the amounts allowed for meals, etc., and future changes thereto will be the subject of agreement between the Company official concerned and the CALPA local chairman for each pilot division, and that allowance will be made in those amounts to cover gratuities."

The main issues in dispute fall into the following categories:—

1. Hours of service including a consideration of flying hours credit for vacation.
   (*a*) Domestic.
   (*b*) Pacific.
   (*c*) Flying hours credit for vacation.
   (*d*) Deadheading.
2. Salaries.
   (*a*) Domestic.
   (1) Captains and First Officers 2-engine equipment.
   (2) Captains and First Officers 4-engine equipment.
   (*b*) Pacific.
   (1) Captains.
   (2) First Officers.
   (3) Second Officers.
   (*c*) Reserve Captains.
3. Allowance for Uniforms.
4. Life insurance to be provided by the Company.
5. Limitation of time on overseas service.
6. Retroactivity of Pay increase if any domestic and of established rate Pacific.

The Pilots Association stated that the question of hours of service is inextricably bound up with that of salaries. Certain matters that require consideration do affect both but an attempt will be made to consider hours apart from salary. In the general economy of Canada present salaries of pilots stand comparatively very high and hours of service are comparatively very low. The former will be dealt with under the heading of salaries.

1. ***Hours of Service***

The reason for short hour requirements is to ensure that the pilot at all times in the operation of an aircraft is fully alert to appreciate flying conditions and the condition of his aircraft. Much has been written on the question of flight time limitations. A memorandum prepared for the Department of Air Transport by Mr. A. R. Eddie, Executive Vice-President of the Pilots Association, was filed with this Board in which it is stated:—

"The piloting of aircraft in scheduled service involves intelligent action of the type which depends upon an insight into the connection of things and events and upon their casual relationships; the exercise of vigilant forethought, rapid and accurate movement, split second timing, muscle co-ordination and integration involve essential nervous processes which are most extravagant in energy expenditure.

The pilot's duties, most calculated to induce mental fatigue, are also of the type which suffer most from its effects. Where in industry, fatigue causes a falling off in production, in the case of the pilot the usual symptoms, inability to pay attention, failing memory and reduced capacity to concentrate and co-ordinate, may have fatal results.

Flying consists of periods of routine interspersed with crises of intense activity. During the former it is mainly necessary to maintain a constant watchfulness, and any associated strain comes from inability to make significant changes of position and from such things as noise, vibration, altitude and variations from optimum temperature and humidity."

"As an Association of professional Air Line Pilots, we subscribe to the well established basic maximum of 85 hours per month for a standard airliner such as the DC-3, flying over flat terrain. We have also established with the air line companies by agreement and by custom that 75 hours should be the basic maximum per month for mountainous terrain and for aircraft of the type of the DC-4M.

While holding to these principles we have, in sympathy with the economic desires of the air line companies, lengthened the unit limitation period from the month to a quarter, and in some cases to a year, in order that the companies may make good an average production of flying hours per pilot coinciding as nearly as possible with the maximum."

"Hours of service on overseas routes present a slightly different problem owing to the length of runs. With present aircraft speeds, too strict limitation over short periods would work a definite hardship on the companies, and there is probably more justification for lengthening the unit period on such operations provided that good judgment is observed in avoiding dangerous crew fatigue. Particularly must there be no pressure, either explicit or implied, on a captain to commence a flight or to complete it once started, if in his judgment he or his crew are too tired to do so."

"The International Federation of Air Line Pilots Associations, of which this Association is a member, recently ratified the following basic maximum hours of work for pilots:—

	Hours
Day	9
Week	36
Month	85
Quarter	255
Year	935

A note is attached to the effect that 'it is felt that this Resolution should be elastic at the present time.'"

On the other hand it appears that the generally recognized limit of 85 hours per month and 1,020 per annum were fixed by an arbitration board in the United States in 1933 and afterwards approved by legislative enactment when flying conditions were considerably different than they are today. Mr. Holleck-Kenyon, who gave evidence before the Board, has been a commercial pilot for most of his adult life and is one of the most experienced pilots in Canada. In the Spring of 1930 he flew what was known as the Prairie Air Mail route between Moose Jaw and Calgary and continued to fly that flight for several years. At that time single engine aircraft were in common use and all had open cockpits. The pilot sat behind a small windshield and the primitive heating arrangements were quite inadequate for the prairie winter. Aids to navigation for the years 1930 to 1932 consisted of flashing beacons which while of considerable assistance on fine nights were of no value in bad weather. Weather information consisted of telegraphed reports from railway agents on the route ahead. At Moose Jaw there was a weather report from the agent at Swift Current and at Swift Current a report from the agent at Medicine Hat and at Medicine Hat a report from Calgary. The operating practice then was to take off and endeavour to proceed until forced down by weather conditions. In one flight out of every ten weather forced the plane to land and the objective in such case was to try to land somewhere where the mail could be placed on a train. In 1932 radio ranges were installed and the pilot was supplied with low power receivers but since no training was given in their use the pilots either did not use them at all or obtained little assistance. There was therefore in 1933 no instrument flying while today less than one per cent of flights are affected by weather conditions either at the terminals or in the air. In the opinion of Mr. Kenyon the larger and more modern aircraft are easier to take off, easier to fly and easier to land than the smaller aircraft and the aids that have been introduced in many ways make the task of the captain easier.

It was argued by the Company that definite tangible nerve strain was imposed on the pilot in 1933 whereas today with the technological advances that have taken place in flying it is no longer considered to be hazardous. Flying is a safe method of transportation. We now have reliable engines, pressurized aircraft, reliable aids to navigation, many more and much improved airports, reliable and extended meteorological information.

It may be that the speedier craft of today present problems to the pilot which were lacking in the older days of aviation and it may be that the very technological improvements in the craft itself have some bearing on fatigue. Figures were given of photographic improvements referred to by Dr. McFarlane in his book "Human Factors in Air Transport Design" showing that during an approach and landing of a B.29 in a period of approximately 5 minutes 116 movements are required of the pilot. The average time for each motion ranged from 1·8 seconds to 3·8 seconds and on the accuracy and timing of many of these motions the safety of the aircraft and of all on board depend. Undoubtedly particularly in take-off and landing some of these motions must be made exactingly and the pilot must be alert.

Whatever the relative "wear" on a pilot may be as between the present and the past there has not been any serious effort by operating companies to increase the number of permissible flying hours of its pilots, and speaking generally it appears that the tendency is rather to reduce the hours than to increase them with the advent of the speedier craft. It may well be that with the introduction commercially of turbo-prop and jet aircraft that the whole problem will have to be carefully canvassed.

Since, however, domestically the Company and the Pilots Association have agreed on an 85-hour month plus 10 hours permissible overtime when flying flat terrain and 75-hours monthly plus 10 hours permissible overtime when flying mountain terrain (subject to such provision as may be recommended by way of vacation and

deadheading allowances) there remains only the question of hours of service to be allocated to pilots engaged in overseas operations.

(*b*) *Hours Pacific*

The Company takes the position that there is no sound reason for restricting the hours of service of pilots on trans-oceanic service any more severely than of pilots flying domestically over flat terrain. All the present equipment is pressurized and the aircraft are equipped with automatic pilots for use on the long uninterrupted flights. Airports which are used are exceptionally well equipped and aids to aviation more elaborate than anything available on domestic routes. In addition the captain has two other officers to assist him as compared with one on domestic service. The Company suggests that the hours be fixed at 1,020 per annum. The Pilots Association requests that the hours be fixed at 900 per annum plus a permissible overtime of 120 hours which would indicate that the Pilots do not feel that the time is excessive. This Board therefore recommends that the maximum number of hours of service permitted for pilots flying Pacific duty be 1,020.

In considering further limitation of hours in overseas operation to quarterly and monthly the normal operating procedure should be reviewed. Two operations are scheduled by the Company, one from Vancouver to Sydney called South Pacific, and one Vancouver to Hong Kong called North Pacific. On the South Pacific flight the pilot leaves Vancouver at 9 a.m. Wednesday, flies directly to Honolulu or makes a fuel stop at Portland or San Francisco and arrives at Honolulu on the same day at 9 p.m., he stops over 35 hours or until 8 a.m. Friday and proceeds to Canton Island where there is a stop-over of one hour and thence a further 5 hours and 20 minutes to Fiji arriving at 9 p.m. on Saturday (the International Date Line is crossed so that outbound a day is lost and inbound a day is gained). There is a stop-over of 12 hours during the night and he leaves Fiji at 9 a.m. Sunday arriving at Sidney at 3:30 p.m. in the afternoon. The pilot remains in Australia from Sunday afternoon until Tuesday morning and departs again for Fiji leaving the following morning for Canton Island where the plane is refueled and proceeds to Honolulu arriving at midnight Tuesday. He remains at Honolulu until midnight of the following night and then departs to Vancouver. If winds are favourable the latter flight is about 12 hours, if unfavourable and he proceeds by way of San Francisco he will normally arrive in Vancouver about 6 p.m. Thursday afternoon.

A pilot is therefore away on the South Pacific flight for a period of eight days during which his flying time is about 72 hours. Apart from some training and other special duties the pilot is then off for twenty days. It will therefore be seen that a limitation of 85 hours per month would mean a normal 72 hours per month unless the South Pacific pilot could be placed on other duty. It should be said that at the present time during the Korean situation South Pacific pilots are occasionally used for an emergency flight to Shemya.

On the North Pacific route the position is different and from it has arisen a problem of deadheading which is dealt with later. Normally the flight leaves Vancouver at midnight on Monday flying via Shemya, the second island in the Aleutian chain, to arrive at Tokyo at 8:30 p.m. on Tuesday (the International Date Line is crossed so, as in the South Pacific flight, one day is lost here outbound and one day gained inbound). It leaves Tokyo two hours later and arrives at Hong Kong at 7 a.m. Wednesday. Returning the flight leaves Hong Kong at 11:30 a.m. Thursday and arrives at Tokyo at 10:30 p.m. and then by Okinawa to Shemya and thence to Vancouver arriving at 8 a.m. Friday. Normally there were no lay-overs on this route except at Hong Kong until the Korean airlift, in which the Company takes part, made it necessary to sleep a complete crew at Tokyo and a Captain and First Officer at Shemya. These crews are flown to these points as passengers. The now normal procedure in the Orient is that a crew remains there for a month. The Company provides hotel accommodation and other expenses. The pilots fly between Tokyo and Hong Kong—a 9-hour flight—lay-over at Hong Kong for 24 hours and make the return flight to Tokyo where they stay for a week and then make another flight to Hong Kong. After four trips, which are made in a period of a month, the air crew returns to Vancouver as passengers and a new crew takes over. The flying time at Tokyo is therefore about 72 hours. At Shemya the Captain and First Officer remain a period of about three weeks.

It is therefore a matter of considerable difficulty at the present time to work out a reasonable schedule which would restrict service to 85 hours per month and at the same time allow the Company to make use of the services of its pilots during the full

flying period. However, to leave the hour limitation on the annual basis might involve the pilots too heavily under abnormal conditions which continued for some time. It is therefore recommended that the maximum permissible flying hours be 265 per quarter and that at the present time they be not broken down to the monthly basis. It has been said that any quarterly or annual maximum might create a hardship under special circumstances and the Board recommends that the following be inserted in the agreement:—

"No pilot shall be allowed to exceed the air hours specified herein (except under extraordinary circumstances) and any question arising herein shall be deemed a grievance."

(*c*) *Vacation Credits*

The Pilots Association proposes that when a pilot is on vacation his flying time should be credited with two hours 45 minutes flying time each day if he is engaged on flat terrain and 2 hours 30 minutes each day if he is engaged on mountain terrain. The Company agrees that these credits be allowed against flying hours for the month in which vacation is taken but maintains that this time should be charged against the annual limitation of hours flown. The Company's position is that pilots receive abnormally high wages for working exceptionally short hours and cannot expect to retain this favoured position by further restricting the service they are prepared to render.

If effect were given to the Company's position the pilots would not be given effective holidays or effective holiday pay and the Board recommends that the limitation of hours on flat terrain and overseas be reduced by 38½ hours per annum to 981½ hours and mountain terrain from 900 hours to 865 hours per annum.

(*d*) *Deadheading*

As mentioned above this problem applies only to the North Pacific run. About 2½ times a year pilots are required to take a flight as a passenger of about 20 hours each way Vancouver to Tokyo and about twice a year Vancouver to Shemya. It is said that the problem of avoiding deadheading is much greater in an extensive system such as this which cannot be closely integrated and that if deadheading were not permitted or if there was allowance for deadheading time against flying hours the operation would have to be changed so as to require some of the pilots to live at their own expense at Tokyo and Shemya. Since most of the pilots are married and many have children of school age and living conditions at both of these places are unsatisfactory, especially at Shemya, it is said that the present method is to the advantage of the pilots as well as the Company. Only two airlines give full credits for deadheading. One is Trans-Canada Airlines and the other a small line known as Hawaiian Airlines operating out of Hawaii. Certain others give credits to First Officers under certain conditions.

The Board is of the opinion that every effort should be made to reduce and if possible to eliminate deadheading. It interferes with the time of the individual concerned and in effect he is giving his time to the service of the Company even though he is flying as a passenger and with passenger comforts. In this particular operation at this time the Board finds it difficult to place a definite restriction on the number of hours beyond which deadheading time should be credited to flying hours and recommends that the following be inserted in the agreement:—

"Every reasonable effort shall be made to avoid deadheading and if 150 hours per annum are exceeded such excess shall be credited to the annual quota of flying hours."

2. ***Salaries***

The Pilots Association requests:—

An increase in salary for Captains and First Officers flying twin-engine aircraft at present in use by the Company.

A new salary (none exists at present) for Captains and First Officers who will fly four-engine aircraft over domestic routes.

A new salary (none exists at present) for Captains, First Officers and Second Officers flying the Pacific.

It is admitted by the pilots that a halt must be called—and soon—in the upward spiral of wages and prices and that pilots are among the highest paid salaried men in Canada. It is said that he belongs in this fortunate group because of his importance to the operation of airlines, his technical ability and the weight of his responsibilities. But because of spiralling prices and other wages and salaries the position of the pilot in the economy of the nation has lowered while his relative value to the Company has increased. It is said that as aircraft increase in size the pilot accepts heavier responsibility, transports more passengers, more freight, more express and more air mail per aircraft flown. As aircraft increase in complexity in the pursuit of greater efficiency, speed, regularity and passenger comfort the technical knowledge and skill of the pilot has increased to keep pace. It is said further that hazard has increased in some cases on

domestic lines in that there are some instrument flying routes where other machines neither report their position nor are aware of the position of others and when CPA pilots let down on instruments below the ceiling these aircraft can—and in some cases do—give rise to danger of collision. The North Pacific route, too, is flown through difficult and dangerous weather conditions and these hazards have lately been increased by the proximity to the war area. Hazard also has increased on both North Pacific and South Pacific routes by the congestion arising from the phenomenally increased airway traffic due to the United Nations war effort.

In considering the question of hazard neither the Pilots Association nor the Company produced any figures that would guide in considering comparative accident frequency per air mile as of this date compared with earlier flying days. There is no doubt that air accidents are frequently spectacular and as such obtain much publicity. The recent accident which occurred during Christmas week near Penticton in British Columbia now under investigation in which the Captain and First Officer were killed while all of the fifteen passengers were saved undoubtedly will go down in the annals of commercial flying as a record of heroism in the face of almost certain death. The captain who goes down with his ship shows an inspirational fortitude but a pilot who so lands his craft that irrespective of almost certain injury or death to himself his passengers will have a more reasonable chance of escape deserves commendation far above ordinary praise. Yet from the point of view of comparative hazard scarcely two weeks previously two engines of the Canadian National Railways, one heading a passenger and the other a troop train, collided head on at Canoe in British Columbia within comparatively few miles of the place where the planes crashed. Again for comparative purposes it should be noted that it was published in the press recently that Vancouver Airport during the year 1950 handled an average of one thousand passengers per day.

The Pilots Association takes the position that its salaries should be higher in general than those paid by Trans-Canada Airlines and more in line with those paid by United and North-West Airlines which are United States operated companies. The Company takes the position that the difference between the United States and Canadian economy makes comparison impossible and that the history of Canadian Pacific Airlines and its present competitive position and the fact that TCA operates a "prestige service" makes the comparison with TCA unsound. At present, as is explained later, Captains on domestic lines of the Company are paid on what is called "formula type pay" i.e. they receive a fixed monthly sum together with flying pay which on flat terrain is on the basis of $5 per hour flown and on mountain terrain on the basis of $6.25 per hour. Formula type pay is also used by North-West Airlines but Trans-Canada Captains are paid on a flat rate basis and First Officers on all of these lines and most others are paid on a flat rate basis. The following are the Pilots Association proposals, the Company's proposals worked out on a flat rate, TCA's flat salary and North-West Airlines' formula salary reduced to flat with respect to domestic mountain terrain:—

CALPA PROPOSAL
Domestic Captain
(Flat Salary)
Mountain Terrain

	75 hrs.
1st year	$615
2nd year	665
3rd year	715
4th year	765
5th year	815

CPA PROPOSAL
Domestic Captain
Present Twin Engine Equipment
(Formula Salary)

9th 6 months		485	445
10th 6 months		510	475
11th 6 months		540	505
12th 6 months		570	535

The salaries of TCA pilots were investigated at length by a Conciliation Board appointed in February, 1948 under the chairmanship of Mr. Justice J. E. Adamson. The Board's report signed by the Chairman and Mr. R. D. Guy, K.C. reported its findings on August 10, 1948. The majority report is filed as part of Exhibit 18 being the Company's Exhibit 7, and therein it is stated as follows:—

"During the argument and in the comprehensive briefs which were filed, not one word in criticism or complaint was made as to working conditions. It must be found as a fact that the TCA pilot enjoys working conditions, advantages and benefits, together with a degree of security difficult to equal anywhere in any occupation.

To become a pilot an expensive investment in a formal education is not necessary. TCA does not insist on a fixed standard of education as a requirement for acceptance as a pilot trainee. Stress is laid on the ability to perform the duties assigned and not a scholarship. An analysis of the educational qualifications of TCA's pilots shows that:—

1.27% have grade 7 or 8 standing.
6.30% have grade 9 or 10 standing.
73.30% have grade 11 or 12 standing.
17.53% have some university education, and
1.6% are university graduates.

100%

This is a most moderate and inexpensive education and takes few if any of the adult years. No profession, and very few if any of the more highly paid positions in business or industry are attained with so little academic education and so early in life. It has been submitted that a pilot's flying life ends earlier than employment in most other vocations. *In considering this point it should be remembered that it may and usually does commence earlier.*"

Quoting further from the said Conciliation Board's report:—

"To sum up, to be a pilot with TCA does not require large intellectual attainments or high educational standards. He must be healthy and have all his faculties. He must be a personable young man of character. He must have emotional stability, good judgment, and above all he must be steady, reliable and dependable."

and again:—

"One reason urged for high wages for flying personnel is that flying life expectancy is shorter than in business and industry. To what age pilots generally may be able to carry on as such is a moot question. The business of flying on its present scale is of such recent growth that statistics do not tell the whole story. TCA's exhibit 23.1 shows the age distribution of pilots in U.S.A. owned aeroplanes. That exhibit is, in part, as follows:—

Age Groups	All Airline Pilots Number	Per Cent
24 and under	269	3.7
25-29	2,869	39.6
30-34	2,169	30.0
35-39	1,232	17.0
40-44	464	6.4
45-49	139	1.9
50 and over	95	1.4
Total	7,237	100.0

Considering the recent growth of the flying industry it is to be expected that the percentages of those in their 40's and 50's will greatly increase in the years to come.

The average of TCA's Captains is 29.8 years and the average age of First Officers is 26.8 years. These low averages are due to the fact that TCA is young and that commercial flying in this country is a comparatively recent development."

and again:—

"It can be stated with certainty that the present flying life expectancy of a pilot is much longer than was that expectancy when TCA pilots' wages were first fixed in 1938. That element, therefore, as justifying high salaries is substantially reduced."

"Because of this situation commercial airlines had to compensate for this Risk or Hazard by offering high wages.

Today, commercial airlines are equipped with the most modern aircraft, navigation, communication and airport facilities.

The hazard involved in flying a modern aircraft on a modern airline is no greater than the hazard in occupations representative of many major industries in Canada and should have little weight in the consideration of pilots' wages."

Age Groups	CPA Active Captains as at May 1/50 Number	Per Cent
25-29	1	3.03
30-34	10	30.31
35-39	11	33.33
40-44	8	24.24
45-49	1	3.03
50 and over	2	6.06
	33	

Information before the Board indicates that no sufficient study has been as yet made to determine with any accuracy what a flying life may be.

With respect to First and Second Officers, the latter of whom are new employees employed as navigators, similar figures in respect to educational qualifications for the Company are as follows:—

5.4% have grade 7 or 8 standing.
17.9% have grade 9 or 10 standing.
58.9% have grade 11 or 12 standing.
14.3% have some university training.
3.5% have graduated from university.

The cost of flying training if obtained by an applicant at his own expense before seeking a position with the Company is shown in Exhibit 30 as $1,076 in order to obtain a commercial licence and an additional $340 or 45 hours of link training and dual flying to obtain instrument rating. For the past eight years pilots employed, with few exceptions, learned to fly in the Armed Forces. This policy has now changed and pilots of 21 years and upwards are employed. The last few have ranged in age from 22 to 28 and the Company now is endeavouring to employ pilots of 21 who have the necessary certificate qualifications. The time to obtain the hours of flying experience is estimated as being within three or four months. The Company is very particular about the medical fitness of a candidate and from the many hundreds of applicants only a comparative selected few are interviewed and of those many are found unfit. Candidates are put through a very stringent examination by the medical officer for the reason, it is said, that the Company deems it necessary in the interests of safety and from the pilot's point of view he would not want a latent condition to develop which would prevent him from flying after he has spent some years as a pilot and reached a highly satisfactory position. After an interview and a short theoretical assessment examination if the candidate is considered suitable he then goes to the medical examiner. At this point the percentage of rejects would run about forty per cent. Then if a vacancy occurs the candidate is offered an appointment and he undergoes a series of specialized medical examinations, examinations on operation, regulations and traffic and a course with respect to flying the particular aircraft upon which he will be engaged. The entire procedure takes two or three weeks. The candidate is taken on payroll at the commencement of ground training.

Comparisons with other professional occupations show that the admission by the pilots of their favoured position in respect to salaries is fully warranted. A somewhat related comparison would seem to be with ships' officers and here the favoured position of the pilot is amply demonstrated. A First Officer of a coastal steamship earns from $245 to $267 per month as compared with an airlines First Officer who receives $370 per month after two years' domestic service and up to $460 per month on Pacific operations. The Ship's Officer is also required to be certificated and only reaches his position after years of service as third and second officer. In coastal duties Captains in charge of the larger vessels of the Canadian Pacific receive from $344 to $410 per month as compared with airline captains of from $605 per month domestic to the proposed maximum of $1,000 on Trans-Pacific flights. The steamship captain is in command of a ship carrying a crew from 110 to 150 and up to 1,500 passengers and costing at present day prices in the neighbourhood of three to four million dollars. The steamship captain has normally served from 25 to 30 years before taking command of a passenger ship. His responsibility in the coastal service includes an intimate knowledge of the many intricate and dangerous coastal channels under all conditions of weather and tide. He has navigational assistance but during fog and particularly in snowstorms navigation is extremely dangerous and nerve-racking although modern radar equipment where supplied is of great assistance. The responsibilities of the Master of a trans-Atlantic liner include elaborate navigational requirements and they are greater than the responsibilities of Captains in coastal service. The airlines Captain, however, rises after a few years service to a wage level considerably above that applicable to the master of the largest passenger liner in the Canadian Pacific fleet.

As against the problems which are inherent in an aircraft and which are not common to both, a ship's officer has disciplinary authority over the crew and is responsible in an emergency for the conduct and safety of a large passenger complement.

Nevertheless, young men of high intelligence, high physical condition and above average in personality are selected from hundreds of applicants. The pilot must maintain himself at all times in first-class physical condition and be alert to conditions which might arise. The splendid standard that has been maintained to date in the Canadian Pacific Airlines should be continued and this Board is not of opinion that the present salaries should be lowered but rather that some increase should be given in domestic service and a reasonable salary rate fixed in Pacific service.

As has been said, the Company took the position that comparison in wage or salary rates paid to pilots in the United States and those paid in Canada is not proper. In 1943 the question of comparison of wage rates between Canada and the United States came before the National War Labour Board and in its reasons for decision found in Case File N-1300 Decision R.D. 242 it was said:—

"In order to make proper comparisons with wage rates paid in similar jobs, positions or occupational classifications in countries other than Canada there would be required an involved and detailed study and examination of and inquiry and investigation into very many factors and conditions which were never contemplated by the Order. The whole policy of control of wages and prices in this Country is entirely distinct and unrelated to the economy of the United States."

In 1948 a Board of Conciliation under the chairmanship of Mr. Justice J. C. A. Cameron dealing with the same question in regard to railway rates of pay stated as follows:—

"For many years the request for parity with United States wage rates has come before Boards of Conciliation and Investigation and before the National War Labour Board. So far as we are aware, it has always been rejected. This Board is also of the opinion that there is no ground for adopting it on the present application."

The minority report made by the employees' nominee agreed in the following:—

"It may well be that as the economies of the two countries and the development of the Canadian railways evolve in the future a return to the principle of parity may become warranted and, indeed, justified. At the present time, however, the disparity in the economies of the two countries of their respective railways, and indeed of the wage structures, have been so altered that parity in wage rates, as requested, though having some moral force, would appear to be difficult and impractical."

Mr. Justice J. O. Wilson appointed as chairman of a board of conciliation in 1950 dealing with the same question of railway wage rates stated as follows:—

"It is abundantly clear that wages of all workers, not only of railroad employees but of all classes of wage-earners are higher in the United States than they are in Canada. The same is true of the salaries and earnings of executives and professional men in the two countries. The fact is that the United States possesses a richer and more mature economy than Canada and that, presently at any rate, our production is not such as to afford us so high a standard of living as there is in the United States. Under present conditions sensible Canadians will, as they must, accept the fact that the earnings of the average Canadian are less than those of the average resident of the United States.

If International comparisons of wage levels are to be made, the rates of wages in other countries with less mature economies than that of the United States might be compared with those in Canada. Australia, New Zealand and South Africa are examples which spring to the mind. If these comparisons were made, it would, we think, be found that Canadian wage levels are a matter for pride. To select, as the only standard of comparison, the wages paid in what is admittedly the richest country in the world, does not appear to us to be sound."

In comparing Canadian pilots' wages with rates of United States pilots, in the report of the Conciliation Board under the chairmanship of Mr. Justice Adamson hereinbefore referred to he stated as follows:—

"When TCA first employed pilots, the wages paid, no doubt, approximated what pilots in the U.S.A. earned. At that time the Canadian economy and the economy of the U.S.A. were close together. Today they are far apart.

The decisions of the National War Labour Board and Canadian Conciliation Boards have recognized that there are fundamental differences in the Canadian and American economies, and have unanimously held that any comparison of wages should be confined to wages in Canada."

It is not necessary to deal at length with the reasons for the difference existing in the two economies but the quotations above mentioned amply demonstrate the position taken by the Company and with this contention this Board agrees.

The rates of pay paid to pilots by companies operating out of Australia, Great Britain, France and other countries are considerably below those paid in the United States or in Canada.

The economy of these countries is not similar to that of Canada and therefore also forms no satisfactory basis for comparison.

The Company further argues that it is not sound to compare wage rates paid by Trans-Canada Airlines with those to be paid by a private operation. Trans-Canada Airlines is a government-owned operation. It provides air transportation domestically on selected monopoly routes and provides air transportation between Canada and other countries. The Company is not permitted to operate in competition with Trans-Canada; East-West routes domestically are reserved by legislation specifically for TCA. The Company came into being in 1942 by the consolidation of a number of previously independent operations i.e. Arrow Airways Lines Limited, Canadian Airways Limited, Dominion Skyways Limited, Ginger Coote Airways Limited, MacKenzie Air Services Limited, Prairie Airways Limited, Starratt Airways and Transportation Limited, Wings Limited, Yukon Southern Air Transport Limited and a controlling interest in Quebec Airways Limited. Letters patent were granted to Canadian Pacific Airlines Limited on January 31, 1942. Previously it had been government policy that no railway line could operate in the air field and then restricted operations were permitted. The routes mainly flown by the Company domestically are North and South. At the end of 1949 the Company owned thirty-six aircraft and during the year 1949 flew 4,350,498 revenue miles in domestic service and 419,811 revenue miles in Trans-Pacific service. Revenue passengers carried during this period were 125,984 on domestic and 842 trans-Pacific. TCA flew in domestic operations during 1949—16,364,733 revenue miles. Its domestic route mileage of 8,085 represents about thirty-nine per cent of the total in Canada while its revenue miles were nearly seventy-five per cent of the total revenue miles flown in domestic operations. TCA's financial results show a deficit in 1946 of $1,269,624 domestically increasing in 1949 to $1,419,444. Its deficit in trans-Atlantic was $136,303 in 1947 and increased to the sum of $2,898,149 in 1949. The Right Hon. Mr. Howe, Minister of Trade and Commerce, stated in the Company's Railway Committee on April 3, 1950 in answer to questioning as follows:—

"It is a prestige service in a way. If the travel increases we will be able to pull out of the red. If we can justify an increase in the number of aircraft we will probably make a much better showing."

And again:—

"In the 1948 reports it was said that until Canada has a larger population or until the basic costs of air transport are reduced international flying must be regarded primarily as a long-term investment. I think that is a fair statement."

And again:—

"All you can do is to keep fighting the deficit and to build up traffic as much as you can."

Canadian Pacific Airlines, being a privately-owned company, must operate on the basis of economic factors in order to become a profitable enterprise. It is by legislation not an integrated system but must be rather a series of disconnected operations scattered across the country.

In addition to handling a monopoly of the principal traffic routes in Canada and serving the principal centres (CPA being limited to North and South routes with one exception i.e. Vancouver to Calgary), TCA is directly associated with the carriage of mail. TCA on certain of its routes carries mail under contract with the post offices but other scheduled carriers only carry mail which is posted as air mail. First-class mail does not go by air on the routes of the Company but goes TCA. Again there are what may be described as hidden subsidies in respect of TCA. Airports are provided by the Department of Transport. Aids to navigation are also provided and staff to man the same. In many cases, such as at Williams Lake, Val D'Or and Rouyn, the Company must provide its own airport. In most cases radio ranges are provided by the Company and manned at its own expense and there is no operating revenue from these. TCA does pay a nominal landing fee but that also is applicable to the Company.

It was said that wages to employees of the Canadian Pacific Railway and of the Canadian National Railways, one of which is government owned and the other a private enterprise, are similar. The answer to this argument is that the privately-owned railway has always been the yardstick whereas in air travel the government-owned operation was first in the field with a definite monopoly and because of its subsidized character should not and cannot be the yardstick.

The differences between the two are so substantial that the Board is of opinion that the salaries paid to pilots of the Company should not necessarily be the same as those paid to TCA. Nor are the salaries paid to pilots of Queen Charlotte Airlines, Maritime Central Airways and Central Northern Airways, all of which are scheduled Canadian airlines, to be relied upon in fixing the salaries of the Company pilots. All of these operations are small and confined. Queen Charlotte Airlines pays its captains a basic salary commencing at $155 per month for the 1st year and raising to $215 per month for the 5th and

succeeding years together with $3 per hour flying time for a maximum monthly flying time of 100 hours. Maritime Central pays a flat salary basis to its captains commencing at $350 per month for the 1st year and increasing to $450 for the 3rd and subsequent years. Limit of time is 85 hours. Central Northern Airways pays a basic salary of $130 for the 1st year increasing to $180 in the 6th and subsequent years together with 3 cents per mile flying time. First officers are used by QCA and MCA and in the former are paid a basic salary of $155 per month for the 1st 6 months increasing to $215 in the 3rd year and thereafter together with $1 per hour flying time while in the latter operation 1st officers commence at $200 per month flat salary increasing to $275 for the third and subsequent years. It will be noted that the present salaries paid to pilots by the Company both on flat and mountain terrain greatly exceed those paid by any of the other scheduled air services save TCA.

There is other unscheduled service in Canada. The British Columbia government operates one aircraft and employs one pilot at a salary of $300 per month. The Saskatchewan government pilots' salaries range from $250 to $310 per month spread over a five-year period plus a commission of $1 per hour for each hour flown over 500 hours per year and a further commission of $2 per hour for each hour flown over 85 hours per month. An average salary would therefore appear to be about $350 per month. In the Manitoba Air Service there are three pilot classifications commencing at $150 per month to $225 per month, the latter of which attains a maximum $275 per month after five years' service and the Base Superintendent is paid a salary of $300 to a maximum of $350 per month after five years' service. Qualifications include university entrance and flying experience ranging from five hundred hours to 1,500 hours depending on the classification. The Ontario government has two classifications and salaries are established on an annual basis, the maximum rate being $300 per month. The Dominion Government has a Civil Aviation Branch of the Department of Transport staffed with inspectors whose responsibility it is to ensure that both the operators and pilots adhere to regulations and are qualified to take the operation for which they are licensed. These inspectors are paid by the Dominion Government a maximum of $300 per month. Initial qualification requirements are high school education, several years' experience, from 750 to 1,000 hours as pilot in charge of an aircraft and a public transport certificate. The District Inspector receives a maximum salary of $350. (The quoted rates were those in effect in 1948 and are extracted from the Report of the Conciliation Board of which Mr. Justice Adamson was chairman.)

There was some discussion as to the method of pay. The Pilots Association originally requested in respect of Captains a flat rate instead of the present base pay plus flying pay.

Some airlines pay the pilots on a formula basis and some on a flat basis and the tendency seems now to indicate an increase in base pay agreements. When the Company was formed some of the lines which were already in operation used the flat rate and some used a formula basis and the Company has continued the formula basis and desires to so continue. The Company did submit proposals on the flat pay basis which the Pilots Association found to be undesirable because the safeguards which the Company felt should be set out were so onerous that an alternative formula basis was suggested by the Pilots Association. The Company feels that a flat monthly rate is not satisfactory in its type of operations either to it or to the pilots. The formula basis was adopted to remedy the inequities and to establish a method of payment to provide the closest possible relationship to the service rendered by a Captain. It is said that it has been reasonably fair both to the Captains and to the Company and no sound reason has been advanced which would justify departing from it at this time. It is an incentive pay in that it encourages Captains to operate extra or non-scheduled trips within the limits of his monthly flying hours. Where flying over different terrain presents different responsibilities it would seem that the present formula basis with present equipment is or should be more satisfactory to both parties and the Pilots Association does not seriously disagree.

One of the reasons advanced by the Pilots Association for flat rate pay was that there is a lag in the payment of the flying pay. Until comparatively recently this lag amounted to about two weeks, that is to say, the flying pay of a Captain paid on the basis of $5 or $6.25 for flat and mountain terrain respectively would be paid on the 15th of January for the previous month of December whereas recently this lag has extended for an additional month i.e. payment would be made on the 15th of February for the hours flown in the previous December. The Pilots Association rightfully complains of this delay. Necessary

adjustments should be made in the accounting system so that payment can be made not later than the 15th of the month following the time that it is earned.

(*a*) (1) *Captains Domestic*

This Board recommends that the base pay of all Captains flying domestic be increased by approximately 7½ per cent and that flying pay of $5 per hour on flat terrain and $6.25 per hour on mountain terrain remain as it is at the present time. The salary rates of Captains would therefore be as follows:—

Captains	Basic Salary*
1st year	$194.00
2nd year	210.00
3rd year	226.00
4th year	242.00
5th year	258.00
6th year	274.00
7th year	290.00
8th year	306.00
Thereafter	323.00

* +$5.00 per hour flat terrain.
+$6.25 per hour mountain terrain.

(2) *First Officers Domestic*

No change was suggested by the Pilots Association in the starting rate for First Officers Domestic but it was suggested that after the 5th six months the rate be increased from $370 to $420. The Board recommends an increase of $30 per month in salary for those who remain as First Officers after three years so that the schedule would be as follows:—

First Officers	Salary
1st 6 months	$270.00
2nd 6 months	295.00
3rd 6 months	320.00
4th 6 months	345.00
5th 6 months	370.00
Thereafter	400.00

(2) *Captains and First Officers D.C.-4*

The Pilots Association requests a differential of $100 per month as between Captains flying D.C.-2 equipment and Captains flying D.C.-4 equipment and a differential of $30 per month for First Officers. The main argument for such a differential is that the increased complexity of the craft and increased responsibility warrants the same. The Company did not seriously argue against a differential and in fact at one stage in the negotiations either prior to or before the Conciliation Officer the Company had offered a differential of $50 in base pay to Captains but no differential to First Officers. The Company's position now, however, is that while it was thought at one time that 4-engine planes could operate economically on many of the domestic routes that further investigation had shown that this was not feasible and therefore the decision was made not to use Canadair IV. It is stated that the Company's present domestic routes are not adaptable to the use of 4-engine planes and that it will not be the Company's policy to use 4-engine planes with the present route pattern. The traffic, however, on two routes in certain seasons of the year is such that advantage does accrue by using the larger equipment. The routes are the Vancouver-White Horse and a section of the Vancouver-Prince Rupert run namely from Vancouver to Sandspit. There is, however, not enough 4-engine flying time domestically to use a full crew on such equipment. At the present time no more than one trip a week during a normal period is expected and that only on the Vancouver to White Horse route which would use only a small portion of a crew's time. Rather than an increase in base pay it would seem that the additional compensation might well be by way of an increase in flying pay. The Company suggested that this increase be to $6.70 per hour but the Board considers this insufficient. The Board recommends that for the temporary situation Captains be paid $7.25 per hour flying time while engaged in a D.C.-4 or other 4-engine equipment domestically and whether flying flat or mountain terrain.

No differential is made between 2-engine and 4-engine equipment in the salaries of First Officers by TCA and in many other airlines. The Board is of opinion that since the First Officers must be capable and ready at all times to take over the craft and for other reasons there seems no sound reason why a differential should not be made. This Board recommends that salaries of First Officers flying D.C.-4 or other 4-engine aircraft for the temporary situation be increased by $40 per month over those recommended in respect of the 2-engine equipment, and that such increase be applicable *pro rata* to the time occupied in flying in the respective equipment.

(*b*) (1) *Captains Pacific*

The Association proposal is that Pacific salaries for Captains after eighteen months' service be $1,100 per month based on a 900-hour year plus $12 per hour for a maximum of 100 hours per annum. This rate is compared with TCA's Atlantic operations which are on a basic rate of $1,000 per month plus $13 per hour for a maximum of 120 hours and averages at $1,130 per month and is compared with North-West Airlines (Orient) which on the basis of an 85-hour month reaches $1,246.75.

The Company, on the other hand, compares the rate which it proposes with that of its principal Pacific competitor namely

British Commonwealth Pacific Lines. Captains on the latter are paid less than half the amount which the Company proposes and their salaries include flight pay and travelling allowance. The Company's proposal is on the basis of 1,020 hours per annum. Reduced to a common denominator the comparisons except that the Association proposes 1,000 hours and BCPA operates 1,000 hours while the Company and TCA are based on 1,020 hours is as follows:—

	Company Proposal	Association Proposal
1st 6 months	850	1,100
2nd 6 months	900	1,150
3rd 6 months	950	1,200
4th 6 months	1,000	
3rd year		
4th year		

TCA	NWA	BCPA Grades 1 to 3
1,030		308 -390.13
1,080		308 -390.13
1,130		313.13-400.40
		313.13-400.40
	1,246.75	318.27-410.67
		323.40-420.93

A substantial amount of training is required before Captains on domestic lines are considered properly equipped to fly Pacific and during this period not only is the pay of the Captain on his domestic rate carried on but special provision is made for living expenses. Also during Pacific flights the Company pays all the pilots' expenses and these have been extended as hereinbefore referred to. The same arguments apply to the rates paid by BCPA as to those paid on American airlines and comparison therefore is not sound because of the material difference in the economy of Canada and Australia. A fair basis of remuneration would be to extend the increases proposed by the Company beyond two years and to provide for payment of $1,075 per month thereafter. The Board therefore recommends that the rates of pay for Captains Pacific be as follows:—

Captains Pacific	Salary
1st 6 months	850
2nd 6 months	900
3rd 6 months	950
4th 6 months	1,000
Thereafter	1,075

(2) *First Officers Pacific*

Comparisons with respect to First Officers on the same basis as Captains' salaries are set out below, the last 100 hours being computed in the Association's proposal at $6 per hour and in TCA at $6.25 per hour. The rates on this basis are as follows:—

	Company Proposal	Association Proposal
1st 6 months	380	500
2nd 6 months	400	550
3rd 6 months	420	600
4th 6 months	440	
5th 6 months		
Thereafter	460	

TCA	NWA	BCPA Grades 1 to 3
		195.07-246.40
462.50		(Probationers 154)
502.50		195.07-246.40
542.50		231 -251.53
	670	231 -251.53
		236.13-256.67

First Officers Domestic would ordinarily obtain promotion by transferring to Pacific duty and since the salaries domestic have been increased by $30 per month and the Company's proposals must have been based on the old rate the Board recommends that the salaries of First Officers Pacific be as follows:—

1st 6 months	$410.00
2nd 6 months	430.00
3rd 6 months	450.00
4th 6 months	470.00
5th 6 months	470.00
Thereafter	490.00

(3) *Second Officers Pacific*

The Company proposes a rate from $270 for the first six months to $370 after two years. The Pilots Association takes the position that the Second Officers employed by the Company are trained by them as pilots and navigators whereas in TCA and NWA Orient the Second Officer is a navigator only and that the requested salary of $500 per month is low as compared to TCA's salary to its Second Officers of $542.50 and to North-West Airlines Orient of $600. It is noted that in the figures given by the Pilots Association the top rate in TCA for Second Officers is the same as the top rate for First Officers and in North-West Airlines Orient there is a difference of only $10. The explanation for the similarity is that a navigator on TCA and NWA Orient remains as such and does not become a pilot. Such rates would not be reasonable in the Company's operations. The position of Second Officer is a new one in the Company's service and the inten-

tion is to obtain young men preferably of the age of twenty-one and to train them as navigators. On entering the service they must have a commercial flying licence and would therefore have some pilot training. Promotion would then be to First Officer Pacific and then to Captain Domestic and then to Captain Pacific. If this progression is reasonable then there should be progression of salary. As with First Officers the Company must have based its proposals on the rate domestic then in force and in line with recommendations already made the Board recommends that the salaries of Second Officers be:—

1st 6 months	$300.00
2nd 6 months	325.00
3rd 6 months	350.00
4th 6 months	375.00
5th 6 months	400.00
Thereafter	400.00

(c) *Reserve Captains*

A Reserve Captain has been defined in the definition hereinbefore set out. This is a temporary classification. A Reserve Captain is a senior First Officer who has been "checked out" by the Company as a Captain. A permanent appointment is not open for him and in the meantime he has permanent employment as First Officer and takes over as Captain when one of the Captains is off for illness or other reasons. At the present time a Reserve Captain is paid a First Officer's salary while flying as First Officer and while flying as Captain is paid his First Officer's pay together with $2.50 per hour for all flying time that he is in command of an aircraft. The Pilots Association has requested that Reserve Captains be paid at Captain rates for all times flown while acting in the capacity of Captain and First Officers' rate for time flown as First Officer. This would mean that while flying as Captain a Reserve Captain would receive the basic Captain's pay which would be at the start of the scale i.e. (presently) $180 per month together with $5 per hour flying pay while flying flat terrain and $6.25 per hour flying pay while flying mountain terrain. Since he is a Senior First Officer and First Officers are paid a flat salary he would be probably in receipt of $370 per month and would be paid his first officer flying time at this rate. The difference lies in whether while flying as Captain he should receive the proportion of $370 per month +$2.50 per hour flying time or $180 per month +$5 flying time flat terrain or $6.25 per hour flying time mountain terrain. There would seem to be very little difference and what there is may be in favour of the Reserve Captain. Since the suggested method of payment would make the bookkeeping more difficult there seems no reason why the present method should not be carried on and this Board so recommends.

3. ***Allowances for Uniforms***

The Association requests that the Company pay one-half the cost of any uniform which pilots are required to wear in accordance with Company regulations and also the full cost of badges, buttons and insignia. At the present time badges, buttons and insignia are provided by the Company. The Company arranges for the purchase of necessary uniforms at a wholesale rate and allows pilots to pay for them through instalment payroll deduction. The Company does not contribute to the cost of uniforms or work clothes of any grade of its employees. Uniforms are supplied to the pilots on some airlines particularly in certain lines flying out of Britain and France but in those cases the pilot's remuneration is very much smaller than that paid in Canada. In the opinion of the Board, pilots' remuneration is sufficient to enable them to supply their own uniforms and it is not recommended that the Company should contribute the requested portion.

4. ***Allowances for Life Insurance***

All pilots are covered by Workmen's Compensation Board at the expense of the Company. Group life insurance is available to the Pilots at favourable rates and the limit has recently been raised to $10,000. Since limitation of flying hours and the very favourable level of earnings are based partly on the assumption of occupational hazards there seems no reason why the Company should contribute towards the cost of premiums for specified amounts of insurance for pilots in either domestic or overseas service.

5. ***Limitation of Time on Overseas Service***

This question was not brought before the Conciliation Officer but it was said that a recommendation of the Board would be much appreciated. When the Pacific service was established there was no time limitation placed upon the pilot as to the length of time the Company would require him to serve before he could bid out from Pacific service back into domestic lines. Later it was a provision of the bidding and so bulletined that those who applied should serve on Pacific for at least three years before being permitted to bid for a vacancy on domestic. The suggestion of the Pilots Association is that a pilot should be permitted to bid back into domestic

after eighteen months of Pacific service. The Company, on the other hand, considers that the cost of training a pilot for the overseas service is very substantial and that three years is not a very severe restriction.

The Northern route is the most trying to the pilot and the Board's opinion is and it so recommends that after 24 months flying Northern route or three years flying Southern or thirty months flying combined Northern and Southern the Captain may bid out of Pacific service into domestic. Furthermore, after service of a period of eighteen months on the Northern route a pilot may not be removed to the Southern route without his consent.

6. ***Effective Date of Pay***

The Board recommends that increases in salaries on domestic routes be retroactive to August 1, 1949 and rates in Pacific service be retroactive to the date of appointment on overseas route.

All of which is respectfully submitted this day of January A.D. 1951.

(Sgd.) J. E. Eades.
(Sgd.) John Groves Gould.

Minority Report and Recommendations

To the
Hon. the Minister of Labour,
Ottawa, Ont.

It is with regret that I am unable to agree with the Majority Report and Recommendations. Certain preliminary statements seem advisable in order to place my views on record. Preamble to the recommendations is made in an endeavour to set forth the dispute as seen through the eyes of this member.

The Company operates a carrier service by air and I believe that in order to succeed and to have the confidence of the general public it is essential that certain conditions exist.

The primary consideration in the operation of an air transport should be the safety of its passengers. The secondary consideration—that of operating at a profit. This safety of passengers depends on two factors, the first of which is the Company's prerogative, that of supplying suitable aircraft and pilots to fly them. The second factor depends on the pilot's skill, ability, physical fitness, mental alertness coupled with an important factor known as working conditions. It is interesting to note that Dr. Edward P. Warner, President of the Council and Director-General of the International Civil Aviation Organization, in the preface of a book entitled "Human Factors in Air Transport Design" by Dr. Ross A. McFarland states as follows: "Accumulating experience is making us increasingly aware of the dependence of the safety record not only on the pilots' physical and mental condition, but also on their working conditions."

Nothing could be more obvious than the fact that an air line whose safety record commences to fall loses the confidence of the public and is on the road to failure. It seems self-evident that pilots, while in the air either operating a plane or flying as a deadhead crew are subjected to constant fatigue for the reason that they are flying at high altitudes, confined in a limited space and subjected to constant noise. With their knowledge of flying they are always aware of danger presenting itself in various forms. It is therefore essential that flying hours, deadheading or otherwise be limited in accordance with some well established practice generally accepted by specialists in that field of endeavour. I feel compelled to accept as an uncontradicted fact the statements of Dr. Ross A. McFarland in his book "Human Factors in Aircraft Design" where he states on page 384—"As aircraft increase in size and complexity, the responsibility placed on the pilot becomes greater and severe demands may be made on his physical strength as well as on his motor skills and reaction time" and continued on page 476—"A consideration of the duties in piloting large transports showed that the number of instruments and controls that must be observed and manipulated has approached the limits of human capabilities; this indicates that a differentiation of function is an absolute necessity in the interest of safety and efficiency. The pilot is able to operate only a limited number of controls, switches and levers within a given time interval. In addition, there are psychological handicaps in regard to attending to so many items simultaneously. The trend is towards greater rather than less complexity in the pilot's duties because of the addition of traffic and radar controls to the flight instruments already present."

It is self-evident that pilots operating large transports and having to manipulate and observe a great number of instruments and controls are subjected to an ever present nerve strain and in addition to this are faced with the fact that a mistake on their part could have most serious results to the plane, passengers and themselves. They are also aware that should they make a mistake in judgment and damage the plane they are most likely

to lose their licence and position, their very means of livelihood. One therefore concludes that pilots must at all cost, be free from undue mental or physical fatigue.

I listened with interest and attention to lengthy and exhaustive presentations of the case by both Company and pilots and have read the transcripts of evidence, the briefs and the numerous exhibits filed and find myself in a position of being unable to agree with the other members of the Board. The disagreement is in part the result of my belief that some principle should be adopted and a precedent followed in resolving the questions in dispute.

The question of ability to pay was not raised by the Company and is therefore not an issue. I do not favour the adoption of U.S. rates of pay but I think that it should be remembered in comparing wages of pilots in Canada and U.S.A., with others, that the air line pilot is not an industrial worker, is not hampered in productivity, as Canadian industrial workers are by comparison with his American counterpart by any lack of facilities for mass production. The pilot is a technical man flying similar aircraft through the same atmosphere, often over the same routes, using the same gasoline and the same facilities and having at least as great skill and as high physical standards as the American pilot.

The CPA argued that a comparison of wages paid to American Pilots is unjust, but the CPR which controls the CPA and fixes its policies, argued differently in its Brief before the Royal Commission on Transportation and stated as follows:—

"The most impressive single political-economic fact in the modern world is the power of the United States to maintain a rapid rate of increase in its productivity per worker in the face of increases in the number employed (and decreases in the average number of hours worked in the year). The result is an increase in total national product over any period such as a generation, which can only be described as startling. Canada is exposed to the full competition of that immensely vital economy throughout the whole breadth of the country. It must meet that competition or be gradually pushed aside in the economy of this continent. In fact it has not only held its own but stands higher now than it did at the opening of the century."

Thus Canadian Pacific makes the points that:—

1. It is proper to draw comparisons between conditions in the United States and Canada.

2. Although Canada has had to face strong competition from the United States in the past, she has successfully met that competition and stands higher now than at the beginning of the century.

I find it necessary at this time to state I do not believe that American scale of wages can properly be applied in Canada for many reasons too obvious for discussion at this time. But all together apart from any question of amount of salary it is certainly proper to examine the trends in salaries in air transportation in the U.S., our closest neighbour which has the nearest comparable form of living scale and where many of the world's greatest airlines operate.

I am of the opinion that no sound reason was advanced by the Company why there should not be equal pay for equal service. However in searching for a precedent for this conciliation, it is my opinion that the pay and working conditions existing in the Trans Canada Airlines is a comparable, just and proper guide in arriving at a settlement of this dispute.

It should be pointed out that the Pilots Association is the certified bargaining agent with both the CPA and the TCA and for many obvious reasons it is logical that similar contracts should be entered into by the pilots with both airlines. It seems equally obvious that these contracts should for the benefit of all parties terminate at the same time and negotiations between the pilots and the Companies should be entered into jointly. Your member is satisfied from the evidence that the duties and operations in general are similar and if any difference exists the evidence points to the pilot of the CPA having more difficult and hazardous routes to fly. This is substantiated by the evidence that the CPA has instrument flying routes off the airways where other aircraft neither report their position nor are aware of the position of others. This matter was dealt with at some considerable length in the Pilots' Brief and is mentioned later in this report and the argument is strongly supported by the facts.

The majority of the Board arrived at the conclusion that the TCA is a "prestige service" and for that reason cannot be used as a proper yardstick in this conciliation. With deference to contrary opinions the Company used this merely as a red herring.

No better example of the propriety of comparing operations of the two air lines may be found than that which is available to us in the history of employer-employee relations with respect to the

parent bodies of the same two airlines. TCA is wholly owned by the CNR while CPA is wholly owned by the CPR. The two railways have for years negotiated their labour contracts together and for years wages, for comparable classifications, have been identical in both operations.

The map attached to the report shows the extensive routes, transcontinentally and feeder, operated by this Company.

Assuming for the sake of argument that such a conclusion was correct it is certain that the Canadian Pacific would be the first to deny that anyone was giving a service that carried more prestige than their own. It must be remembered that the CPA is owned and controlled by the CPR and is an integral part of one of the world's greatest and finest transportation systems. This system known to all Canadians and for which we have reason to be proud is known the world over for its capable management, dependability and luxurious service.

It is indeed worthy of note that the expensive and luxurious Canadian Pacific boats have been withdrawn and air transportation has taken their place, at I believe a great saving of cost to the Company. This is merely keeping abreast with progress and is in keeping with a more speedy and economical service satisfactory to the travelling public.

On January 4 of 1951, the Canadian Australasian Line's ss. *Aorangi* set sail from Vancouver on its last Trans-Pacific run (Canadian-Pacific). Because the *Aorangi* has been the major surface travel link between North America and the Antipodes for more than a year, its removal means that the only way to get to Australia and New Zealand from North America after January 4 will be via air. Unless, of course, the traveller wishes to go the long way around, via the Mediterranean or South Africa.

Over a year ago, the Matson Line, an American shipping firm removed its last passenger ship from the run to Australásia. All that will remain after the removal of the *Aorangi* is a freight and passenger service offered by the Carpenter Line (Canadian). And since the Carpenter ships can carry just twelve passengers on each voyage, the latter being spaced several weeks apart, *there seems to be little doubt that the Pacific passenger carrying trade has been abandoned by the shipping firms, leaving a clear field to the air lines.*

In Australia recently Mr. G. E. Gray, TCA General Supervisor of Agency and Interline Relations said that the number of people choosing to fly to the U.K. via the Pacific and Canada had increased by over a hundred per cent in the last twelve months.

The late Labour Minister, the Hon. Humphrey Mitchell, told Canadian Labour: "Produce more and earn more." It is a point often debated whether this or that group of workers has in fact increased its contribution to the nation's economy in return for increased earnings. But it seems quite obvious that the air line pilots of CPA have contributed and are contributing more to that Company. As aircraft increase in size, the pilot accepts heavier responsibility and transports more passengers, more freight and express, more air mail, per air mile flown. As aircraft increase in complexity in the pursuit of greater efficiency, speed, regularity and passenger comfort, the technical knowledge and skill of the pilot have increased to keep pace. As the Company's routes are converted from visual and day flying services to instrument and night operations, the pilot, by the exercise of the greater flying skill and increased knowledge of weather, radio and navigation which such conversion entails, has built up a record of a greater percentage of flights completed, raising, without jeopardizing safety, the record of the Company for punctuality and regularity of operation, enhancing its reputation and hence its revenue.

As the routes of CPA have been pushed half way across the world, to Australia, Japan and China, the air line pilot has gone forth, building up the experiences of the Company in flying overseas routes, and in meeting the notoriously difficult and dangerous weather conditions of the Aleutians. The hazards of the latter route have lately been increased by its proximity to the war area, and on both routes by the congestion arising from the phenominally increased airway traffic due to the UN war effort.

On CPA's domestic routes also, the hazards are in some cases increased by the nature of the operations. Most airlines such as the TCA fly over controlled "airways"—paths in the sky wherein traffic is controlled by government authority, the positions and altitude of all other aircraft are known, and radio ranges are provided by the government, so that even at night or when flying by instruments in clouds, the pilot is reasonably assured that although other unseen aircraft are about they will pass safely.

CPA, on the other hand, has some instrument flying routes off the airways, where other aircraft neither report their position nor are aware of the positions of

others. These latter machines, if flying by visual contact with the ground, avoid collision with others by visual means, and en route, avoid aircraft flying on instruments by staying away from clouds. But the aircraft which has flown through clouds to reach its destination must necessarily on arrival come down through the ceiling into the middle of this unreported traffic. At Red Lake, Ontario, for instance, CPA pilots let down on instruments by reference to a low powered radio beacon (not a regular radio range) into ceilings of 500 feet, and it is not uncommon to break through at speeds approaching two miles a minute—176 feet per second—to discover a floatplane within a few feet of the ceiling and directly ahead. It is perfectly legal and normal for the other aircraft to be there unreported, as Canadian Air Regulations place no restrictions on aircraft flying by visual flight rules outside a coastal area and below 700 feet altitude measured from the ground. But this situation has given rise to some near misses at such places as Red Lake, and no doubt explains in part why the Great-West Life Assurance Company charges higher premiums on the lives of CPA pilots than on those of TCA.

No evidence was given by the Company to show that they were in any way dissatisfied with their progress or profit from Trans Pacific operations. And evidence was given that the Company was extending and not reducing their service. It seems only logical to conclude in view of the vast experience of the CPR in transportation that they not only intend to stay in business but to compete with all contenders in respect to similar services. I am therefore forced to the conclusion that if the CPA intends to protect the public by employing the very best pilots available it is necessary in order to attract them to the Company's services to have working conditions similar and to have a rate of pay comparable to that of the Trans Canada Airlines, which rate of pay is lower than that paid to American pilots on similar service. The following recommendations are therefore made: I concur with the findings of the Majority Report set forth on page 3 and 4 of the said report that agreement had been reached on the following matters:—

1. Definition—Captain, First Officer, Second Officer.
2. Certain aspects of hours of service (domestic).
3. Expenses and income tax allowance for pilots permanently transferred to bases abroad.
4. Seniority.
5. Seniority list.
6. Loss of seniority.
7. Filling of First Officer vacancies on domestic.
8. Clauses covering definition of mountain terrain.
9. Clause covering reserve captain length of service for pay purposes.

This should constitute a firm agreement between the pilots and the Company on these matters without prejudice to the issues set out in the Company's Brief (page 8, paragraph 18) and dealt with during this hearing. The terms of the matter agreed upon are set forth at the bottom of page 4 in the Majority Report and continue on to the top of page 9 and are more specifically therein set forth.

The main issues in dispute fall into the following categories:—

1. Hours of service including a consideration of flying hours credit for vacation.
   (*a*) Domestic.
   (*b*) Pacific.
   (*c*) Flying hours credit for vacation.
   (*d*) Deadheading.
2. Salaries.
   (*a*) Domestic.
      (1) Captains and First Officers 2-engine equipment.
      (2) Captains and First Officers 4-engine equipment.
   (*b*) *Pacific.*
      (1) Captains.
      (2) First Officers.
      (3) Second Officers.
   (*c*) *Reserve Captains.*
3. Allowance for Uniforms.
4. Life insurance to be provided by the Company.
5. Limitation of time on overseas service.
6. Retroactivity of pay increase if any domestic and of established rate Pacific.
7. Domestic 4-engine flying.

I now proceed to deal with the issues and disputes as to which I am in disagreement with the majority.

Hours of Service

Same as TCA, both as to 2 and 4 Engine Equipment.

Hours on Pacific

It is recommended that any contract entered into between the Company and the pilots should contain a clause that "no pilot

shall be allowed to exceed the hours specified herein." This is for the express purpose of preventing any officer of the Company from saying to a pilot words to the effect "You volunteer to take this flight don't you?" which would put the pilot in a very difficult position as he would feel that in order to obtain advancement with the Company he could not properly refuse such a request. The limitation of pilot flying time is of tremendous importance to professional pilots, air transportation Companies and to the travelling public; and the results of this question will have a definite bearing on the length of the career of the pilot thus affecting himself and his employer and will be closely related to safety which is vital to all concerned. The piloting of an aircraft in schedule service involves intelligent action of the type which depends on the insight into the connection of things and events and upon their casual relationships; the exercise of vigilant forethought, rapid and accurate movement, split second timing, muscle co-ordination and involve essential nervous processes which are most extravagant in energy expenditure.

The Pilots' duties most calculated to induce mental fatigue are also of a type which suffer most from its affects. When in industry, fatigue causes a falling off of production, in the case of the pilot the usual symptoms, inability to pay attention, failing memory, reduced capacity to concentrate and co-ordinate may have fatal results. For these amongst many reasons established Airline Companies have in most instances entered into agreements with the pilots that 75 hours flying time should be the basic maximum per month for mountain terrain and for 4-engine equipment. In an endeavour to comply with the desires of the Airline Companies the pilots have agreed to change the limited time per month to a quarterly basis in order that the Companies may make good an average production of flying hours per pilot coinciding as nearly as possible with this maximum. But the pilots urge that there must be no pressure either expressed or implied on a Captain to commence a flight or to complete it once started, if in his judgment he or his crew are too tired to do so. They further argue that carrying an extra pilot even if he is a Captain has not been found to be a solution to fatigue on long flights as pilots claim that they cannot rest properly during a "watch below while in the air." It is interesting to note that the International Federation of Airline Pilots Association, of which the Canadian Airline Pilots Association is a member, recently ratified the following basic maximum hours of work for pilots: day 8, week 36, month 85, quarter 255, year 935. In view of these facts and many others presented at the hearing it is therefore recommended that the maximum permissible flying hours be the same as TCA agreement.

(*a*) No pilot shall be allowed to exceed the maximum air hours specified herein (except in extraordinary circumstances) and any question arising herein shall be deemed a grievance.

(*b*) Flying hours to be subject to deductions for vacation credits, all of which are to be co-related as nearly as possible to TCA flying hour limitations.

Vacation Credits

My recommendation is same as TCA.

Deadheading

In regard to deadheading this problem is to the pilot a serious matter. While deadheading from place to place he is working for the Company for full hours and subject to the Company's order and in my opinion is subject to flying fatigue. I can see no good reason why the pilots should not be paid under these circumstances. This subject was dealt with and canvassed at great length. I am further of the opinion that the Company could apply itself to this problem and remove to a great extent the necessity for deadheading. Until such time as deadheading is removed there exists too great a temptation to require this service from pilots unless the penalty of full allowance for all hours while deadheading is given to all pilots and crew.

Salaries

It should be pointed out that there are some difficulties in co-relating formula pay to flat salaries. It is therefore recommended that the Company and the pilots get together and work out various rates of pay so as to co-relate them as nearly as possible to salaries paid by the TCA. It is, in addition, recommended that as there have been no increases in salaries, and that the dollars received by the pilots will undoubtedly buy less than the dollars received in 1949 or 1950 and also as the difference between formula pay and flat salaries is such that pilots are not able to plan in advance because of lack of knowledge as to their earnings and that these elements should be considered in computing pay increases. Therefore any benefits received by the Pilots of the TCA in their present negotia-

tions with the Company be accepted by the Company as a proper rate of pay to be paid to air crew.

It is now necessary to deal with salaries of captains and first officers flying 4-engine equipment domestically. It might be noted that the late Minister of Labour, Hon. Humphrey Mitchell, told Canadian Labour —"Produce more to earn more". The CPA in the presentation of its case recognized that there should be a differential of some kind for pilots and officers in this class and offered first officers flying D.C.4's a differential of $50 a month in excess of first officers flying 2 engine D.C.3 equipment. This principle would, I think, apply equally to captains and other officers operating four engine equipment domestically. It seems logical in dealing with this matter to compare the two. Uncontradicted evidence shows that the D.C.4's carry an increased pay load over the D.C.3 of approximately 40 per cent, there being 28 passenger capacity on a D.C.3 and 40 passenger capacity on a D.C.4. It should also be noted that the increased speed of a D.C.4 has resulted in approximately 86 per cent increase in ton miles. Applying the late Hon. Minister of Labour's principle the pilots productivity is therefore increased by 86 per cent, and a $100 increase for captains would be a differential of approximately 13·3 per cent if the pilots figures are correct. The increase therefore, requested by the pilots of $100 per flying month of 75 hours on a D.C.4 domestic seems not out of line when compared to the increase in productivity both in pay load and ton miles. The Company's gain would seem to be substantial regardless of the fact that the equipment would cost a great deal more. It is my considered opinion that pilots should receive some share of the increase in revenue. For that reason, coupled with many others, I recommend an increase of $100 per month in the basic wage of captains flying D.C.4's or four engine equipment domestically over those flying D.C.2 or D.C.3 equipment, during such time as this equipment is being used merely as a temporary expediency and that the basic pay increase for first and second officers be $50 and $30 respectively per month. Should the use of this 4-engine equipment be continued as a permanent service I recommend that the salaries applicable to D.C.4's or 4-engine equipment with the TCA lines together with such increases as they may obtain under present negotiations be paid to pilots in their respective classes.

Captains, First and Second Officers Pacific

It is recommended that the captains and first officers rates of pay be the same as those on the TCA overseas. In the TCA service, second officers are required to be navigators only, while second officers in the CPA service must be both pilots and navigators. Therefore, in my view, CPA second officers and navigators should command an increased rate of pay over TCA second officers equivalent to that of Junior first officer. All ranks should get an increase equal to TCA's new contract.

Reserve Captains

It is recommended that all first officers checked out as captains should get an additional $30 per month over other first officers because of their additional qualifications during the first year. In addition while flying as reserve captain over flat terrain they should receive $2.50 per hour the first year, $3 per hour the second year and $3.50 per hour for the third year. While flying over mountain terrain that amount should be increased by a dollar per hour. After the third year there would be no change.

Uniforms

It is recommended that allowance for uniforms be on the same basis similar as TCA and that the Company pay the cost of the material.

Allowance for Life Insurance

It is recommended that the same insurance allowance be made as that of the TCA.

Limitations of Time on Overseas Service

I am in accord with the majority of the Board in this respect. Their recommendation is found on page 39, paragraph 5 of their report.

Effective Date of Pay

I am in accord with the majority of the Board as set forth in paragraph 6 on page 40 of the Majority Award and so recommend.

Flying Risk

A great deal was advanced by both sides in respect to the question as to whether there was or was not additional risk while flying which should be compensated for in dollars. It is my opinion that there is risk in flying, over and above that of almost any other occupation, and that this risk plays a large part in the nerve wastage of a pilot forcing him to retire at an early age of life.

In disagreeing with the other members of the Board in respect to flying hazard I have come to the conclusion that there is always a danger to the pilot of sudden death, should the pilot at any time become fatigued or should his physical or mental health be such that he is not always in first-class physical condition and mentally alert. In the January, 1951 edition of "Canadian Air Line Pilot" lists the names of 26 pilots who have paid the supreme sacrifice in the service of air transport.

In my opinion there should be borne in mind that pilots are under continuous nerve strain, seriously affecting the pilots employable period as such. According to the figures presented to this Board, there is a tremendous falling off of pilots on active duty after 34 years of age. In other words 74 per cent of the pilots are through for one reason or another at the age of 34 and after the age of 39 only 9·7 per cent of pilots continue to fly. These figures, in my opinion, clearly show that it is essential if young and capable men are to be enlisted in this service, that they be given such remuneration as will enable them to set aside sufficient money from their earnings to support themselves and their families upon retirement from service, whether voluntarily or otherwise. This occupation is of such a character that when middle age is approaching, it is necessary for these men to seek a new field in which to earn a living and take a chance on obtaining another job or earn a living at greatly reduced rates of pay.

"Medically a man may be only as old as his arteries. But an airplane pilot has more complicated problems as he begins to get older. He has to worry about his 'functional age'." Recently, Psychologist Ross A. McFarland of Harvard's School of Public Health told the Gerontological Society in Manhattan that a pilot is as old as his vision, or his 'motor skill,' or his general ability to adjust to the demands of his job. No exact age limit should be set for pilot retirement, McFarland said, but life in the sky certainly does not begin at 40.

Of 7,237 airline pilots holding medical certificates from the CAA in 1946, only 9·7 per cent were 40 or over, 3·4 per cent were 45 or over, 1·3 per cent were 50 or over.

Statements were made and statistics quoted by the Company as to risks in other occupations for the purpose of minimizing the hazards of flying. We all know how statistics may be quoted and used for many purposes which do not in themselves prove anything.

I am reminded of an article in the January, 1949 issue of the "Canadian Airline Pilot", which reads as follows:—

"Of course air line flying is safe—the statistics prove it. And statistics also show that crossing Niagara Falls on a tightrope is safe—it has been done, and no one has been killed attempting it; thus the safety record is 100 per cent, but only because none but the best artists in the world have tried it."

Flying is not inherently a safe profession. It can never be anything but potentially dangerous to drag a complicated mass of machinery into the air from a runway of restricted length, or to bring it hurtling back onto the ground at a selected point in nearly all weathers, night or day. The fact that it turns out to be safe, that danger seldom becomes disaster, is a tribute to the skill exhibited by the mechanics who maintain the aircraft and the pilots who fly them.

Fatal Accidents

It might be pointed out that driving an automobile is hazardous and automobile accidents might be used for the purpose of comparison with the hazards of flying. This of course would be fallacious as auto driving hazard results in the negligence of the other man. Almost invariably one party is innocent of negligence. In flying, accidents almost invariably are the result of unavoidable weather conditions or fatigue.

Fatigue

The Company has advanced the argument that because of the automatic pilot the work of the pilot himself has been greatly reduced. While that may be so, it is interesting to note the findings in the Burke Mishap: "Coastal's accident recalled a mishap involving a non-scheduled Burke Air Transport D.C.-3 which crashed near Melbourne, Fla., July 13, 1947, killing 12 passengers and the pilots. In that instance, CAB found that the pilots had flown over 23 hours of the preceding 37 hours 45 minutes, and that they had little opportunity for rest on the ground prior to starting the flight."

The Board said that there was no direct evidence to indicate that the pilots of the Burke D.C.-3 were asleep, "but under the circumstances it would be surprising if they did not fall asleep as the plane cruised on automatic pilot in the early morning hours, gradually losing altitude."

In conclusion I regret to report that I am forced to draw from this hearing the inescapable conclusion that the pilots and

the Company are drifting further and further apart and that the former harmonious relations which are so essential to any successful enterprise have been replaced with a feeling of distrust. I feel that the parties must be drawn together and I am convinced that unless the pilots receive a wage comparable with that of the TCA under its proposed new contract that these relations will degenerate further. It is very difficult for men doing the same work, belonging to the same Association, having the same bargaining agent and employed by those whose ability to pay is not questioned to understand why different rates of pay and different hours of work should or can exist. This condition is most regrettable and I feel, with due respect to the other members of the Board, that so long as these differences exist—just so long will these men be dissatisfied and justifiably so. There must be mutual trust, mutual respect and co-operation. This condition can only be brought about by a sympathetic and comprehensive understanding of each others problems and a willingness to sit down and work out these problems together.

This report should not be closed without paying tribute to the excellent presentation by W. S. Owen, K.C. on behalf of the pilots and by W. G. Townley, Esq. and the Company's Solicitor and staff who participated in the presentation. The Parties should also be congratulated on their preparation and their clear arguments and most extensive and comprehensive briefs. It must in fairness be acknowledged that a large part of this report is taken with certain changes, variations and modifications from one or other of the briefs submitted.

Respectfully submitted,

(Sgd.) IAN CAMERON.

February 5, 1951.
Vancouver, B.C.

REPORTS OF BOARDS in disputes between

Canadian Press *and* American Newspaper Guild,
and between
Press News Limited *and* American Newspaper Guild.

(1) Canadian Press

Majority Report

The Hon. MILTON F. GREGG, V.C.,
Minister of Labour,
Ottawa, Canada.

SIR:

Your Conciliation Board herein reports as follows: the members of the Board of Conciliation are:—

His Honour Judge A. Cochrane, Chairman.

Herbert Orliffe, Esq., Nominee of the Bargaining Agent.

Gordon R. Munnoch, Esq., K.C., Nominee of the Employer.

Your Conciliation Board met at Toronto on the 11th and 12th days of December, 1950, and again on the 3rd day of February, 1951.

Present at the sittings held in December were the following:—

For Canadian Press:

Mr. John J. Robinette, K.C., Counsel.
Mr. Gillis Purcell, General Manager.
Mr. Charles Bruce, Assistant General Manager.

For the American Newspaper Guild:

Mr. Stephen Ripley, International Representative.

On February 10, 1951, the Minister of Labour received majority and minority reports from the Boards of Conciliation and Investigation appointed to deal with disputes between the Canadian Press and the American Newspaper Guild and between Press News Limited and the American Newspaper Guild (L.G., Dec., 1950, p. 2054).

The Boards were composed of His Honour Judge A. Cochrane, Brampton, Ontario, Chairman, and Herbert Orliffe, employees' nominee, and Gordon R. Munnoch, companies' nominee, both of Toronto.

The texts of the Boards' majority and minority reports are reproduced herewith.

Mr. Jack Mitchell, Provisional President of the Local Unit; and Messrs: John D. Hamilton, Donald Weinert, George Ronald, Edgar Simon.

For convenience the Employer is hereinafter referred to as "the Canadian Press" and the Bargaining Agent as "the Guild".

The Guild was certified on the 5th of April, 1950 and negotiations have been carried on by the Guild with the Canadian Press since certification in an endeavour to

obtain a contract, but so far without success. Although the proceedings before this conciliation board were conducted by all parties on a high level, it is obvious that Canadian Press is not only not friendly towards the Guild but is definitely opposed to it. The parties to this conciliation are far apart on most every important question and have been unable to agree on any of the essential things which are necessary if sound collective bargaining is to be carried out and an agreement arrived at.

In his final summing up before the board Mr. Robinette, K.C., Counsel for Canadian Press, expressed the views of his clients as follows: "We believe solely in the merit system, the industrial system is quite inappropriate and cannot be applied in a firm such as this, there is no middle ground as far as the establishment of a scale is concerned; management must have the sole right to judge concerning employment, transfer, promotion, demotion and dismissal; Canadian Press regards this as essential."

Even to those who may have some doubts as to the propriety of unionization of what are known as "white collar workers" the position taken by Canadian Press would appear to be somewhat drastic and puts the employee in the position that his only choice in many respects is to "take it or leave it" with no recourse no matter what decision may be made concerning him by his employers. Mr. Robinette repeatedly stressed his clients' contention that there is no middle ground between the important demands of the Guild on the one hand and the unyielding position of Canadian Press on the other. We find it difficult to accept this attitude as evidence of bargaining in good faith as we are of the opinion that some common or middle ground can and should be found. Given good will on the part of both parties to this dispute (who well know the difficulties of devising a satisfactory formula), we cannot help but feel that some sort of solution could have been worked out which would have retained to the Employer the prerogatives of making full decisions but which would still give the Employee an opportunity for redress if he felt that he had been unfairly dealt with. It is difficult for a Conciliation Board (composed as this is) to suggest a workable compromise. In these days when collective bargaining has become the rule and not the exception and when we find many employers and their unions endeavouring to find common ground whereby the interests of both parties may best be served, it was somewhat surprising to find that there are still employers who adopt the unyielding, uncompromising attitude which has been adopted by Canadian Press in this matter.

In fairness we think we should also state that in our opinion the Guild was somewhat unreasonable in connection with certain demands which did not, shall we say, improve the possibility of reaching a settlement of the very serious difficulties which have arisen in this conciliation. We refer for example to such items as some of the demands made in connection with Sick Leave Pay, Severance Pay, and the provision that economy shall not be considered a just and sufficient cause for dismissal.

It should not be overlooked that these conciliation proceedings have been an attempt by the Guild to obtain a first contract. Experience has shown that it is not always possible to obtain in the first agreement all that is sought by the union and that compromises by both sides are necessary if an agreement is to be reached. We suggest that if the parties hereto are not prepared to adopt a greater measure of what might be called "give and take" on both sides no agreement can be reached and to establish good labour relations between the parties might become impossible.

Many specific proposals were made by the Guild and these will be dealt with in the order in which they are set out in their brief.

1. ***Guild Shop.***—This is of course the same as Union Shop.

In our opinion the Guild has not been able to justify by evidence the demand for a Guild Shop and we are therefore unable to recommend in favour of this proposal.

2. ***Check-off.***—We recommend in favour of the voluntary check-off irrevocable during the term of any contract or agreement entered into between the parties.

3. ***Hours and Overtime.***—We recommend in favour of (*a*) a five-day, forty-two hour week; (*b*) payment for overtime, and (*c*) payment of night shift bonus. While we recommend payments for overtime and payment of a night shift bonus or differential, it is difficult on the information which is before the board to fix the amounts which should be paid therefor. About all that a board could do under the circumstances is to recommend that the principle be recognized, leaving it to the parties to work out the amounts to be paid and other details.

4. ***Holidays.***—The parties appear to be in agreement as to the number of statutory

holidays to be granted. It is obvious for many reasons that holidays in a business such as that conducted by Canadian Press cannot be dealt with in the same manner as an industry. We recommend that the seven holidays agreed upon be granted and that any employee required to work on any of these statutory holidays shall be paid straight time in addition to his regular pay.

5. ***Retirement and Pension Plan.***—We recommend adoption of the present Pension Plan.

6. ***Severance Pay.***—We make no definite recommendation in connection with the Guild demands on this question. The parties are so far apart that it is, we believe, useless to even recommend discussion and negotiation.

7. ***Vacations.***—We recommend one week's vacation with pay for those who have served with Canadian Press for more than six months and less than one year; two weeks' vacation with pay for those who have served one year or more up to fifteen years of continuous service, and three weeks' vacation with pay after fifteen years of continuous service.

8. ***Sick Leave.***—We cannot accept the Guild proposal that full pay shall be granted to all employees for the entire duration of any illness or incapacity. On the other extreme there is the Canadian Press proposal that employees "shall be paid full salary during illness within reasonable limitations to be determined by the company". Surely there is some middle ground upon which the parties could agree.

We would recommend a plan in which the Canadian Press and the Guild share the cost on an equal basis and that such a plan be discussed between the parties for the purpose of finding a more equitable basis by which the limitations of the pay period during illness can be established.

9. ***Job Security.***—We recommend the following:—

1. There shall be no discharge except for just and sufficient cause.

2. There shall be no discharges as a result of putting any agreement into effect.

3. There shall be no discharge of, or discrimination against, any employee because of his membership or activity in the Guild.

4. There shall be no interference, or attempt to interfere, with the operation of the Guild.

5. It is agreed that the employment, transfer, promotion, demotion and dismissal of employees shall be within the discretion of the Company.

The discretion referred to above should be subject to a proper grievance procedure set up under the terms of any collective bargaining agreement which may be arrived at between Canadian Press and the Guild.

The agreement should also contain a clause providing that two weeks' notice of dismissal (other than for cause) should be given to an employee who has served for more than one year and not more than five years and for one month's notice of dismissal (other than for cause) to an employee who has served for more than five years.

10. ***Expenses.***—The parties appear to have agreed upon this item.

11. ***Struck Work and Strike Breaking.***—The clause proposed by the Guild is ambiguous, while that proposed by Canadian Press is unnecessary. We make no recommendation in this connection.

12. ***Outside Activity.***—The Guild accepted the proposal of the Canadian Press and this being so it is unnecessary for the board to make any recommendation.

13. ***Minimum Wages.***—There are two questions or issues to be decided in connection with this matter as follows:—

1. Should there be a Minimum Wage Scale?
2. If so, what should the scale be?

We are not prepared to accept the idea that minimum rates are as improper and unacceptable as they are viewed by Canadian Press. It seems obvious that if minimum rates or wage scales are adopted on the basis suggested by the Guild, or a somewhat similar basis, Canadian Press can make minimum rates or wage scales as flexible as may be necessary, provided always that they do not go below the minimum standards. Apart from all other arguments pro and con, it seems to be apparent that the mere fact that a person has been retained in the employ of another for some length of time, is an indication that he has given reasonable satisfaction, otherwise he would not be there; this contention applies with considerable force to those engaged in professional work such as is done by the employees of this company.

While we are prepared to accept the principle of minimum wage scales we find some difficulty in deciding on what the scales should be. The attitude and policy of Canadian Press makes it clear that a recommendation for "minimum wage scale is wholly unacceptable". Under these circumstances we feel that no good purpose

can be achieved by recommending what the scales should be, even though the present wages and salaries, viewed in the light of present-day living conditions, are not impressive.

Keeping this in mind, and also keeping before us the ever increasing cost of living, we recommend an interim increase of $3 per week for all members of the Editorial Staff who are at present earning $40 (or less) per week, and an increase of five per cent of their present pay for all members of the Editorial Staff who presently receive more than $40 per week, it being understood however that if the suggested five per cent increase does not equal $3 per week the increase of such member shall be at least $3 per week. Such increases shall be retroactive to January first last.

During the sittings of the board certain information was submitted to the board by Canadian Press on a confidential basis. The chairman questioned the propriety of submitting information to a conciliation board on a basis which did not give an opportunity for full reply by the opposite side, and we have come to the conclusion that it would be unwise to adopt a policy of accepting any information or evidence on this or a similar basis. The information which was submitted has not been used in the preparation of this report.

All of which is respectfully submitted.

Dated at Brampton, this 8th day of February, A.D. 1951.

(Sgd.) A. Cochrane (Judge),
Chairman.

(Sgd.) Herbert Orliffe,
Nominee of the Bargaining Agent.

Minority Report

The Hon. Milton F. Gregg, V.C.,
Minister of Labour,
Ottawa, Canada.

Sir:

I find with regret that I am unable to concur in the Report of His Honour Judge A. Cochrane, Chairman of the Board of Conciliation appointed herein, and of Mr. Herbert Orliffe, the nominee of the Bargaining Agent.

Because of my belief that certain features of collective bargaining which are not uncommon in the case of industrial employees are quite inappropriate to the employees of The Canadian Press, I have thought it desirable to submit a separate Report. For convenience, I shall refer to the Bargaining Agent as "the Guild" and to the Employer as "Canadian Press".

1. The Guild was certified by the Canada Labour Relations Board under date 5th April, 1950, as Bargaining Agent for a designated unit of employees. For reasons best known to the Canada Labour Relations Board, employees serving as messengers were included in the bargaining unit. This results in the anomaly that the bargaining unit consists of a large number of editorial employees and a small number of messengers. The Guild is a highly experienced union which has developed in the United States a type of collective agreement designed to impose upon employers a considerably larger portion of social security than is usually accepted in Canada. Prior to its encounter with the Guild, Canadian Press had no previous experience in the field of collective bargaining. The Guild complains that Canadian Press did not approach the matter of bargaining with the Guild with any enthusiasm and did not welcome representatives of the Guild other than those who were its own employees. However much the Guild may resent this attitude, it is one that is readily understood by any one who remembers the earlier efforts at collective bargaining in Canada. At a meeting held on 3rd May, 1950, the Guild presented a form of proposed agreement based on the top level of its achievements with employers in the United States of America. The terms of this proposed agreement may well have startled Canadian Press to a point that seriously prejudiced negotiations. Shock tactics of this kind are not to be commended when a powerful union enters into its first negotiation with an employer which has had no previous experience with collective bargaining. Conciliation Boards have repeatedly and wisely made moderate recommendations for a first agreement and so left room in point of time for the development of experience between an employer and a union which had been newly certified as bargaining agent. This principle was sound then and is sound now when applied to the circumstances of this particular dispute.

2. Canadian Press is an organization which does not operate for profit. It is the servant of some 91 newspapers operating in the ten Provinces of Canada. It is true that a few of these newspapers have a large circulation and are possibly affluent but the greater number of them are publications which operate with a moderate or small circulation and which could not afford to provide their own employees with the rewards, privileges and advantages that the Guild seeks for the employees of Canadian Press. It is not an overstate-

ment to remark that if the demands of the Guild were substantially granted a weapon might well be placed in its hand which could be dangerous to a great many of the member newspapers and might even threaten their continued existence. Without disrespect to the newspapers of Canada which have achieved obvious financial success, it may be that sometimes the lamp of true journalism sheds its brightest light where there is the greatest struggle for continued existence against rising costs.

3. At the conclusion of the hearing, the members of the Board were unanimously of the opinion that it would be idle to attempt to bring about an agreement between the parties and that the only course that remained was to report their views to the Minister of Labour with little hope that such views would lead to any reconciliation of the widely divergent views of the parties.

4. The editorial content of the bargaining unit of Canadian Press is composed of men who are undoubtedly engaged in an intellectual pursuit. It is common knowledge that those engaged in intellectual pursuits do not receive rewards which are equivalent to those received in industrial activities. Generally speaking, this is true of the Press as it is of university professors, teachers, clergymen and even judges. The problem before this Board should not be approached from the standpoint of the present inflated rewards in industry. Furthermore, it is not practicable to design a scale of reward or terms of employment comparable to those in industry. Anyone who chooses to earn his living with his mind must be prepared to accept the scale of reward provided by competition for his services and realize that his own achievements must lead to the places of responsibility which command the upper brackets of reward. There is also the fact that, having regard to the special services rendered by Canadian Press, anyone who enters its service must develop the special experience required whether or not he has had previous experience in other enterprises concerned with the publication of news.

5. At a meeting held on 18th June, 1950, Canadian Press provided to the Guild a draft of an agreement which Canadian Press had prepared and which differed materially from the draft agreement previously submitted by the Guild. Notwithstanding the gulf between the views of the parties, they did succeed in negotiating the terms of a number of provisions which would be acceptable to both parties if an overall agreement were eventually reached. With this in mind, it appears likely that the parties could themselves negotiate an agreement if any common ground could be found on the major issues between them which their own negotiations have left untouched and it is only with regard to these major issues that I think it might possibly be helpful to express an opinion. Unless there is some measure of reconciliation on these major issues, nothing is to be gained by exploring the more detailed matters dealt with in the respective submissions to the Board. It would have been of assistance to me in dealing with the major issues to know how many employees of Canadian Press are now members of the Guild. The Guild made it quite clear that it thought this was not a matter of any concern to the Board and declined to give the information. From the submission of Canadian Press, it would appear that little more than half of the editorial staff were then members of the Guild at the time it was certified and the Board was not told what the present situation is. In considering matters of union security and other matters of like importance, it is vital that any Board of Conciliation should know the approximate number of employees within the bargaining unit who might be coerced by reason of any recommendation favourable to certain of the Guild's contentions.

6. ***Union Security.***—Under this head, the Guild originally demanded a *Union Shop* and a voluntary *Check-off,* both of which were flatly rejected by Canadian Press. In its presentation to the Board, the Guild intimated that it was willing to accept something less than a *Union Shop* provided that there should be some measure of union security. In my opinion, the Union Shop is wholly inappropriate to an enterprise such as Canadian Press. The editorial and like staff of Canadian Press must be engaged as individuals on the basis of their personal achievements and qualifications. It is obvious that those well suited to this kind of enterprise are individualists and there may well be suitable personnel whose views would be inconsistent with holding a union card as a term of employment. Unionization has not progressed so far in Canada in the literary field as would justify placing this restriction on the employment of personnel. With regard to *Check-off,* the Guild has proposed a voluntary revocable check-off of union dues pursuant to the written request of an employee. Employers who in recent years have bitterly contested the principle of a check-off have nevertheless learned to regard it as one of the normal consequences of the status of a certified bargaining agency and a check-off of this type is now

so generally accepted that I recommend a check-off in terms of paragraphs 1 and 2 of the Guild's proposal in that behalf. With regard to paragraph 3, I see no reason why employees should be bound to use the form supplied by the Guild which was not even submitted to the Board for consideration.

7. ***Hours, Overtime and Holidays.***— These are important matters to the way of life of any employee. The Guild has sought to apply the rigid structure that is today growing common in industrial enterprises which are subject to collective bargaining. Canadian Press is, however, a service organization in the vital field of news gathering and dissemination. It serves its constituent members directly and indirectly it serves the public at large which demands world-wide news while it is news. Canadian Press cannot anticipate the timing of events which will place strains on its personnel in point of time, service and even endurance. In service organizations, interference with normal ways of life must necessarily be expected. A physician in general practice must meet the needs of his patients however much they may interfere with his leisure and personal activities. Those who lack this zeal for their occupation should find another. Extra hours of work are normal—not abnormal—in any enterprise which gathers and disseminates world-wide news. Premium pay for overtime in industry is justified by the relation of extra work to additional profit. Here there is no profit motive. The objective of Canadian Press is to maintain a five and one-half day week governed by an eleven day fortnight at the discretion of the Bureau Chief. There is an exception in Toronto, Montreal and Vancouver where a five-day week is in vogue because of the practice followed by newspapers published in those cities. There is much to be said for the principle that employees of Canadian Press in any particular city should observe hours that are acceptable to newspapers published in that city. I am of the opinion that the rigid standard of working hours which the Guild has grasped from industry and now seeks to impose on Canadian Press is impracticable, but I do not agree in full with the contention of Canadian Press. The modern practice is to establish hours of work which are normally appropriate to the task to be accomplished and to procure the regular adherence to such hours of work by providing for the payment of overtime. In the draft agreement submitted by Canadian Press it is stated that overtime for extra duty "shall be compensated by equivalent time off or, *with the consent of the Company,* by pay at the rate of straight time. Straight time in addition to regular pay shall be paid for work on a statutory holiday." I do not accept this principle. I think that overtime should be paid at the rate of straight time and that the option to take equivalent time off should rest with the employee concerned rather than with Canadian Press. Straight time is recommended because it is being paid for by a non-profit organization in which overtime is normal having regard to the service to be rendered. I do not propose to do more than enunciate this principle; the details are better left to the parties concerned if the principle be accepted. Agreed holidays should attract straight time if worked unless the employee chooses the alternative of equivalent time off.

8. ***Retirement and Pension.***—Canadian Press has provided a pension plan for its employees linked to a Dominion Government Annuity Contract providing $1,200 a year maximum pension upon retirement at sixty-five years of age. The Guild was apparently of the view that while the employees contributed five per cent of earnings the contribution of Canadian Press was less than that amount. In fact the contribution of Canadian Press for current service is equal to five per cent of the employee's earnings and in addition the Plan calls for the payment of $38,012 in respect of past service for twenty-seven employees as of the time the plan was instituted. This plan was established before the Guild was certified. Only a small fraction of the employees on newspapers have any protection of this kind and there should be no relative issue between the parties.

9. ***Severance Pay.***—The record of Canadian Press as set out in its submission respecting the treatment of employees at severance is generous according to Canadian standards. The Guild's proposal that upon termination of employment or voluntary retirement an employee shall receive cash severance pay in a lump sum equal to three weeks' pay for each year of service or fraction thereof, computed at the highest weekly rate of salary received by the employee during his term of service, must emanate from a concept of social security which is entirely foreign to Canadian practices. It is no doubt something that has been borrowed by the Guild from the lush economy of the United States of America if indeed it is generally accepted there. In terms of the Guild's proposal, severance pay could even be claimed in cases of dismissal for cause. Likewise, in

the case of the death of an employee, it would be payable to his beneficiary. Canadian Press was fully justified in refusing even to discuss such an absurd proposal.

10. ***Vacations.***—In its submission Canadian Press says that two years ago it established the principle of three weeks' vacation with pay for men with fifteen years of service and that all other employees are in fact given two weeks' vacation with pay. It did not, however, go this far in the draft agreement which it submitted to the Guild. It may well be that Canadian Press does not wish to commit itself to two weeks' vacation with pay for employees who have been employed for less than a full year but it does not seem unreasonable that Canadian Press should be asked to agree to three weeks' vacation with pay for employees with fifteen full years of service. I recommend that Canadian Press agree to give employees one week's vacation with pay if they have served more than six months and less than one year, two weeks' vacation with pay if they have served one year or more up to fifteen years of continuous service and three weeks' vacation with pay after fifteen years of continuous service.

11. ***Sick Leave.***—The proposals of Canadian Press with regard to employees who suffer from illness are fair and reasonable. The Guild's proposal that sick leave with full pay should be granted to all employees *for the entire duration* of any illness or incapacity is another startling social security measure which is entirely unreasonable.

12. ***Job Security.***—This head presents the widest possible difference in point of view between the parties. The Guild previously suggested that there should be no discharge except for just and sufficient cause and that *economy should not be considered just and sufficient cause.* This is so startling a proposition that it is little wonder that negotiations between the parties broke down. At a later stage, the Guild was willing to accept economy discharges if accomplished according to seniority and if the employees so discharged were "placed in a preferential-hiring pool". This did not solve the matter nor could it be expected to do so. The whole theory of seniority as applied to collective bargaining in industry is based on the fact that at many levels of employment the older employee has acquired greater skill than the employee who is younger in the service and so seniority rules do not work too great a hardship on the company concerned and are fair to employees. In an occupation where usefulness and advancement must essentially depend upon merit and ability together with all the individual qualifications that go to make up an intellectual pursuit of this kind, it is quite unreasonable that Canadian Press should be deprived of the right to retain what it considers to be its best men in the event of a necessary reduction in forces. The only true job security at this level of intellectual endeavour is the skill, ability and flair of the employee which alone can give him the highest right to have his services retained if some must necessarily seek other employment. Again, this is a service occupation. Canadian Press, in order to survive and to expand, must serve its constituents with the highest skill and ability it can afford and command and its enterprise should not be curtailed by adaptations from the more highly organized profit-making enterprises which can readily include the cost of economic errors in the price ultimately paid by the consuming public. Canadian Press has a clear duty not only to its constituent members but to the public to purvey news without bias, with a shrewd and cultivated news sense related to public interest and certainly without the colour of personal notions, particularly including economic, political, national, religious or other personal concepts. The responsibility of moulding public opinion rests not with Canadian Press but with the editors of its constituent members who are directly answerable to their subscribers and advertisers. The responsibility of Canadian Press to its constituent members and to the public can only be met by a retention of the clear right to dispense with the service of any employee which it considers to be unsatisfactory from any standpoint other than participation in the affairs of the Guild. The Guild's fair treatment of employees dismissed otherwise than for cause is set out at page 24 of the submission of Canadian Press and is not contradicted by the Guild. However, in the case of other dismissals there is no reason why Canadian Press should not agree to notice or pay in lieu of notice for the period of two weeks in the case of an employee who has served for more than one year and not more than five years and for the period of one month in the case of an employee who has served continuously for more than five years.

13. ***Minimum Wages.***—

(*a*) *Messenger Staff and Office Boys*—Dealing first with this class of employees, the Guild originally proposed a starting wage of $25 per week advancing at stated periods to $34 after three years of service. The Guild later reduced its demands to a

starting wage of $23 per week, rising after six months to $25, after one year to $27.50 and after two years to $30. Even in the present inflated economy, this range of reward for services of this type is too high. During the hearing, the Guild supplied the Board with a copy of an agreement dated 6th April, 1950, which it had entered into with *The Ottawa Citizen*, a newspaper of the Southam Company Limited. For the purposes of this agreement, the Guild accepted a range of rewards for messengers and office boys as follows:—

To start, $15 per week;
After six months, $16 per week;
After one year, $17 per week;
After 2 years, $19 per week.

The present range of reward for messenger staff or office boys of Canadian Press is from $18 to $25 per week. During the period of negotiations between the parties Canadian Press voluntarily increased the maximum from $22 to $25 per week. I see no reason to alter this range of reward and accordingly recommend a minimum starting wage of $18 per week.

(*b*) *Editorial Staff*—Dealing next with employees who are generally referred to as "Editorial Staff", I must again mention that increases were voluntarily granted in January of 1950 while negotiations were in progress with the Guild. These increases were intended to adjust certain inequities (in the judgment of Canadian Press) as there is no discernible pattern in granting the increases. In a few cases there was no change in salary and in other cases the amount varied. Out of fifty-eight such employees, sixteen are paid a salary under $50 per week. From a study of the salaries paid, it is clear that they are not based on length of service; for instance, one employee is paid $75 per week with but two years of service and another receives a like reward after thirty years of service. This is an extreme case but obviously the practice of Canadian Press has been to link the reward to the achievement on a basis of merit and ability rather than years of service. This is to be expected where admittedly (from the standpoint of Canadian Press) the rating is according to merit, ability and flair. In such an intellectual pursuit, the full flight of achievement might be accomplished after comparatively few years of service. In the competitive field of personal achievement in an occupation such as this, years are not necessarily the criterion of reward and it would be entirely inappropriate to recommend a scale of automatic increases related to years of service. In the past, Canadian Press has endeavoured, with success, to recruit likely employees from those who have served as messengers. This is commendable and one would hesitate to present a barrier by economic sanctions even though Mr. Robinette has said that at the present time the calibre of those available for messenger service does not often lend itself to this type of promotion. I think that Canadian Press would be well advised to agree to a starting minimum salary of $30 per week with an increase after one year of editorial service to $35 per week. After two years of editorial service, however, I think each employee of the Editorial Staff should rely on his own merit, ability and flair for any further increases and Canadian Press will then have to meet competition for the services of such employees. If accepted, this preliminary floor will yield immediate increases to four employees ranging from $4 to $10, the last being apparently an employee who has been a short time on the Editorial Staff. Excluding the employees who will receive the last-mentioned increases, I think that other employees of the Editorial Staff should receive an increase of five per cent of their present rates of pay. I recommend accordingly. I have not dealt with the night differential and this should not, in my opinion, be dealt with unless and until the proposed rewards are further considered by the parties. The difference between the parties is not so great as to be beyond reconciliation. As any agreement entered into will be the first collective agreement between the parties, it is recommended that the increases be effectual as of and from the date on which the collective agreement is signed.

14. ***General.***—The foregoing report does not deal with a number of matters which could only be usefully explored in the actual drafting of an agreement and may well be left to the efforts of the parties after the major difficulties have been resolved.

The above is respectfully submitted this 8th day of February, 1951.

(Sgd.) Gordon R. Munnoch,

by The Canadian Press.

(2) Press News Limited

Majority Report

The Hon. Milton F. Gregg, V.C.,
Minister of Labour,
Ottawa, Canada.

Sir:

Your Conciliation Board herein reports as follows: the members of the Board of Conciliation are:—

His Honour Judge A. Cochrane, Chairman.

Herbert Orliffe, Esq., Nominee of the Bargaining Agent.

Gordon R. Munnoch, Esq., K.C., Nominee of the Employer.

Your Conciliation Board met at Toronto on the 11th and 12th days of December, 1950, and again on the 3rd day of February, 1951.

Present at the sittings held in December were the following:—

For Press News Limited:

Mr. John J. Robinette, K.C., Counsel.

Mr. Charles Edwards. General Manager Press News Limited for the American Newspaper Guild.

Mr. Stephen Ripley, International Representative.

Mr. Jack Mitchell, Provisional President of the Local Unit; and Messrs. John D. Hamilton, Donald Weinert, George Ronald, Edgar Simon.

For convenience the Employer is hereinafter referred to as "Press News Limited", and the Bargaining Agent as "the Guild".

The problems arising in connection with this conciliation are in most if not all respects similar to those involved in the conciliation between Canadian Press and the Guild and the two matters were dealt with jointly at the sittings of the board above referred to.

In reporting on this matter it is understood that the report submitted in the Canadian Press conciliation shall apply to this matter and we adopt the language and recommendations of that report.

In addition to all other recommendations we make the same recommendations in connection with salary increases to the Editorial Staff of Press News Limited as were made in connection with Canadian Press, it being understood however that the suggested increases would not apply to apprentices and messengers in the employ of Press News Limited.

All of which is respectfully submitted.

Dated at Brampton, this 8th day of February, A.D. 1951.

(Sgd.) A. Cochrane (Judge),
Chairman.

(Sgd.) Herbert Orliffe,
Nominee of the Bargaining Agent.

Minority Report

The Hon. Milton F. Gregg, V.C.,
Minister of Labour,
Ottawa, Canada.

Sir:

I find with regret that I am unable to concur in the Report of His Honour Judge A. Cochrane, Chairman of the Board of Conciliation appointed herein, and of Mr. Herbert Orliffe, the nominee of the Bargaining Agent.

Because of my belief that certain features of collective bargaining which are not uncommon in the case of industrial employees are quite inappropriate to the employees of Press News Limited, I have thought it desirable to submit a separate Report. For convenience, I shall refer to the Bargaining Agent as "the Guild" and to the Employer as "Press News".

1. The Guild was certified by the Canada Labour Relations Board under date 12th May, 1950, as Bargaining Agent for a designated unit of employees. Three employees serving as messengers were included in the bargaining unit. At the hearing before the Board the Guild made one submission relative to its disputes with Press News and The Canadian Press. Though a separate submission was presented by Press News, it was conceded that the more complete submission of The Canadian Press should be taken as applying substantially to Press News. This is not surprising as Press News is owned by The Canadian Press and the employees of both are interchangeable to some extent. The principal function of Press News is to provide news to Radio Stations in a form for broadcasting. It also supplies news pictures to Canadian newspapers. The practices of these two employers are almost identical, the wage scales are similar and the only important difference in the presentation of the Guild at the hearing was that a shorter work week was asked for Press News.

2. After certification, negotiations were broken off at a meeting held on 15th August, 1950, because it was believed that there was no point in discussing a possible agreement unless and until an agreement had been reached between the Guild and The Canadian Press.

3. The observations and recommendations contained in my Report of even date relating to the dispute between the Guild and The Canadian Press may be read as applying in principle to the dispute between the Guild and Press News and I do not think it would be helpful to repeat them. I am convinced that if agreement is reached between the Guild and The Canadian Press agreement will also be reached between the Guild and Press News.

The above is respectfully submitted this 8th day of February, 1951.

(Sgd.) Gordon R. Munnoch,
Member Nominated by Press News Limited.

Recent Decisions of Canadian Railway Board of Adjustment No. 1

The Canadian Railway Board of Adjustment No. 1 has released its findings in cases held on November 14, 1950 and one case on July 11, 1950.

Case No. 601.—Canadian Pacific Railway Company (Prairie Region) and the Order of Railroad Telegraphers. A dispute concerning the dismissal of the agent at Kelloe, Manitoba.

Joint Statement of Facts: On January 3, 1950, the agent in question sent a message to the chief dispatcher at Brandon to the effect that "due to present exigencies" he refused to handle message headed 23 No. 167 from Brandon on December 27.

(The numerals "23" are the equivalent of a code word meaning that the message is addressed and must be transmitted to "all agents and all concerned" located over the whole of the division or subdivision.)

The agent was relieved immediately and was dismissed from the service for refusing duty.

The employees contended the agent was not a relay operator and the schedule does not indicate that such work is required of the agent at the office. They claimed that he should be reinstated at Kelloe with full seniority rights and other privileges accruing to him at the date of his dismissal and continuous thereafter; payment of all wages and overtime lost to him since he was dismissed until his reinstatement, and other compensations.

The company contended that "there was no question but that the relaying of '23' messages has been one of the regular duties of the position of agent and operator at Kelloe for many years, and the action of the employee in declining to handle them, after doing so for nearly three months, can only be regarded as a refusal to perform the duties assigned to him, which, of course, is a dismissal offence."

The Board decided not to sustain the contention of the employees but recommended that the man concerned be reinstated without pay for time lost. It further recommended that the question of classification of duties be discussed jointly by the proper railway officers and representatives of the employees.

Case No. 602.—Canadian National Railways (Central Region) and the Brotherhood of Locomotive Firemen and Enginemen. Dispute concerning the claim of a fireman for continuous time from 9.10 a.m., March 3, to 9.50 p.m., March 5, 1947.

Joint Statement of Facts: The fireman was regularly assigned in short turnaround passenger service to Trains 29-170 Stratford to London to Stratford, via Thorndale Subdivision. He was required to report for duty at Stratford at 9.10 a.m., March 3, for Train 29. Due to storm and snow conditions, the Subdivision became blocked with snow and Train 170 was cancelled at 4.30 p.m.

It was decided to try to return the fireman to Stratford. He was ordered to deadhead on Train 40, London to Toronto and Train 39, Toronto. After some difficulty because of snow blocking the line, he arrived at Stratford where he booked off duty at 9.50 p.m., March 5.

Time return was submitted claiming continuous time from the hour and day the fireman was required to report for duty at Stratford, that is, at 9.10 a.m., March 3, until final release at Stratford at 9.50 p.m.

The employees contended that it is the intent of Article 2 (*b*) of the Schedule governing the service of Firemen, Helpers and Hostlers to compensate firemen in short turnaround passenger service for the first eight hours within 10 and for all time thereafter until released at the end of the last run at the final terminal.

The employees further contended that the fireman was simply carrying out instructions when ordered to deadhead London to Stratford via Toronto. It was their contention also that it was the fact that he was in continuous service that prompted the officials to order him to deadhead to Stratford and had he arrived at Stratford at the time his arrival was anticipated, there would have been no question of him being in continuous service.

They therefore submitted that he should be compensated under the recognized practice for men in this service.

The railway contended that the fireman was tied up at London by the railway due to the return movement on the assignment being cancelled on account of the Thorndale Subdivision being blocked with snow. The company maintained as well that being in short turnaround passenger service had no bearing on the fireman's being ordered to deadhead from London to Stratford via Toronto, as he was so ordered with the object of having him available for the next trip on his assignment out of Stratford.

The railway therefore requested that the claim for continuous time be declined.

81108—7½

The parties to the dispute appeared before the Board and submitted additional written and oral evidence.

The Board decided that the employee's claim "is sustained."

Case No. 603.—Canadian National Railways (Central Region) and Brotherhood of Locomotive Firemen and Enginemen. The case concerns the claim of a fireman for final terminal delay at Palmerston, 3.45 p.m., March 4, to 12.05 a.m., March 5, 1947.

The fireman was called from the Fireman's Spare Board at Palmerston for March 4 for engine 557 to proceed to Whites, slightly more than a mile from Palmerston Station, and assist the snowplough extra with two engines to Durham and return to Palmerston. Before the arrival of 5574 at Whites it was found that the snowplough had derailed. Engine 5574 returned to Palmerston for men and tools to re-rail the snowplough and made several trips between Whites and Palmerston, reaching the designated ward switch on the last trip at approximately 11.45 p.m., March 4, 1947.

The fireman claimed final terminal delay from 3.45 p.m., March 4 to 12.05 a.m., March 5, 1947. Claim was denied and final terminal delay allowed from the time locomotive last passed designated switch returning to Palmerston, namely 11.45 p.m., March 4.

The employees contended that when engine 5574 passed the outer switch at Palmerston, road service had commenced and, conversely, ended when it again entered the yard at Palmerston, which entitled the fireman to be compensated for any further time held on duty.

The railway challenged the above-mentioned contention of the employees. It maintained that this claim "is not in accordance with the facts, as such practice would be inconsistent with schedule rules as road mileage begins and ends at the outer main track switch connecting with the yard track, consequently, where a series of short trips are made it is the established practice to allow final terminal time from the time locomotive passes the designated switch on the last trip into the terminal."

The railway therefore maintained that the fireman had been properly compensated.

The Board was of the view that there was an emergency and decided that the claim of the employees "is not sustained."

Case No. 604.—The Canadian National Railways (Central Region) and the Brotherhood of Locomotive Firemen and Enginemen. The dispute concerned discipline assessed two firemen in connection with collision between two engines at Brent, Ontario, on June 15, 1948.

Joint Statement of Facts: Engines 3707 and 3364 were in collision on the main track within yard limits at Brent, Ontario. Both firemen involved were suspended for 30 days for failure to keep a sharp lookout and warn locomotive engineer in sufficient time to avoid the collision.

The employees contended that the distance from the west switch, where engine 3707 was brought to a full stop, and the coal chute where the engine 3364 was almost stopped was short enough to substantiate the employee's statements that both locomotives involved were moving at a very slow rate of speed when each fireman saw the other simultaneously.

The employees pointed out that at the time of the accident track No. 1 next to main line was occupied by a train with an engine and two cabooses standing ahead of the train which obstructed the view of the fireman to just a very short distance.

The employees therefore claimed that the discipline was unjust and that the firemen should be compensated for lost time.

The railway contended that from the west switch referred to, eastward there is a 3° 20″ curve to the left extending to the point of collision. On account of the curve, and engine and cars standing on track immediately north of main track of inside of curve, both firemen "knew that their engineer's view was obstructed and their engineers would be depending on them to give warning in sufficient time to prevent an accident."

The railway further contended that while the firemen "were apparently looking out, it is quite evident that they were not keeping a sharp lookout as stated in the employees' contention . . ." It therefore maintained that the discipline exerted in the case of both firemen was equitable.

The Board, after receiving additional oral and written evidence, decided that the contention of the employees "is not sustained."

Case No. 605.—Concerning Canadian National Railways (Central Region) and The Brotherhood of Locomotive Firemen and Enginemen. The dispute concerned the dismissal of a locomotive fireman at Lindsay, effective February 13, 1949, for court conviction.

Joint Statement of Facts: The employee in question, assigned to the spare board for Locomotive Firemen at Lindsay, was involved in an affray that took place in a hotel beverage room in Lindsay, Ontario. He was arrested for assaulting and obstruct-

ing police officers while executing their duty, was found guilty and served 30 days in jail. For police court conviction on a criminal charge, he was discharged from the service of the railway, effective February 13, 1949.

The employees contended that the fireman was illegally discharged by the railway. They quoted from Article 33A, Investigations, which reads as follows: "No fireman, helper or hostler will be suspended or dismissed upon *any charge,* without first having been given a fair and impartial investigation and his responsibility established, etc."

Attention was drawn to the fact that when the General Chairman (A. E. Matthews) representing the fireman was informed of the dismissal without an investigation having been held, a request was made to the District Officers for an investigation. The request was denied, the Officers claiming that they were privileged to decide whether or not it was necessary to conduct an investigation.

The employees therefore submitted that the fireman should be reinstated to his former standing and be compensated for time lost.

The railway contended that at the time of his dismissal, the fireman took no exception to it and after his release from jail did not contact the local officers at Lindsay in order that a formal statement could be taken. Appeals were made on his behalf by his son and by the General Chairman of the Brotherhood.

The company also maintained that while employed, he "did not render satisfactory service either to his fellow employees or the Company." It therefore contended that "there are no reasonable grounds for the request for reinstatement or for compensation for time lost."

In its decision, the Board stated that "the claim of the employees is sustained to the extent that the railways violated Rule 33 of the current schedule, but in view of the evidence presented the claim for reinstatement and payment for time out of service of (the fireman) is not sustained."

Case No. 606.—Concerning Canadian National Railways (Western Region) *ex parte* and the Brotherhood of Railroad Trainmen *ex parte.* The dispute was in connection with the dismissal and request for reinstatement of a conductor of Hanna, Alberta, with full seniority rights and reimbursement for all time lost from January 3, 1950. The case was heard on July 11, 1950.

Joint Statement of Facts: On October 14, 1949, the conductor was notified by letter that he had been discharged from the railway effective September 15. The reason given for his dismissal, was that he had been an "undesirable employee."

The railway submitted evidence showing that the conductor had been convicted on a charge of having "knowingly and wilfully (committed) an act contributing to a child's being or likely to become a juvenile delinquent, contrary to Section 33 (*b*) of the Juvenile Delinquents Act." The defendant was sentenced "to pay a fine of $100 and in default serve one month."

The case was appealed to a higher court and the presiding judge quashed the conviction and ordered the $100 fine to be returned to the appellant.

The company submitted that the conductor did not deny the facts, that the facts were not denied in the judgment of the court, and that the reason for the conductor's discharge had not been altered by the fact that his conviction had been quashed.

The employees maintained that since his appeal had been upheld and his conviction had been quashed, the conductor should be reinstated with full seniority and reimbursed for all time lost since January 3, 1950.

The parties concerned appeared before the Board and presented additional written and oral evidence.

The Board decided that the contention of the employees "is not sustained."

Collective Agreements and Wage Schedules

Recent Collective Agreements

A file of collective agreements is maintained in the Economics and Research Branch of the Department of Labour. These are obtained directly from the parties involved and through the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining

Coal Mining

SYDNEY MINES, N.S.—OLD SYDNEY COLLIERIES LIMITED AND THE UNITED MINE WORKERS OF AMERICA, DISTRICT 26.

Agreement to be in effect from February 1, 1950 to January 31, 1952, and thereafter from year to year, subject to notice. The company recognizes the mine committee in the discharge of their duties as provided for in the agreements which applies to all union members and to all who are eligible to membership in the union.

Check-off: the company agrees to deduct from the pay of all union members all dues, fines and initiation fees, and also assessments and levies for strictly union purposes. The maximum amount to be so deducted in any one month shall not exceed $5.

Hours: 8 per day; if necessary, certain employees may be required to work up to ½ hour longer to facilitate their own work or the work of the next shift or day. *Overtime:* mechanics, blacksmiths, and carpenters (except when employed as shaftmen) will be paid time and one-half for overtime and double time for work on Sundays and on 7 specified holidays; this does not apply to continuous service men or to men supplying for absentees. Rope splicers who work less than 4 hours overtime will be paid a half shift and those who work over 4 hours a full shift. Rope splicers at Princess colliery, when putting on new rope, will be paid time and one-half for overtime and double time for Sundays and 7 holidays. Shovel operators and boom operators shall be paid double time when called out on Sundays and on 7 holidays.

Vacations with pay will be granted to employees covered by the agreement in accordance with the Supplementary Finding and Directions of the National War Labour Board, dated January 20, 1944, as modified by later negotiations.

Wage rates for certain classes: the agreement contains schedules of mining rates for the Florence and Princess collieries showing the rates per ton of coal mined, rates for timbering, pushing, etc. Where daily rates are given, they are as follows: surface—tally boys $7.04; lamproom boys, compressor oilers (boys) $7.34; labourers, bank and screenmen, pickmen, teamsters, pit tub oilers $8.14; conveyormen $8.24; washhouse and boiler tenders, blacksmiths' helpers $8.53; lamproom men doing repairs, compressormen with oilers, tubmen and 2nd class carpenters, screen and bank mechanics, brook and reservoir pumpmen $8.64; colliery mechanics $8.69 and $8.95; electricians, carpenters 1st class $8.69; chauffeurs, truck drivers and tractor operators $8.70; shaftmen $9.37; welders $9.53; masons (surface) $9.75. Underground—trapper boys $6.93; pick boys $7.54; labourers, drivers, spraggers, couplers, pit tub oilers, pan movers, jig and balance onsetters, pit stablemen, pushers $8.14; man cage onsetters, landing tenders, pickmen, bratticemen, timbermen, pack builders, chock builders $8.24; rollermen $8.26; electric enginemen, haulage enginemen $8.14 to $8.70; machine repairers $8.69; pipemen $8.70; rope examiners and splicers, mine mechanics $8.95; chock drawers $9.25; mechanized mining rates—joy loader operators, cutting machine operators $11.90; borers, operators of duckbills, Eimco machine or other types of loaders $11.40; shuttle car operators $10.90; mechanics and electricians with loading units $9.55; others employed at face with loading unit $9.25. Banking station—firemen $8.72, boom operator $9.40, shovel operator $10.16. Electrical department—linemen, electricians, 1st class $10.21, 2nd class $9.58, helpers $8.69.

Provision is made for the election of *checkweighmen* and for *grievance procedure.*

STELLARTON, N.S.—THE ACADIA COAL COMPANY, LIMITED, AND THE UNITED MINE WORKERS OF AMERICA, DISTRICT 26.

Agreement to be in effect from February 1, 1950, to January 31, 1952, and thereafter from year to year, subject to notice. This agreement is similar to the one between Old Sydney Collieries Limited, Sydney Mines, and the United Mine Workers of America, District 26, summarized above, with the following differences:—

Hours: certain departments of the company will work only 7 hours on Saturdays. With regard to overtime this agreement provides only that no change will be made in the special privileges enjoyed by the employees in the matters of overtime and double time for Sundays and 7 specified holidays.

This agreement contains a provision that no change will be made in the differentials in favour of machine mining as against hand mining rates in certain sections of the collieries and the differentials for double shift.

Manufacturing

Vegetable Foods

TORONTO, ONT.—CHRISTIE'S BREAD, LIMITED, AND THE BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION OF AMERICA, FACTORY BAKERS' LOCAL 264.

Agreement to be in effect from May 1, 1950, to April 30, 1952, and thereafter from year to year until a new agreement has been

signed or until this agreement has been cancelled or terminated by either party upon 30 days' notice. It is agreed, however, that, should the cost-of-living index of the Dominion Bureau of Statistics show a substantial increase over the index as of May, 1950, the union may, upon 30 days' written notice after April 1, 1951, request a discussion of classification wage rates only. This agreement is similar to the one between Christie, Brown and Company Limited and Christie's Bread Limited and the Bakery and Confectionery Workers' International Union of America, Local 264, summarized in the LABOUR GAZETTE for January, 1950, p. 71, with the following changes and additions:—

This agreement does not cover working conditions in the biscuit department.

Hourly wage rates, in most cases, are increased by 4 cents per hour. In lieu of a 3-cent per hour addition to the straight-time hourly classification rates, the company agrees to put into effect and to pay the full cost of a *non-occupational benefit plan* which will include non-occupational accidental death coverages and non-occupational accident and sickness insurance for employees, hospitalization and surgical insurance, and medical benefits during confinement in a hospital, for employees and their dependents. The benefit plan will go into effect on November 19, 1950. The terms and conditions of the company's present group life insurance plan shall continue on a contributory basis as heretofore.

TORONTO, ONT.—CHRISTIE, BROWN AND COMPANY, LIMITED, AND THE BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION OF AMERICA, FACTORY BAKERS' LOCAL 264.

Agreement to be in effect from May 1, 1950, to April 30, 1952, and thereafter from year to year until a new agreement has been signed or until this agreement has been cancelled or terminated by either party upon 30 days' notice. This agreement is similar to the one between Christie Brown and Company Limited and Christie's Bread Limited and the Bakery and Confectionery Workers' International Union of America, Local 264 (L.G., Jan., 1950, p. 71), in so far as the latter applies to the biscuit department, with the following changes:—

A clause has been added which provides that all employees at the Lakeshore plant shall be granted one hour off with pay for each 9-hour shift, this hour to include full lunch and the two-15-minute rest periods.

Hourly wage rates are increased for all employees in the service of the company on August 7, 1950, by 4 cents, effective May 1, 1950, and by an additional 3 cents, effective August 7, 1950.

Rubber Products

TORONTO, ONT.—GUTTA PERCHA AND RUBBER, LIMITED AND THE UNITED RUBBER, CORK, LINOLEUM AND PLASTIC WORKERS OF AMERICA, LOCAL 136.

Agreement to be in effect from August 31, 1950, to August 31, 1951, and thereafter, subject to 30 days' notice. The company recognizes the union as the sole and exclusive collective bargaining agent for all eligible employees. Both parties agree that membership in the union is a voluntary act of each individual employee.

Check-off: the company will make arrangements to permit union members to have their monthly union dues deducted from their wages upon authorization; such authorization shall be subject to cancellation only during the last 7 days of the stated term of the agreement.

Hours: day and night shifts—8 per day Monday through Friday (except where night shift ends Saturday morning), a 40-hour week; engineering department—as arranged to fit in with above hours, except that standard hours for power house and boiler room will be a 6-day, 42½-hour week, with daily hours as arranged by the engineering department. *Overtime:* time and one-half for all work in excess of regular hours and for work on Saturdays and Sundays (except where they are part of regular shift); double time for work on 8 specified *paid holidays.*

Vacations with pay: one week after 1 year's seniority, 2 weeks after 5 years' seniority and 3 weeks after 15 years' seniority; employees with less than 1 year's seniority will be granted one-half day for each month of service.

Wage rates shall be the rates in effect prior to the signing of the agreement, increased by 7 cents per hour with the increase incorporated into the rate structure as follows: 7 cents per hour added to all time work rates, 5·1 cents added to all Bedaux base rates, a percentage added to all piece work rates by occupational groups to reflect an increase of 7 cents per hour on earnings. An additional adjustment will be made in the rates of skilled engineering trade personnel bringing their rates up to the following amounts (including the general wage increase of 7 cents): engineer $1.10 to $1.38, carpenters $1.16 to $1.36; electricians $1.22 to $1.42, millwrights $1.19 to $1.39, oilers $1.05 to $1.19, steamfitters $1.17 to $1.37, painters (grades 2 and 3) $1.10 and $1.20, tool maker $1.43, lathe operators $1.20 to $1.40, bench fitter and general machinist $1.18 to $1.38, machine shop (lead man) $1.50, welder (grade 2) $1.33, storemen $1.13. The above rates are retroactive to August 14, 1950. Skilled engineering trade personnel on the payroll of August 14, 1950, will be granted retroactive pay in the amount of $30.

Off-shift differential: a bonus of 5 cents per hour will be paid for a third 8-hour shift, for the second shift normally ending at 7 or 8 a.m. and for abnormal shifts commencing after 1 p.m. and finishing after 12.30 a.m., and a bonus of 3 cents per hour for the second 8-hour shift and for abnormal shifts commencing at 11 a.m., or later, and finishing before 12.30 a.m. (excluding part-time office cleaners).

Provision is made for *grievance precedure, seniority rights* and the *health and safety* of employees.

Wood Products

WINNIPEG, MAN.—BROWN AND RUTHERFORD LIMITED AND THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL 1901.

Agreement to be in effect from June 1, 1950, to May 31, 1952, and thereafter from year to year, subject to notice. Should the company cease operations for reasons beyond its control while the agreement remains in force, its expiry date shall be postponed

until 6 months after the resumption of normal operations. The company recognizes the union as the employee's sole collective bargaining agent. There shall be no discrimination, intimidation, interference, restraint or coercion with respect to any employee because of membership or non-membership in the union.

Hours: for mill employees—8 per day Monday through Friday, 4 on Saturday, a 44-hour week; for yard employees—48 per week. The company has agreed to recognize the principle of a 40-hour week to be put into effect after the parties have mutually agreed that the industry as a whole is prepared for it. *Overtime:* time and one-half for work in excess of regular weekly working hours and for work on Sundays and on 7 statutory holidays. The above provisions regarding hours and overtime do not apply to millwrights, repair and maintenance men and their assistants. There shall be no work done on Labour Day. After 2 years' continuous service employees shall be entitled to 3, and after 3 years' continuous service to 7, *paid holidays* (the previous agreement provided for 3 paid holidays after 3 years' and 7 paid holidays after 5 years' continuous service).

Vacations with pay: after 6 months' continuous service an employee shall receive ½ day for each month worked, until he has been so employed for 12 months; thereafter he shall receive one week per year.

Hourly wage rates in effect immediately prior to the effective date of the agreement shall be increased by 5 per cent or by 5 cents per hour, whichever is greater, for the period from June 1, 1950, to December 31, 1950, and by 10 per cent or by 10 cents per hour for the period from January 1, 1951, to May 31, 1952. This latter increase does not apply to employees engaged in manufacturing common or rough lumber, shippers, yard men, truck drivers and labourers; these employees shall be paid an increase sufficient to elevate their rates of pay to the rates prevailing in other lumber yards in the Greater Winnipeg area. The above increases will bring the hourly wage rates up to the following amounts (for the periods from June 1, 1950, to December 31, 1950, and from January 1, 1951, to May 31, 1952, respectively): stairmen $1.26 and $1.32; benchmen 95 cents to $1.26 and $1 to $1.32; stickermen $1 to $1.26 and $1.05 to $1.32; shapermen 95 cents to $1.21 and $1 to $1.27; general machinemen, charge hands $1.26 and $1.32; millwrights $1.10 to $1.16 and $1.16 to $1.21; assistants 90 cents to $1.05 and 95 cents to $1.10; machine and detail men 85 cents to $1 and 90 cents to $1.05; machine helpers (adult) 75 to 85 cents and 80 to 90 cents; breakoutmen 90 cents to $1.05 and 95 cents to $1.10; glaziers 85 to 95 cents and 90 cents to $1; yard men 65 to 80 cents and prevailing rates; truck drivers 75 to 85 cents and prevailing rates.

Escalator clause: from and after June 1, 1951, the rates of pay for all categories of employees shall be increased 2 cents per hour for every 3 point increase in the cost-of-living index as published by the Dominion Government for May, 1951, and shall be decreased on the same scale for a decrease in the cost-of-living index, but the rates of pay shall not be lower than those given above.

Provision is made for *seniority rights* and the *settling of disputes.*

Metal Products

GALT, ONT.—GALT METAL INDUSTRIES LIMITED AND UNITED STEELWORKERS OF AMERICA.

Agreement to be in effect from October 2, 1950, to October 2, 1951. The company recognizes the union as the sole and exclusive bargaining agent for all eligible employees.

Check-off: the company agrees to deduct monthly union dues from the earnings of all employees who so authorize and to remit same to the union; the authorization may be revoked by the employee on 6 months' notice.

Hours: 9 per day Monday through Thursday, 8 on Friday, a 44-hour week. *Overtime:* employees, with the exception of watchmen and guards, shall be paid time and one-half for work in excess of above hours (firemen after 56 hours in any one work week) and for work on Saturdays, Sundays and on 8 specified *paid holidays.*

Rest periods: there shall be one 10-minute rest period in the forenoon and one in the afternoon. In addition, each employee shall be allowed a respite of 5 minutes immediately prior to the end of each half shift.

Vacations with pay: employees with less than 5 years' continuous service shall be granted one week and employees with 5 or more years' continuous service two weeks.

Hourly wage rates: tool maker 95 cents to $1.38, machinist 95 cents to $1.18, maintenance men, die setters 95 cents to $1.13, inspectors 95 cents to $1.14, shipper 99 cents to $1.08, shipper helpers 95 to 98 cents, stockkeepers and stockkeepers' helpers 95 cents to $1.03, firemen, general help (male) 95 cents. Male starting rates of 87 cents and female starting rates of 60 cents will be paid for all day-work classifications with a 4-cent per hour increase after the first 30 days and an additional increase of 4 cents after the second 30 days' probation, thereby establishing a rate of 95 cents for males and of 68 cents for females after the full 60 days' probation; for youths under 18 years of age female rates shall apply.

Off-shift differential: employees, with the exception of watchmen, guards and firemen, shall receive a bonus of 5 cents per hour for complete evening and complete night shifts.

Provision is made for *seniority rights, grievance procedure* and the appointment of a *Safety and Health Committee.*

Construction

Buildings and Structures

CALGARY, ALTA.—ELECTRICAL CONTRACTORS' ASSOCIATION OF CALGARY AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 348.

Agreement to be in effect from July 1, 1950, to December 31, 1951, and thereafter from year to year, subject to 60 days' notice.

Union security: for all electrical work the employers shall hire only members of the union in good standing. Should the union be unable to furnish workmen within 24 hours of receiving a request, it shall issue working permits to workmen who apply and are recommended by the employer until such time as it can furnish men. Members of the

union shall not work for employers who do not comply with the provisions of this agreement (this does not apply to regular maintenance, municipal or government work when this is not done by the employer).

Hours: 8 per day Monday through Friday, a 40-hour week. *Overtime:* double time shall be paid for all work, except shift work, performed outside of the regularly scheduled working hours and on Saturdays, Sundays, 8 specified holidays and all general holidays declared by the Provincial or Federal Governments; when a holiday falls on a Sunday the following Monday shall be considered a holiday. Each shop shall have the right to employ one journeyman for emergency work on Saturday morning, same to be paid at straight time. Country work is to be done according to the Provincial Maximum Hours of Work Act (not more than 48 hours per week).

Vacations with pay: each employee shall be granted 2 weeks annually. Every week the employer shall place 4 per cent holiday with pay stamps in the employee's stamp book.

Minimum hourly wage rates: July 1, 1950, to December 31, 1950—foremen $1.70, journeymen $1.55; January 1, 1951, to December 31, 1951—foremen $1.75, journeymen $1.60. Apprentices as per the Alberta Apprenticeship Act; helpers shall be paid according to the apprenticeship act in respect to years of service and per cent of journeyman's rate plus 5 per cent. Workmen required to work outside the jurisdiction of the local union, where a higher rate of wages prevails, shall be paid the higher rate.

Night shift differential: night shift work shall be paid for at the rate of 8 hours' pay for 7 hours' work. Workmen must work at least 2 consecutive shifts to be considered on night shift.

Transportation: the employer shall furnish transportation to and from all jobs within the city limits. On out-of-town work the employer shall furnish transportation, board and all other necessary expenses and also pay travelling time on the basis of 8 hours in 24.

Provision is made for the *settling of disputes* and an *apprenticeship plan.*

Transportation and Public Utilities

Electric Railways and Local Bus Lines

OTTAWA, ONT.—OTTAWA TRANSPORTATION COMMISSION AND AMALGAMATED ASSOCIATION OF STREET ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, DIVISION 279.

Agreement to be in effect from January 1, 1951, to December 31, 1952, provided, however that either party may by written notice, delivered not later than November 15, 1951, require renegotiation of the wage rates for the year 1952. The commission agree to bargain exclusively with the union in respect to all eligible employees so long as the union remains the certified bargaining representative. There shall be no discrimination, intimidation or coercion because of membership or non-membership in the union.

Check-off: both parties agree to the establishment of a voluntary but irrevocable check-off of union dues, except that employees who were subject to the check-off at the date of the inception of this agreement shall remain subject thereto during the life of the agreement. The previous agreement provided for a voluntary and revocable check-off.

Hours: 8 per day (platform time 8¼ hours), a 48-hour week. *Overtime:* time and one-half shall be paid to car and bus operators for time worked in excess of 8½ hours (this does not apply to chartered runs), to all employees called out for emergency work after working a full day, to trackmen, day staff employees of power house, car shop, car shed, bus garage and line department for emergency work on Sundays and legal holidays and to employees who are requested to work on their day off; time and one-quarter for work on Sundays and on 8 specified holidays. Employees engaged in overtime work shall be given meal tickets.

Vacation with pay: employees with less than one year's service shall be entitled to one-half day for each month worked, to be taken in the year following the one in which they were hired; after one year's qualifying service an employee shall be entitled to 7 days off with 6 days' pay; after 2 or more qualifying years to 14 days off with 12 days' pay. A qualifying year shall be one in which an employee has been employed for the full year and has performed 2,000 hours of work or in which, in the case of employees hired prior to May 1, he has worked an average of 165 hours a month during his employment in such year, provided, however, that the above provision regarding vacations for employees with less than one year's service shall continue to apply as far as vacations for the year following the one in which they were hired are concerned. In computing the qualifying period, regularly booked 6-hour runs shall be treated in the same manner as 8-hour runs.

Hourly wage rates for certain classes: operators $1.15 (first 18 months $1.05 to $1.13), linemen (first to fourth class) $1.17 to $1.07, groundmen $1.01 to $1.05, water plant operator $1.10 and $1.15, substation operator $1.08 and $1.10, learner $1.05, maintenance and repair men $1.12 and $1.23, helper $1 to $1.07; motor mechanic, body mechanic, automotive electrician $1.13 to $1.25; apprentices from 81 cents in first year to $1.01 in fifth year; garage attendants $1 to $1.16; blacksmiths $1.10 and $1.20, carpenters $1.07 to $1.20, machinists $1.11 to $1.25; pitmen, car body and truck repair men, painters $1.06 to $1.15; upholsterers $1.01 to $1.18; welders $1.06 to $1.25; armature winders, electricians $1.06 to $1.19; firemen $8.48 (per day); cleaners $1; trackmen $1.01 to $1.04½; track welder $1.06 to $1.10; switchmen, truck drivers $1 to $1.04½; labourer 81 cents to $1; watchmen $7.04 to $7.48 (per day). With a few exceptions, the above rates represent an increase of from 15 to 18 cents per hour over the previous rates.

The commission will provide employees with free transportation on its regular car and bus services. All operators will be supplied by the commission with uniform clothing and trackmen, employed at drain work during the spring and fall, with rubber boots.

Provision is made for an *Insurance and Sick Benefit Plan, seniority rights* and *grievance procedure.*

Storage

Fort William and Port Arthur, Ont.—Certain Terminal Elevator Companies and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Local 650.

Agreements to be in effect from January 1, 1950, to December 31, 1951. The companies recognize the union as the exclusive bargaining agency for all eligible employees for the duration of this agreement. The principle of "open shop" is maintained and there will be no discrimination against any employee because of membership or non-membership in the union.

Check-off: there shall be a voluntary revocable check-off of monthly union dues.

Hours: 8 per day Monday through Saturday, a 48-hour week. *Overtime:* hourly rated employees shall be paid time and one-half for all work over the regular 8 hours per day and on 2 specified holidays and double time for work on Sundays and on 6 *specified paid holidays;* monthly rated employees shall be paid at *pro rata* rates for all overtime and for work on 8 holidays. Except in case of emergency, no employee shall be required to work more than 11½ hours in any one shift, such time to include both regular time and overtime.

Vacations with pay: 2 weeks to monthly rated employees with one or more years of service and to hourly rated employees who have worked not less than 46 weeks in a period of 52 consecutive weeks.

Wage rates (for the periods from January 1, 1950, to September 30, 1950, and from October 1, 1950, to December 31, 1951, respectively): for ordinary labourers, including shovellers, $1 and $1.02 per hour for all other classes of hourly rated employees, including assistant weighmen, electricians assistants, millwrights' assistants, cleaner men, bin floor men, oilers, etc., $1.05 and $1.07 per hour (previous rates were 95 cents per hour for ordinary labourers and $1 for other hourly rated employees); for all monthly rated men the rate of pay existing as at December 31, 1949, shall be increased by $10.40 and $14.56 per month. When hourly rated men are appointed to act in a supervisory capacity they shall be paid 10 cents per hour extra.

Off-shift differential: all employees shall receive 5 cents per hour extra for all work performed on any other than their regular day shift.

Provision is made for *seniority rights* and *grievance procedure.*

Service

Business and Personal

Toronto, Ont.—Toronto Launderers and Dry Cleaners Limited and International Association of Cleaning and Dye House Workers, Local 180 (Cleaners and Dyers Union).

Agreement to be in effect from September 1, 1950, to August 31, 1951, and thereafter from year to year, subject to notice. The company recognizes the union as the sole and exclusive collective bargaining agency for all eligible employees. There shall be no discrimination, intimidation or coercion against any employee because of his union or non-union affiliation or because of his activity or lack of activity in any labour organization.

Check-off: the parties agree to a voluntary but irrevocable check-off of union dues.

Hours: in the laundry division 40 and in the dry cleaning division 42½ per week. *Overtime:* time and one-half for work in excess of the standard weekly hours and for work on Sundays and on one statutory holiday, except when they form part of an employee's standard work week. All employees will be granted 7 specified *paid holidays* (an increase of one). The present system of *rest periods* will be continued.

Vacations with pay: after 1 year's continuous service 1 week, after 2 years' service 1 week and 1 day, after 3 years' service 1 week and 2 days, after 4 years' service 1 week and 3 days and after 5 years' service 2 weeks.

Hourly wage rates: female employees and boys under 18 years—starting rate 56 cents, after 6 weeks 60 cents; males over 18 years—starting rate 78 cents, after 6 weeks 85 cents, wash men 98 cents; employees in the laundry department will be given additional incentive pay, depending on their production; drycleaning department—checkers, shippers, inspectors, baggers 60 to 71 cents; silk spotting and silk finishing 60 to 86 cents, drycleaners 82 to 98 cents, wool pressers 9½ cents per unit plus 3 cents per hour. The above rates represent an increase of 5 cents per hour over the rates previously in effect. The company agrees to continue its practice of paying a Christmas bonus.

A *night shift differential* of 5 cents per hour will be paid for time worked after 6 p.m.

Provision is made for *grievance procedure* and *seniority rights.*

London, Ont.—Middlesex Properties Limited (operating the Hotel London) and the Hotel and Restaurant Employees and Bartenders International Union, Local 37.

Agreement to be in effect from October 1, 1950, to October 1, 1951, and thereafter from year to year, subject to notice during the month of August. The company recognizes the union as the sole and exclusive collective bargaining agent for all eligible employees. There will be no discrimination, intimidation, interference, restraint or coercion because of membership or non-membership in the union.

Hours of work vary in accordance with a schedule which forms part of the agreement.

Vacations with pay: 2 weeks will be granted after one year's continuous service.

Daily wage rates: housekeeping department—linen maids, chambermaids $3.95 to $4.70; housemen $4.90 to $5.80, window washers $5.25 to $6.60, wall washer $4.40 to $5.25; service department—day bell boy $1.75 to $2.30, night bell boy $2.75 to $3.75, elevator man $4 to $5.20, baggage porter $3.15 to $3.95, doorman $3.75 to $4.25; dining room—waiters, waitresses $3.85 to $4.85; busboys $3.75 to $4.25; kitchen department—sauce cook, swing cook, pastry cook and baker $7.25 to $8.95; night cook, gardemanger, butcher $6.25 to $8.25; boilerman $6.25 to $7.60; roast cook $5.85 to $6.95, assistant baker and pastry cook $5.40 to $6.40, assistant cook $5.25 to $6.05, breakfast cook $4.75 to $6.25, assistant butcher $4.25 to $6.60; ware

washers, pot washer, kitchen porter, night porter $4.55 to $4.90; head pantry girl $4.90 to $5.75, pantry girls $4.45 to $4.70, vegetable cleaners $3.95 to $4.75, assistant storekeeper $4.25 to $4.95, stewards clerk $4.25 to $4.90; cocktail lounge—bartenders $7.05 to $7.55, barboys $4.25 to $5.25, waiters $3.75 to $4.25; beverage room—tapman $5.25 to $6.05, waiters $3.75 to $4.30, glass washers $3.75, porter $4.75 to $5.75; engineer—ice cutter $4.25 to $5.25, plasterer $8.25, carpenter $7.85, painter $7.05, plumber $8.60; laundry—utility man $5.40 to $6.40, laundry washman $5.40 to $6.15, extractor operator $5.40 to $5.75, female staff $4.25 to $5. In addition to the above rates the company may, at its discretion and according to its merit rating plan, pay employees special merit rates.

Sick leave with pay up to a maximum of 5 days in any one year shall be granted, where necessary, to full time regular employees with one or more years of continuous service. Under no circumstances shall such leave be cumulative. The allowance for sick pay shall only commence after the third day of illness.

Provision is made for *seniority rights* and *grievance procedure.*

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec,* include the repeal of two agreements, the amendment of eleven others and the correction of one of them, and the extension of two new agreements. In addition to those summarized below, they include: the amendment of the agreements for retail stores at Granby and for barbers and hairdressers at St. Hyacinthe published in the *Quebec Official Gazette* issue of January 27. The amendment of the agreement for retail stores at Farnham in the issue of February 3; the repeal of the agreements for municipal employees at Jonquière and at Kenogami, the amendment of the agreement for tannery employees in the province and a correction of an amendment for the metal trades industry at Quebec in the issue of February 10.

Requests for amendments to the agreements for the building trades at Chicoutimi and at Three Rivers, for the dressmaking industry and for tannery employees in the province, for grocers and butchers at Sherbrooke, and for retail stores at Richmond and Melbourne and at Windsor were gazetted January 27; for freight handlers (longshoremen, inland and coastal), for funeral undertakers, for the ornamental iron and bronze industry and for printing trades at Montreal, for the men's and boys' clothing industry in the province, for retail stores at Rimouski, for the building trades at Sherbrooke and for iron oxide miners at Red Mill, were gazetted February 10.

Orders in Council were also published approving the levy of assessments on the parties to certain agreements.

Manufacturing

Textiles and Clothing

LADIES' CLOAK AND SUIT INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated January 25, and gazetted February 3, amends the previous Orders in Council for this industry (L.G., Jan., 1947, p. 48; June, 1948, p. 619; Aug., 1949, p. 987; Jan., 1950, p. 77, and previous issues).

Minimum wage rates for employees working on an hourly or weekly basis only: fully skilled cutter $1.28⅝; semi-skilled cutter 97½ cents; trimmer 98⅜ cents; fur tailor $1.06¾; assistant fur tailor, machine baster, special machine operator 79¾ cents; button sewer, general hand and examiner 56⅝ cents per hour.

Minimum wage rates for piece-work (piece rates to be fixed to yield at least the following rates for workers in the following classes): skilled operator (male) $1.28⅝; skilled operator (female) $1.05⅛; section operator (male or female), top presser, machine presser $1.28⅝; under presser $1.22; piece presser, semi-skilled operator (male) 97½ cents; semi-skilled operator (female) 91½ cents; skirt maker, lining maker, finisher, hand baster 79¾ cents. Piece-work rates will be the same for male and female employees.

Minimum weekly wage rates for apprentices: apprentice operators, pressers and fur tailors from $15.40 per week in first 6 months to $38.56 after 36 months; apprentice skirt makers, lining makers, finishers, machine basters, hand basters and special machine operators from $15.40 per week in first 6 months to $31.84 after 24 months; apprentice cutters and trimmers from $15.40 in the first 6 months to $51.36 after 48 months; apprentice button sewers, general hands and examiners from $15.40 in first 6 months to $22.60 after 18 months.

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the LABOUR GAZETTE, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

All of the above wage rates are to be in effect from December 1, 1950, and represent an increase of 7 per cent over the rates previously in effect. Notwithstanding the minimum rates per hour set forth in the present agreement all piece-work rates shall be increased by 7 per cent as and from December 1, 1950.

MILLINERY INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated February 1, and gazetted February 10, amends the previous Orders in Council for this industry (L.G., March, 1947, p. 369, Sept., p. 1307; June, 1949, p. 736).

Vacation with pay: 2 weeks with pay (previously one week), after at least one year in the industry and at least 6 months' service with the same employer previous to June 30 in any year. Vacation pay to be calculated as follows: those employees who, during the period from July 1 of any year to June 30 of the following year have worked a minimum total of 1,400 hours (8 full months) are entitled to 2 weeks' pay at their individual weekly rate; employees who have worked less than the time stipulated above are entitled to 4 per cent (previously 2 per cent), of their gross earnings. Employees with a minimum of 2 months' service, in the event of termination of employment, are entitled to 4 per cent (previously 2 per cent), of the wages earned by them after June 30 preceding their termination of employment.

Minimum weekly wage rates in zone I: hand blocker $57.96; blocker $53.60; cutter, straw operator, fabric operator $52.29; draper $36.60; trimmer draper $32.40; trimmers $29.50; zone II—10 per cent less than minimum rates of zone I. (The above rates represent increases ranging from $4.50 to $7.76 per week over those formerly in effect.)

Pulp, Paper and Paper Products

UNCORRUGATED PAPER BOX INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated February 1, and gazetted February 10, amends the previous Orders in Council for this industry *in the district of Montreal* (L.G., Dec., 1947, p. 1802; Aug., 1948, p. 871; March, 1949, p. 301, Oct., p. 1246; April, 1950, p. 516) .

Specified paid holidays: the number of paid holidays is now increased to 3 by the addition of Christmas Day and Labour Day.

Minimum hourly wage rates in zone I (Montreal district) for female employees: set-up department—forelady 68 cents; hand worker (class A) 63 cents; hand worker (class C) covering machine operator, staying machine operator, Stoke & Smith machine operator, top-piece machine operator 56 cents; hand-fed machine table gummer, packer and tier, four-corner machine feeder, operators on machines not classified above 54 cents; folding department—forelady 68 cents; stitcher operator 56 cents; stripper, folder, packer and tier, Brightwood machine feeder, automatic glueing machine feeder, operators of machines not classified above 54 cents. (The above rates in most cases are from 5 cents to 7 cents per hour higher than those previously in effect.) Basic hourly wage rates for female employees are from 40 cents per hour during the first 3 months and 45 cents during the second 3 months to 50 cents per hour during the fourth 3 months instead of from 40 cents during the first 6 months to 48 cents in the fourth 3 months as previously in effect. The classifications hand labeller 54 cents and labelling machine operator 56 cents per hour are added to the schedule of minimum rates for the set-up department.

Minimum hourly wage rates in zone I for male employees: set-up department—foreman $1.19 assistant $1.04; scorer, cutter on knife (first class) 95 cents; cutter on knife (second class) 85 cents; end-piece operator (single) 84 cents; end-piece operator (double) 87 cents; four-corner stayer operator 91 cents; feeder (four-corner stayer), punch operator 77 cents; circular saw operator 78 cents; slitter operator 80 cents; bale press operator 76 cents; folding department—foreman $1.19, assistant $1.04; die maker $1.06, assistant die maker 78 cents; automatic glueing machine makeready man 99 cents; Brightwood machine makeready man 91 cents; feeder (Brightwood machine), feeder (cylinder box press) 77 cents; cutter on knife (first class), cylinder box pressman 95 cents; cutter on knife (second class) 85 cents; stripper 74 cents; bale press operator 76 cents; general—machinist (first class) 95 cents; maintenance and repairman, truck driver 82 cents; shipper 90 cents; boiler fireman 73 cents. (The above rates for male employees of zone I represent increases ranging from 6 to 11 cents per hour over those previously in effect.) Basic wage rates of male employees, over 18 years of age (previously no age limitation mentioned), are increased by 5 cents per hour and are now from 55 cents per hour during the first 3 months to 70 cents per hour in the fourth 3 months. Rates for stationary enginemen 78 cents per hour and for chief-engineman (second class) $43.50 per week; (third class) $37.25 per week remain unchanged. New classifications are added to the minimum wage schedules of various departments and their rates are as follows: set-up department—creasing operator 95 cents, wrapper makeready man 90 cents, operator of machines not classified above 75 cents; folding department—Indman machine makeready man 91 cents; waxing machine makeready man 75 cents; automatic cellophane machine makeready man 99 cents; feeder automatic cellophane machine, feeder (platen die cutting press) 77 cents; power stacker-lift truck operator 80 cents; platen die cutting pressman 88 cents; packer and tier 70 cents; operators of machines not classified above 75 cents; general—electrician 95 cents, assistant shipper 75 cents, watchman 70 cents. A new basic wage scale for male employees under 18 years of age is included and the minimum rates are as follows: from 45 cents per hour during the first 3 months to 55 cents in the fourth 3 months.

Night shift differential is now 15 per cent in excess of the regular day shift rates instead of 20 per cent, as previously in effect, and any remuneration for overtime work will include this 15 per cent.

Printing and Publishing

PRINTING TRADES, QUEBEC DISTRICT.

An Order in Council, dated February 8, and gazetted February 17, makes obligatory the terms of a new agreement between "Le

Syndicat patronal de l'Imprimerie de Québec, Inc." *and* "Le Syndicat Catholique des Imprimeurs et Relieurs de Québec, Inc." "L'Union Typographique de Québec", Local No. 302, "L'Union des Pressiers et Clicheurs de Québec", Local No. 152, "L'Union des Relieurs", Local No. 152, Québec, "Le Syndicat Catholique des Imprimeurs de Rimouski et Rivière-du-Loup", "Le Syndicat Catholique des Ouvriers Imprimeurs de la Beauce". Agreement to be in force from February 17, to December 31, 1951, and thereafter from year to year, subject to notice. Contracting parties have agreed to a *retroactive date of January 1, 1951,* from which date the terms of this agreement will be in effect. The agreement covers both daily newspaper and job work.

Territorial jurisdiction comprises the judicial districts of Quebec, Beauce, Montmagny, Kamouraska, Rimouski, Gaspé, Bonaventure and those parts in the districts of Three Rivers, St. François and Arthabaska not governed by the agreement for printing trades in the Montreal district.

Establishments governed by the agreement are divided into 5 classes for the purpose of rating the wages and the duration of labour: class "A"—includes all establishments operating one or more rotary multicylinder printing presses, for whatever purpose, as well as photogravure and electrotyping establishments with the exception of paper bag factories; class "B"—includes all establishments operating one cylinder and 3 automatic presses, or 2 cylinder and 2 automatic presses, or 3 cylinders and one automatic press, or 4 cylinders or more, and paper bag factories; class "C"—includes all establishments operating 2 cylinder presses (or more), or one composing machine (or more), or one cylinder when employing 7 male employees (or more), or any establishment employing 7 or more male employees irrespective of the equipment, as well as lithography, offset, photo-litho, ruling and bookbinding establishments not specifically mentioned in classes "A", "B" and "E", and the printing departments of paper box manufacturing concerns; class "D"—includes all establishments not comprised in the other categories; class "E"—includes all establishments engaged exclusively in bookbinding operations.

Hours: 42½ hours per week for establishments of classes "A", "B", "C" and "E" of the judicial district of Quebec with the exception of the aniline press department of paper bag factories; 45½ hours per week for establishments of class "D" of the judicial district of Quebec, for the aniline press department of paper bag factories and for all establishments of judicial districts other than that of Quebec; hours for night shifts —a maximum of 39½ hours constitutes a regular work week with the exception of establishments in judicial districts other than that of Quebec where the regular week is one of 42½ hours; the maximum daily duration of night work in all establishments governed by this agreement is 8½ hours. In paper box factories the regular duration of work is 48 hours. (The above hours represent a reduction of 2½ hours per week with the exception of those for paper box factories which remain unchanged.) From January 1, 1952, the standard work week will be reduced by 2½ hours in all shops.

Overtime as previously in effect, is payable at the rate of time and one-half; double time for work on Sundays and 8 specified *paid holidays.* Paid statutory holidays were increased from 5 to 6 in 1949, to 7 in 1950 and to 8 in 1951 as provided for in the previous agreement summarized in the Labour Gazette issue of February, 1949, on p. 178.

Minimum hourly and weekly wage rates: typographer, keyboard, caster operator, electrotyper $1.33 per hour for class "A", $1.28 for class "B", $1.23 for class "C" (electrotypers not included in classes "B" and "C"); bookbinding finish-gilder $1.33 for class "A", $1.28 for class "B", $1.23 for class "C", $1.19 for class "E", pressman and stereotyper $1.30 for class "A", $1.26 for class "B", $1.21 for class "C"; bookbinder $1.25 for class "A", $1.22 for class "B", $1.18 for class "C", $1.16 for class "E"; photoengravers and camera operator $1.25 for class "A"; pressman on cylinder $1.08 for class "D"; pressman on platen press and typographer $1 for class "D". (These rates are 11 cents per hour higher than those formerly in effect.) As previously in effect, journeymen on *night shifts* will receive $3 more per week than the regular rates established for day workers and foremen will be paid $5 more per week than journeymen in class "A", $4 more in classes "B" and "C", and $3 more in other classes. Rates for bookbinding female employees are increased by from $1 to $2 per week and are now as follows: from $14 per week in the first 6 months to $22 in the second 6 months of the fourth year. Minimum rates for apprentices are from $1 to $2 per week higher than those formerly in effect and are now as follows: class "A"—from $16 per week in the first year to $35 in the second 6 months of the fifth year; classes "B" and "C"—from $15 to $34; classes "D" and "E"—from $15 to $31. Apprentices on *night shifts* receive an additional $2 per week. Caster men's helpers will receive apprentices' wages up to the rate fixed for the fourth year inclusive; after 4 years their rate will be increased by 10 per cent every year, until they attain the journeymen's rate. Rates for helpers in classes "A", "B" and "C" remain unchanged at from 43 cents per hour in the first year to 47 cents in the second year.

In judicial districts, other than that of Quebec, the wage scale may be reduced by 10 per cent.

Vacation: one week with pay annually after one year's continuous service; one-half day with pay for each month of service for those who have been employed less than one year. (The above provisions are similar to those previously in effect.) New provisions are added as follows: all journeymen, with the exception of bookbinding female employees, are entitled, each year, to 3 days additional vacation with pay and vacation pay is computed on the basis of 50 per cent of the journeymen's wages for the standard work week. The period of continuous service which entitles an employee to an annual vacation with pay extends from May 1 of one year to April 30 of the following year.

Home work is prohibited. Provision is made for board and lodging, for apprenticeship regulations, and for the proportion of apprentices, in ratio to the number of journeymen, that may be employed in establishments of various classes.

Metal Products

Metal Trades, Quebec District.

An Order in Council, dated January 25, and gazetted February 3, amends the previous Orders in Council for this industry (L.G., Nov., 1948, p. 1247; Jan., 1949, p. 67, Oct., p. 1247; Jan., 1950, p. 77, Dec., p. 2067). Another amendment to this agreement was published in the *Quebec Official Gazette* issue of November 18, 1950. The present amendment provides that the name "Metal Trades, Quebec District", will be substituted for the name "Mechanical Construction and Repair Industry, Quebec District".

Territorial jurisdiction of the agreement comprises the city of Quebec and within a radius of 50 miles from its limits, and the municipalities of St. Ephrem de Beauce, St. André de Kamouraska and St. Jean-Port-Joli.

Industrial jurisdiction comprises the fabrication, installation, transformation and repair of boilers, metal or mechanical parts, tanks, engines, machines or parts of all kinds, and other mechanical equipment, whether such operations be carried out inside or outside metalworks, and whether it constitutes the main or secondary industry of the establishment provided it is done for commercial purposes. It also applies and extends exclusively within the limits of its territorial jurisdiction to any construction, installation, transformation and repair of boilers and tanks not carried out in metalworks. However, this agreement does not apply to office chief-clerks and clerks, foreman (not doing manual work), technical staff, elevator operators, messengers, maintenance employees, employees engaged in shipbuilding and repairs, students under 16 years of age in charitable institutions governed by the Public Charities Act, employees specifically engaged in the construction or repair of elevators who are governed by the agreement for the elevator construction industry for the province (included in the building trades agreement for Montreal) nor to employees in an establishment not principally engaged in metalwork operations and who are covered by a private collective agreement stipulating better working conditions and higher wages than those of the present agreement.

Minimum hourly wage rates: toolmakers $1.15 in zone I, $1.02 in zone II; draughtsman $1.05 in zone I, 92 cents in zone II; general machinist, pattern-maker, general welder 95 cents in zone I, 82 cents in zone II; lathe, milling machine, etc., machinist, marine mechanic, fitting mechanic, boilermaker, tinsmith, pipe mechanic, welder (electricity and acetylene) 90 cents in zone I, 77 cents in zone II; metalworks joiner, blacksmith, cutter (electricity, oxyacetylene), bodyworker 85 cents in zone I, 72 cents in zone II, except for bodyworker whose rate in zone II is 77 cents; storekeeper 80 cents in zone I, 67 cents in zone II; truck driver 75 cents in zone I, 64 cents in zone II; helper 70 cents in zone I, 62 cents in zone II; common worker 65 cents in zone I, 57 cents in zone II. (The above minimum rates represent an increase of 5 cents per hour in zone I and 7 cents per hour in zone II over those rates previously in effect.) Minimum rates for construction boilermakers, erectors, steam generating mechanics, welders, are increased from $1.15 to $1.50, for helpers from 85 cents to $1.10; however the installation of portable tanks and boilers under 2 tons in weight will be remunerated at the rates provided for by the terms of this agreement and shown above. Rates for machine operators remain unchanged at from 65 cents in zone I during the first year, 55 cents in zone II, to 75 cents in zone I and 65 cents in zone II in the third year. Minimum rate for machine fitters (formerly classified as assemblers) is unchanged at 55 cents during the first year in zone I, 50 cents in zone II; 62 cents during the second year in zone I, 55 cents in zone II, but is increased from 68 to 70 cents during the third year in zone I, from 60 to 62 cents in zone II; increased from 75 to 78 cents during the fourth year in zone I, from 65 to 68 cents in zone II. The following classifications are added to the wage scale—machine feeders from 45 cents during the first 6 months in zone I, 40 cents in zone II, to 55 cents during the second 6 months of the third year in zone I, 50 cents in zone II; metal products fitter from 55 cents during the first 6 months in zone I, 50 cents in zone II to 65 cents during the second 6 months of the third year in zone I, 60 cents in zone II. Apprentices who have completed their apprenticeship period are entitled to an increase of 10 per cent on the wages of a fourth year apprentice, a second 10 per cent after an additional period of not less than 6 months and a third 10 per cent increase after an additional period of not less than one year. Thereafter, the apprentice will be examined by the Board of Examiners and, based on the result, the apprentice will be classified as a journeyman or will remain a fourth year apprentice, third 10 per cent. Examinations may be repeated after every additional apprenticeship period of one year. Employees engaged in more than one operation or trade will receive the rates applicable to the highest paid operation or trade. If a piece-work or job-work system is established the workers will be paid not less than the minimum rates fixed in the present agreement.

Apprenticeship regulations are included in the terms of this amendment.

Construction

Metal Trades, Quebec District.

See above under "Manufacturing: Metal Products."

Building Trades, St. Hyacinthe.

An Order in Council, dated January 25, and gazetted February 10, amends the previous Orders in Council for this industry (L.G., July, 1947, p. 1002, Sept., p. 1308; May, 1948, p. 488; Oct., 1949, p. 1247; Feb., 1950, p. 209, Aug., p. 1185, Oct., p. 1679, Dec., p. 2067; Jan., 1951, p. 64, and previous issues).

Cost-of-living wage adjustment: for quarterly adjustments the Parity Committee will take as a basis the federal cost-of-living index for the months of February for the May adjustment, of May for the August adjustment, of August for the November adjustment and of November for the February adjustment.

Plumbers, Three Rivers.

An Order in Council, dated February 8, and gazetted February 17, amends the

previous Orders in Council for this industry (L.G., May, 1948, p. 488; June, 1950, p. 876). This amendment to be in effect from January 1, 1951.

Minimum hourly wage rates for contractors (personal services) are increased from $1.70 to $1.80 per hour; senior journeymen from $1.10 to $1.20; junior journeymen from 95 cents to $1 per hour; common workers from 70 to 80 cents per hour. Rates for apprentices remain unchanged during the first and second year but are increased by 5 cents per hour during the third and fourth year and are now as follows: 40 cents per hour in the first year, 55 cents in the second, 65 cents in the third, and 75 cents in the fourth year.

Transportation and Public Utilities

Local and Highway Transport

TRUCK DRIVERS, MONTREAL.

An Order in Council, dated January 25, and gazetted February 3, amends the previous Orders in Council for this industry (L.G., Sept., 1948, p. 995; Aug., 1949, p. 989). Another amendment to this agreement was published in the *Quebec Official Gazette* issue of April 15, 1950, p. 1125.

Welfare Plan: all employers will pay an amount of $3.50 per calendar month towards a group insurance plan which will provide, to each employee with at least 80 hours of service per month, the following benefits—life insurance, sickness and accident, and hospital and doctor's fees. New employees are eligible to insurance after the last day of the second month following that in which they were employed. Certain benefits, as sickness and accident, and hospital and doctor's fees may be extended to include an employee's wife and unmarried children under nineteen years of age.

This plan will be administered by the Parity Committee who may appoint a subcommittee to be responsible for the levy of assessments from the employers to finance the above plan.

Water Transport

LONGSHOREMEN, CHECKERS AND COOPERS (OCEAN AND INLAND), SOREL.

An Order in Council, dated January 25, and gazetted February 3, makes obligatory the terms of a new agreement between certain stevedoring firms and Le Syndicat Catholique et National des Débardeurs de Sorel, Inc. Agreement to be in effect from February 3, 1951, until January 31, 1952, thereafter from year to year, subject to notice.

This agreement applies to the loading and unloading of all ships (including the handling of grain) engaged in ocean, inland and coastal navigation, to the loading and unloading of all railway cars, as well as the work of checkers and coopers. It also applies to longshoremen paid by the hour and engaged in loading and unloading explosives.

Territorial jurisdiction comprises the harbour of Sorel.

Overtime: work on Sundays and 5 specified holidays, time and one-half. Time and one-half to be paid also for work during meal hours and thereafter until relieved. However, if the work can be completed in one working hour, longshoremen will work during the meal hour at the regular rate of wages. Overtime for those workers engaged in handling explosives will be paid at the rate of double time after 6 p.m., and for work performed on Sundays and 5 specified holidays, but no employee is compelled to work on any of the above specified holidays.

Minimum hourly wage rates: for loading grain—$1.07½ for work between 7 a.m. and 6 p.m.; $1.17½ for work between 7 p.m. and 12 midnight; $1.27½ for work between 12 midnight and 6 a.m.; for unloading grain out of lake and ocean steamers into the elevator—97½ cents per hour for work between 7 a.m. and 6 p.m.; $1.00½ for work between 7 p.m. and 12 midnight; $1.07½ for work between 12 midnight and 6 a.m.; for loading or unloading of cargoes not otherwise specified from or to vessels and for railroad cars, cleaning or bunkering of vessels and erection of grain fitting—$1.02½ for work between 7 a.m. and 6 p.m.; $1.12½ for work between 7 p.m. and 12 midnight; $1.22½ for work between 12 midnight and 6 a.m.; for unloading or loading of vessels and/or railroad cars and cleaning same from sulphur, china clay, potash, cyanamid, pitch and all other similar strong cargoes, not including phosphates—$1.17½ for work between 7 a.m. and 6 p.m.; $1.27½ for work between 7 p.m. and midnight; $1.37½ for work between 12 midnight and 6 a.m.; foremen to be paid 10 cents per hour extra. Longshoremen reporting for work at 7 a.m. and 1 p.m. will wait one-half hour without pay, but if required to wait longer, regular rates of pay for such waiting time; those workers reporting for duty at 7 p.m. will be paid at regular rates until discharged. Employers may call longshoremen for 10 a.m. and 3.30 p.m. In the event of being put to work or discharged, longshoremen will be paid a minimum of one hour at the prevailing rate for each time called with the exception of the 3.30 p.m. call for which they will be paid a minimum of 2 hours at the prevailing rate; no calls to duty between 7 p.m. and 7 a.m. (with the exception of those workers engaged in trimming bunker-coal) who will be paid a minimum of 4 hours from the time ordered out to commence work. *Minimum wages for the handling of explosives* are as follows: for work between 7 a.m. and 12 noon and between 1 p.m. and 6 p.m.—longshoremen, water carriers $1.35; foremen, carpenters, winchmen and hatchmen $1.45; walking bosses $1.85. Employees required to work will be called for 7 a.m., 7.30 a.m., 10 a.m., 1 p.m., 1.30 p.m., 3.30 p.m. and be paid for one hour at the prevailing rate from the time ordered out except for the 3.30 p.m. call for which the employees will be paid a minimum of 2 hours.

Hatch beams must be taken off or bolted when men are working in the hatch and using a winch.

Provision is made for the number of men in gangs and the number varies according to the type of work performed.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the LABOUR GAZETTE for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During January

(1) ***Works of Construction, Remodelling, Repair or Demolition.***

During the month of January the Department of Labour prepared 72 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 125 construction contracts was awarded by the various Government departments. Particulars of these contracts appear below.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are *"minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates".

(2) ***Contracts for the Manufacture of Supplies and Equipment.***

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

Department	No. of contracts	Aggregate amount
Canadian Commercial Corporation. . . .	10,694	$15,917,468.71
Post Office.	13	94,221.19
Public Works. . . .	1	5,450.00

(3) ***Arrears of Wages***

During the month of January the sum of $177.03 was collected from one employer who had failed to pay the wages required by the labour conditions attached to his contract. This amount was distributed by the Department to the 22 employees concerned.

Contracts Containing Fair Wages Schedules Awarded During January

(The labour conditions of the contracts marked (*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of 8 per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

Canadian Commercial Corporation

Goose Bay, Labrador: A. F. Byers Construction Co. Ltd., repair of hangar trusses, RCAF Station. *Summerside, P.E.I.:* M. F. Schurman Co. Ltd., repairs to sub-floors of

Buildings 7, 9, 13, 15, 20, 30, 38, 51 and 56, RCAF Station. *Dartmouth, N.S.:* Trynor Construction Co. Ltd., renewal of water distribution system, RCN Armament Depot; Arthur & Conn, Ltd., installation of electrical work underneath mezzanine floor Hangar 21, RCN Air Station. *Debert, N.S.:* Dominion Steel & Coal Corp. Ltd., construction of chain link fence, Magazine Area. *Sydney, N.S.:* R. G. McDougall, redecking jetty, Point Edward Naval Base. *Moncton, N.B.:* W. Ronald McLaughlin, repairs to foundation Building No. 1, Garrison Barracks. *Lachine, P.Q.:* R. M. Clark Construction Co. Ltd., renovation of officers' mess, Building No. 3, RCAF Station. *St. Hubert, P.Q.:* Building Renovators Ltd., interior painting of hangars, RCAF Station. *London, Ont.:* A. N. Martin, exterior painting of 11 buildings, Wolseley Barracks; Sid Jones Construction Co. Ltd., insulation heating and ablution facilities Building No. 8, Central Ordnance Depot; A. F. Byers Construction Co. Ltd., repair to Hangar No. 2, RCAF Station. *Mount Hope, Ont.:* W. J. Walsh & Co., re-location of boilers and installation of new heating system, RCAF Station. *Gimli, Man.:* Hudson's Bay Co., laying of linoleum, RCAF Station. *Winnipeg, Man.:* Henry E. Gibson & Co., construction of classrooms and general repairs, HMCS "Chippawa". *Saskatoon, Sask.:* Onufry Waschuk, repairs to subfloors of Buildings 1, 6, 17, 19, 32 and 35, RCAF Station. *Abbotsford, B.C.:* F. Drexel Co. Ltd., re-insulation of heating distribution lines, RCAF Station. *Kamloops, B.C.:* H. Giddens Ltd., replacement of flashings, RCN Magazine.

Central Mortgage and Housing Corporation

St. John's, Nfld.: Chester Dawe Ltd.,* installation of screen and storm doors. *Cornwallis, N.S.:* George Mabee,* installation of surface drains, culverts and ditching of streets; George Mabee,* building of log crib; George Mabee,* installation of surface drains and ditching; George Mabee,* log crib construction. *Dartmouth, N.S.:* Trynor Construction Co. Ltd., installation of sewer and water services, HMCS "Shearwater". *Yarmouth, N.S.:* Rodney Contractors Ltd.,* grading, drainage, gravelling of lots and construction of walks, etc. *Chatham, N.B.:* Terminal Construction Co. Ltd., construction of 65 housing units. *Saint John, N.B.:* Lloyd R. Mawhinney Ltd.,* installation of rink rims. *Barriefield, Ont.:* McGinnis & O'Connor Ltd.,* earth fill. *Centralia, Ont.:* Parker Construction,* construction of house walks and front paths; Parker Construction,* partial construction of house walks. *Cobourg, Ont.:* George F. Turner,* elimination of deficiencies. *Fort Erie, Ont.:* Rigby's Ltd.,* installation of doors and insulation. *Hamilton, Ont.:* Wilf. Malstorm,* elimination of deficiencies. *North Bay, Ont.:* Sterling Construction Co. Ltd., construction of 6 classroom school. *Niagara Falls, Ont.:* Rigby's Ltd.,* installation of doors and insulation. *Trenton,* Ont.: Town of Trenton,* cleaning sewers. *Windsor, Ont.:* Sterling Construction Co. Ltd.,* construction of concrete walks. *Edmonton, Alta.:* Hume & Rumble Ltd., installation of electrical distribution services, street lighting, fire alarm and security lighting systems. *Chilliwack, B.C.:* Wm. M. Orr & Vancouver Associated Contractors Ltd.,* road construction; Wm. M. Orr & Vancouver Associated Contractors Ltd.,* road construction. *Vancouver, B.C.:* Pyke & White Construction Co. Ltd.,* elimination of deficiencies; Howard Shields,* rough grading; Howard Shields,* clearing lot; Monarch Construction Co. Ltd.,* road maintenance; Pyke & White Construction Co. Ltd., construction of house sidewalks; Baynes Manning Ltd.,* setting and adjusting valve boxes and installing new services; Biltmore Construction Co. Ltd.,* construction of house sidewalks and steps.

Defence Construction Limited

Summerside, P.E.I.: Island Telephone Co., installation *re* VHF/DF Building. *Dartmouth, N.S.:* Bryant Electric Co., installation of electrical system; Acadia Construction Ltd., construction of boiler house and tunnels for central heating plant, HMCS "Shearwater", United Steel Corporation Ltd., installation of coal handling equipment for central heating plant, HMCS "Shearwater"; Canadian Comstock Ltd., installation of steam piping and return distribution system and steam plant auxiliaries, HMCS "Shearwater". *Greenwood, N.S.:* Maritime Telegraph & Telephone Co., installation *re* VHF/DF Building. *Chatham, N.B.:* Modern Construction Ltd., construction VHF/DF Building facilities; Modern Construction Co. Ltd., construction of combined mess, unit supply building, fire hall and bulk petroleum storage. *Quebec, P.Q.:* Valere Brochu, renovation of casements, the Citadel; Frs Jobin Inc. construction of one-100 man barrack block No. 1. *Clinton, Ont.:* Johnson Bros. Co. Ltd., construction of permanent type barrack block, etc., RCAF Station. *Gloucester, Ont.:* Tower Co. Ltd., erection of pre-fabricated instructional building. *Grand Bend, Ont.:* H. E. Mott Co. Ltd., erection of one-108,000 gallon water storage

tank. *Kitchener, Ont.:* William Knell & Co. Ltd., installation of heating system, Knellwood Park Armoury. *North Bay, Ont.:* Sterling Construction Co. Ltd., construction of unit supply building, 180 man barrack block and combined mess, RCAF Station; H. A. Hennessy, clearing of land and building site. *Oakville, Ont.:* S. McNally & Sons Ltd., construction of a new "H" Hut, Ortona Barracks. *Ottawa, Ont.:* A. S. Peterson Ltd., construction of steelox building, Defence Laboratory, Montreal Road. *Petawawa, Ont.:* McLaughlin Bros., installation of water intake pipeline; M. Sullivan & Sons Ltd., construction of 2 barrack blocks, mess hall and workshop. *Picton, Ont.:* Kingston & Salmon, construction of extension to central heating plant, RCSA. *Winnipeg, Man.:* Power Plant Contractors Ltd., installation of oil burning system, Fort Osborne Barracks. *Wainwright, Alta.:* International Water Supply, drilling of permanent well. *Chilliwack, B.C.:* Bennett & White Construction Co. Ltd., construction of 250 man barrack block, RCEME. *Fort Nelson, B.C.:* Marwell Construction Co. Ltd., construction of 30 permanent married quarters, RCAF Station.

National Harbours Board

Montreal Harbour, P.Q.: Automatic Sprinkler Co. of Canada Ltd., installation of fire protection systems in sheds 2 to 6 inclusive.

Department of Public Works

Rocky Point, P.E.I.: Wallace Noye, Allison Raynor & James Noye, wharf repairs. *Summerside, P.E.I.:* McNamara Construction Co. Ltd., breakwater repairs. *Cooper's Point, N.S.:* A. J. Campbell, J. A. Campbell & J. A. McIsaac, construction of breakwater. *Halifax, N.S.:* Mosher & Rawding, breakwater improvements; Standard Construction Co. Ltd., alterations to kitchen and canteen, customs examination and waiting room building; Arthur & Conn Ltd., electrical imrovements, Old Post Office Building. *Lunenburg, N.S.:* Rodney Contractors Ltd., repairs, improvements, painting and laying of linoleum, Marine Hospital. *Pictou, N.S.:* J. P. Porter Co. Ltd., restoration of harbour facilities, Pier "C". *Chockfish, N.B.:* Diamond Construction Co. Ltd., repairs to breakwaters. *Baie St. Paul, P.Q.:* McNamara Construction Co. Ltd., harbour improvements. *Grande Rivière, P.Q.:* James S. Watt, construction of protection works. *Lachine, P.Q.:* Richard & B. A. Ryan Ltd., installation of additional ventilator openings and repairing of underpinning to Buildings Nos. 27, 34, 35, 36, 37, 38, 39, RCAF Depot; J. L. E. Price & Co. Ltd., repairs to underpinning of Buildings 23, 32, 33, 40, 41 and installation of air vents in Buildings 17, 18, 19, 23, 32, 33, 40, 41 at former RCAF Depot. *Lacolle, P.Q.:* Paul Boucher, construction of bus terminal and examining warehouse. *Lauzon, P.Q.:* Edgar Jourdain, extension to west guide pier at the Lorne Graving Dock. *Paspebiac, P.Q.:* B. Joncas, wharf reconstruction. *Quebec, P.Q.:* Emile Coté, demolition of marine stores building, etc.; Emile Frenette Ltée, construction of marine stores building. *Ste. Anne de Bellevue, P.Q.:* Walter G. Hunt Co. Ltd., construction of new sewage pumping station, Ste. Anne's Hospital. *Departure Lake, Ont.:* R. A. Blyth, construction of wharf. *Meaford Ont.:* Russell Construction Co. Ltd., repairs to harbour walls. *Moose Factory, Ont.:* Universal Plumbing & Heating Co. Ltd., installation of steam mains, water main, sewer lines, and steam heating system, Indian Residential School. *Ottawa, Ont.:* A. Lanctot Construction Co., alterations to room 1147 for new X-ray department, Lisgar St.; Taggart Construction Ltd., construction of film vault and instrument houses for National Film Board, Montreal Road; William D'Aoust, alterations on the 2nd, 3rd and 7th floors, Sovereign Building; M. J. Sulphur & Sons Ltd., addition and alterations, Royal Canadian Mint; Taylor Engineering & Construction Co. Ltd., installation of ash handling equipment, Central Heating Plant, Cliff St.; Anglin-Norcross Ont. Ltd., superstructure, Dominion Bureau of Statistics Building, Tunney's Park Development; Canadian Fairbanks-Morse Co. Ltd., installation of accessory equipment, Central Heating Plant, Cliff St. *Thornbury, Ont.:* McNamara Construction Co. Ltd., reconstruction of pier. *Toronto, Ont.:* McNamara Construction Co. Ltd., harbour improvements. *Windsor, Ont.:* Sterling Construction Co. Ltd., warehouse repairs. *Hecla, Man.:* Wm. Newman Co. Ltd., wharf reparis. *Swan River, Man.:* W. C. Wells Construction Co. Ltd., construction of public building. *Fort Qu'Appelle, Sask.:* Harvey Lunan Construction Co., construction of public building. *Regina, Sask.:* J. C. Davis Ltd., installation of automatic sprinklers, Veterans' Hospital; Smith Bros. & Wilson Ltd., erection of crime detection laboratory for RCMP. *Swift Current, Sask.:* Walter J. Burden Ltd., construction of addition to Soils Laboratory, Dominion Experimental Station. *Brooks, Alta.:* Hornstrom Bros., construction of public building. *Calgary, Alta.:* North West Electric Co. Ltd.,

improvements to lighting system, public building. *Crescent, B.C.:* Todd Construction Co. Ltd., wharf construction. *Denman Island, B.C.:* James McDonald Construction Co. Ltd., float renewal. *Fraser River, B.C.:* Gilpin-Nash Ltd., improvements (Kirkland Island). *Vancouver, B.C.:* Allan & Viner Construction Co. Ltd., alterations, etc., on 2nd and 3rd floors, Federal Building; Barr & Anderson Ltd., installation of automatic sprinklers, Hycroft Veterans' Home. *Montreal, P.Q.:* Canadian Vickers Ltd.,* construction and delivery of 7 80′ steel pontoons, Dredge *PWD. No. 21. Wheatley, Ont.:* N. C. Scrigley,* extension of western retaining wall, driving timber sheet piling on west face of eastern crib-work breakwater and addition of stone rip rap on inner ends of the two retaining walls.

Department of Transport

Dorval, P.Q.: Quemont Construction Inc., alterations and additions, administration building, airport. *Montreal, P.Q.:* Atlas Construction Co. Ltd., construction of vehicular tunnel, under Lachine Canal. *Hastings, Ont.:* Central Bridge Co. Ltd., fabrication and erection swing bridge over Trent Canal. *Sault Ste. Marie, Ont.:* Dominion Bridge Co. Ltd., repairs to emergency swing dam. *Sandspit, B.C.:* Hanssen Construction Co. Ltd., erection of administration building.

Recent Regulations Under Dominion and Provincial Legislation

A National Advisory Council on Manpower was set up to consider various aspects of manpower questions and to advise the federal Minister of Labour regarding the most effective utilization of the present and potential working force of Canada.

In Saskatchewan, the Brotherhood of Railroad Signalmen has, by a majority vote of its members, been brought under the Workmen's Compensation (Accident Fund) Act. The Order permitting workers in shops and offices in the smaller centres of the Province to work up to 48 hours in a week without payment of overtime has been extended to December 31, 1952.

The supplementary grant which may be paid in cases of need under the Ontario Mothers' Allowances Act was raised from $10 to $20.

DOMINION

National Advisory Council on Manpower

Order in Council P.C. 567 of February 1 authorized the establishment of a National Advisory Council on Manpower "to advise the Minister of Labour on matters related to the most effective utilization in the national interest of the present and potential man and woman working force of Canada".

The Order in Council named the Clerk of the Privy Council and the Deputy Minister of Labour as joint chairmen of the Council which is to include four representatives of labour, four of employers, and two each of agriculture, women and veterans, appointed by the Minister of Labour, with the approval of the Governor in Council, after consultation with the appropriate national organizations. Also designated as members of the Council are representatives of the divisions of the government service responsible to the Ministers of Agriculture, Citizenship and Immigration, Finance, Fisheries, Justice, Labour, National Defence, Resources and Development, Trade and Commerce and Veterans Affairs and to the Secretary of State.

The National Advisory Council on Manpower is authorized, in the discharge of its duties, to utilize the services of the Unemployment Insurance Commission, its National Employment Services, and the national, regional and local Employment Advisory Committees operating under the Unemployment Insurance Act. (*See also* L.G., March, 1951, p. 311.)

PROVINCIAL

Alberta Workmen's Compensation Act

Employment by counties has been declared an industry to which the Workmen's Compensation Act applies from January 1, 1951, by notice of the Workmen's Compensation Board which was gazetted on February 15. An Act to provide for the setting up of counties was passed at the 1950 session of the Alberta Legislature.

British Columbia Health Act

The Minister of Health and Welfare may, where necessary or advisable, exempt for a specified period mobile camps or any particular camp from the application of the whole or a part of the general regulations for the sanitary control of industrial camps (L.G., 1947, p. 197).

The general regulations apply to lumber, mining and railway construction camps, saw mills, canneries and similar places established by an employer as living quarters for his employees, with or without charge.

The Order in Council permitting exemptions to be granted was made on February 27 and gazetted March 1.

British Columbia Workmen's Compensation Act

A change has been made in the industrial diseases schedule under the Workmen's Compensation Act, by an Order made on February 7 and gazetted on February 15.

As previously, employees who contract tuberculosis in their work where there is

contact with tuberculous infection or tuberculous-infected material will be compensated if they are free from evidence of tuberculosis before engaging in their employment and for six months thereafter. However, when primary tuberculosis, as proven by a negative tuberculin test on employment, develops during the first six months of employment, compensation will be payable.

The amendment, effective from March 1, stipulates that any subsequent tuberculosis which develops three years or more after the disease has been arrested will not be deemed to have been a result of the original disability.

The places of employment where compensation for this disease is payable include hospitals, sanatoria, clinics, and public health units of the Provincial Government, of the University of British Columbia, of any municipality or of a school board, or of any branch of the Victorian Order of Nurses.

Nova Scotia Trade Union Act

The regulations governing the procedure of the Nova Scotia Labour Relations Board were amended by an Order in Council of February 28, gazetted on March 7. The section which stated that every application for certification, verified by statutory declaration, must set forth a copy of the union constitution, the names and addresses of its officers, etc. was changed to provide that every application must be supported by these documents which will not form part of the application but are for the information of the Labour Relations Board only.

Ontario Mothers' Allowances Act

The supplementary grant which may be paid to a recipient of a mother's allowance where the need is apparent to the Mothers' Allowances Commission was increased from $10 to $20 by an Order of January 25 (O. Reg. 9/51), gazetted on February 10.

The basic allowance paid under the Act is $50 a month for a mother with one dependent child, which is increased by $10 for each additional child, $10 in respect of a permanently unemployable husband, the cost of fuel, and medical and dental services.

Saskatchewan Hospitalization Act

The general regulations governing the levy and collection of the hospitalization tax for 1951 have been amended by an Order in Council (O.C. 415/51), made on February 27 and gazetted on March 10, to provide for an exemption from the Act for a beneficiary who moves to British Columbia.

A beneficiary will be exempt from benefits under the Saskatchewan Act from the date on which he becomes qualified as a beneficiary under the British Columbia Hospital Insurance Act, and on application to the Minister of Public Health a refund of a proportionate amount of the tax in respect of the remainder of 1951 will be granted to the person or agency who paid the tax on behalf of the beneficiary.

Saskatchewan Hours of Work Act

Until December 31, 1952, workers in shops and offices in the smaller towns and villages of Saskatchewan may work up to 48 hours in a week without payment of time and one-half for overtime.

The Order permitting this exemption from Section 4 of the Hours of Work Act was originally made on April 22, 1949, and now by Order in Council 377/51, made on February 20 and gazetted on March 3, is extended from April 1, 1951, to the above-mentioned date. It applies to shop and office workers in, or within a five-mile radius of, 83 towns with a population of between 300 and 500.

Saskatchewan Workmen's Compensation (Accident Fund) Act

The application of the Brotherhood of Railroad Signalmen to the Workmen's Compensation Board to come under the Workmen's Compensation (Accident Fund) Act was approved by an Order in Council (378/51) on February 20, and gazetted March 3. Most classes of railway employees are still under the earlier Workmen's Compensation Act under which compensation is recovered by action against the individual employer. The Workmen's Compensation (Accident Fund) Act permits any of these classes to come within its provisions on a majority vote of the members of their organization. Members of the Brotherhood of Locomotive Firemen and Enginemen came under the Act on April 1, 1948 (L.G., 1948, p. 626).

Legal Decisions Affecting Labour

The Supreme Court of Canada held that a covenant restricting the ownership of property to persons of the white or Caucasian race was invalid. ¶In an unusual case, the Ontario High Court held that an employer who had complied with all the requirements of the Factory Act was nevertheless responsible for damages where a workman's death was hastened by working conditions. ¶On appeal, the Quebec Court of King's Bench ruled that the Superior Court lacked jurisdiction to deal with a case involving a union claim for wages and the case was transmitted to Magistrate's Court for trial.

Discriminatory clause in deed to property held invalid by the Supreme Court of Canada.

The Supreme Court of Canada, reversing the decision of the Ontario courts, on November 20, 1950, held that a restrictive covenant in the deed to land at the Beach O'Pines summer resort was not binding. The covenant is in these words:—

> The lands and premises herein described shall never be sold, assigned, transferred, leased, rented, or in any manner whatsoever alienated to and shall never be occupied or used in any manner whatsoever by any person of the Jewish, Hebrew, Semitic, Negro or coloured race or blood, it being the intention and purpose of the Grantor, to restrict the ownership, use, occupation and enjoyment of the said recreational development including the lands and premises herein described, to persons of white or Caucasian race not excluded by this clause.

The issue came before the courts when the solicitor of a prospective purchaser of property at Beach O'Pines required a release from the restrictions imposed in this clause "in view of the fact that the purchaser herein might be considered as being of the Jewish race or blood." The owner initiated proceedings by bringing a motion in the Ontario High Court of Justice for an order that the restrictive covenant did not constitute a valid objection to the title. Owners of other property in the summer resort area defended the action. That Court held the covenant to be valid, and the judgment was affirmed by the Court of Appeal for Ontario. An appeal was then taken by the owner and the prospective purchaser to the Supreme Court of Canada.

In giving their reasons for decision, the Supreme Court judges cited authorities which establish that the language of a restrictive covenant must set forth clearly and distinctly the intent of the parties. The language of this restrictive clause failed to indicate the intention of the parties as to the amount or degree of the prohibited race or blood that might be permitted. A judge called upon to determine this issue would find in the contract no standard or other assistance that would constitute a basis upon which the issue might be determined. It must, therefore, be held "void for uncertainty." One judge dissented from this decision.

Since the appeal was allowed on this ground, the Supreme Court did not deal with the other contention of the appellants, that a discriminatory provision such as this is contrary to public policy. *Noble and Wolf* v. *Alley, et al.* [1951] 1 DLR, 321.

Ontario High Court holds that an employer's duty is not only to maintain safe working conditions but also to warn an employee against any unusual danger.

An employer who, through breach of duty to his employee, aggravates a disease from which the worker is suffering and accelerates his death is liable, even though he has complied with all the safety requirements under the Factory, Shop and Office Building Act. This was the finding of Mr. Justice Ferguson of the Ontario High Court of Justice on September 1, 1950, when he awarded $2,500 damages, and costs, to the widow of a workman whose death was found to have been hastened by his working conditions.

The workman, Harvey Mackie, was employed in 1934 by the defendant, a skate manufacturing company, as an electric spot-welder. His job consisted of welding blades and tubes of skates together by making about eight welds on each skate. The blades and tubes were covered with a slight film of oil which burned and caused a small wisp of smoke as each weld was made. Since the welder handled 400 skates per hour, there were on an average about 3,200 puffs of smoke every hour. The workman complained of the smoke at a very early stage of his employment and the company supplied him with apparatus to help to lessen its effect. He continued,

however, at this employment until 1942, when he was forced to stop working because of the progress of the disease, pulmonary emphysema, which caused his death in 1948. At the time of death he was 46 years old.

The workman claimed compensation under the Workmen's Compensation Act but was refused because pulmonary emphysema is not listed in the schedule of industrial diseases which are compensable under the Act. The Workmen's Compensation Board, however, on application of the plaintiff, the workman's widow, allowed her to sue the company for damages under the Fatal Accidents Act.

Medical evidence established that the type of emphysema from which Mackie suffered was induced by violent and prolonged coughing. The first question was, therefore, whether the coughing was caused by a foreign agent in the defendant's factory or by a disease such as bronchitis or asthma, which was aggravated by fumes and dust. It was stated in evidence that the workman had suffered a severe attack of pneumonia in 1922 which, according to expert medical testimony, is frequently the forerunner of bronchitis and emphysema. The consensus of medical opinion given at the trial was that Mackie's emphysema developed from chronic bronchitis which in turn had resulted from an attack of pneumonia, but that his condition was greatly aggravated by the smoke resulting from his occupation. There was no evidence, however, that similar fumes caused similar coughing in other workmen.

The opinion of the medical practitioners was supported by the evidence of employees associated with the workman who testified that he had violent fits of coughing and showed many symptoms of poor health in the early years of his employment. His Lordship felt that the abundance of complaints regarding the smoke made by Mackie, of which the defendants were well aware, was also very significant in determining whether the disease was present during the early stages of Mackie's employment.

Mr. Justice Ferguson, therefore, found that the disease was not caused by the conditions of employment but that it was aggravated and advanced thereby.

The second point to be determined was whether the defendant was in any way responsible for the aggravation of the workman's disease. Provincial factory inspectors testified that the defendant's plant had complied with all the regulations made under the Factory, Shop and Office Building Act with reference to ventilation. But His Lordship held that this compliance did not make the system of work safe for the workman in question and that having regard to his numerous complaints the defendant knew, or ought to have known, that the system was unsafe for him. His Lordship, therefore, held that the defendant's compliance with the Act and regulations did not relieve the company from its common law duties.

> It is the duty of an employer not only to warn his employee against unusual danger known to him but also to make the place of employment as safe as the exercise of reasonable skill and care will permit, or, conversely, it is the duty of the employer not only to make the place of employment as safe as the exercise of skill and care will permit but to warn the employee of all unusual dangers known to the employer. I think the defendant knew that there was unusual danger for Mackie and its officers failed to take the precaution of warning him of it. Their compliance with the Factory Act Regulations was not sufficient. In consequence of the defendant's breach of duty the conditions under which Mackie worked contributed to the disease from which he suffered. I hold that but for the development of the disease, caused by its being aggravated, his death would not have taken place when it did.

Mr. Justice Ferguson next dealt with the doctrine of *volenti non fit injuria* which had been offered as a defence by the company. To succeed on this ground, His Lordship explained, the defendant must show that the deceased freely and voluntarily, and with full knowledge of the nature and extent of the risk he ran, impliedly agreed to incur it. This was not so in the present case.

> It has been held repeatedly that a workman who has complained of the conditions of his employment cannot be said to have agreed that if injury should befall him the risk is to be his and not his master's. I think, therefore, that death was caused in such a manner as to entitle Mackie to maintain an action and recover damages . . .

"Death was inevitable from the disease which, I find antedated Mackie's employment", continued His Lordship . . . "but I think the evidence establishes the defendant's liability for the death at the date it occurred." He cited *Golder* v. *Caledonian R. Co.* (1902) and *McCarthy* v. *Owners of the Ship Melita* (1923) as his authorities for stating that the fact that death would inevitably have occurred at a later date in consequence of the disease does not relieve the defandant of liability.

In awarding the plaintiff $2,500 and costs, however, His Lordship took into account the fact that the date of death had not

been advanced many years. *Mackie* v. *Canada Skate Manufacturing Co. Ltd.* [1951] 1 DLR, 226.

Union claim for wages due to its members under arbitration award fails—Superior Court held to lack jurisdiction because each single claim was less than $200.

A claim by a union on behalf of its members for wages is not within the jurisdiction of the Superior Court, if each separate claim is less than $200. This decision was reached by the Court of King's Bench, Appeal Side, on October 30, 1950, reversing the previous judgment, in an appeal of a furniture company from the decision of the Superior Court at Arthabaska on March 4, 1950. One judge dissented from the Appeal Court decision.

On January 3, 1949, the furniture company and the union signed an agreement which provided for a wage increase. The agreement contained a clause providing for settlement by arbitration of any dispute during the life of the agreement as to its interpretation. As the employer failed to put the wage increase into effect, the parties resorted to the arbitration clause. On November 15, a council of arbitration by a majority award ruled the employer guilty of breach of agreement for not paying his employees the wage increase agreed upon. In order to enforce the decision, the union took action in the Sueprior Court to require the company to pay the wages due, and requested the Court to grant homologation of the award, that is, to record and confirm it.

The company entered a plea that the Superior Court did not have jurisdiction in this action. The plea stated that although the union's claims for wages owed to its members amounted to $3,903.07, no single claim was over $63.61 and in consequence did not come up to $200, the amount of debt required to give the Superior Court jurisdiction. The case was, therefore, within the exclusive jurisdiction of the district magistrate's court and should be sent back there for trial.

Mr. Justice Girouard of the Superior Court held that the members must be considered to have transferred their claim to the union acting on their behalf, and the total amount of the claims determines which court has jurisdiction.

The Appeal Court, in a decision given by Mr. Justice Galipeault, pointed out that the action rested upon Section 25 of the Professional Syndicates Act (RSQ 1941, c. 162):—

> The groups who may appear before the courts and who are parties to the collective labour agreement may exercise all rights of action arising out of such agreements in favour of each of their members, without having to establish a transfer of claim by the persons interested, provided that the latter has been advised and has not declared that he was opposed thereto. The person interested may intervene at any time in the proceedings taken by the group.
>
> Whenever an action arising out of the collective labour agreement is brought by a person or by a group, the other groups with authority to appear before the courts, whose members are bound by the agreement, may intervene at any time in the proceedings taken, on the grounds of the collective interest which the result of the litigation may have for their members.

From this section, it is clear that the plaintiff union could exercise the rights of its members, and the case cannot be interpreted as a transfer of claim. The wages, when paid, will be returned to the individual members, as is shown in the plaintiff's brief.

It is also true that the individual claims cannot be accumulated to give jurisdiction to the Superior Court. On that point, Section 25 differs from sections in other Acts allowing associations to join claims on behalf of their members. When several claims are made in one action, if the competency of the court is to be determined by the total of the claims, the statute sets it out in plain words, as in Section 53 of the Collective Agreement Act (RSQ, 1941, c. 163):—

> The recourses of several employees against the same employer may be cumulated in a single demand whether emanating from the employees or from the committee, and the total claimed shall determine the competency of the court of original jurisdiction as well as of appeal.

On this point the company's objection was well founded, Mr. Justice Galipeault said.

He next dealt with the plaintiff union's second argument, namely, that the Superior Court had jurisdiction because it is the only court empowered to grant homologation, even if the debt was not sufficient to give jurisdiction on the basis of the amount. He did not accept this as a sound argument. The union took an action in recovery of debt, and the request for homologation was an accessory to the principal demand. The accessory must not take the first place. The court competent to try the principal action is also competent to deal with the accessory. The Code of Civil Procedure, Section 1443, provides that an arbitration award made extrajudicially may be executed only under the authority of the *competent court,* and on a suit brought in the ordinary manner.

Summing up, Mr. Justice Galipeault said that it was necessary to have a competent court determine the amount owed each of the creditors, since the arbitration award did not determine such amounts. The request for homologation seemed to have been attempted only in an effort to entitle the Superior Court to adjudicate on the question. He accordingly granted the appeal, with costs, and transmitted the case for trial by the District Magistrate at Arthabaska.—*Eastern Furniture Ltd.* v. *Syndicat National Catholique des Travailleurs du Meuble de Victoriaville et d'Arthabaska Inc.*, Rapports Judiciaires de Québec. [1950] B.R. Montreal, No. 10, 799.

Labour and Industry in British Columbia

The annual report of the British Columbia Department of Labour for 1949 records another year of progress. Average weekly earnings of male wage-earners were at an all-time high of $49.21. Only nine disputes began during the year and the time-loss from industrial conflict was at the lowest point since 1945. There was a further increase in union membership which at the end of 1949 was approximately 33 per cent of the total working force of the Province. A gradual improvement in working conditions in factories was noted.

The thirty-second annual report of the Department of Labour of British Columbia for the year ending December 31, 1949, "records another year of stability and progress in the march of industrial development which has become increasingly apparent during the past few years."

The report contains statistics on employment, payrolls, average weekly earnings and average weekly hours, computed from returns submitted by 9,020 employers. These figures are shown in tables, together with comparative data for previous years. The report reviews the activities of the Board of Industrial Relations in administering minimum wages, hours of work and holidays legislation, the Labour Relations Board, the Factories Inspection Branch and the Apprenticeship Branch. There is a brief summary of new laws affecting labour passed in 1950.

Payrolls

The estimated total provincial payroll for the year was the highest in provincial history, some $690,000,000, an apparent increase of fifty million dollars over the total recorded for 1948.

As in previous years, statistics are given for 25 industrial classifications. The general trend of industrial payrolls continued upward in 1949, with 20 of the 25 industrial classifications showing increases over the previous year's total. For the construction industry, 1949 was the most successful year on record. Its payrolls advanced by over $6,500,000. The metal trades had the second greatest increase, gaining by $4,000,000, and the total covering the group of miscellaneous trades and industries was up over $3,500,000. Lesser increases were noted in 17 other classifications varying from $1,907,747 in coast shipping to $49,460 in jewellery manufacturing.

Decreases were noted in five of the industrial classifications. The lumber industry where production was hampered by extreme weather conditions during a part of the year showed a decrease in payrolls of $12,300,000 from the peak figure established in 1948. With the completion of work at hand and shortages of new contracts, shipbuilding and boat-building continued to decline showing a decrease of over $4,700,000 from the 1948 figure. The other industries recording decreases were pulp and paper manufacturing (down over $1,800,000), wood-manufacturing (down $98,708) and smelting and concentrating (down $64,195).

Wages

Average weekly earnings increased in 21 out of 25 classifications. The average weekly earnings of male wage-earners in 1949 were at an all-time high of $49.21, an increase of $1.91 over the preceding year. The comparable figure for 1947 was $43.49. For clerical workers, stenographers and sales workers, the average weekly wage was $50.55 for male workers and $31.85 for females, a considerable increase in each case from the previous year.

Employment

Employment totals were somewhat lower than in the record year of 1948. The peak of employment was attained in August, 1949,

with 154,753 wage-earners as against 160,002 in the same month of 1948. When clerical and sales staff are included in addition to wage-earners, the totals are 176,305 in August, 1949, and 182,565 in August, 1948.

Hours of Work

Average weekly hours of work remained at practically the same figure from 1947 to 1949. Average hours worked in 1949 were 42·24. Except for the war years, there has been a gradual decline in weekly hours, according to the report, since the Hours of Work Act came into operation. Since 1946, when legal working hours for employees in industry were reduced from 48 to 44 per week, approximately 80 per cent of wage-earners have worked 44 hours or less per week. In 1949, information submitted to the Department of Labour concerning 161,945 male and female wage-earners indicated that 81·86 per cent worked 44 hours or less per week and 18·14 per cent had a work-week in excess of 44 hours.

New Laws Affecting Labour

Certain amendments were made to the Annual Holidays Act to clarify its application and to change the basis of computing holiday pay. Formerly, a worker was entitled to his regular pay for a week's work, depending on whether he was paid on an hourly, weekly, semi-monthly or monthly basis. Holiday pay is now computed on the basis of two per cent of the total wages earned in the working year. The "working year" was reduced from 250 to 225 days of actual work. The definition of "employee" was changed to make it clear that it includes an employee paid by time, piece or otherwise. Professional workers were excluded from the Act.

The application of the Boiler Inspection Act, now the Boiler and Pressure-vessel Act, was widened to cover hot water boilers as well as steam boilers and pressure vessels.

Board of Industrial Relations

During 1949 the Board of Industrial Relations held 68 meetings. Following public hearings, two minimum wage Orders were revised and five entirely new Orders were put into effect. Forty-one delegations appeared before the Board in connection with problems regarding hours of work, minimum wages, etc. Ten Regulations permitting exceptions under the Hours of Work Act were made during the year. All the minimum wage Orders and hours of work Regulations in effect, including those issued in 1949, are summarized in an appendix to the report.

As in previous reports, a section is devoted to a statistical summary of employment, earnings and hours of work of women workers in 11 industries and occupations covered by minimum wage regulations. Statistics are given for a five-year period, 1945-49 inclusive, and enable a comparison to be made in an industry from year to year as well as between one industry and another. With 236 more firms reporting in 1949 than in 1948, the number of women workers reported on rose to 61,874, the highest number yet recorded in the history of the Department.

For all occupations covered in the survey, average weekly earnings were $27.79, as against $25.98 in 1948. This average is well above the highest minimum wage set by the Board. Average weekly hours were a little higher than the 1948 average, 39·32 as compared with 38·61.

In order to have similar statistics for male employees in various occupations covered by the Male Minimum Wage Act, a segregation of male employees was made from industrial classifications dealt with elsewhere in the report. Ten tables provide a comparative study of employment, hours worked and earnings over a four-year period.

Each year more investigations are made by the Inspectors of the Department, and the amounts collected as wage adjustments under the Minimum Wage Acts and the Annual Holidays Act have steadily increased over the past several years. In 1949, collections made amounted to $132,118.23, an increase of almost $25,000 over the collections made in 1948.

Fifty-six violations of the Acts under the administration of the Board were brought to the Courts. The Acts involved were the Annual Holidays Act, the Minimum Wage Acts, the Hours of Work Act, the Control of Employment of Children Act, and the Semi-monthly Payment of Wages Act.

During the year, 297 special licences for the employment of inexperienced employees at learners' rates and 129 part-time employment permits were granted by the Board.

Control of Employment of Children

Under the Control of Employment of Children Act, 1944, the employment of a child under 15 in an industry or business covered by the Act is forbidden except on written permission of the Minister setting forth the number of hours to be worked per day and the conditions of employment. The number of permits in effect at the

end of December, 1949, was 320. Of these the greatest number, 218, were in the mercantile industry.

Labour Relations Board

Due to the ever-increasing volume of its activities, the Labour Relations Board in 1948 formed two Committees to expedite its work. During 1949, the Board held 52 full Board meetings and 401 Committee meetings, and heard 1,109 delegations. Much of the Board's work was in the mediation of disputes and through its efforts settlements were arrived at in many industries. Only nine disputes began in 1949; two others commenced in 1948 and were continued in 1949. The time-loss in industry resulting from labour disputes, 31,692 man-days, was at the lowest point since 1945. When expressed as a percentage of the estimated total working time of wage and salary earners, the 0·034 figure for the year under review was the lowest since 1941.

Throughout the year a Weekly Summary of Activities was mailed to employer and labour organizations. This Summary sets out the appointment and reports of Conciliation Officers, the appointment and reports of Conciliation Boards, and certifications of bargaining authorities.

As required by the Industrial Conciliation and Arbitration Act, the report of the Labour Relations Board contains a statement of its proceedings during the year, a summary of the certifications of bargaining authorities granted by the Board, a summary of Conciliation Boards appointed, a summary of strikes and lockouts, and a summary of prosecutions under the Act.

In 1949, 757 applications for certification of bargaining agents were made, 594 were granted, 95 rejected and 68 withdrawn. One hundred and nineteen strike votes were supervised, 80 representation votes conducted, 246 Conciliation Officers named (resulting in the settlement of 108 disputes) and 97 Conciliation Boards appointed. In seven instances, permission to prosecute was granted, and 12 grievance procedures were provided.

In the 97 disputes in which a Conciliation Board was appointed (these are summarized in Table III), wages were a predominant cause of the dispute in 80 cases; statutory holidays in 22; union security in 21; annual holidays in 20; all terms of the agreement in 16; hours of work in 15; grievance procedure in 4; medical and hospital insurance plans in 4; and some other matters in 3 other cases.

Employers' and Employees' (Labour) Organizations

From information filed by associations of employees, as required by the Department of Labour Act, it was ascertained that union members in 761 organizations at December 31, 1949, numbered 146,259, which represents 32·94 per cent of the Province's estimated total labour force. There has been a steady and consistent growth in union membership over the past decade. From 1939 when there were 44,867 members to 1949 when membership stood at 146,259, the increase was 225 per cent.

The report notes that there were 48 employers' organizations in 1949. The number recorded from 1945 to 1948 was 37.

Factory Inspection

The Chief Inspector of Factories in his report to the Deputy Minister of Labour stated that there had been during the year a gradual but quite noticeable improvement in working conditions in industrial plants, both in health and safety. Partly because the Factories Inspection Branch has been gradually raising the standard in effect in the Province and partly because co-operation from owners has been generally excellent, accepted modern conditions of safe operation are being obtained. During the year, 2,370 inspections and reinspections of factories were made. More and more, it is stated, manufacturers are turning to the Factories Branch for advice in making new installations or additions to their premises.

During the year particular attention was paid by Inspectors to the problem of securing an abundant supply of good air in plants by use of a complete air-conditioning system, and much work was done to secure improved lunch-room arrangements in factories. Inspectors assisted firms by explaining the use of temperature scales as an indication of atmospheric conditions.

Generally speaking, the report notes that the matter of sanitary facilities is well taken care of by employers. Management is also becoming more conscious of the need for adequate lighting.

With respect to the problem of guarding workers against harmful fumes, vapours and gases, the Chief Inspector stated: "With but a few exceptions, no great mechanical problem would be involved in their effective removal at the point of origin, if the employer would realize that the protection of the worker should begin on the drafting board and in the design of suitable ventilation equipment."

The volume of industrial homework in the Province continues to decline. During 1949, seven permits were issued to employers and 17 to homeworkers.

One prosecution was undertaken. The proprietor of a cleaning establishment was fined $150 and costs for employing persons before 7 a.m. without the permission of the Inspector.

Elevators

The inspection of passenger and freight elevators, which is an important part of the work of the Factories Inspection Branch, is becoming more exacting each succeeding year. It includes not merely a routine check of cables and safety devices but a thorough mechanical check of all equipment.

A movement to modernize both passenger and freight elevators was welcomed by the Factories Inspection Branch because, it was pointed out, "the older the equipment, the more rigid must be the inspection, and the older the elevator, the more difficult it is to maintain in a safe operating condition."

In passenger elevators, the old type of winding-drum elevator is being replaced with overhead traction equipment, and with respect to freight elevators the change from hand-cable control to push-button operation, which is rapidly taking place, has eliminated many hazards. The passing of an Order in Council requiring all freight elevators installed after June 1, 1949, to be equipped with a contacted car door or gate was an important step in increasing safety on freight elevators. During the year 1,702 elevators were inspected and, in the interests of safety, 10 elevators were suspended from use until they conformed to the regulations. Thirty-eight new elevators were installed. During the year elevator operators' examinations were held and 451 temporary and 392 permanent licences issued. One thousand one hundred and eighty-seven licences were renewed.

Apprenticeship

The year 1949 showed a decrease in the number of apprentices serving under contract (1,482) but a great advance in the standard of training facilities in general use.

In order to improve the number and quality of skilled journeymen, the Apprenticeship Branch is endeavouring to improve training on the job and in addition has established technical trade classes with up-to-date training facilities. Extension classes for tradesmen were also instituted by Trade Advisory Committees during the year.

UNEMPLOYMENT INSURANCE

Selected Decisions of Umpire Under The Unemployment Insurance Act

The following case is considered to be of sufficient general interest to warrant the publication of the decision in full.

Held that the claimants lost their employment by reason of a stoppage of work due to a labour dispute at the premises at which they were employed, and that by virtue of their own action or that of their unions' leaders they became participants or belonged to a grade or class which was participating in the said labour dispute.

DECISION

Summary of the Facts:

The claimants interested in the present appeals were employed either as carpenters or as labourers on building projects in the City of Victoria, B.C. The carpenters were members of Local 1598 of the United Brotherhood of Carpenters and Joiners of America and the labourers were members of Local 1093 of the International Hod Carriers' and Common Labourers' Union. Both locals belonged to the Victoria Building Trades Council, an employees' organization.

The claimants' employers were members of the Victoria Building Industry Exchange, an employers' organization.

On March 30, 1950, a stoppage of work took place at the premises of Evans, Coleman and Johnson Bros. Ltd., which is reputed to be the largest distributor of construction materials on Vancouver Island and which supplied certain materials to the claimants' employers. The stoppage of work was due to a labour dispute between the company and its transport workers who were members of the Vancouver Island Drivers Division 234 of the Canadian

Brotherhood of Railway Employees and Other Transport Workers. Shortly thereafter members from the said division 234 acting as observers appeared at some of the projects where the claimants were employed and where material normally supplied by the Evans Company was used and picket lines were set up. Subsequently a stoppage of work took place, first at the projects where observers were posted or which were picketed and then at all the other projects, thereby bringing about the claimants' unemployment.

The claimants filed an application for benefit but were disqualified from the receipt thereof by the Insurance Officer under Section 39 (1) of the Act, because, in his opinion, they had lost their employment by reason of a stoppage of work due to a labour dispute.

Section 39 of the Act reads as follows:—

39 (1) "An insured person shall be disqualified from receiving benefit if he has lost his employment by reason of a stoppage of work due to a labour dispute at the factory, workshop or other premises at which he was employed unless he has, during the stoppage of work, become *bona fide* employed elsewhere in the occupation which he usually follows, or has become regularly engaged in some other occupation; but this disqualification shall last only so long as the stoppage of work continues.

(2) An insured person shall not be disqualified under this section if he proves

(*a*) that he is not participating in, or financing or directly interested in the labour dispute which caused the stoppage of work; and

(*b*) that he does not belong to a grade or class of workers of which immediately before the commencement of the stoppage there were members employed at the premises at which the stoppage is taking place any of whom are participating in, financing or directly interested in the dispute.

(3) Where separate branches of work which are commonly carried on as separate business in separate premises are carried on in separate departments on the same premises, each department shall, for the purpose of this section, be deemed to be a separate factory or workshop."

From the decision of the Insurance Officer, the claimants appealed to a Court of Referees which sat in Victoria, B.C., on May 15 and 16, 1950. The Court, after having heard considerable oral evidence from claimants, employers and officials of the unions, allowed the appeals in the cases of Peters, Tibando, Edwards and Poitras *et al*, but disallowed the appeals in the cases of McPherson and Hill *et al*.

The following are excerpts from the Court's decisions concerning the appeals which were allowed:—

Re: J. J. Peters and M. J. Poitras et al

"After hearing evidence presented by employer's representatives and employee's representatives, much of which evidence was not available to the Insurance Officers of the UIC at the time of their submissions, this Court is of the opinion that unemployment was not directly connected with the strike of Evans, Coleman and Johnson Bros. Ltd., but that the lay-off was brought about by the employer's desire to retain an equitable employee relationship throughout the many jobs that they were conducting, some of which might have had to close due to a shortage of materials. This, as explained to us, might have resulted in senior employees having to be laid off or transferred to other work on which they had not been previously employed, and which would have rendered their operation uneconomical and chaotic."

Re: H. M. Edwards and M. Tibando et al

"From evidence presented by employees representatives and representatives from the Northern Construction Company, it is clear that a shortage of material did occur in consequence of which it was necessary to lay off the majority of the employees. We have definite assurance from the employer that approximately 10 per cent of his crew continued to be employed and were given employment by them on this job during the shut down. He further assured us that there was no dispute between the Company and their employees, and that had space been available for the erection of machinery or had a competitive firm been able to deliver ready mixed concrete, they would have availed themselves of this supply and continued their operation. From evidence given, it is proven that no work stoppage occurred due to a labour dispute on these premises, and that the shut down was entirely due to the shortage of material being supplied by Evans, Coleman and Johnson Bros. Ltd., which supply was cut off due to the strike of the C.B. & R.E. & O.T.W., at their Victoria, B.C., plant. Evidence establishes that the employees of the Northern Construction Company were in

no way a party to this strike, nor could they, in any way, benefit by its final outcome."

In the cases of McPhesron and Hill *et al* the Court felt that "a labour dispute actually existed and a stoppage of work did occur" because on the project where McPherson was employed the employees had either walked out or refused to cross picket lines while on the project where Hill worked the employer had found it necessary to confer with union officials as to whether or not the employees belonging to their unions would handle "hot material".

From the decisions of the Court in the two last mentioned cases the carpenters' and the labourers' unions appealed to the Umpire. From the decisions of the Court concerning Peters, Tibando, Edwards and Poitras *et al* the Insurance Officer also lodged an appeal.

An oral hearing before the Umpire was requested by the interested unions and it was held in Montreal, P.Q., on September 18, 1950. Those who attended were Messrs. A. P. Rayment and V. Midgley representatives of the labourers' and the carpenters' unions respectively and Mr. H. S. Relph, Chief Claims Officer of the Unemployment Insurance Commission.

Conclusions:

I have carefully considered the statements of observations and representations made by Messrs. Rayment, Midgley and Relph.

Briefly it is contended by the unions' representatives that the various stoppages of work which took place in the Victoria construction industry in the early part of April, 1950, and with which we are concerned, were merely due to a shortage of materials whereas it is argued by the Insurance Officer that the stoppages were the result of a labour dispute which developed between the Victoria Building Industry Exchange and the Building Trades Council, as a consequence of the labour dispute between Evans, Coleman and Johnson Bros. Ltd., and its transport workers who were members of Division 234 of the C.B. of R.E. and O.T.W.

According to the evidence, on March 31, 1950, the day after the stoppage of work commenced at Evans, Coleman and Johnson Bros. Ltd., the Building Trades Council held a special meeting at which representatives of the two unions interested in these appeals were present. The purpose of the meeting was apparently to consider what action was to be taken by the member unions with respect to the situation which prevailed at the said company. A resolution was put forward by Mr. Chivers, who is president of the Building Trades Council and a member of the carpenters' union, enjoining the unions to respect picket lines established by Division 234 on any construction job in the Victoria area. The question of handling "hot material", i.e., material obtained from a source other than the Evans Company, was also discussed. It is not too clear whether the resolution was officially adopted. However it is apparent, notwithstanding Mr. Midgley's contention that the carpenters' union took the stand that those matters should be left to the discretion of the individual members of the carpenters' local, that the general feeling was that picket lines should be respected and that "hot material" should not be handled.

In any event, on April 4 and 5, 1950, some carpenters and labourers walked off the projects where observers were posted or where picket lines were established while others refused to cross picket lines or to handle "hot material".

The evidence further indicates that Mr. Simms, business agent of Local 1598 of the carpenters' union, informed the employer on at least two projects that the members of his local would respect the picket lines and would not handle "hot material"; it also indicates that Mr. Rayment of the labourers' union while in communication with an official of the cement workers' union at Bamberton, B.C., advised him not to release any cement from that place for delivery to the Victoria projects. (A few days later, however, Mr. Rayment gave his approval to its release.)

As a consequence of those events a meeting was held by the members of the Exchange at which it was decided that the employers would stop the work on a number of the projects in so far as the labourers and carpenters were concerned, which in fact is what happened on April 6, 1950.

Following those shut downs articles and notices were published by the Exchange in the Victoria newspapers and pamphlets were issued by the Council wherein both parties expressed mutual disagreement with the stand taken by each other, as a consequence of the dispute between Evans, Coleman and Johnson Bros. Ltd. and its transport workers.

Apart from the notice which appeared on April 21, 1950, in the *Victoria Colonist* under the heading "The following members of the Victoria Building Industry Exchange regret the necessity of closing down all work until further notice" and wherein all the claimants' employers were listed, the following notice, which was published by the Exchange in the same newspaper on

April 26, 1950, under the heading "Construction workers whose interests are you serving?", cannot be overlooked:—

"As the shut down of all construction is now in its third week, it is time that you assess the situation for what it is.

"First, you have been advised that the Evans, Coleman strikers are entitled to picket your job. They are not. The courts have already decided that such picketing is illegal, as in the case of the Producers Sand & Gravel Company. The Evans, Coleman strikers are only entitled to picket their own plant where there is a dispute.

"Second, you have been advised that you should respect these illegal picket lines. This means that you must be prepared to put yourself out of a job to support a strike at Evans, Coleman. Otherwise you are a strike-breaker. This is what the agitators want you to believe.

"The Victoria Building Industries Exchange firmly believe that there are radical political elements in our Building Trade Unions who will go to any length to prove that our present economic system is bad, that any kind of private enterprise is bad, particularly a large company like Evans, Coleman and Johnson Bros. Ltd. They are using you to fight this malicious campaign. If it costs you and the contractors, and this community one-half a million dollars in losses, they will be well pleased.

"It was not their intention to shut down all jobs—only the larger and more important ones. They expected that the contractors who were picketed and shut down would put extra pressure on Evans, Coleman to meet the strikers' demands. As you know, it did not turn out that way. The contractors will not be used to put pressure on either party in the Evans, Coleman dispute, nor will they submit to illegal picketing and illegal work stoppages.

"The contractors cannot correct this situation except through you, as a member of your Trade Union. We are not asking you to be a strike-breaker. We are not asking you to do anything contrary to the legitimate principles of the Trade Union movement. We are asking you to wake up and realize what is going on, and ask yourself who is profiting from the present situation!"

Another article which appears on file—this one issued by the Building Trades Council and distributed as a pamphlet to the members of the unions—is also worth noting:—

"Now It Can Be Told

This was refused as a paid advertisement by both the *Victoria Times* and *Colonist*

The Building Trades Council Replies to The Building Industries Exchange

In published statements on April 14 and April 18, the Victoria Building Industries Exchange says its members are anxious to return to work immediately and could do so, if it were not for building trades' interference with contractors using supplies obtained from sources *other* than the struck firm. In reply, we would state that we do not wish to assist an employer who has a monopoly on certain building materials.

"The fact that several local building supply dealers have attempted to secure agencies for lines, especially cement, now exclusively handled in Victoria by Evans, Coleman and Johnson Ltd., is further evidence that such a monopoly exists.

"At present, these 'secondary' dealers normally buy their supplies from Evans, Coleman and Johnson, rather than directly from the producer.

"One of them again recently attempted to secure a direct, permanent agency from the B.C. Cement Company and was again refused.

"Was this company refused because it was prepared to pay the rates asked by the striking union at Evans, Coleman and Johnson Vancouver Island Drivers, Division No. 234, Canadian Brotherhood of Railway Employees and Other Transport Workers (CCL)?

"We would further emphasize that the Building Trades Council has not at any time 'ordered' men to stay off the job.

"We have no authority to do so.

"But we did recommend in all sincerity observance of what has been recognized as trade union practice for more than 50 years—to respect picket lines. The Exchange took it upon itself to order its members to shut down jobs, despite the fact that there was plenty of material on many *of these jobs*.

"Why? Was it to force building trades workers to assist the Evans, Coleman combine maintain its monopoly?

"Certain contractors did resume operations on Monday, April 17, but were again ordered by the Exchange to cease operations despite the fact that there was no shortage of material.

"These jobs, in consequence, were closed down at midday, Wednesday, April 19.

"The contractors say they can obtain materials such as cement and gyproc from sources other than the struck company.

"What sources are there in B.C., let alone Victoria, other than the Evans, Coleman combine?"

On the above evidence, I find it impossible to agree with the unions' representatives that the stoppages of work which took place in the Victoria Construction Industry in the early part of April, 1950, were merely due to a shortage of materials as it is quite apparent that there were on hand, at least on a number of projects, at the time of the commencement of those stoppages, sufficient materials to permit the work to continue and that furthermore if such materials were not actually available it was not because of circumstances entirely beyond the control of the employers and the employees. On the contrary, it seems clear to me that those stoppages, as contended by the Insurance Officer, were attributable to a labour dispute between the Exchange and the Council and in particular between the Exchange and the carpenters' and labourers' unions, which dispute stemmed from the refusal or threats to refuse on the part of some of the members of those unions to handle hot material or to cross picket lines and culminated in the concerted action of the employers in closing down the work on the projects.

This finding seems to be borne out by the transcript of the evidence taken before the Court of Referees which discloses that officials of the unions admitted before the Court that there was on a number of the projects, at the time of the commencement of the general stoppage of work, materials available and that the action of the employers following the meeting of the Exchange was in fact a lockout.

It is true that statements were made by a few of the employers that they had no dispute with their carpenters or labourers and that the close downs were not lockouts but merely resulted from a shortage of materials. It is to be noted however that it does not appear that any of the employers concerned repudiated the actions taken on their behalf by the Exchange nor did they question the inclusion of the name of their company in press releases made by the Exchange announcing the shut downs. In applying the law I must be governed by the actual facts and not simply by what the parties term the incidents.

Much has been said by the Insurance Officer and the unions' representatives as to the legal status of the Exchange and its authority to act for the employers, as to whether or not the Council represented the views of its membership and whether or not the union officials, who actively engaged themselves in the dispute, had the power to speak or act on behalf of their union members.

It is to be observed however that the Exchange on behalf of the employers entered into bargaining agreements with the carpenters' and labourers' unions in 1949, and again acted on their behalf throughout the general stoppage of work in the spring of 1950; that similarly the Council acted on behalf of those unions during the said stoppage and that the actions of the officials of these unions were not disavowed by their fellow members.

The argument that some carpenters and labourers did in fact remain at their employment throughout the dispute does not preclude a finding that the shut downs were in fact lockouts. A stoppage of work be it a lockout or a strike, need not be a general cessation of operations at the factory or premises and the number of employees involved is not the test; it is sufficient if there is an appreciable interruption in the work which is normally carried on thereat. In the present case the employers preferred to discontinue a substantial part of their operations rather than have the projects on which they were carrying on work picketed or face a walkout of their employees and there can be no doubt that this constituted a stoppage of work within the meaning of Section 39 of the Act herein before quoted.

In his submission to me, Mr. Rayment stated as follows:—

> "I submit also that apart from the generally accepted fact that to cross properly constituted picket lines is contrary to all trade union principles, there is, in addition to the ordinary occupational risks, a further element of danger not contemplated when wage rates are set. The Act takes cognizance of this. If a man receiving unemployment benefits were sent to a job by an employment officer and found it picketed and did not take the job, he would not be cut off benefits."

In many decisions my predecessor and I have stressed the fact that for a claimant to refuse to cross a picket line where there is no display of violence, is evidence of his participation in the labour dispute. I quite understand, however, the unions' feeling in respect to the matter of crossing picket lines, but a sympathetic manifestation of

that kind must be taken into consideration when determining the merit of a case under Section 39 of the Act.

I agree therefore with the Insurance Officer that the Court of Referees erred "when they considered each construction job as a single entity and not as part of the general construction picture in the City of Victoria as controlled by individual members or companies which made up the Victoria Building Industry Exchange."

My decision is that the claimants lost their employment by reason of a stoppage of work due to a labour dispute at the premises at which they were employed and that by virtue of their own action or that of their unions' leaders they became participants or belonged to a grade or class which was participating in the said labour dispute.

The appeals of the carpenters' and labourers' unions in the cases of McPherson and Hill *et al,* are dismissed and the appeals of the Insurance Officer in the cases of Peters, Tibando, Edwards and Poitras *et al,* are allowed.

ALFRED SAVARD,
Umpire.

Dated at Ottawa, Ont., this 8th day of January, 1951.

Unemployment Insurance Statistics, January, 1951*

The monthly report issued by the Dominion Bureau of Statistics on operations under the Unemployment Insurance Act states that during the month of January, 1951, a total of 172,269 initial and renewal claims for unemployment insurance benefit were filed at local offices of the Unemployment Insurance Commission. This represents a 28 per cent increase over the 134,218 claims filed in December. All provinces contributed to this increase, the largest relative increases being recorded in Newfoundland, Nova Scotia, Alberta, New Brunswick, Prince Edward Island and British Columbia. In comparison with January of last year, when initial and renewal claims filed numbered 182,053, this month's total represents a decline of 5 per cent, appreciable decreases having occurred in the provinces of Ontario (17 per cent) and British Columbia (20 per cent), while all other provinces experienced a slight increase.

Ordinary claimants on the live register on January 31 numbered 220,539 (177,752 male and 42,787 female), compared with 183,268 (144,564 male and 38,704 female) in December, 1950, and 297,238 (244,333 male and 52,905 female) for January one year ago.

Total claimants signing the live register as at the end of January numbered 255,753, of whom 27,103 were claimants for supplementary benefit. Of this total, 77 per cent, or 197,926, had been on the register seven days or more.

Adjudicating centres disposed of 183,219 initial and renewal claims during January, of which 130,129 were considered entitled to benefit and 53,090 not entitled to benefit. Of those considered not entitled to benefit, 41,410 were disallowed and 16,978 disqualifications were imposed (including 3,925 on revised claims). Chief reasons for disqualification were: "voluntarily left employment without just cause," 5,544 cases; "not unemployed," 5,104 cases and "not capable of or not available for work," 1,186 cases.

Persons in receipt of initial payments of benefit during the current month totalled 104,667, an increase of 50 per cent over the 69,870 in December.

Benefit payments for the month of January amounted to $9,367,276 for 3,788,241 compensated days of unemployment. In December, $5,308,818 were paid for 2,192,851 proven unemployed days, while in January last year a total of $11,781,142 were paid in respect of 4,925,381 unemployed days.

During the week January 27-February 2, 149,816 benefit payments were made, amounting to $2,195,606 for 885,092 days. In the week of December 30-January 5, 101,918 benefit payments amounting to $1,431,588 for 583,743 days were recorded.

During the week January 27-February 2, benefit payments averaged 5·9 days, while in the week December 30-January 5, this average was 5·7 days. Beneficiaries received during these weeks payments averaging $14.66 and $14.05 respectively.

Supplementary Benefit

Out of a total of 41,410 regular claims disallowed during January, 41,278 were considered for supplementary benefit. In addition, 364 renewal claims were filed. Those entitled to benefit numbered 27,236, while 13,331 were either disallowed or disqualified. The amount of benefit paid was $462,161.

* *See* Tables E-1 to E-8.

81108—9

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission showed that during January, 1951, insurance books were issued to 4,106,243 employees who had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1950. This was an increase of 82,087 since December 29, 1950.

As at the end of January, there were 242,873 employers registered, representing an increase of 1,304 since the end of December.

WAGES, HOURS AND WORKING CONDITIONS IN WHOLESALE AND RETAIL TRADE, OCTOBER 1949*

In both Wholesale and Retail Trade more than 80 per cent of the employees were normally working from 40 to 48 hours a week in 1949. Almost one-third of the workers in Wholesale Trade, but a much smaller proportion in Retail Trade, were reported on a five-day week. The annual vacations with pay policy and the numbers of statutory holidays observed and paid for differed between the two major divisions of Trade, as shown in the following article.

The value of domestic trade continued its upward trend in 1949. The monthly average index of wholesale sales increased almost 3 per cent over the previous year and the monthly average value of retail sales increased somewhat less than 6 per cent. The monthly average of weekly wages and salaries reported by the leading trading establishments increased to $36.97 in 1949, 7½ per cent over 1948.

The average weekly wage rates for the selected occupations in Table I reveal wide variations in the average rates among both the occupations and the cities shown. Comparing similar occupations, the average wages in Wholesale Trade are generally higher than in Retail Trade, and the averages for men are higher than for women workers.

In both divisions of Trade an almost equal proportion of the employees, about 83 per cent, were normally working from 40 to 48 hours a week in 1949. However, a much higher proportion of workers in Wholesale Trade were on a 5-day week than in Retail Trade. One-third of the workers in Wholesale Trade were in establishments which gave an initial vacation of two weeks with pay, compared with 14 per cent in Retail Trade. On the other hand, more than one-half of the workers in Retail Trade were employed in establishments which gave a maximum vacation of three or four weeks after longer periods of employment, compared with one-quarter of the workers in Wholesale Trade.

Ninety-three per cent of the employees in Wholesale Trade and 89 per cent in Retail Trade were employed by firms which reported observing seven or more statutory holidays in 1949. Most of the workers in both divisions of the industry were paid for some or all of the statutory holidays when these days were not worked.

Wholesale Trade

One-third of the 25,300 employees included in this analysis of the leading Wholesale Trade firms were employed in Ontario. An almost equal proportion, 22 per cent, were located in British Columbia and the Prairie Provinces, 17 per cent in Quebec and 5 per cent in the Maritime Provinces. Fourteen per cent of these workers were women, the largest number of whom were reported in British Columbia.

Wage Rates.—In most of the eight cities for which information is given in Table I, General Office Clerks were paid the highest average weekly wage rates during the pay period ending October 1, 1949, and Ware-

* Information in this article was prepared from data obtained in the annual survey of wage rates and working conditions for 1949 conducted by the Economics and Research Branch of the Department of Labour. Employers were asked to report on wage rates (straight-time earnings for workers on commission) and certain conditions of work in their establishments during the last pay period preceding October 1, 1949.

housemen were paid the lowest. The differences in average weekly rates between cities ranged from $5.35 for Warehousemen to $11.78 for Truck Drivers; and the differences between occupations within cities ranged from $4.29 in Edmonton to $9.77 in Vancouver. The highest average weekly wage rate, $46.42, was paid to Truck Drivers in Vancouver and the lowest, $32.30, was paid to Warehousemen in Winnipeg.

Amongst the six female occupations, Bookkeepers were paid the highest average weekly wage rate. The variation between cities in the average rates paid to workers in the same occupation ranged from $3.22 a week for Typists to $9.19 a week for Bookkeepers. The variation between the highest and lowest paid occupation within the same city varied from $1.52 in Saint John to $7.08 in Edmonton. The lowest average weekly wage rate in the female occupations was $24.70 for Telephone Switchboard Operators in Saint John, and the highest was $35.33 for Bookkeepers in Montreal.

A comparison of the average weekly rates paid to General Office Clerks, Male, and General Office Clerks, Female, shows that the men average from $8.62 to $14.42 higher than the women.

The Normal Work Week.—Eighty-three per cent of the employees in Wholesale Trade were normally working from 40 to 48 hours at the time of the 1949 survey (Table II). About 22 per cent of the workers were on a 40-hour week, 23 per cent were on a 44-hour week and 12 per cent on a 48-hour week. Thirteen per cent of the workers were normally working more than 48 hours a week, about half of whom were working 54 hours.

There was also much variation in the distribution of hours between regions. This can be readily seen in the following table, which shows the proportion of employees in each region working 44 hours or less a week and the proportion working more than 44 hours.

	Normal Weekly Hours	
	44 Hours or less	More than 44 hours
Maritime Provinces.	64%	36%
Quebec	42%	58%
Ontario	63%	37%
Prairie Provinces....	89%	11%
British Columbia....	52%	48%

Almost one-third of the workers were reported to be working five days a week in 1949, most of whom were working 40 hours. Ontario had the largest proportion

NOTE: Information on vacations with pay was not reported for 168 employees.

of workers, just under 45 per cent, on a 5-day week, and British Columbia had the next largest proportion, 32 per cent. Twenty-eight per cent of the workers in the Prairie Provinces, 26 per cent in Quebec and 24 per cent in the Maritime Provinces were on a 5-day week.

Vacations with Pay.—Two-thirds of the workers in Wholesale Trade were employed by firms which reported giving an initial vacation of one week with pay, and one-third by those which reported giving two weeks with pay, generally after a year of employment (Table III). More than one-half of the workers in the Maritime Provinces but less than one-fifth of those in British Columbia were in establishments which gave this initial vacation of two weeks with pay.

Wholesale establishments employing 60 per cent of the workers reported increasing the period of vacation with pay as the worker's term of employment lengthened. About one-third of the workers were in establishments which increased the vacation period from one to two weeks with pay, and one-quarter were in those which increased the vacation from one or two weeks after a year of employment to three weeks, generally after 15 to 25 years. In total, 17 per cent of the employees were in establishments having a maximum vacation of one week, 58 per cent in those having a maximum of two weeks, 24 per cent a maximum of three weeks and just over one per cent, four weeks.

Statutory Holidays.—More than 80 per cent of the workers were employed by Wholesale firms which observed from 7 to 10 statutory holidays in 1949 (Table IV). The largest group of workers, 29 per cent, observed 8 statutory holidays and the next largest group, 26 per cent, observed 9 days. Eleven per cent of the workers were in establishments which observed more than 10 statutory holidays.

In the Maritime Provinces and Quebec there was a wide variation in the number of statutory holidays observed. In Ontario, 90 per cent of the workers observed 7, 8 or 9 statutory holidays, in the Prairie Provinces 64 per cent observed 8 or 9 days and in British Columbia 48 per cent observed 7 or 9 days.

(1) Includes 13 workers who are paid for 3, 4, 5, 6 and 8 statutory holidays after 6 months, 1 year, 18 months, 3 years and 5 years of employment respectively.

The number of statutory holidays observed, in this article, is the number of days when the establishment is closed because of Dominion, Provincial or Municipal holidays, or religious holidays regularly observed.

Eighty-seven per cent of the employees were reported to be paid for some or all of the statutory holidays when these days were not worked. More than one-half of the workers were paid for 8 or 9 statutory holidays on this basis, and 16 per cent were paid for more than 9 holidays. In most of the provinces just a small proportion, if any, were not paid for any of the statutory holidays when not worked, but in British Columbia almost one-half of the workers were in establishments which did not.

Retail Trade

Forty-four per cent of the 103,600 employees included in the 1949 survey of Retail Trade were working in Ontario and 19 per cent in Quebec. Twenty per cent of the workers were in the Prairie Provinces, 12 per cent in British Columbia, 6 per cent in the Maritime Provinces and a very few in the Northwest Territories. Women workers comprised almost one-half of the employees in the industry.

Wage Rates.—Sales Clerks on commission received the highest average weekly wages of any of the male occupations in Retail Trade shown in Table I. In all but two of the eight cities, Stockkeepers received the lowest average weekly wage. There was a substantial variation in the average weekly rates between cities as well as between occupations, particularly in the latter case because of the high wages received by the Sales Clerks on commission. The average weekly wages ranged from $21.11 for Stockkeepers in Saint John to $69.37 for Sales Clerks on commission in Edmonton.

There were similar variations in the average weekly wage rates of the nine female occupations shown in Table I, although the earnings of Sales Clerks on commission were not the highest of the rates in most cities. The average weekly wages of the women workers ranged from $17.96 for General Office Clerks in Saint John to $36.34 for Sales Clerks on commission in Vancouver. The highest average rate for an occupation was generally found in Vancouver or Toronto, whereas the lowest rate was generally found in Saint John or Halifax.

The average weekly wage rates for men was higher than the average rates for women in the same occupational classification.

The Normal Work Week.—Eighty-three per cent of the employees in Retail Trade, the same proportion as in Wholesale Trade, were normally working from 40 to 48 hours

TABLE V.—THE NORMAL WORK WEEK IN RETAIL TRADE, OCTOBER 1949

NOTE: Information on the normal work week was not reported for 388 employees.
(1) This breakdown does not include 52 employees in the Northwest Territories.

a week at the time of the 1949 survey (Table V). Nineteen per cent of the workers were on a 40-hour week, 17 per cent on a 44-hour week and 16 per cent on a 48-hour week. Eleven per cent normally worked less than 40 hours a week and just under 6 per cent worked more than 48 hours.

There was a substantial difference between the distribution of employees by normal weekly hours in the Food Division and the General Merchandise Division of Retail Trade. In the former group almost all of the employees were working 44 hours or more, whereas in the latter group just 16 per cent were working these weekly hours. The variations in the normal weekly hours of work may be seen by comparing the proportion of employees in each region working less than 44 hours with those working 44 hours or more, as follows:—

	Normal Weekly Hours	
	Less than 44 hours	44 hours or more
Maritime Provinces.	49%	51%
Quebec	24%	76%
Ontario	49%	51%
Prairie Provinces....	69%	31%
British Columbia....	73%	27%

Thirteen per cent of the workers in Retail Trade were on a 5-day week in 1949, as compared with 32 per cent in Wholesale Trade. More than one-half of these workers were on a 40-hour week, and three-quarters were on a normal work week of 40 hours or less. Almost 60 per cent of the workers in British Columbia, 7 per cent in Ontario and 14 per cent in Quebec were on a 5-day week. The corresponding proportions in the Maritime Provinces and the Prairie Provinces were negligible.

TABLE VI.—ANNUAL VACATIONS WITH PAY IN RETAIL TRADE, OCTOBER 1949

[1] This breakdown does not include 52 employees in the Northwest Territories.

Vacations with Pay.—An initial vacation of one week with pay, generally after a year or less of employment, was reported by establishments employing 86 per cent of the workers (Table VI). The remaining 14 per cent were employed by firms which reported giving two weeks with pay, mainly after a year of employment.

Establishments employing all but 13 per cent of the workers reported an annual vacation policy which increased the period of vacation as the worker's term of employment continued. Twenty-nine per cent of the workers were in establishments whose vacation with pay period increased to two weeks, 43 per cent to three weeks and 14 per cent to 4 weeks. Including the group of workers in establishments having just one vacation period, 4 per cent of the employees in Retail Trade could receive a maximum vacation with pay of one week, 38 per cent a maximum of two weeks, 43 per cent three weeks and 14 per cent four weeks. Most of the workers in establishments having this maximum vacation policy of four weeks were employed in Ontario.

Statutory Holidays.—Almost 98 per cent of the workers in Retail Trade were employed by firms which reported observing one or more statutory holidays in 1949 (Table VII). Just over two-thirds of the workers observed from 7 to 9 holidays, with the largest group, almost one-third, observing 9 days. Twenty-one per cent of the workers observed more than 9 statutory holidays.

The predominant number of statutory holidays observed varied between regions,

(1) This breakdown does not include 52 employees in the Northwest Territories.

from 7 days in Quebec to 11 days in the Prairie Provinces. In British Columbia almost three-quarters of the workers observed 9 holidays. In the Maritime Provinces almost equal proportions of workers observed 8, 9 and 10 days, whereas in Ontario almost equal proportions observed 8 and 9 days.

As for Wholesale Trade, the number of statutory holidays observed is the number of days when the establishment is closed because of Dominion, Provincial or Municipal holidays, or religious holidays regularly observed.

A very small proportion of the workers in Retail Trade were in establishments which did not pay for any of the statutory holidays when not worked. In almost all cases the establishments paid for all of the statutory holidays observed.

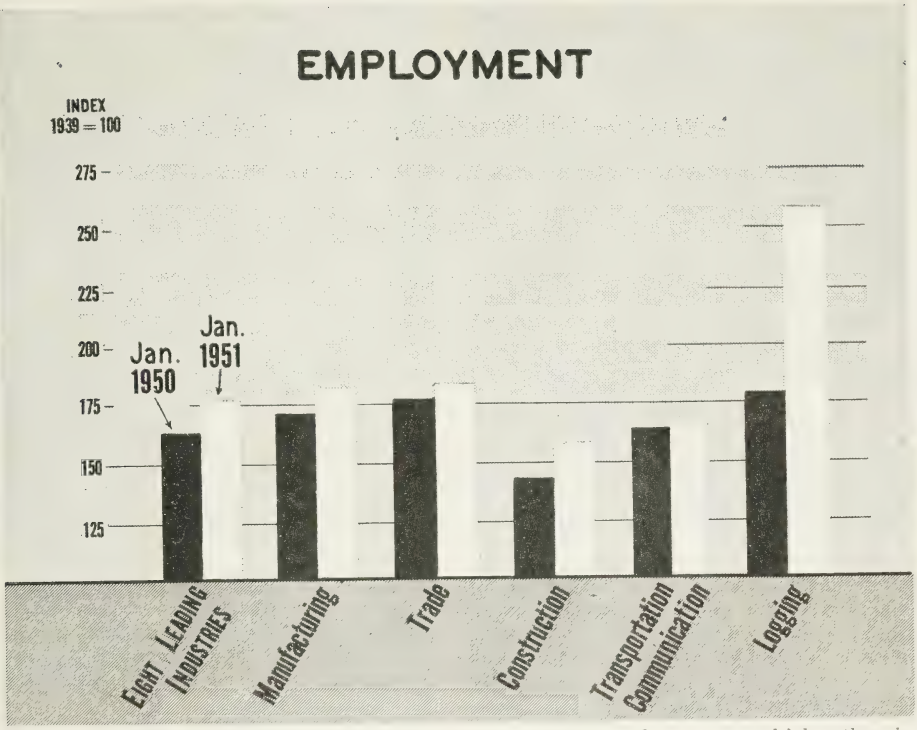
Employment Conditions

An analysis of the current employment situation prepared by the Economics and Research Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

February 1951 . . .

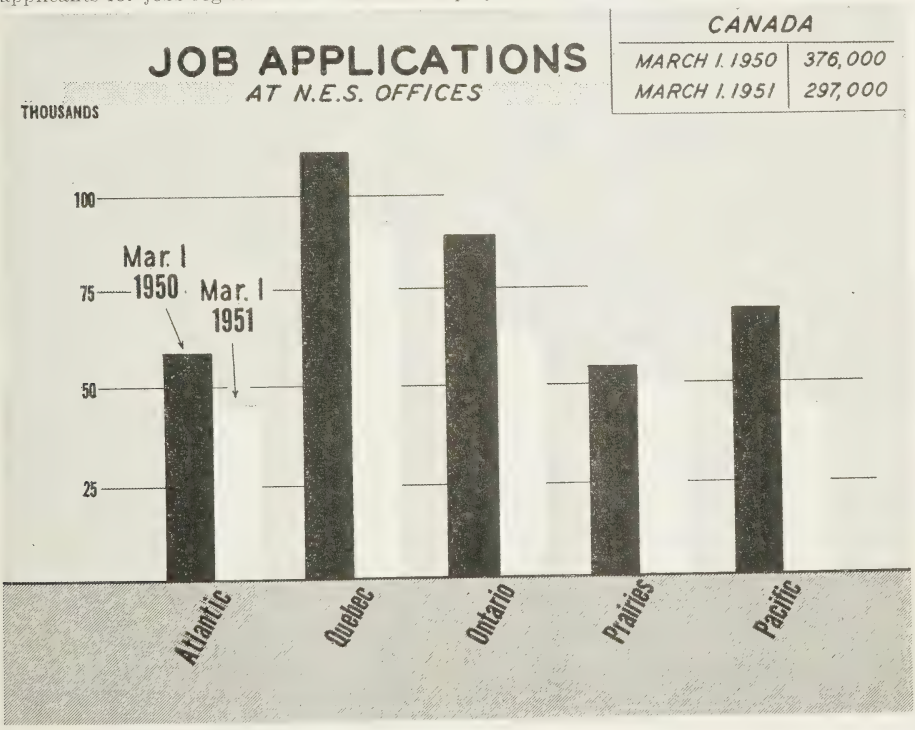
. . . saw the beginning of the annual decline in seasonal unemment. Employment gains in Ontario and British Columbia more than offset increasing unemployment in Quebec and Newfoundland; in other regions there was little change. Lumbering on the west coast was recovering from the effects of the heavy snowfall of January. Manufacturing continued its uneven expansion, retarded in some branches by scarcities of key materials and technical personnel. By all indications, construction will have a busy season.

The rapid increase in winter unemployment came to a halt early in February. Job applications with the National Employment Service, an important indicator of unemployment change, reached a level of 303,700 on February 8, declining steadily to 296,700 at March 1. Contrary to last year, demand for pulp and newsprint is high and snowfall in Quebec, where woods unemployment was heaviest, was sufficient to keep over 33,000 workers busy cutting and hauling logs from the woods. The heavy unemployment which occurred in March of last year was not likely to be repeated.



Rather, the strength of consumer, investment and defence demands made an early scarcity of labour in some industries almost certain. Employment effects of government contracts were already evident in the central provinces. Although about 58,000 unemployed were registered in construction occupations, contractors were concerned about the availability of labour to carry out the heavy program of industrial engineering and defence construction in the coming months.

The demand for consumer goods is still strong. At the end of the year, the rise in the average of all weekly earnings over the year equalled the increase in the cost of consumer goods and services, while because of increased employment, total labour income rose more rapidly. Investment income increased by a fifth, while farmers' income will be augmented by the 190 million dollars which the Wheat Board is now distributing. Employment in consumer goods industries arising out of the demand created by greater spending power will be limited only by material scarcities or government restrictions.



Some dislocations will undoubtedly occur, as the needs of the defence program are superimposed upon the high level of civilian production. Some of these have already occurred in manufacturing. Restrictions on housing credit, added to the high and rising prices of materials will have a depressing effect on residential construction. This will be more than offset by defence construction, together with the large industrial and engineering projects in eastern Quebec, in southern Ontario, in Alberta and on the west coast. But the concentration of activity in particular areas may create a situation in which there are labour shortages in some places and surpluses in others.

Among the major industries, logging, mining and manufacturing were active during February. Construction and agriculture were at their lowest point for the year and employment in the distributive industries, although seasonally slack, was above last year's levels. A large part of the unemployment existing during the month, consisted of workers laid off from these seasonally inactive industries, notably construction, transportation and food products.

With a strong world-wide demand for newsprint and lumber products, logging operators on both the West Coast and in eastern Canada were working at top capacity. Hauling was about 75 per cent finished in most parts in the east, although mild weather made this work difficult. Cutting operations, normally finished by the end of January, were still being carried on where possible. In British Columbia, activity was just beginning to pick up after the normal winter slowdown. Although the industry as a whole was generally busy, there were 22,000 applications for employment in lumbering occupations on file with the National Employment Service across Canada at February 22.

The charts on this page show that in the early part of 1951, employment was higher than in the previous year in Canada's major industries; and correspondingly that the number of applicants for jobs registered at National Employment Service offices was lower.

CANADA	
MARCH 1, 1950	376,000
MARCH 1, 1951	297,000

More winter construction work has been carried on this winter than last but not sufficient to employ the whole of the construction labour force, however. National Employment Service offices report 58,000 applications for construction employment at February 22, of which nearly 38,000 were classified as skilled and semi-skilled workers. The increase in winter construction over last year is reflected in a rise in the index of construction employment from 143·2 to 158·8 (1939=100) in the twelve-month period ending January 1, 1951. A large volume of new work was in the planning stage and contracts awarded during January totalled $159,000,000, over $100,000,000 more than the figure in January, 1950.

In the manufacturing industries, textiles, agricultural implements, chemicals and aircraft plants were seasonally active during February. On the other hand, meat packing plants, sawmills and food processing firms were releasing workers. There were some lay-offs due to material shortages, as the scarcity of steel, nylon, staple fibres, zinc and copper have held up production. In total, however, manufacturing employment continues to run above 1950 levels, the January 1, 1951 index being 11 points above January 1, 1950 at 182·0 (1939=100).

There was relatively light labour market activity in other industries, although employment in all the major divisions has been above that of the winter of 1950. The index of employment for the following major industries at January 1, 1951, with the figure for January 1, 1950 in brackets, reflects this employment expansion: trade, 184·3 [176·1]; transportation, storage and communication, 168·0 [163·1].

Regional Analysis

In ***Newfoundland,*** the completion of pulpwood quotas by smaller contractors released numerous cutters and fewer alternative jobs were available for them in log hauling, owing to the lack of snow. Conditions were particularly unfavourable for hauling in east coast areas, where all logging was virtually dormant by the end of the month. The woods forces employed directly by the pulp and paper firms, however, remained relatively unchanged from their late January total of about 6,000; and some 500 workers were engaged in cutting birch logs to be stockpiled for the woodworking plant now under construction. Firms at Seven Islands, Quebec, recruited workers from the St. John's area during February for the construction of the Labrador railway. As a result of the decline in forest activity, job applications with the National Employment Service increased by 2,800 during the month to a total of 11,900 at March 1. This was 36 per cent lower than the total a year ago.

The employment situation in the ***Maritimes*** at the end of February was only slightly less favourable than at the beginning of the month and remained considerably more favourable than it was a year earlier. Job applications with NES increased but 1,100 to a total of 33,300 at March 1. In Prince Edward Island, the much greater pulp cutting activity this winter has been limited in its employment effects, but income from this source has served to offset particularly low potato prices. On the mainland, the unusually mild winter has resulted in lumber production much below the record levels predicted earlier and has brought virtual suspension of log hauling activity. However, Cape Breton fish processing is enjoying extended activity this season. Steel shipments arrived for naval shipbuilding contracts, the hiring of shipyard workers stepped up in Halifax, and the arrival of structural steel permitted the resumption of work on certain construction jobs in Saint John, augmenting the already high volume of activity there. Other steel-using firms still feel the pinch of material shortages.

Sustained demand for woods workers, a heavy winter construction program, and a steady rise in manufacturing employment have been the chief factors in the lower level of employment this season in ***Quebec.*** Heavy snows in the Saguenay, La Malbaie and Gaspe districts made cutting and hauling difficult and large numbers of workers left the woods; while exactly opposite conditions—lack of snow and frost—produced similar results in parts of the Eastern Townships. The principal factors which retarded manufacturing expansion were first, shortages of steel, wool and nylon and secondly, a general scarcity of engineers, draftsmen, chemists, metallurgists and metal tradesmen. The continued pressure of strong private and public demand—the latter involving, in particular, defence contracts for aircraft and parts, clothing, chemicals and electronic equipment—was sufficient, however, to bring about a net rise in the over-all level of manufacturing employment. The cumulative effect of these conditions was reflected in a slight rise in the total number of active job applications filed with the National Employment Service. The end-month total of 92,500, while 3,300 above the total at the beginning of the month, remained 18 per cent lower than the comparable 1950 total.

Milder weather, which permitted an early start on construction projects, and a contra-seasonal expansion in manufacturing were

responsible for an early down-turn in seasonal unemployment in ***Ontario.*** The general improvement was not uniform. Unemployment declined in industrial centres while in other areas, particularly in those dependent upon logging, it continued to increase. Expansion in manufacturing continued at an uneven pace. Primary industries and chemical, rubber, tanning and abrasive plants were working at capacity and expanding, but other firms, notably food processing, clothing and electrical apparatus manufacturers were forced by material shortages to make temporary staff reductions. Automobile manufacturers, with contracts for army vehicles added to the high level of civilian production, continued to increase staff. Although more production workers were hired in February than previously, the greatest demand was for technicians and skilled metal tradesmen.

The employment situation in the ***Prairie*** region showed little change from the end of January. There was some increase in construction, offset by contraction in coal mining and continued lay-offs in meat packing plants. From a peak of 51,900 at February 22, total unplaced applications with NES declined to 50,800 at March 1. This is 7 per cent lower than the total a year earlier, which may be attributed to a greater number of job opportunities in the eastern woods. A serious scarcity of labour is expected in this area in the coming months. Milder weather at the end of the month reduced the demand for coal and all mines, with the exception of those at Estevan, reverted to short time. Metal mining, on the other hand, showed increasing activity, particularly in development work in the Steep Rock range and at Lynn Lake in northern Manitoba. The number of construction contracts awarded in the past three months indicate a strong demand for labour in Manitoba and Alberta this spring. In Edmonton, particularly, contracts let for larger buildings exceed $10 millions, and in addition, two university buildings and a $14 million pulp plant are contemplated.

In the ***Pacific*** region, peak unemployment was reached early in the month and declined sharply during the last two weeks. Shipbuilding yards have not as yet made any substantial hirings and coal mining employment declined, but manufacturing, particularly lumber and shingle mills, showed a strong upward trend. Logging operations on Vancouver Island, after the almost complete disruption during the heavy snowfall of January, were near normal. In the interior mainland, on the other hand, unemployment increased as the spring break-up of logging roads, which normally disrupts the industry for a period of from four to six weeks, began. The wet weather prevented any large scale expansion in construction, but the number of industrial and engineering projects planned for the summer was causing concern among contractors about the adequacy of manpower. The total of 44,800 job applications at March 1, although high in relation to the labour force of the region, was substantially lower than it has been at this time during the past two years.

Employment Service Activities

By the end of February it was apparent that registrations for work were falling off, but for most of the month, there was not a great deal of labour market activity. Applications for employment hovered around 300,000, dropping to 297,000 by the beginning of March. Placements remained steady during the month at around 12,000 to 13,000 a week.

The decline in applications began in Ontario but by the first week in March decreases were apparent in all regions. Applications from women as well as from men were dropping off. Vacancies reported by employers started to increase in the second week in February and by March 1 totalled 37,700, some 2,400 more than three weeks earlier.

At the beginning of March, 62 per cent of the persons registered at employment offices were receiving unemployment insurance benefits, either regular or supplementary. In actual numbers it represented 184,900 persons, 26,900 of whom were collecting supplementary benefit. There has been 16,600 added during the month of February, although both registrations for employment and claims for unemployment insurance were declining during this period. A lag exists between the time a person files a claim for unemployment insurance and the time he actually receives a cheque, which accounts for the divergent trends.

A larger proportion of the workers registering for employment this winter have been assisted by unemployment insurance than in any time past. The main reason for this is the supplementary benefit program which enables persons who exhaust their benefit rights, as well as other groups, to receive unemployment insurance benefits, although at a lower rate. Too, with the extention of coverage last April, which brought the Eastern Canada logging industry under the Unemployment Insurance Act, more workers are eligible. It is estimated that about 55 per cent of the labour force and 74 per cent of the wage and salary workers are now covered by unemployment insurance.

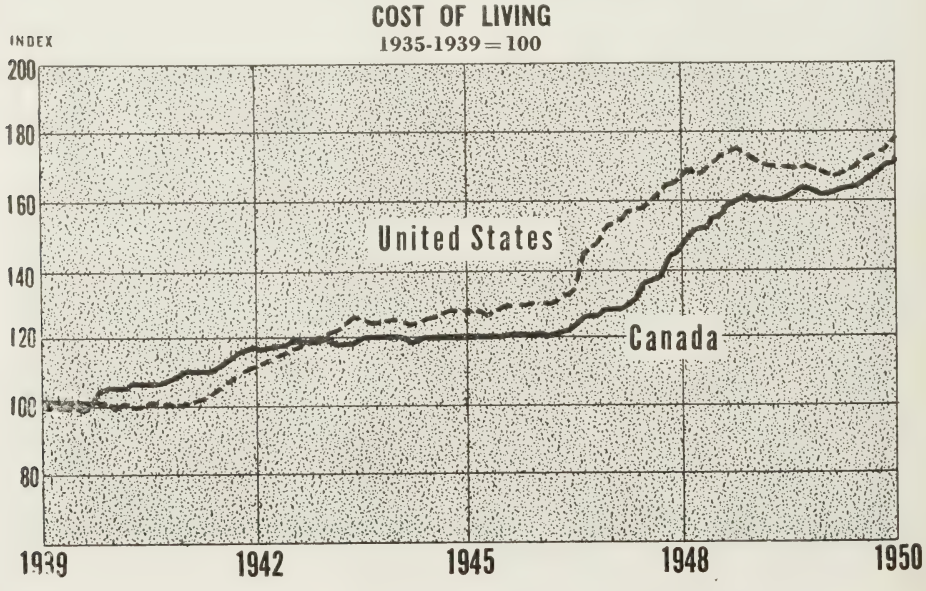
PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index rose from 175·2 to 179·7 between February 1 and March 1, 1951. This increase of 4·5 points was equivalent to an advance of 2·6 per cent. All group indexes moved up higher in February, although two-thirds of the total increase was due to higher food prices. The index for foods rose from 224·4 to 233·9, reflecting gains for most items, particularly eggs, butter, beef, pork, cabbage, carrots, shortening and oranges. An increase in the fuel and light index from 141·7 to 146·5 was mainly attributable to higher prices for coal and coke. Further gains in a broad list of clothing and footwear items moved the clothing index from 192·4 to 196·3, while the home furnishings and services index rose from 185·1 to 188·6, as floor coverings, furnishings, hardware and furniture advanced. The miscellaneous items index rose narrowly from 137·0 to 137·8, due to increases for personal care items, notably haircuts and health costs. Reflecting the results of the March quarterly survey, the rent index moved from 136·4 to 137·6.

From August, 1939 to March, 1951, the increase in the cost-of-living index was 78·3 per cent.

Cost of Living in Eight Cities



The eight city cost-of-living indexes moved closely with the Dominion index between January 2 and February 1. Increases ranged from 2·1 points in Halifax to 3·2 points in Vancouver. In percentage terms these increases are equivalent to 1·3 per cent and 1·9 per cent, respectively. Increases for food, clothing and home furnishings accounted for most of the increases recorded for each city. The fuel and light indexes remained mostly unchanged while all miscellaneous series were slightly higher.

Composite city index increases between January 2 and February 1 were as follows: Vancouver 3·2 to 175·8; Edmonton 3·0 to 169·0; Toronto 2·9 to 171·5; Montreal 2·8 to 180·6; Saint John 2·8 to 171·2; Saskatoon 2·4 to 172·6; Winnipeg 2·3 to 170·1; and Halifax 2·1 to 162·3.

Wholesale Prices, January, 1951

The general index of wholesale prices advanced 7·4 points (3·3 per cent) to 233·8 (1935-39=100) between December, 1950 and January, 1951. All of the eight groups contributed to the upward trend, with the Textile Products group recording the largest increase. An advance of 14·6 points (5·1 per cent) brought the January level of this index to 298·8. Animal Products followed closely with a gain of 13·3 points (4·8 per cent) to 290·4. Wood Products moved up 10·7 points (3·9 per cent) to 284·5, and Chemical Products 6·8 points (3·9 per cent) to 179·7. Vegetable Products increased by 4·5 points (2·1 per cent) to 214·1, Iron Products, 4·2 points

* *See* Tables F-1 to F-6.

(2·2 per cent) to 196·4, Non-metallic Minerals, 1·9 points (1·1 per cent) to 167·3 and Non-ferrous Metals, 1·6 points (0·9 per cent) to 174·7.

The following commodity price increases were registered between December and January: lobsters, in shell, Halifax 50·0 per cent, cocoanut oil 26·5 per cent, worsted cloth yarn, 2 ply, 25·5 per cent, denatured alcohol 24·2 per cent, spruce scantling (export) 23·2 per cent, raw wool, eastern bright, 22·2 per cent, beef carcass, cow, Vancouver 21·6 per cent, fir timber, No. 1 common, 21·4 per cent, flax No. 1 C.W. 21·4 per cent, sisal rope 20·9 per cent, pickled sheepskins 20·7 per cent, woodpulp, bleached sulphite 18·5 per cent. Decreases in commodity prices were recorded as follows: eggs, Grade A large (average), 21·2 per cent, canned corn 14·3 per cent, oranges 8·0 per cent, whitefish, Ontario 7·6 per cent, lemons 7·0 per cent, bananas 2·7 per cent, cheese, new, Toronto, 2·3 per cent.

The index of Canadian Farm Products prices at wholesale rose 7·7 points (3·4 per cent) to 235·2 (1935-39=100). Animal Products prices advanced 12·5 points (4·2 per cent), higher prices for livestock, wool, poultry and butterfat outweighing sharp declines in egg prices. Field Products moved up 2·9 points (1·9 per cent), influenced by higher prices for grains, potatoes and hay.

STRIKES AND LOCKOUTS,
Canada, February, 1951*

Strike idleness showed little change as compared with the previous month and with February, 1950. Fourteen new strikes and lockouts began during the month but the majority involved few workers and caused little time loss. One interprovincial stoppage of steel products factory workers at London and Toronto, Ont., Montreal, P.Q., and Winnipeg, Man., involved half the total workers and caused half the total time loss.

Preliminary figures for February, 1951, show 18 strikes and lockouts in existence, involving 4,508 workers, with a time loss of 18,878 man-working days, as compared with 17 strikes and lockouts in January, 1951, with 6,253 workers involved and a loss of 16,763 days. In February, 1950, there were 16 strikes and lockouts, involving 3,861 workers, and a loss of 24,871 days.

For the first two months of 1951, preliminary figures show 31 strikes and lockouts, involving 10,577 workers, and a loss of 35,641 days. In the same period in 1950 there were 20 strikes and lockouts, with 5,434 workers involved and a loss of 63,459 days.

Based on the number of non-agricultural wage and salary workers in Canada, the time lost in February, 1951, was 0·02 per cent of the estimated working time, the same percentage as in January, 1951; 0·03 per cent in February, 1950; 0·02 per cent for the first two months of 1951 and 0·04 per cent for the first two months of 1950.

Of the 18 strikes and lockouts in existence during the month, two were settled in favour of the workers, two in favour of the employers and two were compromise settlements. Seven were indefinite in result, work being resumed pending final settlement. At the end of the month five strikes and lockouts were recorded as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes and lockouts about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., and Edmonton, Alta., on May 30, 1946; electrical apparatus factory workers at Vancouver, B.C., May 11, 1950; laundry machinery factory workers at Toronto, Ont., June 16, 1950; and cleaners and dyers at Toronto, Ont., October 4, 1950.

* *See* Tables G-1 and G-2.

Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. Statistics given in the annual review issued as a supplement to the LABOUR GAZETTE for April, 1951, and in this article are taken, as far as possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in December, 1950, was 72 and 11 were still in progress from the previous month, making a total of 83 during the month. In all stoppages of work in progress in the period there were 9,100 workers involved and a time loss of 28,000 working days was caused.

Of the 72 disputes leading to stoppages of work which began in December, three, directly involving 200 workers, arose out of demands for advances in wages, and 33, directly involving 3,400 workers, on other wage questions; two, directly involving 500 workers, on questions as to working hours; eight, directly involving 500 workers, on questions respecting the employment of particular classes or persons; 23, directly involving 1,500 workers, on other questions respecting working arrangements; two, directly involving 100 workers on questions of trade union principle; and one, directly involving 100 workers was in support of workers involved in another dispute.

For 1950, preliminary figures show a total of 1,338 work stoppages beginning in the year, 302,000 workers directly and indirectly involved in all stoppages in progress during the year and a time loss of 1,388,000 working days.

Comparable figures for 1949 are, 1,426 stoppages, 434,000 workers and a time loss of 1,807,000 days.

United States

Preliminary figures for January, 1951, show 400 strikes and lockouts beginning in the month, in which 185,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 1,200,000 man-days. Corresponding figures for December, 1950, are 200 strikes and lockouts, involving 40,000 workers with a time loss of 1,000,000 days.

FATAL INDUSTRIAL ACCIDENTS IN CANADA, 1950*

During the calendar year 1950, industrial fatalities in Canada totalled 1,240, a decrease of 145 from the 1949, figure of 1,385. Included in the final figure for 1949 are 41 deaths not previously reported. Accidents both fatal and non-fatal as reported by the provincial Workmen's Compensation Boards increased from 412,378 in 1949 to 414,075 in 1950.

The accidents recorded are those which involved persons gainfully employed, during the course of or arising out of their employment. Also included are deaths from industrial diseases as reported by the provincial Workmen's Compensation Boards. Reviews of industrial fatalities appear quarterly in the LABOUR GAZETTE.

Annual statistics on industrial fatalities are compiled from reports received from the various provincial Workmen's Compensation Boards, the Board of Transport Commissioners, and certain other official sources. Press reports are used to supplement these data, but accidents reported in the press are included only after careful inquiry to avoid duplication. For those industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible therefore that coverage in such industries as agriculture, fishing and trapping and certain of the service groups is not as complete as in those industries which are covered by workmen's compensation legislation.

During the year there were fourteen industrial accidents which caused the death of three or more persons in each case. On January 20, nine workers in a clothing plant at Toronto, Ontario, were burned to death in a fire. Three hydro-electric workers were killed at Isle Maligne, Quebec, on February 13, when the turbine in which they were working was accidently set in motion. On March 18, ten crew

* *See* Tables H-1 to H-5.

members of a fishing craft were drowned when their vessel collided with a steamship off Halifax harbour, Nova Scotia.

A trainman and two engineers were killed in a collision between two freight trains near Sioux Lookout, Ontario, on June 10. Five miners were killed at Cadomin, Alberta, on June 14, when they were trapped 350 feet underground by a cave-in.

On July 9, three electrical workers engaged on the conversion of a hydro-electricity transmission system from 25 to 60 cycles at London, Ontario, received fatal burns when a transformer exploded. An aircraft crash at Timagami, Ontario, resulted in the death of five employees of the Ontario Department of Lands and Forests on August 30. Five fishermen from Woods Harbour, Nova Scotia, are believed to have been drowned when their boat was capsized off the south coast of Nova Scotia, during a hurricane; their overturned boat was found on September 20.

On November 11, the Leduc Hotel in Leduc, Alberta, was wrecked by an explosion, and the fire which followed, cost the lives of three employees. Seven crew members of the aircraft *Canadian Pilgrim* perished when the plane crashed in the French Alps. Many more persons lost their lives, but for the purpose of these statistics only those whose deaths were a result of their employment are listed. On November 21, four trainmen were killed, when two trains, one a troop train, carrying members of Canada's Special Service Force, met in a head-on collision at Canoe River, British Columbia. Five employees of a department store in Halifax were burned to death when fire destroyed the building in which they were working on November 30. On December 5, three loggers were drowned in the Nimpkish River, British Columbia, when their boat was swamped while they were transporting supplies back to camp. Three employees of the British Columbia Forest Service lost their lives by drowning on December 15, when the forestry launch *A. L. Bryant* was in collision with the steamship *Lady Cynthia* off Bowen Island.

Fatalities by Causes

Classification of accidents according to cause (Table H-2) indicates that the largest number, 359, came under the category of "moving trains, vehicles, etc." Automobiles and other power vehicles and implements caused 194 of these fatalities.

Industrial diseases, strain, etc., were responsible for 141 of the 233 industrial deaths recorded in the group "other causes". Falls of persons resulted in 184 fatalities, while dangerous substances caused 162 deaths, including 51 resulting from electrocution. Falling objects caused fatal injuries to 160 persons, 66 of whom were employed in the logging industry.

Fatalities by Provinces

The largest number of industrial fatalities recorded in any province in 1950 was 434 in Ontario, a decrease of 81, from the preceding year. Of these 125 occurred in manufacturing, 63 in transportation, and 58 in the construction industry. In Quebec, 247 fatalities were recorded including 51 in manufacturing and 45 in the construction industry. British Columbia followed with a total of 235 industrial deaths recorded during the year. Accidents in the logging industry were responsible for 75 of these fatalities.

Fatalities by Industries

Table H-4 includes an analyses of fatalities by industries and months and the number of fatalities in each industry expressed as a percentage of the grand total. The latest available figures of persons employed in the various industries are also given; these, although not in any case for the year under review, are included to provide an approximate indication of the relative frequency of accidents from industry to industry.

The highest percentage of the 1,240 fatalities in 1950 was in manufacturing with 19·6 as compared with 18·0 per cent in the previous year. Transportation accounted for 15·7 per cent in comparison to 18·6 in 1949.

The percentage in mining and quarrying declined to 13·3 from 14·7 per cent in 1949. In logging the percentage increased from 10·5 in 1949 to 12·1 in 1950.

SELECTED LIST* OF PUBLICATIONS RECEIVED IN LIBRARY OF DEPARTMENT OF LABOUR, OTTAWA.

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

Zinc ..... 000 tons	.....	.....	24·0	21·8	24·7	15·2
Coal ..... 000 tons	1,640	1,945	1,802	1,856	1,621	1,200
Crude petroleum ..... 000 bbls.	.....	.....	1,924	1,356	832	532
Distribution—						
Wholesale sales index, unadjusted (5)	.....	306·7	232·0	243·7	159·5	77·6
Retail sales $000,000	.....	.....	501·8	493·4	†	†
Imports, excluding gold $000,000	274·3	327·2	211·9	223·8	126·4	43·7
Exports, excluding gold $000,000	233·9	285·1	221·2	237·0	242·0	70·1
Railways—						
Revenue freight, ton miles 000,000	.....	.....	3,614	4,702	5,349	1,871
Car loadings, revenue freight 000	294·0	331·0	271·0	300·0	282·0	172·0
Banking and Finance—						
Common stocks, index (5)	166·5	153·8	119·0	114·3	81·5	93·8
Preferred stocks, index (5)	.....	.....	152·4	144·7	118·3	102·5
Bond yields, Dominion index (5)	.....	.....	90·1	95·4	97·3	97·3
Cheques cashed, individual accounts $000,000	.....	9,002	7,307	6,929	4,512	2,512
Bank loans, current public $000,000	.....	2,671	2,164	2,054	1,037	792
Money supply $000,000	.....	4,688	4,386	4,162	3,153(6)	1,370(6)
Circulating media in hands of public $000,000	.....	1,151	1,131	1,131	835	281(6)
Deposits $000,000	.....	3,537	3,255	3,031	2,163(6)	1,089(6)

NOTE.—Latest figures subject to revision. Many of the statistical data in this table are included in the Canadian Statistical Review issued by the Dominion Bureau of Statistics.

† Comparable statistics are not available.

(1) Population figures are as at the first day of December, for 1950, 1949 and June 1, for 1944, 1939.

(2) Labour Force Survey figures given are as at November 4, 1950, October 29, 1949. Detailed figures for November 1950 will be found in the February issue of the Labour Gazette.

(3) Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base: Average 1946=100.

(4) Newfoundland is included after April 1, 1949

(5) Average 1935-39=100.

(6) Year end figures.

(7) Figures for 1939-44 are production data rather than shipments.

(8) Includes ordinary live claimants plus claimants for supplementary benefit. Latter totalled 6,833 at January 1, and 27,103 at February 1, 1951.

C—Employment, Hours and Earnings

NOTE: The Dominion Bureau of Statistics has discontinued the series of monthly index numbers of employment and payrolls computed on bases of 1939 and 1941 as 100, formerly published in the LABOUR GAZETTE. The two series have been replaced by a new one, using a 1939 base as 100. Delays in preparation of the new series necessitate the omission of most of the tables on employment, hours and earnings from this issue of the LABOUR GAZETTE. They will reappear in next month's issue, in the new form now established by the Bureau.

TABLE C-2.—EMPLOYMENT, PAYROLLS AND WEEKLY WAGES AND SALARIES

(1939=100) (The latest figures are subject to revision)

G—Strikes and Lockouts

TABLE G-1.—STRIKES AND LOCKOUTS IN CANADA, JANUARY-FEBRUARY 1950-1951†

Date	Number of Strikes and Lockouts		Number of Workers Involved		Time Loss	
	Commencing During Month	In Existence	Commencing During Month	In Existence	In Man-Working Days	Per Cent of Estimated Working Time
1951*						
January	17‡	17	6,253‡	6,253	16,763	0·02
February	14	18	4,324	4,508	18,878	0·02
Cumulative totals	31		10,577		35,641	0·02
1950						
January	9‡	9	2,381‡	2,381	38,588	0·04
February	11	16	3,053	3,861	24,871	0·03
Cumulative totals	20		5,434		63,459	0·04

* Preliminary figures.

‡ Strikes unterminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day, Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, FEBRUARY, 1951 [1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars[2]
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to February, 1951				
MANUFACTURING—				
Boots and Shoes (Leather)				
Shoe factory workers, Quebec, P.Q.	1	78	1,636	Commenced January 31; for increased wages; piece rates; terminated February 24; negotiations; in favour of workers.
Textiles, Clothing, etc.—				
Cotton and rayon underwear factory workers, Sherbrooke, P.Q.	1	15	200	Commenced May 11, 1950; for a new agreement providing for increased wages, following reference to court of referees; employment conditions no longer affected by the end of February; indefinite.
Miscellaneous—				
Furniture and clothing factory workers, Victoria, B.C.	2	51	1,100	Commenced January 26; for implementation of unanimous award of conciliation board for increased wages in union agreement under negotiations; terminated February 28; negotiations; in favour of workers.
CONSTRUCTION—				
Buildings and Structures—				
Carpenters, Fort William and Port Arthur, Ont.	5	40	600	Commenced January 29; jurisdictional dispute as to whether metal sheeting should be applied by carpenters or sheet metal workers; terminated February 21; return of workers pending reference to arbitration board; indefinite.
Strikes and Lockouts Commencing During February, 1951				
LOGGING—				
Loggers, Menzies Bay, B.C.	1	100	200	Commenced February 8; against dismissal of a faller for failure to bring in his saw from the bush; terminated February 9; return of workers pending further negotiations; indefinite.
MINING—				
Coal miners, Drumheller, Alta.	1	150	150	Commenced February 14; dispute over removal of dirt caused by coal cutting machine; terminated February 14; return of workers pending further negotiations; indefinite.
MANUFACTURING—				
Rubber and Its Products—		[3]		
Tire factory workers, Kitchener, Ont.	1	827	1,600	Commenced February 9; protest against 3-day suspension of a curing press operator for negligence; terminated February 14; return of workers; in favour of employer.
Fur and Leather Products—				
Handbag factory workers, Montreal, P.Q.	1	23	35	Commenced February 27; protest against disciplining one worker for absenteeism; unterminated.
Textiles, Clothing, etc.—				
Knitting factory workers, Whitby, Ont.	1	30	90	Commenced February 26; for a new agreement providing for increased wages and check-off, following reference to conciliation board; unterminated.
Printing and Publishing—				
Bookbinders, Toronto, Ont.	1	21	145	Commenced February 20; protest against decision to eliminate union shop clause from memorandum of agreement signed February 16; unterminated.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, FEBRUARY, 1951 [1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars[2]
	Establishments	Workers		
Strikes and Lockouts Commencing During February, 1951—*Concluded*				
Metal Products—		[4]	[4]	
Steel products factory workers, London, Toronto, Ont., Montreal, P.Q., and Winnipeg, Man.	5	2,350	9,400	Commenced February 2, 5, 6 and 13; for increased wages; terminated February 16; conciliation, provincial, and negotiations; compromise on wage increase, plus cost-of-living escalator clause.
Foundry and machine shop workers, Toronto, Ont.	1	392	880	Commenced February 8; for settlement of grievance *re* method of weighing materials on moulding conveyor; terminated February 12; return of workers pending settlement; indefinite.
Refrigerator factory workers, Brantford, Ont.	1	200	2,400	Commenced February 13; inter-union dispute *re* bargaining agency; unterminated.
Steel barrel factory workers, Hamilton, Ont.	1	19	15	Commenced February 28; protest against suspension of a worker following disagreement with foreman; unterminated.
Non-Metallic Minerals, Chemicals, etc.—				
Rock wool insulation factory workers, Burdick, Sask.	1	10	45	Commenced February 20; protest against lay-off of a worker following demands for increased wages; terminated February 26; negotiations; compromise, increase in wages granted.
CONSTRUCTION—				
Buildings and Structures—				
Labourers, Hamilton, Ont.	1	40	20	Commenced February 2; for increased wages; terminated February 2; return of workers; in favour of employer.
Painters, decorators and paperhangers, London, Ont.	16	100	300	Commenced February 16; for union shop clause in union agreement under negotiations; terminated February 20; return of workers pending reference to provincial conciliation; indefinite.
TRADE—				
Brewery warehouse and retail stores workers, Windsor, Ont.	8	62	62	Commenced February 10; alleged delay in negotiations for a new agreement providing for increased wages pending report of conciliation board; terminated February 10; return of workers pending settlement; indefinite.

(1) Preliminary data based where possible on reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) 266 indirectly affected.

(4) Three establishments in Ontario, 1,899 workers, 7,600 day's loss; Quebec, one establishment, 411 workers, 1,650 day's loss; Manitoba, one establishment, 40 workers, 150 day's loss.

(1) Includes accidents to seamen and airmen on Canadian craft only; any such accidents occurring outside of Canada are assigned to province from which craft were operated. For quarterly reports of accidents see the Labour Gazette for June, September and December, 1950, and March, 1951. (2) Preliminary figures. (3) Revised figures for 1949.

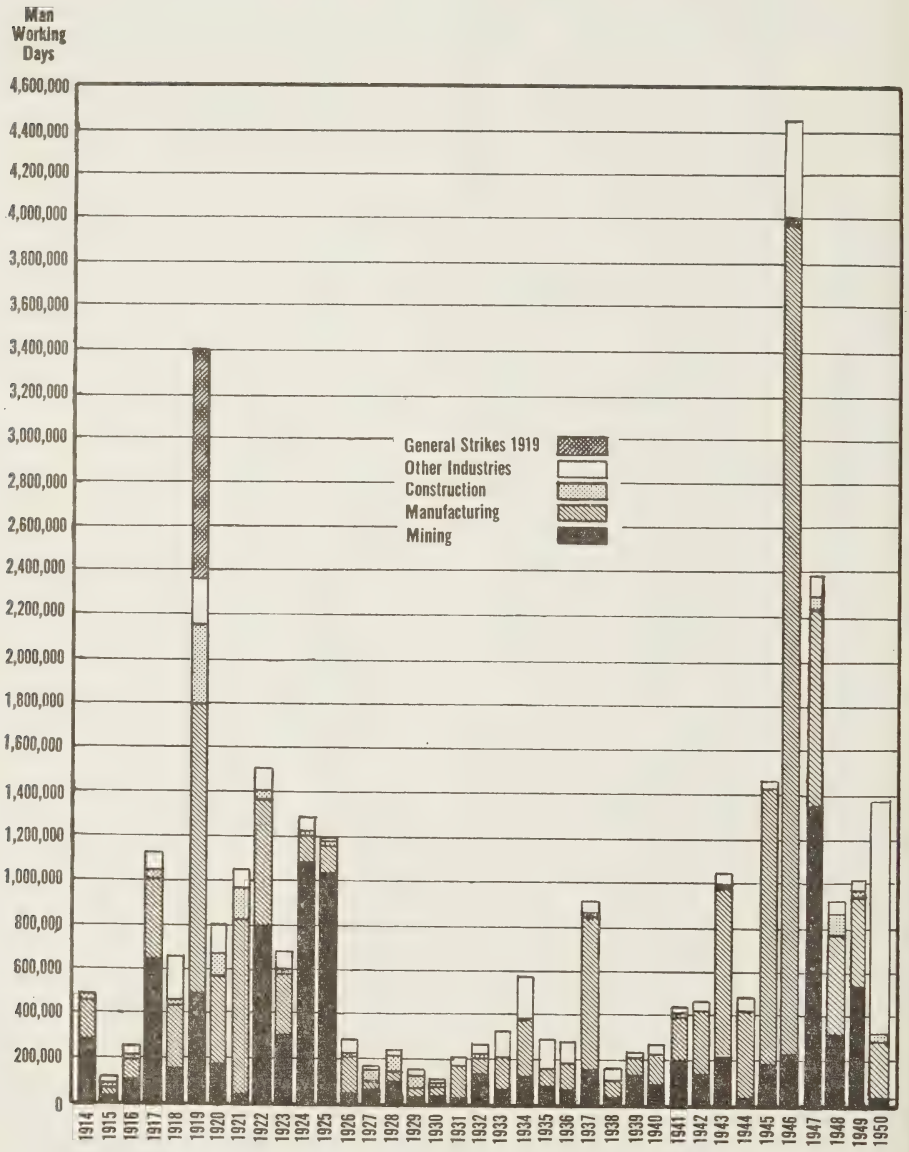
STRIKES AND LOCKOUTS IN CANADA, 1950

The outstanding feature of the year was Canada's first nation-wide railway strike. The nine-day work stoppage in August of 128,000 non-operating railway workers caused a time loss of a million days. This was the only strike with a high time loss during the year and with this exception strike idleness was moderate. Only five other stoppages showed losses greater than 20,000 days and none of these was over 30,000 days. A summary of the railway strike is given in this review, with reference to special articles in the LABOUR GAZETTE, *covering the periods preceding, during and following the strike.*

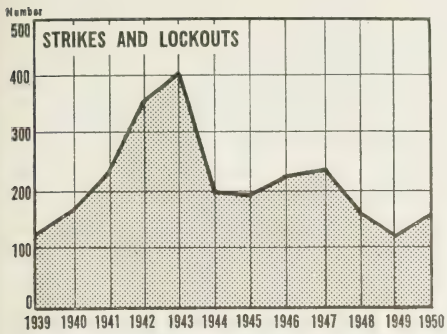
There were 161 strikes and lockouts in 1950, an increase of 15 per cent over the previous year, but less than the annual average of 230 during the preceding 10 years. The number of workers involved in 1950 was 192,000, the second highest of any year in the records of the Department. The highest was in 1943, when 402 strikes and lockouts, involved 218,000 workers and caused a loss of 1,040,000 days. The time loss of 1,400,000 days in 1950 was greater than in 1948 and 1949, but in six previous years, 1911, 1919, 1922, 1945, 1946 and 1947, strike idleness was higher than in 1950. The greatest amount of time lost in any year was in 1946, following World War II, when 228 strikes and lockouts, with 139,000 workers involved, caused a loss of 4,500,000 days. The second highest was in 1919, following the first world war, with 336 stoppages, 149,000 workers and a loss of 3,400,000 days.

In 1950, only 55 strikes and lockouts arose out of disputes over renewals of existing contracts, the great majority of agreements having been negotiated without resort to strike action. The latest figures available show that in 1949 collective agreements in effect covered more than 1,224,000 workers (L.G., Dec., 1950, p. 2023).

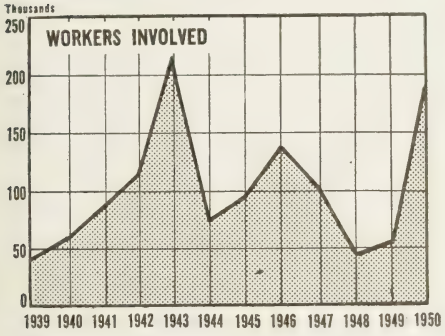


Detailed figures for the last three years show 161 strikes and lockouts in 1950, 137 in 1949 and 154 in 1948. The number of workers involved was 192,153 in 1950, 51,437 in 1949, and 42,820 in 1948. The time loss in 1950 was 1,389,039 man-working days, 1,063,667 days in 1949, and 885,793 days in 1948.

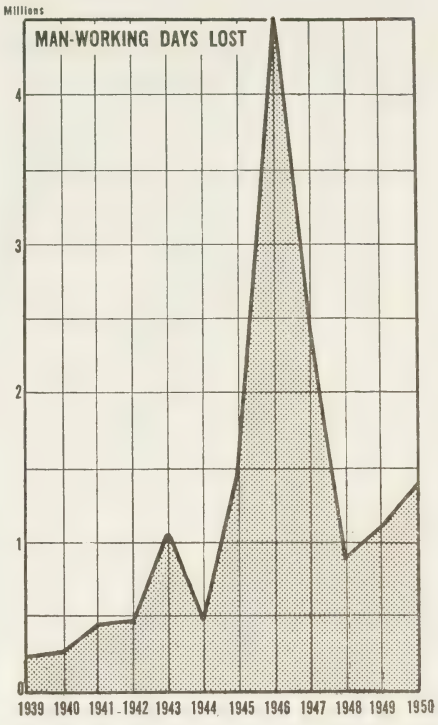
Based on the number of wage and salary workers in Canada, the total amount of time lost in 1950 was about one-tenth of one per cent of the estimated working time, approximately the same percentage as in 1948 and 1949, one-quarter of one per cent in 1947, and one-half of one per cent in 1946. The total time lost in 1950 was equivalent to an average loss for each wage and salary worker in Canada of less than one-half day, one-third of a day in 1949, one-quarter of a day in 1948, three-quarters of a day in 1947, and one and one-half days in 1946. The average loss of time for each worker involved in strikes and lockouts in 1950 was about seven days, 21 days in 1948 and 1949, 23 days in 1947, 32 days in 1946, 15 days in 1945, less than eight days in each of the preceding seven years, and 41 days in 1925, the highest on record.



For the past five years the impact of steadily rising prices on the family budget of the Canadian worker has been reflected in the number and importance of strikes and lockouts arising out of demands for increased wages. In 1950, this demand for higher wage rates, frequently accompanied by other issues affecting unionism and working conditions, was the central cause of 48 per cent of the strikes and lockouts, affected 82 per cent of the total workers, and caused 94 per cent of the total time loss. In the same comparison, the figures for 1949 were: 63 per cent of the stoppages, 56 per cent of the workers and 84 per cent of the time loss; in 1948, 68 per cent of the strikes, 71 per cent of the workers, and 83 per cent of the loss; in 1947, 66 per cent of the strikes, 79 per cent of the workers and 91 per cent of the loss; and in 1946, 48 per cent of the strikes, 76 per cent of the workers and 96 per cent of the loss.

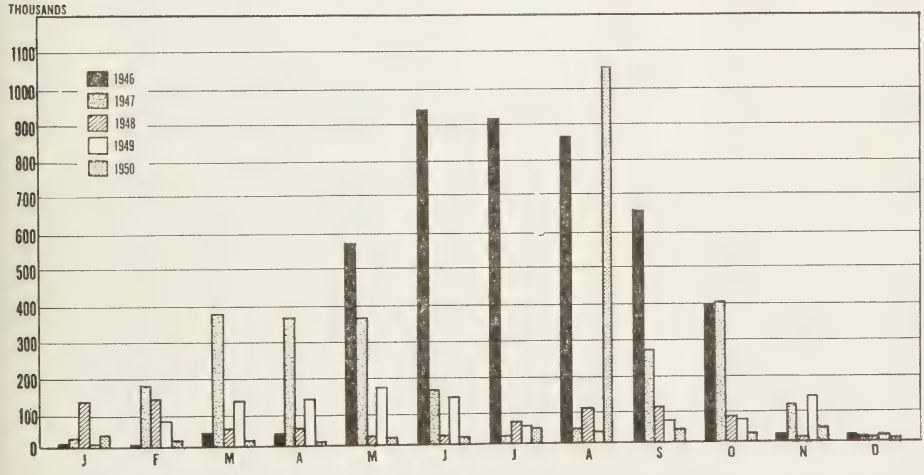


In 1949 and 1950, pension and welfare plans were not an important cause of strikes and lockouts. Accident, hospitalization, pension or welfare plans were listed as issues in some 10 work stoppages but in nearly all cases they appeared to be less important than the questions of increased wages which was the major



LOSS IN MAN-WORKING DAYS THROUGH STRIKES AND LOCKOUTS BY GROUPS OF INDUSTRIES EACH YEAR 1914-1950

STRIKES AND LOCKOUTS IN CANADA, 1939-1950



TIME LOSS IN MAN-WORKING DAYS

By Months 1946-1950

demand. Settlement of four of these 10 increased wages, which was the major stoppages included in the signed contracts clauses covering welfare, accident or hospitalization. In some cases studies were to be made for future plans. In one case a pension plan was provided for in a strike settlement but it was not an issue in the dispute.

There were three small sympathy strikes in 1950, one in 1949 and none in 1948.

The great variety and complexity of causes leading to strikes and lockouts present difficulties in classification for statistical purposes as there are usually a number of issues in dispute in each case.

Of the 161 strikes and lockouts during the year about 20 per cent were settled in

* In this table figures for strikes and lockouts extending over the end of the year are counted more than once.

favour of the workers and about 30 per cent in favour of the employers. Almost 40 per cent of the total resulted in a compromise or partial gain to the workers, about the same proportion as in the last three years. Many of the larger work stoppages, involving 75 per cent of the total workers and causing more than 90 per cent of the time loss were settled on a compromise basis. Protracted negotiations in a number of disputes were continuing at the end of the year and settlements had not been reported in time for this article.

The time loss of over a million days in 1950 was the greatest ever recorded in the

* In this table, figures for strikes and lockouts extending over the end of year are counted more than once.

† Two groups in which few strikes occurred are not shown in this table; they are: Finance —1929, one strike; 1942, one strike; 1948, one strike; Miscellaneous—1907, one strike; 1918, 2 strikes; 1919, 14 strikes, (general strike); 1920, one strike.

‡ In this table the manufacturing group now includes shipbuilding since 1901; prior to 1942 shipbuilding had been in the construction group.

§ In 1943 two strikes involved workers in five industries; in 1946, one strike involved workers in two industries.

transportation industry. Other years with a high time loss in this group were: 1908, 442,000 days; 1901, 300,000 days; 1903, 196,000 days; 1918 and 1919, 129,000 days each. In 1950, there were few strikes in the mining industry and little time was lost, less than four per cent of the total for the year. In 1949, the greatest loss was in the mining industry, caused by a strike of asbestos miners and mill workers in various centres in Quebec. In 1947, the largest amount of time lost was also in the mining industry, because of a prolonged strike of coal miners in Nova Scotia and

* In this table figures for strikes and lockouts extending over the end of the year are counted more than once.

† Two groups in which few strikes occurred are not shown in this table; they are: Finance—1929, 11 workers; 1942, 224 workers; 1948, 119 workers; Miscellaneous—1907, 6 workers; 1918, 157 workers; 1919, 44,399 workers (general strike); 1920, 119 workers.

‡ In this table the manufacturing group now includes shipbuilding since 1901; prior to 1942 shipbuilding had been in the construction group.

New Brunswick. With the exception of 1950, 1949 and 1947, during the last nine years the time lost in manufacturing, with the largest working force of any industry, has been greater than in all other industries combined. In 1950, the time loss in manufacturing was less than 18 per cent of the total and was the lowest recorded since 1941. There were few strikes in the construction industry and the time lost was only two per cent of the total.

Direct negotiations between workers and employers brought about settlement of 54 of the 161 strikes in 1950, in some cases with provincial conciliators acting in an

(Continued on page 46)

Total (2)	**30**	**5,515**	**18,771**	**51**	**36,538**	**76,493**	**62**	**145,101**	**1,259,592**	**18**	**4,999**	**34,183**	**161**	**192,153**	**1,389,039**

(1) The figures for the group "Increase in wages and other changes" under "Union Questions—Collective Agreements" are included in these totals and are therefore shown twice in the table but counted only once in the final total, see footnote (2); in addition to increase in wages, "other changes" may include union security, reduced hours, changes in working conditions, vacations with pay, sick leave, health, welfare and pension plans, payment for statutory holidays, overtime rates, shift differential, etc.

(2) These totals are not the sum of the above group totals, see footnote (1).

(3) Union jurisdiction refers to disputes between unions as to the character or class of work which their respective members should perform, not to disputes re bargaining agency.

(4) Inter-union disputes caused four strikes, involving 3,470 workers with a time loss of 4,915 days.

(5) Other than in connection with union questions.

(6) Including suspension and refusal to reinstate.

† Number of employers or establishments.
‡ Employment conditions no longer affected.
§ Interprovincial, see footnote to Table XX.
* During the year the total time loss in all strikes listed due to workers indirectly affected, that is workers in the plant made idle because of the strike, amounted to about 366,000 days. Workers in other plants who may have been indirectly affected are not included. The following list shows the number of workers indirectly affected in each case:

1	170	6	408	11	80	16	17
2	100	7	1,500	12	25	17	41,500
3	485	8	1,447	13	360	18	375
4	1,700	9	155	14	72	19	1,000
5	317	10	28	15	611		

(Continued from page 11)
advisory capacity at some stage of the negotiations or in drafting contracts. Provincial conciliation in 29 cases and civic mediation in three cases brought about settlement of 32 stoppages, six were referred to labour boards and commissioners, four were settled by arbitration and 44 by return of workers and replacement, the latter being a factor in 13 strikes. At the end of the year two work stoppages were reported as unterminated, coal miners at Lethbridge, Alta., and cotton underwear factory workers at Sherbrooke, P.Q. The coal miners at Lethbridge resumed work on January 30, 1951, a compromise settlement having been reached.

Female workers were involved in 68 of the 161 strikes and lockouts during 1950, slightly more than 8,000 workers, or about four per cent of the total being women and girls. The 10-year average, 1940-1949, of females in work stoppages was 70 strikes and 9,250 women and girls, or about 10 per cent of the total of all workers involved.

More than 8 per cent of the total loss was caused by 23 strikes and lockouts which involved more than 500 workers in each case. Eleven per cent of the idleness was caused by 65 stoppages which involved between 100 and 500 workers in each case. Seventy-three strikes involved less than 100 workers in each case, causing only three per cent of the total loss.

About 67 per cent of the strikes and lockouts, involving 95 per cent of the workers and causing 78 per cent of the loss, were settled within 10 days. The number of workers and the time loss for this group are very much above the average for other years, as the railway strike lasted less than ten days. Usually the strikes and lockouts in this group, being of short duration, cause little time loss. About seven per cent of the strikes and lockouts, involving less than one per cent of the workers and causing five per cent of the total loss, lasted longer than 50 days.

Compilation of Statistics

Since its establishment toward the end of 1900 the Department of Labour has maintained a record of strikes and lockouts in Canada, publishing in the Labour Gazette each month a complete list of those in progress, so far as available, with particulars as to the nature and result of each strike. Early in each year a review of the previous year has been given, including statistical tables analysing the data, and since 1912 including a complete list of the disputes on record during the year. As the monthly statements in the Labour Gazette are necessarily of a preliminary nature, the annual review constitutes the revised record for the year.

The annual review for 1930, appearing in the Labour Gazette, February, 1931, included summary tables back to 1901, the result of a revision of the record on the basis of the classification of industries adopted by the Dominion Bureau of Statistics and other government departments for official statistics. This classification had been used for strikes and lockouts since 1921, and it was advisable to have the record for earlier years on the same basis. Other revisions to secure uniformity throughout the whole period were made.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical tables, therefore, strikes and lockouts are recorded together. In this discussion the word "strikes" is frequently used for convenience in place of "strikes and lockouts".

A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting one working day or more. Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused. A separate record of such minor strikes is maintained in the Department. During 1950 there were 10 such strikes, involving 111 workers and causing a time loss of 206 man-days. In 1949, six were recorded, involving 98 workers with a time loss of 27 days.

In Tables I and XXII the number of employers involved is given. In strikes which involve large numbers of shops or factories, such as clothing, fur, furniture, etc., or building construction jobs, logging and fishing operations, etc., only the approximate number of employers is usually reported.

The figures in this report are inclusive of all strikes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. As to duration of strikes, numbers of employees concerned, etc., it is not always possible to secure exact information but the estimates made in such cases are the result of painstaking methods in the collection of data, and it is believed that the statistics indicate the conditions with reasonable precision. The estimate of time loss is reached by multiplying the number

of working days during which each strike lasted by the number of employees directly involved from time to time, so far as known. The number of employees recorded for each strike is the number of those directly involved, that is on strike or locked out, and does not include those indirectly affected. The figures in the tables as to workers are therefore the number of those directly involved. In recent years, when the information was available, the numbers indirectly affected, if important, have been shown in footnotes to the table listing in detail the strikes and lockouts during the year. The workers indirectly affected in each strike are those in the establishment who are unable to continue work because of the stoppage but not participating in the strike. Data as to workers or idleness in other plants which may have been indirectly affected are not included in any of the statistics owing to the difficulty of securing exact information.

Charts

The accompanying charts show the time loss in man-working days by groups of industries each year, for the period 1914 to 1950; the number of strikes and lockouts, the number of workers involved and the man-working days lost, for the years 1939 to 1950, inclusive; and man-working days lost by months for the years 1946 to 1950, inclusive.

SUMMARY OF THE RAILWAY STRIKE, 1950*

The strike of non-operating railway workers in August stands as the most widespread work stoppage in the records of the Department, both in terms of manpower involved and its importance to the Canadian economy as a whole. Following the failure of direct negotiations and protracted conciliation proceedings, extending over a period of one year, some 128,000 workers were on strike for nine days, causing a time loss of a million days. The strike halted practically all Canadian railway transportation. More than 41,000 railway workers in occupations other than those striking were unable to work because of the strike, and layoffs in industries depending heavily on the use of railway facilities totalled more than 23,000. Industry endeavoured to cope with the absence of rail transport by readjustments in production schedules and by the use of other means of transportation. Before a critical point was reached in the industrial life of the country, work was resumed on August 31, and a drastic dislocation of production was averted.

The dispute began in mid-1949 when a group of 15 international trade unions and two national trade unions, all representing railway employees in non-operating classifications and hotel and water transport employees, separately served on the railway companies notice requesting wage increases of 7 cents per hour (10 cents per hour was desired by the two national trade unions) and, in addition to other requests, the introduction of the 40-hour week without loss in take-home pay.

After negotiations broke down between the companies and the unions, conciliation officers were appointed by the federal Department of Labour. On receiving a report from the conciliation officers of failure to bring the parties to a settlement, the Minister of Labour appointed two conciliation boards, both under the Chairmanship of Mr. Justice J. O. Wilson of the Supreme Court of British Columbia. The railway companies accepted the recommendations of the majority reports of the

* Labour Gazette reference: appointment of conciliation officers, December, 1949, p. 1554, and February, 1950, pp. 199 and 203; conciliation boards, May, 1950, p. 670 and June, 1950, p. 826; negotiations preceding strike, report of commissioner, the strike and its economic effects, special session of parliament and text of Maintenance of Railway Operation Act, October, 1950, p. 1638; award of arbitrator, February, 1951, p. 194.

Boards but the two groups of trade unions rejected them. In May, 1950, both groups advised that they would submit the dispute to a vote of their members who would decide if they wished to withdraw from service, i.e., go on strike. On completion of the voting, the results of which were said to have given large majorities for strike action, the railway managements were advised that a withdrawal from service would take place on August 22, 1950.

Further attempts by direct negotiations were made to effect a settlement, but without success. On August 16, Prime Minister St. Laurent made a direct appeal to the two parties to settle their differences and urged that strike action be postponed for a period of one month. Although postponement of the strike was rejected by the unions, both parties agreed to accept the offices of a government-appointed mediator. On August 18, Dr. W. A. Mackintosh, Vice-Principal of Queen's University, Kingston, was appointed for this purpose, but after constant negotiations for three days a basis of settlement acceptable to the parties was not found.

The strike began on August 22, and on the same day the Prime Minister announced that a special session of Parliament had been called and would meet on August 29. On that date, the Maintenance of Railway Operation Act was introduced and passed on August 30. It had six principal provisions:—

(1) Railway operations and subsidiary services were to be resumed within 48 hours after the commencement of the Act.

(2) A provisional amendment was to be made in existing collective agreements, covering the railway workers involved in the disputes, for a 4-cent per hour increase in railway wage rates. (This amount had been offered by the railway companies.)

(3) Hotel and water transport workers were to be included under this provisional wage increase.

(4) If within thirty days after the commencement of the Act or such longer period as might be fixed by the Governor in Council at the joint request of a railway company and a union, agreement had not been reached as to the terms of a collective agreement or as to an arbitrator to decide such terms, the Governor in Council would appoint an arbitrator. The duties of the arbitrator were to give a decision, which would be binding, on all outstanding issues in dispute between the two parties, within the limits of the proposals made by the parties to each other prior to the commencement of the Act or subsequently if such proposals narrowed the area of disagreement. The arbitrator was to have all the powers conferred on a conciliation board under the Industrial Relations and Disputes Investigation Act.

(5) There was to be no discrimination against any employee resulting from strike action.

(6) The unions were to withdraw their strike order on commencement of the Act.

When the Act was passed several points were in dispute, including the extent of the wage increase, the date of institution of the 5-day 40-hour week, the term of the agreements, and the position under the agreements of hotel employees and water transport workers.

As provided by the Act, a period of 30 days was allowed to enable both parties by direct negotiations to resolve their differences as to the term of the agreements and other matters or to appoint an arbitrator agreeable to both parties. A further 15-day extension was granted at the request of both parties but no agreement concerning the issues could be reached. The Government then appointed Mr. Justice Kellock of the Supreme Court of Canada to arbitrate the dispute. His award, made public on December 18, 1950, included the following principal points:—

(1) To railway employees, other than hotel and water transport, a wage increase of 7 cents per hour retroactive to September 1, 1950. (Four cents of this amount had been given in the Act.)

(2) Institution of the 5-day 40-hour week on June 1, 1951.

(3) A two-year term for the agreements.

(4) Hotel and water transport workers were not granted the additional 3 cents per hour or the 5-day 40-hour week, and the term of agreements affecting them was for one year beginning September 1, 1950.

Arising out of the Kellock award a master agreement, excepting hotel and water transport employees and setting out the principles to govern the revision of the individual wage agreements, as well as providing for a method of final disposition

of any disputes that might arise in applying such principles, was signed on January 30, 1951, by Canadian National Railways, Canadian Pacific Railway Company, Toronto, Hamilton and Buffalo Railway, Ontario Northland Railway and 15 non-operating International Organizations, The Canadian Brotherhood of Railway Employees and Other Transport Workers, and the Brotherhood of Express Employees.

Canada and Other Countries

The accompanying tables give information as to industrial disputes resulting in work stoppages (strikes and lockouts) in certain countries since 1919, including Canada, showing the number of strikes and lockouts, the number of workers involved and the time loss in man-working days.

During the war years, and the dislocation following the war, statistics for many countries were not available and our yearly strike review from 1941 to 1947 was confined to seven countries, see Supplement to the LABOUR GAZETTE, April, 1948, p. 32. In 1940, tables were given for Canada and 31 other countries, *see* LABOUR GAZETTE, March, 1940, p. 234. The review this year includes countries for which statistical tables on strikes and lockouts have been received in the Department. Throughout the year figures for certain countries are given in the monthly articles in the LABOUR GAZETTE as they are received in the Department.

In the different countries variations occur in the definition of strikes and lockouts and in the methods of compilation of statistics. In nearly all countries no distinction is made between strikes and lockouts but in a few cases the figures are for strikes only. In some cases the number of strikes and lockouts shown for the year is the number commencing during the year and in other cases it is the number in existence during the year, including those carried over from the previous year.

The figures published by some countries as to the number of workers involved show not only the number of workers directly involved but also the number of those indirectly affected, that is thrown out of work by strikes and lockouts to which they were not parties, but exact information on this point is not always given. In the tables herewith, the column showing the number of workers involved includes figures for the number directly involved or the total number directly and indirectly involved, according to the method adopted by the country concerned. Footnotes to the table indicate the nature of the statistics with reference to the above points.

For these reasons the figures for strikes and lockouts for the various countries are not exactly comparable.

Many countries publish statistics dealing with disputes resulting in work stoppages only once each year or even less frequently, the figures being issued in some cases after an interval of great length. Most countries revise their figures when additional facts are brought to light, even though such revisions may necessitate changes in statistics published a considerable time previously. In nearly all cases statistics dealing with strikes and lockouts in other countries published in the LABOUR GAZETTE are obtained from official publications of the countries concerned.

November	19	14,165	49,477
December	14	2,581	8,465

(1) Strikes and lockouts in existence in the period.

(2) Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused.

(3) Directly involved only. In 1950, time loss due to workers indirectly affected, that is workers in the plant made idle because of the strike, amounted to about 366,000 days. Workers and idleness in other plants which may have been indirectly affected are not included in any of the statistics.

CURRENT LABOUR CONDITIONS

This article summarizes the latest employment and labour information available at May 10, as the LABOUR GAZETTE *went to press. It was prepared by the Economics and Research Branch, Department of Labour.*

BY THE beginning of May, it was clear that the usual rapid spring increase in employment was well under way. Heavy spring hirings in construction, agriculture and transportation were reflected in the decline in registrations for work at National Employment Service Offices, from 290,300 at the beginning of April to 244,900 at the first of May. These seasonal increases in employment were taking place at a time of continued strong labour demand in defence and related industries.

In both construction and agriculture, labour demand is expected to be heavy. Although increased down payments on new houses financed through Central Mortgage and Housing and material shortages may restrict the volume of new housing, this may be offset by an increase in other types of construction, especially engineering construction and that associated with resource development. In agriculture, labour requirements are expected to be at least as high as last year, at a time when expansion in other industries may be expected to provide alternative job opportunities to agricultural workers.

Manufacturing industries, especially defence industries and those firms producing capital goods, will continue to make heavy demands on the labour supply throughout the period of seasonal increases in employment. The demand for skilled machine shop workers remains strong, and there is an increased demand for those trades such as boilermakers and riveters associated with shipbuilding and heavy metal construction. There is also some indication that a few of the defence industries are beginning to require more semi-skilled workers, now that the tooling up has passed beyond the preliminary stage.

These continuing demands for labour will be made on a labour force whose structure has already altered considerably in answer to the pressures of the preparedness program. The most recent sample labour force survey of the Dominion Bureau of Statistics, covering the first week in March, indicates that both the labour force, and employment were higher than on the comparable date last year, while the number of persons totally without work in the survey week fell considerably. On March 3, the labour force totalled 5,172,000, an increase of 19,000 men and 45,000 women over the totals on March 4, 1950. An estimated five million persons were employed in the first week of March this year, as compared with 4,796,000 in the spring survey week last year. The number of those totally without work fell to 172,000 as compared with 312,000 on the comparable date in 1950.

83139—1½

The total of those who did no work in the survey week should not be taken as a measure of the labour reserve available, since many doing casual or part time work are considered to be employed for purposes of the survey. A considerable number of these workers would be available for full time jobs. In the survey week, the total of applications for work on file at National Employment Service offices was 296,700. The proportion of workers 45 years of age and over who are without jobs has increased, however, and there are also fewer skilled workers available than last year. A considerable number of those skilled and semi-skilled men still looking for work are probably in the older age groups.

The preparedness program has not only reduced the number of those without work; it is also beginning to alter the structure of employment, in the direction of increasing the proportion of workers employed in manufacturing industries. The number employed in manufacturing grew by some 106,000 between March 1950 and March 1951, an increase of 8 per cent, as compared with an increase of 4 per cent in total employment. This represents the largest increase in the numbers employed in manufacturing since 1947, and indicates a definite shift into manufacturing as a result of the increased labour demand in defence and related industries, and in firms manufacturing consumer durables and capital goods. Some of the workers now employed in manufacturing industries were undoubtedly unemployed last winter, but there are indications that some have come from jobs in other industries. Employment in the service industries, for example, has declined by an estimated 4 per cent over the period.

In contrast to manufacturing, labour force survey estimates indicate that there has been a decline of about 91,000 in the numbers employed in agriculture from March 1950 to March 1951. A decline is reported in all groups in agriculture—farm owners, self employed, farm workers and unpaid family workers. This does not necessarily indicate a large scale movement out of agriculture, however. Much of this decline in agricultural employment shown in the spring survey is undoubtedly due to the fact that the high employment in the logging industry provided many winter jobs for farmers, both farm workers and farm owners alike. The survey shows that logging employment had increased by about 77 per cent from the low level in 1950.

Since the increase in logging employment is not sufficient to account for all the decline in agriculture, it is probable that the greater number of job opportunities in urban centres this winter have also been an important factor. Any trend out of agriculture will show up more clearly in later surveys. The anticipated shortage of labour in the harvest season in agriculture will be due, not so much to an increase in demand for agricultural workers over that of last year as to a fall off in supply For this reason, both immigration, and organized seasonal movements of farm workers are expected to play a major role in helping to meet farmers' requirements at the peak of the season.

Although there has been an increase of 45,000 in the number of women in the labour force, the proportion of women in the labour force to total labour force has increased very little. Since the war, this ratio has remained fairly stable around 21 per cent, slightly above that of prewar years, but well below that of the war period. This would indicate that the increase in the number of women workers is keeping pace with the growth of the labour force, in spite of the increase in the marriage rate and birth rate in recent years. The number of married women employed has been on the increase since 1948, and this current survey shows a continuance of that trend. Most of the increase in women's employment has been in the clerical occupations. The number of women working in manufacturing occupations has increased very little over the past year, reflecting the fact that labour demand for women in defence industries is not yet very heavy.

(a) Estimated on basis of sample labour force survey. Only those who did not do any work in the survey week are here classified as persons without jobs.
(b) Includes ordinary live claimants plus claimants for supplementary benefit.
(c) Includes $1,671,257 in supplementary benefit.
(d) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

Data in this table are preliminary figures from regular reports compiled by various government agencies, including Dominion Bureau of Statistics, the Unemployment Insurance Commission, the Immigration Branch, Department of Citizenship and Immigration, and the Economics and Research Branch, Department of Labour. Detailed information can be found in the statistical appendix of the LABOUR GAZETTE.

Notes of Current Interest

Seamen on Great Lakes screened for security

The Minister of Labour, the Hon. Milton Gregg, announced on March 22 that seamen employed on Canadian vessels on the Great Lakes would be screened for security reasons. The seamen will be issued with identification cards which they must possess to obtain or remain in employment.

Mr. Gregg's announcement amplified a statement made by Prime Minister St. Laurent on the same day. It directly followed the passing of regulations, under the Emergency Powers Act, the purpose of which is to ensure that only trustworthy seamen are employed on Canadian ships operating in the Great Lakes. These include: "Lakes Ontario, Erie, Huron (including Georgian Bay), Michigan and Superior and their connecting waters and includes the St. Lawrence River as far east as the lower exit of the Lachine Canal and the Victoria Bridge at Montreal."

The term "seaman" means a person employed in any capacity on board a ship and includes the master of a vessel.

The new regulations parallel the screening provisions applicable to seamen employed on U.S. vessels in the same waters. They will be administered by the Department of Labour through the National Employment Service.

In future, seamen employed on Canadian vessels operating in the waters mentioned above, must apply to a local office of the National Employment Service for an Interim Seaman's Card. Before receiving their cards, they must submit three photographs each of themselves and be fingerprinted. To take or continue in employment on or after May 1, 1951, they must be in possession of these cards. On or after August 1, they will be required to hold a Regular Seaman's card for the same reasons.

The Minister of Labour may, under the regulations, refuse to issue a Seaman's Card to an applicant or he may revoke a Card if he is satisfied that the presence of the particular seaman on board a Canadian ship in the Great Lakes might prejudice the security of Canada. There is provision for appeals in case of refusal by the Minister to issue a Seaman's Card or in case of revocation of the same.

CCL expels Fur and Leather Workers' Union

The Executive Council of the Canadian Congress of Labour on April 11 voted to expel the International Fur and Leather Workers' Union. The action was taken under a constitutional amendment passed at the Winnipeg Convention of the CCL last September, giving the Council authority to expel any union which follows the Communist party line (L.G., Nov., 1950, p. 1819). This marked the first occasion action had been taken under this new section of the Constitution.

The Congress issued a press statement declaring that the Fur and Leather Workers' Union had "followed the Communist party line in charging the Congress with betrayal of workers in its policy on price control."

The Congress' press statement then continued as follows:—

"The Council's decision was based on a statement issued following a meeting of the Fur and Leather Workers' Union in Winnipeg on March 13. The statement attacked the Canadian Congress of Labour for a joint presentation made to the federal government by the CCL with the Trades and Labour Congress, Canadian and Catholic Confederation of Labour and Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods.

"The central labour bodies demanded price controls and opposed wage controls. At the same time, the labour groups said that if wage increases created serious pressure, the labour organizations would be prepared to take part in a three-way government-labour-management conference to discuss practical measures of wage stabilization. The Fur and Leather Workers' Union charged that the CCL, in adopting this position with the other central labour bodies, was betraying the interests of the Canadian workers.

"In supporting the motion for expulsion of the Fur and Leather Workers' Union, members of the Executive Council said the policy indicated by the Fur and Leather Workers' Union was the line being followed by the Communist Party. In announcing the expulsion the CCL made it clear that there was no suggestion that the majority of the rank-and-file members of the Fur and Leather Workers' Union supported the Communist Party line. The policy was

rather one adopted by officers of that union who followed Communist policy rather than the policy determined by the great majority of the CCL membership."

Canadian labour income in 1950

Estimated total of salaries and wages and supplementary labour income in Canada reached an all-time peak of $8,114,000,000 in 1950, exceeding by 6·3 per cent the preceding year's figure of $7,630,000,000, according to the Bureau of Statistics. The estimated total in December amounted to $703,000,000, down $30,000,000 from November, but up $61,000,000 or 9·5 per cent over December, 1949. Increases were recorded in all industries both in the month and 12-month period over a year earlier.

A comparison of the 1950 total with that of 1949 reveals that, of all the industrial groups, "Construction" recorded the greatest gain: 8·3 per cent. "Finance, Service, including Government" was next with a gain of 7·1 per cent while labour income in "Manufacturing" rose by 6·4 per cent. The group showing the slightest increase in the year was "Agriculture, Forestry, Fishing, Trapping, Mining" with 2·9 per cent.

The total of labour income for the last three months of 1950 was $2,159 millions; compared with $2,093 millions for the third quarter, this was an increase of 3·2 per cent. An increase in the fourth quarter over the third is contrary to the experience of both 1948 and 1949 when the last three months showed declines of 0·2 per cent.

Labour income increased in the fourth quarter in all industrial groups except "Construction", an industry that is typically lower at this season than in the preceding quarter. The greatest increase between quarters occurred in the group of primary industries, "Agriculture, Forestry, Fishing, Trapping, Mining", which rose by 7·9 per cent. This was followed by a 5·9 per cent increase in the "Public Utilities, Transportation, Communication, Storage, Trade" group.

Record investment planned in 1951

The Department of Trade and Commerce has issued its annual report on the outlook for private and public investment in Canada, covering the year 1951. The report is based on a survey covering some 18,500 business establishments of all kinds.

According to the report, investment intentions of business, institutions and governments and planned expenditures of individuals for housing, involve in total for 1951 the outlay of more than $4·3 billion. This is exclusive of any expenditures by the Department of National Defence for military equipment.

"An investment program of this magnitude," the report comments, "would be the largest on record in Canada and it would mean an increase over the accomplished 1950 program of 14 per cent in value terms and some 6 per cent in terms of physical volume. It would mean that Canada would be devoting about 22 per cent of her gross national production to the creation of buildings and engineering works and to the acquisition of producers' machinery and equipment. This represents a slight increase over 1950 and the highest proportion in the post-war period.

"The 1951 statement of investment intentions is of particular significance," the report continues, "because in the same year Canada plans to undertake the largest peacetime defence program on record. The increased defence and investment programs will make demands on substantially the same type of resources. It is against this background that the 1951 investment intentions must be considered."

Both the private and public sectors of the economy plan substantially increased capital outlays in 1951. Private investment will rise from $2·8 to $3·1 billion, an increase of 11 per cent, if intentions are realized, while a rise is planned in public investment from just under $1 billion to $1·2 billion, an increase of 23 per cent.

Citing the heavy expenditures planned for construction purposes in 1951, including those planned for defence purposes, the report predicts that while housing outlays may show an increase over 1950 in dollar terms, it is likely that the physical volume of activity may be somewhat less than last year.

Dealing with the economic significance of investment intentions, the report continues as follows: "Each year since 1945 has seen an increase in the value of investment expenditures. This has been a result of efforts by primary producers and manufacturers to provide a sufficient flow of goods to meet the pent-up demands accumulated during the thirties and throughout the war years. These needs were accentuated by a greatly increased buying power resulting from a larger population with increased incomes. By 1950 manufacturing facilities had passed the peak of their capital expansion. However, large backlogs still existed for housing, educational and health facilities, transportation and communication facilities and such necessities as roads, streets, waterworks and sewers. In short the investment program has maintained a

constant pressure on the supplies of labour and materials available for the construction of buildings and engineering works and the building of machinery.

"The stated investment intentions for 1951 indicate that the investment program is going to demand an increased share of labour and materials that are already scarce. If the supply of materials available is made even smaller by reason of defence requirements, competing demands for use by manufacturers of all types of producers' and consumers' goods will add to inflationary pressure already apparent. The distribution of these scarce commodities can be accomplished to the best advantage and without significant price increases only if businessmen, institutions and governments exert the utmost caution in planning and implementing their investment programs. Government measures may facilitate the process by assisting in the procurement of materials for essential projects and discouraging types of projects for which material may not be available."

A companion study, issued by the Department, deals with the outlook for 1951 in regard to the supply of basic and building materials in Canada. Thirty building materials as well as primary iron and steel and lumber are discussed in this report. Estimates of production in 1951 are based upon a comprehensive survey of manufacturers' intentions. If their expectations are realized, the overall supply of building materials in Canada will be somewhat greater, although less balanced than in 1950. Substantial increases in output are anticipated in the case of mineral wool and gypsum products, cast iron pipe and fittings, rigid insulating boards and certain kinds of sanitary ware and heating equipment. On the other hand, difficulties encountered in obtaining raw materials such as cement and steel and non-ferrous metals, may prevent any increase in the output of cement blocks, steel pipe and fittings, hot water storage tanks, wire nails and spikes and builders' hardware. Imports of such items as structural steel and steel sheet and plate for non-defence purposes may also be reduced.

NES opens Teachers' Employment Office in Saskatchewan

To help eliminate some of the difficulties encountered in providing teachers for many of Saskatchewan's schools, the Prairie Region of the National Employment Service has opened a Teachers' Employment office in the Province.

Establishment of the office is the result of negotiations between the National Employment Service and the three interested groups—the Saskatchewan Teachers' Federation, the Saskatchewan School Trustees' Association, and the Education Department of the Provincial Government.

A Teachers' Placement Officer has been appointed and is located at the NES local office in Saskatoon. School teachers may obtain employment applications from any NES local office in Saskatchewan. The forms, when completed, are forwarded to Saskatoon, where the selection and referral work takes place.

All orders are also forwarded to the Saskatoon local office. These orders contain more information than is ordinarily recorded on employers' orders, such as complete school curricula, report on housing accomodation, ethnic data pertaining to the district, and other details pertinent to the successful placement of a qualified teacher.

Although much of the work of this new office is still in the organizational stage, a satisfactory number of placements have already been made considering the time of the year, it is reported.

The project is being watched with interest by education officials in other provinces.

42nd annual congress of Co-operative Union of Canada

The Co-operative Union of Canada held its 42nd annual congress in Regina, Sask., on March 6-8, when delegates and representatives from all provinces were in attendance, as well as visitors from various parts of Canada and from the United States and Mexico.

A report submitted to the meeting showed that for the year 1949-50, co-operatives affiliated with the Co-operative Union of Canada numbered 933. These co-operatives had an aggregate membership of 722,971 in 1950 and did a business of $559,057,344. Affiliated co-operative marketing and purchasing associations, with 2,979 places of business, did a business of $543,012,082. They had a total of 649,770 members and 674,863 patrons. The business of the nine affiliated Canadian Co-operative Wholesales amounted to $76,490,393.

There were 30 affiliated fishermen's co-operatives, whose total business amounted to $12,780,159. Service co-operatives numbered 34, and included housing, funeral services, transportation, garage services, restaurant, medical services, cold storage, printing, electricity, and insurance.

The Congress accepted in principle a five-year plan of development for the Canadian Co-operative Union. The plan, which includes among its aims stimulating organization of co-operative enterprise, was

referred to the directors for elaboration and presentation in final form to the 1952 congress.

Measures taken by the board of directors and a national committee to promote the incorporation of a Canadian Co-operative Credit Society were approved by the delegates, and the board was instructed to press for action on a Bill to this end now before the Senate in Ottawa.

In addition to resolutions dealing with specific problems related to the income tax status of co-operatives, the Congress expressed its approval of government economic controls that will bear equitably upon all sections of the national economy.

The directors were called upon to study the problem of co-operative credit, with special reference to the establishment of a co-operative trust company to operate in the field of long-term credit.

A nation-wide committee was set up to study the possibility of forming a Canadian Society of Co-operative Accountants, Auditors and Legal Counsel, and report to the next Congress.

In the election of officers, Mr. A. W. Friesen, of Rosthern, Sask., was returned as president.

Proposal to extend UI coverage to hospital employees

Proposals to extend the coverage under the Unemployment Insurance Act to persons employed by hospitals and charitable institutions are under consideration by the Unemployment Insurance Commission. (At present a few institutions have taken advantage of the provisions of the Act to insure their employees on a voluntary basis.)

Such extension would not apply to medical, technical and nursing staffs, or to members of religious orders or other persons who are not under a contract of service.

The Commission announced that oral and written representations by interested persons or associations would be considered at a meeting, to be held in the board room of the Commission on May 16.

Labour Department official loaned to ILO

Hon. Milton F. Gregg, Minister of Labour, announced in April that A. G. Kerr of the Economics and Research Branch of the Department had been loaned to the International Labour Office as an occupational analyst to carry out work in connection with the ILO migration program.

Mr. Kerr, who will spend one year with the ILO in Geneva, has had considerable experience with occupational research. Following World War II he assisted in the preparation of an extensive rehabilitation manual prepared by the Department of Labour relating army training to civilian employment and entitled "Army Employment—Civilian Jobs".

University of Montreal holds third study session

The third annual study session was held at the University of Montreal during March. The subject discussed was "union policies and company management." The session was organized by Rev. Emile Bouvier, Director of Industrial Relations at the University, and was attended by about 300 delegates representing both labour and management.

The delegates heard papers on several topics of interest in the field of industrial relations, and following the lectures, open forums were held. Principal speakers during the two-day seminar were: Professor R. A. Lester, Research Associate of the Industrial Relations Section at Princeton University, who spoke on "Criteria of Wage Determination"; Peter F. Drucker, industrial relations consultant, who spoke on "The Function of Unions in Business"; Professor Joseph N. Scanlon of Massachusetts Institute of Technology, who discussed the "Scanlon Plan" of labour-management co-operation; and Professor F. H. Harbison, of the University of Chicago, who discussed "Criteria of Union-Management Co-operation."

Publication of 1951 edition of handbook *Canada*

Publication of the 1951 edition of the Official Handbook *Canada* has been announced by the Dominion Bureau of Statistics. Initiated 21 years ago to supplement the field of the *Canada Year Book*, it is especially designed for ready use by businessmen, teachers, students, lecturers, and all those interested in the progress of Canada. The pocket-sized annual contains up-to-date official information on all phases of the country's economic organization.

The current edition contains over 300 pages of text, reproductions of more than 180 photographs illustrating the textual matter, four scenic views in colour, as well as diagrams, charts and lithographed maps.

A special article deals with the development, resources and people of the Northwest Territories and Yukon. The chapter material covers population and vital statistics, education, scientific research, social and cultural relationships, national

income, agriculture, forestry, mines and minerals, water powers, fisheries, furs, manufacturers, construction, labour, transportation and communications, domestic and foreign trade, public finance, banking and insurance.

The handbook is available at a price of 25 cents from the King's Printer, Ottawa.

Newfoundland workmen's compensation law comes into force

On April 1, 1951, the Workmen's Compensation Act passed by the Newfoundland Legislature in 1950 came into effect. The newly constituted Workmen's Compensation Board commenced operations on April 2.

The new Act, like the Acts in all the other Canadian provinces, is of the collective liability type (L.G., Dec., 1950, p. 2076). It repeals the Workmen's Compensation Act, 1948, which provided compensation through an individual liability system.

Members of the Newfoundland Workmen's Compensation Board are: Irving Fogwill, Chairman; J. Madigan, C. Hancock and J. W. May, Secretary.

CCL appoints educational and welfare director

Appointment of Howard Conquergood of Toronto as educational and welfare Director of the Canadian Congress of Labour was announced on April 23. Mr. Conquergood previously held a similar post with the United Steelworkers of America and has been active in CCL educational work for some years in arranging weekend institutes across Canada and in organizing summer and winter schools and staff seminars.

Decision on benefit right of married women

The first decision of the Umpire under the Unemployment Insurance Act involving the disqualification of a married woman from receipt of benefit, under the recent amendment to the Benefit Regulations which became effective on November 15, 1950, appears elsewhere in this issue on p. 711.

***Community Planning Review*: a bilingual quarterly**

The first issue of a bilingual quarterly published by the Community Planning Association of Canada, has recently been distributed. According to an introductory statement, the quarterly, *Community Planning Review*, will contain illustrated articles by recognized authorities, of the kind that appeared from time to time in its predecessors *Layout for Living* and *Urbanisme*.

"There are reasons, in Canada as elsewhere, for giving fuller scope in this mid-twentieth century to discussion of the purposes and methods of community planning," states the *Review*. "The modes of city building seem today more rapid than sensible. The complexities of today's urban growth appear to overwhelm the habitual machinery of urban government. The efforts at town planning in the first half of the century plainly have not produced the results hoped for."

Much of our community planning has been too superficial, too partial and unreal to succeed, the *Review* continues. The sociologist and economist usually confined themselves to describing the curious behaviour of urban institutions and the private land market. An accomplished designer might draw a non-existent place, oblivious to economic and social forces. An administrator "might try to translate the pretty drawings into a permanent legal sieve, through which the flow of city-building would be sifted nearer to the designer's taste."

The editors hope that through their magazine there will emerge "clearer images of the citizens' role and specialists' role, and of the public policies and technical practices that lead to more reasonable and beautiful surroundings."

Articles in this first issue include, "Ajax: Planning a New Town in Ontario" by Kent Barker; "Delimitation D'Une Banlieue de Grande Ville" by Jean-Charles Falardeau; "The Decision Makers in Residential Building" by Nathan Keyfitz; "Urban Mapping: An Elementary Manual" by Humphrey Carver; and "Economic Problems of Urban Re-development" by Leonard Gertler.

First report on British National Insurance Scheme

The working of the National Insurance Scheme during the 21 months since its introduction on July 5, 1948, is reviewed by the government actuary in his first interim report, now available for distribution.

At March 31, 1950, there were 23½ million contributors to the scheme. Of this number, nearly 21½ million were employed, slightly under 1½ million self-employed, and about half-a-million non-employed. These figures indicate a considerable shift from the two latter classes to the employed class since before World War II, it is observed. About 2½

million persons were brought into national insurance for the first time under the new scheme.

There were, at March 31, 1950, 4,161,000 retirement or old age pensions in payment, including 300,000 at the transitional rate of 10s. a week earned under the old scheme by pensioners who had not retired. The annual cost of retirement pensions is at present £250 million. This amount represents two-thirds of the total expenditure on benefits under the scheme. (Other benefits are unemployment, sickness, maternity, widows' and guardians' allowances, retirement and death.) It is expected that the cost of retirement pensions will double during the next 30 years because of the increase in the aged population. As contribution income will remain relatively stationary, this additional cost will fall almost wholly on the Exchequer.

Retirement pensioners who had their pensions reduced on account of earnings averaged at the beginning of 1950 about 21,000 men and 11,000 women each week, or about five per cent of men and two per cent of women pensioners in the age groups concerned—65-70 and 60-65.

Of the 262,000 retirement pensions awarded in the year 1949-50, just over six per cent of the recipients received increments for deferment of retirement. The report examines available evidence on the effect of the retirement condition; it stresses, however, that the period of observation (July, 1948-March, 1950) is short. The proportion of men likely to go on working rather than retire on pension on reaching pensionable age, the report comments, would appear to be rather less than was estimated before the scheme began to operate. Nevertheless, the proportion not retired is substantial; more than half of the insured men reaching 65 continue at work, or remain available for work, six months later, and the proportion is still as high as one-third at age 68. The proportion of women remaining at work after pension age appears to be much lower than was expected: about 40 per cent of women qualifying for pension at age 60 on their own insurance are still at work after six months.

The scheme inherited assets of nearly £900 million from the old insurance schemes. During the 21 months period, income, including Exchequer contribution of about £228 million, exceeded expenditure by about £225 million, and in the year 1949-50 by about £140 million. This was due mainly to low unemployment (between one-and-a-half and two per cent in the year under review), which affects the cost of unemployment benefit and also results in larger contribution receipts. The balances in the funds at March 31, 1950, were over £1,100 million.

The income of the fund in the financial year 1949-50 was about £525 million (apart from some £40 million collected on behalf of the National Health Service) Of this, some £185 million were contributed by the insured and £175 million by employers, and £135 million were paid from the Exchequer. Nearly £30 million came from interest on the funds.

Manpower for Britain's rearmament program

Measures to meet the manpower needs of Britain's defence program have been under consideration by the National Joint Advisory Council—an advisory body set up late in 1939 and reconstituted in 1946 on a peacetime basis, for purposes of consultation between departments of government and representatives of organized employers and workers.

The Council found that although much additional labour for defence work could be gained by changing workers from civilian to armament work within the factories now employing them, many more workers will be needed, and that the most efficient use of existing labour is necessary. Accordingly, the Council, at a meeting held early in the year—the first under the chairmanship of the new Minister of Labour and National Service, Rt. Hon. Aneurin Bevan—made the following recommendations:—

1. Schemes of training, upgrading and dilution to be developed by different industries, supplemented when suitable by training in government training centres.
2. Each industry to be asked to consider whether longer working hours by the introduction of systematic overtime would increase production.
3. More adjustments of working hours to make it easier for women with domestic responsibilities to enter industry.
4. Employment of women to a greater extent on appropriate semi-skilled processes.
5. Both sides of industry to be asked to avoid unfair competition in the recruitment of labour.
6. Employers to be asked to give advance notification of redundancies so as to reduce to a minimum any periods of unemployment between jobs.

Appropriate action by industry in accordance with these recommendations, and the curtailment of civilian production by cuts in raw material allocations will, it is hoped, raise the number of workers on rearmament from the present figures of 400,000 to 900,000 by 1953.

In order that the progress made towards this objective might be accurately gauged, manufacturing firms will be asked to make quarterly returns showing the percentage of their employees engaged on defence contract work.

The question of the full employment of old people was raised by the Minister of Labour, and was referred to the Joint Consultative Committee, which is the executive committee of the Council, for detailed consideration.

Teen-agers and their jobs in amusement industries

The Bureau of Labour Standards, United States Department of Labour has made a study of the teen-age employment in the amusement industries. In a booklet issued subsequently, "They Work While You Play", the Bureau states that more information should be known by the general public about the conditions of employment of the thousands of young people in this type of occupation.

While important advances have been made during recent years in protective State legislation for young workers, the booklet states, it is known that teen-agers in the recreational service industries have not shared to the same extent as other young people in the accompanying benefits.

During 1947, there were 193,700 teen-age workers in the recreation industries; 14,600 were under 14 years of age, 64,000 were 14 or 15 and 115,110 were 16 or 17. They represented about one in every four of the total employees.

Among the legislative advances referred to above, the most important is the raising from 14 to 16 of the minimum age for work during school hours and for work in factories. The work of amusement centre employees, however, is largely part-time, carried on in the traditional leisure-time hours of the general public—late afternoon, evening, and on Saturday and Sunday. Moreover, because of the local nature of their employment, few children who work in amusement industries are covered by Federal child-labour legislation.

In general, earnings in the occupations in which minors are employed are relatively low, the survey showed. For example, the median weekly wage for ushers of all ages in New York State in 1949, was $15.47, while for boys under 21, it was $13.96.

Out of a total of 6,377 boys under 21 employed in the amusement industries in New York State in 1949, nearly 2,000 were pinboys. The median weekly earnings were $9.65. Besides the physical strain involved in pinsetting, there is always the possibility of accidental injury. Theatres and motion picture houses employ between two-fifths and half of all the young people working in recreation industries. Many boys and girls who begin work in the late afternoon or early evening are employed for hours that, added to their school hours, make a long day and a long work week.

Little is known about conditions of work or the extent of young people's employment in such amusement places as ball grounds, fairs, dance halls, golf links, race tracks, skating rinks and circuses, the Bureau stated.

The usual minimum age under State laws for work outside school hours is 14, although some laws set a lower standard. Under most laws employment certificates or work permits are required up to 16 or 18 years of age. For children under 16 night work after 6 or 7 p.m. is, in the majority of States, prohibited. In some States, the standards apply to places of amusement, but in others they apply only to a list of specified occupations which do not include those in amusement centres.

In 24 States, the report shows, there is either a lower minimum age than 14, or no minimum age at all, for work outside school hours in theatres, or in bowling alleys, or on golf links or in all three services.

In the matter of minimum wages, only nine States of the 26 with minimum wage laws, and the District of Columbia, have issued orders affecting workers in these services.

The restrictions of hours of work to eight a day and 40, 44 or 48 a week, which are general in child-labour laws for children under 16, do not benefit these part-time workers. However, when enforced, other laws placing special limitations on hours of work on school days and during school weeks, or on combined hours of school and work, do give them definite protection.

"Legal standards, however, are of little avail if they are not enforced," states the booklet. "There is much illegal employment in some of these industries. . . . It must be recognized that legislative restrictions in these types of employment meet with special difficulties of enforcement. These young workers are usually so scattered—a few in one establishment and a few in another—that their employment may be overlooked as of little or no significance."

Desirable standards for legislation regulating child labour in the amusement industries, suggests the Bureau, would be:—

(*a*) stricter regulation of night work, so that the work of the school child under 16

will be limited to afternoon hours and so that there is time for a full night's rest for all workers under 18;

(*b*) a minimum age of 14 for work outside school hours, and of 16 for work during school hours;

(*c*) a requirement of employment certificates up to 18 years of age;

(*d*) a limitation on combined hours of school and work;

(*e*) minimum-wage standards that would provide adequate recompense for the young person's time and effort.

U.S. defence industries to receive training assistance

Defence industries may now obtain manpower training assistance from the United States Department of Labour under a program recently put into effect by Secretary of Labour Maurice J. Tobin, according to the April issue of *Labour Bulletin,* a publication of the U.S. Department of Labour.

Upon the request of defence industries, field representatives of the Labour Department's Bureau of Apprenticeship will provide aid towards improving the skills of employed workers and training new workers on the job.

Through teamwork between the Bureau, public employment services, and vocational education agencies, the following three services will be provided to defence industries, in addition to developing needed skilled workers through apprenticeship programs:—

1. Assistance in determining training needs and the recommending of methods and procedures for the organization of training on the job;

2. Assistance in the organization of training throughout a defence plant to meet production requirements;

3. Assistance in the solving of special training problems.

The field representative of the Bureau of Apprenticeship upon invitation will obtain a working knowledge of the production plans of a particular defence plant. In co-operation with the plant's production manager and personnel director he will advise on the skills needed to meet production schedules. In addition, the local office of the State employment service will conduct a job analysis survey in the plant and will recommend how present workers may be best utilized in production plans. Once these two factors are determined, the number of additional workers needed and the skills required can be decided.

If there is not sufficient trained manpower available through local public employment offices, the field representative will suggest to plant officials a procedure whereby new workers can be trained on the job without interference to the production schedule.

In view of the present high employment in the United States, continues the article, defence industries will probably be compelled to use workers on jobs for which their skills do not equip them, or to hire persons who have not worked before. In many areas, it will become necessary therefore to establish pre-employment training classes similar to those operating during the recent war. In these cases, State and local vocational education authorities will consult with the employer on the content of the course and curriculum.

"A main objective of the program," states the *Bulletin,* ". . . is to make the fullest possible use of available skilled and other classes of trained workers to get a plant into defence production, and then to use these workers to train others as the plant expands and new employees are brought on to the job."

CIO to participate in ILO Conference

The CIO will participate with the AFL as labour representatives on the United States delegation to the annual International Labour Conference for the first time since 1946, Secretary of Labour Maurice J. Tobin announced on April 11. The Conference opens in Geneva on June 6.

The AFL would nominate the worker delegate, the Secretary said, and the CIO would join the AFL in nominating advisors to the delegate. Each organization would have an equal number of advisors.

Mr. Tobin said that the agreement constituted a significant step in American labour's united approach towards world affairs.

Reviewing the background of the agreement, he recalled that in 1949, the AFL and CIO were prime movers in forming the International Confederation of Free Trade Unions, "free labour's answer to the Communist-controlled World Federation of Trade Unions.

"Through the ICFTU," he continued, "the united American labour movement is co-operating with its democratic counterparts in 59 countries to raise standards of living and promote the legitimate interests of free trade unions everywhere, in all out effort to defeat the forces of Communism.

"This agreement to work together in the ILO is another milestone on the road towards international labour co-operation. The ILO is one of the most effective international instruments for building the economic and social foundations of world peace."

In emphasizing the vital role of the ILO in the world today, Secretary Tobin stated: "Communism feeds on conditions of poverty and misery. In attacking the source of such conditions and helping eliminate them, the ILO is making a direct contribution toward the strengthening of democracy and freedom. It has become one of the most important international instruments for achieving the social and economic objectives of free peoples everywhere. These objectives are the necessary foundation of a durable and lasting peace. Anything we do to strengthen the ILO and our participation in it is in the interest of the United States."

Women's Advisory Committee on defence manpower

The United States Department of Labour Industrial Bulletin for April reports that on March 20 Secretary of Labour Maurice J. Tobin named 18 women leaders as members of his newly created Women's Advisory Committee on Defence Manpower. Members of the committee are representative of women's organizations across the country, State departments of labour, labour unions and management.

India enacts legislation to conform with ILO Convention

A bill seeking to prohibit the employment of young persons between the ages of 15 and 17 years, during the night in railways and ports, was introduced in the Indian Parliament on April 19. It is also sought to completely prohibit the employment of children under 15 years of age in any occupation in the port areas.

According to the Government of India Information Services, the legislation has been introduced in order to conform with the provisions of a Convention adopted by the International Labour Conference in 1948 and ratified by India.

The Convention (No. 90) concerns the night work of young persons employed in industry, and comes into force in June. It prohibits the employment of young persons during the night in factories, mines, railways, and ports. Necessary action to enforce the provisions of the Convention in mines and railways is being undertaken separately by amending the relevant laws. The only national law regulating the employment of children in railways and ports is the Employment of Children Act of 1938. The present Bill amends that to give effect to the provisions of the Convention in respect of railways and ports.

(Concluded from page 624)

IN BRIEF . . .

The cost-of-living index advanced from 179·7 to 181·8 between March 1 and April 2, an increase of 1·2 per cent. The food index rose from 233·9 to 238·4, in part because of an increase in the price of butter . . . Canadian production of iron and steel moved up again in February, continuing a gain in monthly output over a year earlier that has been uninterrupted since May last year. Pig iron production in February advanced to 193,227 tons from 157,200 a year ago. Production of ferro-alloys in February advanced to 14,914, tons from 9,652 in the same month last year . . . Employment in the major non-agricultural industries was slightly lower at the beginning of March than a month earlier, while payrolls were slightly higher. Both employment and payrolls were substantially higher than a year earlier. The advance index of employment (1939-100) was 172·1 at March 1, nine per cent above the level at March 1 last year. The advance index of employment in manufacturing was 186·2 at March 1, 8·6 per cent higher than a year earlier, and the highest level reached in the postwar period . . . Weekly earnings of those employed by the larger manufacturing firms averaged $49·57 as compared with $45·55 at March 1, 1950.

LEGISLATIVE PROPOSALS OF LABOUR ORGANIZATIONS

During the week of April 9, representatives of the Trades and Labour Congress, the Canadian Congress of Labour, the Canadian and Catholic Confederation of Labour, and the Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods, presented their annual briefs containing proposals for administrative and legislative changes to the Federal Cabinet.

Trades and Labour Congress of Canada

Stressing the Congress anxiety at recent increases in the cost of living, the Executive Council of the Trades and Labour Congress, supported by a large delegation of senior officers from affiliated organizations, presented its annual memorandum to the Federal Cabinet on April 10. The memorandum, which was read by Percy Bengough, TLC President, expressed the Congress viewpoint on many matters of current national and international interest.

In welcoming the TLC officials to the meeting, the Prime Minister, the Rt. Hon. Louis S. St. Laurent, expressed the Cabinet's pleasure at being able to meet with the Congress, and said that the aims of the Congress for the country were in many cases analogous to those of the Government.

Replying to Mr. St. Laurent's welcome, Mr. Bengough thanked him for his remarks, and took the occasion to present his group's best wishes to the Hon. Mr. Gregg, Minister of Labour, who was celebrating his birthday.

In its introductory remarks, the Congress commended the Government for its leadership and participation in international affairs. The Congress made particular reference to "the support and participation given the International Labour Office . . . and the response of your Government to the call of the United Nations Security Council for the recruitment of a Special Reserve Force for service wherever the United Nations has need for the maintenance of international law and order." The brief also commended the Government for financial assistance given to underdeveloped areas, and for its determination to strengthen Canada's defences from attack.

Social Security

Expressing concern at the progress in establishing a program to improve "social and economic" security, the brief pointed out that "Communism feeds and grows upon social and economic insecurity," and that "too little has been done and that a great amount of resentment and dissatisfaction exists." The Congress said further:—

> It is with this knowledge that we wish to impress your Government with the need of establishing a co-ordinated plan of social security for the people of Canada. There are still many thousands of men and women in this country living in constant fear of becoming unemployed —a justifiable fear in view of the mass unemployment experienced during the Spring of 1950. Canadians still have the fear of illness with its high costs and debts as well as the fear of old age with insufficient income and savings. Canadians are also experiencing the greatest of difficulty in purchasing the necessities of life because of ever-increasing living costs.
>
> We do not accept the argument that the costs of the military defences necessary to protect our country must come before a program of comprehensive social security; nor do we believe it necessary that living costs should be allowed to skyrocket as they have during the past four years. We have no hesitation in warning your Government that continued failure to deal adequately and quickly with these matters will weaken any defensive measures that may be taken, leave our freedoms and democratic institutions open to attack from within, and render sections of our economy ineffective at a time when it is necessary for them to carry the greatest punch.

The Congress asked for immediate enactment at this session of Parliament of a contributory social security scheme. Included in this scheme would be a health insurance plan, providing accident and

hospital benefits, and medical, surgical, and dental services financed by individual prepayment and Government subsidies.

Mr. Bengough said that his organization was disappointed that such a scheme had not yet been inaugurated. Mr. St. Laurent replied that labour could do much to educate the public to accept such a proposal. Under the British North America Act, the major responsibility for health remained with the provinces. There was a fear in many parts of the country that such a scheme would lead to federal centralization. Some progress had been made, but there was a need for education among the people. Labour, he said, is "a very effective instrument to educate people," because of its "overall influence all over the country."

The brief also presented the recommendations for old age pensions passed at the 65th convention of the Congress in September (L.G., Nov., 1950, p. 1804). The Congress recommended: abolition of the means test; federal responsibility for old age and blind pensions; interim measures to provide a $65 monthly pension, "while machinery is being developed for the implementation of a full social security scheme"; reduction of pensionable age to 65 for men and 60 for women; and the provision of housing for all pensioners who might require it. The proposed national social security scheme "should include provisions for allowances on a broader and more enlightened scale for mothers and widows," the TLC said.

Noting the changes in the Unemployment Insurance Act removing the limitations on coverage, the Congress considered that "there are still those who are not covered, and too low a ceiling has been placed upon the amounts of benefits available."

The following changes in the Act were recommended: increased weekly benefits; universal coverage regardless of income or employment; payment of benefits for all statutory holidays; clearer definition of the phrase "suitable employment"; an increase in the time limit for registrations, and a shorter waiting period for the payment of benefits; the right of a claimant to draw benefits until credits are exhausted; all employees full or part time, be required to deposit insurance books with employers; "that benefits in respect of dependent persons be paid whether or not the dependent shares the same domicile;" reduction of contributions by longshoremen from 450 to 300 days, and "in regard to the dead seasons from 50 to 35 days"; replacement of the Umpire by a panel made up of a High Court Judge, and an employee and employer representative.

The Congress said that its membership did not want "social security as a gift," but was prepared to pay a share of such a plan if implemented.

Price Control

Stating its awareness to "the inflationary aspects of increased preparedness and defence spending," the Congress emphasized its belief that price controls were now necessary. The brief said that "it may be necessary for and desirable for your Government to require considerable saving by our people as was done during World War II." However, the Congress drew attention to the large increases in the cost of living in recent months. Mr. Bengough said that labour did not feel that the increased cost of living was entirely due to international conditions. He said that items such as foodstuffs, which had shown the greatest increases recently, were produced in Canada. He added that rentals were not subject to international trade conditions, and increases had also been registered here.

Maintaining that people on fixed incomes, and wage-earners, had not benefited from price rises, the brief continued:—

> It is our opinion that your Government must take some responsibility for the stabilization of prices. We are not a little disappointed at the failure of your Government to take some constructive steps along these lines.
>
> We believe that measures of price control are an immediate necessity to protect the living standards of our people and to assure the success of our current drive for greater defence preparedness.

The TLC recommended that the Government take the following action to alleviate the price situation:—

> Establish a prices board with power to control prices and having equal labour representation.
>
> Provide subsidies for foodstuffs "sufficient to bring food prices within the purchasing power of those in the medium and lower income groups."
>
> Institute a 100 per cent excess profits tax as a deterrent to higher prices, and to help pay the cost of subsidies.
>
> Establish a policy of applying to the prices board for approval of all price changes.

The Congress took the position that wages were now controlled through the negotiation procedure of collective bargaining. The brief also pointed out that prices of the services sold by public utili-

ties are negotiated in the manner proposed, and recommended "that all prices be so handled". Unless this is done, the Congress said, "industrial unrest will be one of the immediate results."

Rent Control

Noting that the Government had definitely decided to vacate the field of rental controls, the Congress observed:—

> We are pleased to see that some of the Provincial Governments have enacted rent control legislation. However, we are not yet assured that all Provinces will follow the same procedure. We would ask your Government to endeavour to have such protection extended to all citizens.

Mr. Bengough, speaking on the matter of adequate housing, and the recent regulations regarding down payments for new construction, said that "very strong views" had been expressed by trade unions against this action. The effect of the regulations would be to prohibit working people from building, he said. He read a resolution passed at the Congress Convention which urged the Federal Government to "assume full responsibility for the financing of slum clearance and low rental housing projects in co-operation with the provinces and municipalities" (L.G., Nov., 1950, p. 1805).

Taxation

The Congress asked for several changes in taxation laws. These requests were: Exemption from income tax of "all union dues paid as a condition of employment;" Exemption of $2,400 a year for married persons; $1,200 a year for single persons; $400 a year for each child; and complete exemption of incomes of children eligible for family allowances.

The TLC recognized the Government's need for increased revenues because of "the large sums it will cost to establish and maintain our defence on an adequate scale, but we are not prepared to have the bulk of these costs shouldered by one section of the public, and the section least able to pay." The Congress also asked for reduced taxes on tobacco and its products.

National Labour Code

While there were some features of the Industrial Relations and Disputes Investigation Act which were "not entirely satisfactory," the Congress urged the Government "to obtain an immediate amendment of the British North America Act which will make the provisions of the Federal Labour Code applicable in all parts of the country."

The Congress also asked that the Act's provisions be extended to cover civil servants and municipal employees. In making this request, the TLC asked that civil servants be permitted to choose a bargaining agent, obtain certification, and conclude collective agreements. Mr. Bengough spoke of working conditions and wages at the Government Printing Bureau, and said that the Government should be a model employer and lead the way for private employers.

The brief also suggested that "the check-off of union dues should become mandatory upon the employer," and that the Act be amended to require "an employer or employers to bargain collectively with a group of associated unions representing the employees."

Injunctions in Labour Disputes

The Congress registered a strong protest against the use of injunctions prohibiting picketing at strikes. Citing several instances of what the TLC considered unjust use of injunctions, the brief asked "for the enactment of legislation barring the use of injunctions in labour disputes before all those involved have had an opportunity of appearing before the judge and stating their case."

Immigration

The Congress said that it was "wholly opposed to any large scale immigration scheme," but that it felt "Canada can continue to welcome new citizens." Opposition to large scale immigration was based on the belief that neither sufficient employment or housing were available. There were sufficient jobs and housing for "a considerable number" of immigrants each year. The Congress suggested that immigration policy be placed under the Department of Labour, and administration under a commission representing labour, management and the Government.

The Government was asked to tighten security regulations as a precaution against those "who wholeheartedly oppose and despise democracy and our way of life."

Government Employees

In addition to other suggestions on civil service employees (see above), the Congress said that it did not approve of the action of increasing hours of work. The brief also noted delays in salary adjustments, and hours of work at the Government Printing Bureau.

Education

The Congress said it realized education was a matter of provincial jurisdiction, but "it is the opinion of this Congress that the Government of Canada should accept more

responsibility in this field. We urge your Government to make financial aid available to education in all provinces." In addition, the Congress asked for wider technical education, and financial assistance to universities, particularly for work in the social science field.

Other Recommendations

Among the other requests made by the TLC were the following:—

Establishment of a board or commission, to act in co-operation with the Secretary of State, to promote and improve understanding between racial and religious groups;

Ratification of the United Nations Convention on Genocide;

Enactment of a Fair Employment Practices Act;

An intensified effort to develop Canada's natural resources, and to stimulate improvements in industrial processes;

The calling of public hearings "before any amendment or amending procedures are agreed to," with regard to the British North America Act;

Enactment of a Canadian Bill of Rights, incorporating "the fundamental freedoms as expressed in the United Nations Declaration of Human Rights;"

Amendment of the provisions in the Criminal Code dealing wtih sex crimes, to provide clinical and psychiatric care for such offenders, and establishment of "institutions of a hospital-jail type;"

Expansion of the activities of the Canadian Broadcasting Corporation in both radio and television (the Congress also asked that Parliament should retain its control over the Corporation; that greater emphasis be put on the use of Canadian talent; and that there be greater labour representation on the CBC directorate);

Establishment of a Canadian Coast Guard Service;

Reduction of the voting age from 21 to 18;

Restricting the award of Government contracts "to firms having current working agreements with regularly established unions," and use of union labels on Government printing and stationery.

Conclusion

In concluding its presentation, the Congress asked the Government's consideration of its requests. President Bengough expressed the thanks of the Trades and Labour Congress to the Government, and its Department officials, for their co-operation and assistance during the year.

The brief emphasized again the necessity to combat Communism by maintaining a good Canadian standard of living:—

Communism provides an outlet for the frustrated. It appeals to the hungry, the ill-clothed, the poorly-housed, and the misfits. It appeals to the prejudiced, the ignorant, and the depressed. It also appeals to the educated, the ambitious, and the highly-trained when these too are without security and opportunity. We conscientiously believe that social and economic security can be achieved without interference with the exercise of personal freedom and civil liberty, and that opportunities can be opened up for all to use their abilities and skills to the maximum. All Canadians, able and willing to work, have a right to expect employment with an income that will enable them to maintain a good and comfortable home and a decent standard of living for themselves and their families, free from the fear of want for the whole of their lives, with efficient treatment during illness, and a pension commensurate with Canadian standards in old age.

These requests are being made at a critical time. It is a time for calm, clear thinking, and deliberate, well-considered action.

We earnestly hope that our requests will have the approval of your Government and be included in the legislation passed by Parliament at this Session.

Government's Reply

The delegation was received by the Rt. Hon. Louis St. Laurent, Prime Minister, and the following members of the Cabinet: Hon. Milton F. Gregg, Minister of Labour; Rt. Hon. C. D. Howe, Minister of Trade and Commerce, and Minister of Defence Production; Hon. Alphonse Fournier, Minister of Public Works; Hon. Lionel Chevrier, Minister of Transport; Hon. D. C. Abbott, Minister of Finance; Hon. J. J. McCann, Minister of Revenue; Hon. Stuart Garson, Minister of Justice; Hon. Robert Winters, Minister of Resources Development; Hon. Hugues Lapointe, Minister of Veterans Affairs; Hon. E. Rinfret, Postmaster General; Hon. George Prudham, Minister of Mines and Technical Surveys; and Mr. Paul E. Coté, Parliamentary Assistant to the Minister of Labour.

In replying to the brief as a whole, Prime Minister, Rt. Hon. Louis St. Laurent said: "I can assure you that we appreciate the spirit in which these recommendations have been made." He said that it was obvious from the brief that it was not presented from self-interest; but as a thoughtful expression of opinion on the working of the economy as a whole; and that Canada was fortunate to have such a group taking a broad rational view of the nation's economy. No broad minded Canadian could do other than feel that these recommendations were made for the good of the country, he said.

Speaking on the matter of taxation, the Prime Minister drew the Congress' attention to the fact that the Government did

not have any money of its own, but that it had to use funds given to it by the people in the form of taxes.

He stressed the necessity of taking into account the present international situation, and said "there is nothing we can do but take our share under the North Atlantic Treaty Organization." The people of all twelve NATO countries will have to bear burdens. "We hope that our preparations will prohibit another war", he said, but he felt certain that if another war came we would win it as we had done the last one.

Labour, the Prime Minister said, realizes better than any other segment of the population what the cost of war is in lives, and disrupted human habits. He said that Canada and Canadians looked upon another war with horror. "Nothing should be left undone to make our joint strength as impressive as possible," Mr. St. Laurent said. In the world conflict between democracy and Communism, "we've got to maintain the feeling that democratic government is good government." Because of this "we cannot afford to undertake at this time, anything which might fail," he said.

Mr. St. Laurent said that when the recent figures on the cost of living were released, he, and the Cabinet, had been very concerned. He had found that the percentage increase to retailers was lower than that to the primary producers.

He stressed his belief that the prices which had increased the most were those affected by international trade. There were many factors to be considered, he said. Labour had been successful in getting the 40-hour week; but it was necessary to remember that the primary producer had to work much longer. On the average, he felt that farmers were not getting more than their fair share of the national income. He knew, he said, that labour's objective was equality for all before the laws of the country.

On the subject of controls, he said that if the Government felt that controls could be made to work, "we would not hesitate", but there must be no "shadow boxing". In this regard, he pointed out that controls had been successful during the last war, and that one of the results of this success was that once controls were lifted an increase in prices resulted.

Turning to health insurance and medical care, he pointed out that the number of hospital beds and trained personnel had increased; but as in the matter of housing, no serious inroads had been made into the backlog. However, it was still a fact that no hospital in Canada today has any space to spare, he said. The Government could not, therefore, undertake to give a contract to the taxpayer promising care, when the facilities to provide this care were lacking. However, he felt that progress had been made "fairly well."

On a per capita basis we have done as well in housing as any country in the world, he said. However, "this was not good enough." One of the causes of the shortage has been that in recent years, a greater proportion of the population has been in a better financial position to build homes.

The Government desired to keep the interest rate on borrowing to build houses as low as possible for those who want to build. Because of the shortage in building materials and labour, the Government had recently increased this rate as a warning of the shortages, so that too many would not undertake building, and find themselves unable to finish their homes.

Adding to the housing problem was the need for housing servicemen, he said. We must provide adequate accommodation for the men we want, and are trying to get into the services.

All of these factors must be considered in any decisions the Government has to make. While labour might not agree with the Government's view, the Prime Minister said he felt certain that they realized that there were many factors to be considered. The Government, he said, would like to accord its sincere thanks to labour for its co-operation whenever asked. Co-operation was as necessary within the country as in our external relations, he said.

Mr. St. Laurent said that he could give "no rash expectations" as to how far the government could go in granting the requests presented to it. He assured Mr. Bengough that the requests would receive careful consideration. The Government, he said, would do its best to justify and maintain the confidence of the people in democratic government.

Mr. Gregg

Mr. Gregg thanked Mr. Bengough for his expression of good wishes on his birthday. His Department would study very carefully those proposals and recommendations relating to its jurisdiction. He reminded the representatives, however, that there were ten other governments to be considered in many of the decisions which might have to be made.

Canadian Congress of Labour

The Annual Memorandum of the Canadian Congress of Labour was presented to the Government on April 11 by a large delegation headed by President A. R. Mosher and Secretary-Treasurer Pat Conroy.

Welcoming the delegates from the CCL to the meeting, the Prime Minister, Rt. Hon. Louis S. St. Laurent, said that he knew from past experience that the representations made to the Government were the expression of honest opinion, objectively presented.

In reply, Mr. Mosher admitted that he did not anticipate that the Government would immediately do everything the Congress asked. He strongly emphasized, however, that there was a great sense of "futility and frustration" on the part of the people because of the Government's failure to introduce price controls and curb the cost of living.

Mr. Conroy then read the Memorandum.

The Congress presentation began by stressing the critical nature of the present world situation. It urged the need for a social and economic program designed to counteract the challenge of Communism.

"The Congress has always felt," the Memorandum stated, "that the welfare and progress of the nation were bound up with the well-being and advancement of other countries." The brief described the measures taken by the Congress to support the International Confederation of Free Trade Unions, which recently initiated a program to train labour leaders in South-East Asia, for the purpose of encouraging the development of free trade unions and the raising of living standards. The Congress was raising a fund to support this program.

The Memorandum "noted with deep interest that the Canadian Government, through the Colombo Conference and the decision to contribute $25,000,000 toward the carrying out of the Colombo Plan, has shown that it realizes how vitally the decisions and attitudes of the countries of South-East Asia may affect the future of the world." It called attention to the "Declaration of a Positive Economic Philosophy" adopted by the Congress at its last Convention (L.G., Nov., 1950, p. 1814), which had advocated better living standards for Asiatics.

"The Congress commends the Government for the steps it has taken along these lines," the brief continued, "but we are strongly of the opinion that vastly more must be done if our efforts to stop the spread of Communism throughout the world are to be effective." (Mr. Conroy interrupted his reading of the Memorandum at this point to state that in the view of the Executive Council of the Congress the grant of $25,000,000 to the Colombo Plan was not enough, and that it reflected a "lack of appreciation of the seriousness of the situation in that part of the world." It was felt that Canada's stature demanded a "more liberal grant.")

"We do not suggest for one moment that the Government is not fully cognizant of the activities of Communism and its world-wide ramifications," the brief went on. "We are at war with Communist forces in Korea, and our participation in the work of the United Nations has been outstanding and effective in many respects. In the field of international affairs generally, our nation has been given great opportunities for service, and has won the confidence of the other nations to a degree which is highly commendable.

"Our Congress feels, however, that there has not yet been shown, either in the domestic or the international field, a willingness to take adequate steps to relieve conditions which prepare the minds of great masses of the people to accept the false assurances of the Communist philosophy. Canada is one of the most highly productive nations of the world, as a result of her natural resources, skilled labour, and mastery of modern technical processes. In the circumstances, Canada cannot refuse to accept her full share of responsibility for helping those nations whose people are chronically undernourished and periodically ravaged by disease and famine. India, at the moment, is a conspicuous example. . . . It is always gratifying to be generous, but our generosity now may be the best means of preserving the democratic way of life and the institutions which we cherish."

The brief then turned to domestic matters, and urged the necessity of "doing whatever is possible to remedy conditions at home which are causing frustration and despair in the hearts of the Canadian people. If they are to participate fully in the fight against Communism, there must be a social and economic program at home which will give them something worth defending with their lives."

Economic Controls

One of the most important of the domestic matters demanding Government action, the Memorandum stated, is price control. The brief recalled that a joint

delegation representing the major sections of the Canadian labour movement had presented detailed arguments for the reinstitution of price control.

However, the brief continued, "in spite of the urgency of the situation, and the fact that the Government has obtained full authority from Parliament to take whatever steps are necessary to control prices and rents, it has shown an unwillingness to act in this matter, which it is almost impossible to understand. In many instances, prices have been deliberately raised in anticipation of action by the Government, without any other excuse or justification, and we have no alternative but to express very deep disappointment with regard to the failure of the Government to maintain price and rent control, in the first place, and to re-impose it long before the present serious inflation had occurred.

"Instead of adopting price control, the Government has imposed restrictions on credit and similar measures. The Congress believes not only that these are wholly inadequate for the purpose intended, but that they constitute a form of discrimination. The requirement of higher down payments and a shorter financing period on the purchase of automobiles hits hardest at buyers with small incomes and no appreciable cash reserves, and has the effect of forcing low-income buyers out of the automobile market.

"Credit controls mean rationing according to wealth rather than according to need. For many thousands of workers an automobile is a necessary means of transportation and not a luxury. The same observation might be made with regard to the requirement of a larger cash payment by buyers of homes. This prevents low-income workers from purchasing homes while those who are well-to-do have little or no difficulty in doing so."

Housing

Declaring that the lack of homes left people "rootless and frustrated," and that housing was "one factor in the battle against Communism," the Congress therefore reiterated its demand that the Government "undertake a program which will provide properly-constructed homes, that may be purchased on reasonable terms by lower-income groups, and that the financing as well as the construction of homes be carried on by the Government rather than by profit-seeking corporations.

"In other words," the brief said, "we believe that the provision of homes for the Canadian people should not be used as a means of private exploitation, but be carried on as a Government undertaking on a non-profit basis."

National Labour Code

On the subject of labour relations legislation, the brief said as follows:—

"The Congress again urges the establishment of a National Labour Relations Act which will ensure uniform labour practices throughout Canada. At the present time, every province has its own code, with wide differences in terms, interpretation, and enforcement. The scope of the present federal legislation is very limited, and, in a number of industries of national scope, the unions are required to deal with each province separately. Among the specific provisions which should be included in a National Labour Code are: the outlawing of company unions; the voluntary check-off; the removal of the provisions that employers may have certification revoked, and effective procedure for legal action against employers charged with unfair labour practices."

Unemployment Insurance

The Memorandum recalled that a year earlier the Congress had objected to an amendment to the Unemployment Insurance Commission power to make regulations concerning married women.

"What the Congress feared at that time has happened," the brief asserted, "and a very rigid regulation was adopted by the Commission, leaving little or no room for consideration of mitigating circumstances. The Congress believes that this section of the Act should be eliminated, as it is discriminatory in character, and, in any event, is regarded as unnecessary."

Among other amendments to the Act which the Congress strongly urged were: increase in benefit payments to workers with or without dependents, without increase in the contribution rate; the extension of coverage to employees of hospitals and charitable institutions and other classes of workers still excluded; complete elimination of non-compensable days; the reduction of the waiting period to at most three days, or its complete elimination, and the payment of benefits for workers laid off without pay during a plant shutdown for vacation purposes.

The Congress further believed that the seasonal regulations should be eliminated; that supplementary benefits should be available throughout the year at not less than the present normal benefit rates, and that they should be paid out of the Consolidated Revenue Fund. The Unem-

ployment Insurance Act should also, in the opinion of the Congress, be extended to provide insurance against disability through illness.

Representation on Government Bodies

"The Congress recognizes," the brief said, "that in the establishment of the National Advisory Council on Manpower, provision was made for the representation of labour, and that labour is also represented on a number of other advisory councils, as well as the Canada Labour Relations Board. However, during the last war, labour was not represented on various bodies dealing with war production, or on the Wartime Prices and Trade Board. The Congress strongly urges that the Government adopt as a uniform policy the appointment of labour representatives on all government bodies in which it has a direct interest, with the exception of technical matters within the sphere of national defence."

(Interrupting his reading of the Memorandum, Mr. Conroy drew the Cabinet's attention to the difficulties the problem of labour representation had been causing in the United States, and said that it was not good for labour to have a "purely nominal representation" in the defence effort, since this would lead to a feeling that business was running the program and that labour was being left out.)

Old Age Pensions

The Congress commended the Government for the enquiry which was made last year into the question of old age pensions and for the amendment of the British North America Act on this subject which it has proposed to the provinces. It was disappointed, however, that the Parliamentary Committee recommended "what must be regarded as a wholly inadequate provision for those who must depend upon old age pensions for their livelihood.

"While the Congress feels that elimination of the means test for pensioners of 70 years or over was a step in the right direction, it strongly urges that the means test be abolished, and that old age pensions of $60 per month be payable at the age of 65. The Congress is also of the opinion that there should be no further delay in the provision of adequate old age pensions, since social security is a vital factor in the maintenance of democracy."

Right of Government Employees to Organize

Referring to the fact that Government employees are specifically excluded from the provisions of the Industrial Relations and Disputes Investigation Act, the brief said: "The Congress cannot find any adequate justification for the discrimination practised against civil servants. It sees no reason why they should not be permitted to organize into trade unions and to bargain collectively through representatives of their own choosing in the same manner as the employees of industrial or other enterprises. The Congress, therefore, strongly urges that civil servants be brought within the scope of the Industrial Relations and Disputes Investigation Act, and given the rights and privileges provided therein."

Mr. Conroy said that the Congress was particularly concerned with the rights of employees of Government arsenals in Ontario and Quebec.

Other Recommendations

The Memorandum expressed the view that the arbitrator in last year's railway dispute should have treated hotel and water transport employees on the same basis as the other workers involved in the strike.

It asserted that "the impression given by the Prime Minister in the House of Commons debate on the railway strike was that all employees would be treated on an equal basis." It asked that the Government "take whatever action may be necessary to remedy what the railway employees believe was a discriminatory decision on the part of the arbitrator."

Dealing with the western coal industry, the brief urged its developemnt "by means of the same type of assistance as is being provided under the Maritime Coal Producers' Assistance Act, and the maintenance of preferred rates, which would permit Western coal to meet competition in Ontario."

The Memorandum also made the following recommendations:—

> That no amendment be sought to the British North America Act giving the provinces powers of indirect taxation;
>
> Adoption by Parliament of a declaration of human rights pending a constitutional amendment that would permit adoption of a federal Bill of Rights;
>
> Extension of the CBC's radio programs dealing with the problems of organized labour and the encouragement of racial tolerance (the CBC was commended for its "fine public service," and opposition was expressed to "the campaign which is being carried on by private interests in the endeavour to undermine the Corporation");
>
> The appointment by the Government of a committee to study the question of the employment of workers over forty years of age, and to make recommendations upon which legislation might be based;

Legislation to provide that all statutory holidays, apart from Good Friday, Christmas and New Year's Day, be observed on Mondays;

A national health insurance scheme, which would provide free medical, surgical, optical, dental and hospital treatment for all Canadian citizens;

The assumption of administrative and financial responsibility for preventing the recurrence of floods in the Red River Valley;

Substantial grants to the provinces for educational purposes, with a view to establishing and maintaining adequate educational standards in all parts of Canada;

The establishment of a Dominion Standards Division, with authority to enforce a minimum standard of quality in clothing and consumer goods, and a uniform system of size and description of clothing;

Legislation to prevent the use of injunctions in labour disputes;

The establishment of a national minimum wage of 85 cents per hour, and a maximum work week of forty hours;

Endorsation by the Government of the adoption of a World-Calendar;

The amendment of the British North America Act, in order to bring all matters of common interest to the Canadian people and of national importance and character within the jurisdiction of the Federal Government;

The revision of the cost-of-living index so that it will present a true picture of the present cost of living in Canada;

The establishment of an immigration policy which will protect the standard of living of Canadian workers as well as that of immigrants, but which will not permit the immigration of advocates of either Fascism or Communism;

The ratification of the United Nations Convention on Genocide, making the mass-murder of religious or racial groups a crime punishable under international law;

The construction of the St. Lawrence Waterway.

Trucking Concerns

Following the presentation of the Memorandum, Mr. Mosher spoke briefly, registering a protest against a report that the Government was considering allowing American trucking concerns to ship through Canada in bond, a privilege now allowed only to the railroads. Declaring that this would injure the transport workers represented by the Congress, he strongly urged the Government to reconsider this move if it were contemplated.

Government's Reply

The Congress delegation was received by the Prime Minister, Rt. Hon. Louis S. St. Laurent, and the following Cabinet Ministers: Hon. Milton F. Gregg, Minister of Labour; Rt. Hon. C. D. Howe, Minister of Trade and Commerce; Rt. Hon. James Gardiner, Minister of Agriculture; Hon. Alphonse Fournier, Minister of Public Works; Hon. Lionel Chevrier, Minister of Transport; Hon. Paul Martin, Minister of National Health and Welfare; Hon. D. C. Abbott, Minister of Finance and Receiver General; Hon. James J. McCann, Minister of National Revenue; Hon. Lester B. Pearson, Secretary of State for External Affairs; Hon. Stuart Garson, Minister of Justice and Attorney General; Hon. Robert Winters, Minister of Resources and Development; Hon. Hugues Lapointe, Minister of Veterans Affairs; Hon. G. E. Rinfret, Postmaster General; Hon. Walter Harris, Minister of Citizenship and Immigration. Also in attendance were the Parliamentary Assistant to the Minister of Labour, Mr. Paul E. Coté, and the Chairman of the House of Commons Committee on Industrial Relations, Mr. A. F. Macdonald.

Replying to the presentation of the Congress, the Prime Minister complimented the delegation on the broad outlook it had displayed.

He said that he was impressed by the first paragraphs of the brief dealing with the international aspect of Canada's affairs, and by the Congress' appreciation of the needs of South-East Asia. Emphasizing the importance of maintaining good relations with the people in this part of the world, he paid tribute to their much older civilizations. Much was to be gained by interchange of ideas with the people of these countries; and Canada and other Western powers could contribute technical knowledge and skills in aiding them to develop their industry. He emphasized the "indisputable right" of Asian peoples to manage their own affairs, but stressed also the danger of Communist attempts to pervert the aspirations of these peoples to their own ends.

Returning to the observations of the CCL regarding Canada's contribution to the Colombo Plan, Mr. St. Laurent pointed out that what 13 or 14 million people could do to aid hundreds of millions was relatively small. Declaring that the Government was alive to the necessity of maintaining good relations, he said that it was "a good example for the world to see that the labour unions of Canada are so much concerned with the good of their fellow human beings in other lands."

At present, he continued, our primary concern is to prevent another world war. We must build up our strength so that it "would not be good business for any aggressor" to attack us. Our objective in arming is not to prepare for World War III, he emphasized, but to prevent it if possible. Each of the nations in NATO is doing everything to build up its strength. Therefore it is necessary for us to give "a

very large proportion of our annual production to build up that strength." Our war expenditures in the next year will be twice what they were last, he said. Because of this, "we must forego a lot we would like to do in raising our own and other living standards."

Referring to Mr. Mosher's remarks at the beginning of the interview regarding the price situation, Mr. St. Laurent said that the Government had similar feelings regarding cost-of-living rises.

Regarding the possibility of Government controls, he pointed out that during the last war, despite the "patriotic fervour" in the country at the time, it took a large staff, costing some $18 million a year to make controls work. Subsidies had added another $200 million a year. At the present time a similar program would cost $400 million, he declared. This equalled the amount Mr. Abbott had had to budget for to carry out the defence program.

The Prime Minister stressed the importance of maintaining the confidence of the people in our present form of government, and asserted the reluctance of the Cabinet to promise to do something which would not work in a situation short of an all-out shooting war.

Turning to the Congress representatives on housing, the Prime Minister agreed that the need was great, but called attention to the requirements of the defence program. We must provide "reasonably comfortable quarters" for men coming into the services, he said. Defence would therefore have to take first priority over everything else; but housing was "second only to the defence effort". He referred to the new ruling on depreciation allowances contained in the budget as an example of one of the measures designed to limit competition for scarce building materials.

Referring to the section in the brief dealing with the railway strike, Mr. St. Laurent said that in his speech during the special session of Parliament he had not intended to convey the meaning attributed to him regarding hotel and water transport employees. All employees had been treated alike in that all the matters in dispute had been referred to the arbitrator. If in his award he had made a mistake, no one could feel that it was other than an honest mistake.

The recommendations of the Congress regarding the operation of the Unemployment Insurance Act would be referred to the Department of Labour, Mr. St. Laurent said, which would study how far it was possible to meet the recommendations and still keep the unemployment insurance fund as an element of social security.

The Prime Minister then replied to the section of the brief dealing with the right of government employees to organize. He made it clear that civil servants were entitled to join unions, but said that they could not bargain on the same basis as a union bargains with an employer who makes his revenue out of the work of his employees. The money to pay civil servants is voted by Parliament, and comes from the taxpayers.

He continued: "We want civil servants to enjoy as good working conditions as are enjoyed by workers throughout the nation." He said that they should be treated fairly, but that since they were paid by the taxpayers they should not have a preferred position.

Before the Civil Service Commission had been set up, there had been too much political influence in the Service. While the present system existed, collective bargaining procedures were not appropriate.

In concluding his remarks, the Prime Minister assured the delegation that all the recommendations of the Congress would receive careful consideration in the appropriate departments of government.

Mr. A. R. Mosher

Mr. Mosher repeated his belief that price controls should be introduced. He felt certain, he said, that if a plebiscite were taken now, the majority of the people would be in favour of such action.

Referring to the Prime Minister's calculation that it would cost $400 million to successfully launch price controls, he said the failure to impose these controls had cost several times that amount. He suggested that if some of the millions of dollars in profits now enjoyed by business were cut off, the cost of living would be lowered.

With reference to the railway dispute, he protested the difference in treatment accorded the rail workers and the hotel employees in the final settlement. The hotel workers were split from the economic strength of the other employees in the union because of the settlement, he said.

Mr. Pat Conroy

Stating that we are facing a "ten times bigger enemy" than in the last war, Mr. Conroy urged the Government to take action to convince the Canadian people that we are meeting our problems at home. "Let us have a positive program," he declared, indicating that this would eliminate the need for prodding to get men for the services.

Canadian and Catholic Confederation of Labour

On April 12 the Canadian and Catholic Confederation of Labour presented its annual legislative Memorandum to the Federal Government. The delegation, composed of about 30 members, was headed by Mr. Gérard Picard, President of the CCCL, and Mr. Jean Marchand, Secretary-General, who read the text of the Memorandum after its presentation by Mr. Picard.

The Prime Minister, the Rt. Hon. Louis St. Laurent, who replied to the delegation on behalf of the Government, was accompanied by the following members of the Cabinet: Hon. James J. McCann, Minister of National Revenue; Hon. Hugues Lapointe, Minister of Veterans Affairs; Hon. Brooke Claxton, Minister of National Defence; Hon. Paul Martin, Minister of National Health and Welfare; Hon. Douglas Abbott, Minister of Finance and Receiver General; Hon. Alphonse Fournier, Minister of Public Works; Hon. Milton F. Gregg, Minister of Labour; Hon. Stuart Garson, Minister of Justice and Solicitor General; Hon. Edouard Rinfret, Postmaster General; Hon. Robert Mayhew, Minister of Fisheries; and Hon. Lester Pearson, Secretary of State for External Affairs.

Also in attendance were: Mr. Paul Emile Côté, Parliamentary Assistant to the Minister of Labour; Mr. Jean Lesage, Parliamentary Assistant to the Minister of Veterans Affairs; and Mr. Albert MacDonald, Chairman of the Parliamentary Committee on Industrial Relations.

The CCCL president, when presenting the Memorandum, expressed the thanks of his organization to the Minister of Labour and his officers, and the Parliamentary Secretary, Mr. Paul Emile Côté, for their co-operation.

Principal requests contained in the Memorandum included: immediate institution of price control and the setting up of a special tribunal (on which organized labour would be represented), with full power to decide upon any future increases in prices and to reduce any prices unjustifiably increased; modification of the recent policy on housing; substitution of compulsory savings for indirect taxation; revision of Government policy on old age pensions; granting of the right of association and of collective bargaining to Federal civil servants, Government Printing Bureau, and Arsenal employees; revocation of the recent amendments to the Unemployment Insurance Act affecting married women.

Other requests called for the appointment of a diplomatic representative to the Vatican; adoption of a distinctive Canadian flag; support of the UNO in whatever steps it might take to restore religious liberty in those countries in which it has been suppressed; adoption of the universal calendar prepared by the World Calendar Association.

The Confederation re-stated its opposition to compulsory military training in time of peace.

The Federal Budget

Before the reading of the Memorandum, the CCCL president, Mr. Gérard Picard, expressed the views of the Confederation on the Federal Budget presented to parliament two days previously.

The Canadian and Catholic Confederation of Labour, Mr. Picard said, recognizes in principle the fact that the Government is obliged to impose taxes; that this is one of the objects of the Budget. "The second objective of the budget is to reduce inflationary tendencies, and on this point," he declared, "the CCCL does not agree with the Finance Minister's views. If taxes are necessary to reduce purchasing power, the Government should have recourse to compulsory savings rather than indirect taxation, so that their money may later be returned to the taxpayers. Siphoning purchasing power does not fulfil its purpose and will not establish a balance between wages and prices."

The workers have already been hard hit, Mr. Picard said: first, "by the increase in personal income tax, about which we are not complaining too much; by the increase in the sales tax, and we do protest against that since families with relatively lower incomes are hit harder; and third, by taxing kitchen appliances which although formerly considered as luxuries are now a necessity." In the case of a married woman not gainfully employed, he added, the family income should be considered as having been earned equally by husband and wife, and both should have the option of making separate income tax returns.

Mr. Picard concluded by thanking the Government for its action in exempting union dues from income tax.

Canada and the International Situation

The spread of Communism in the world creates a serious problem for the free and democratic nations, the Memorandum

observed, denying spiritual values and belittling the human being, and Christianity must take up the fight. War begets Communism, it continued, and it is useless to dream of peace as long as the causes of war—poverty, distress, insecurity and unequal distribution of wealth—are not seriously and resolutely attacked. "Our first and principal task is to bring about in our country a social order based on justice. In this way we will do more for peace than the strongest armies in the world."

In taking this view, it was explained, the CCCL does not exclude the possibility of aggression on the part of belligerent nations, "against which we must protect ourselves. It realizes that the United Nations must organize to prevent acts of international brigandism which violate the liberty of the people." However, the Confederation urged caution on the part of those who have assumed the mission of putting an end to the reign of force, to resist the use of force themselves, which might result in jeopardizing the cause of peace, and requested the Government to "prudently limit itself to its present international agreements."

National Registration

The Memorandum referred to "rumours circulating" to the effect that the Federal Government may decide in the near future to proceed with a national registration. "The CCCL cannot, at the present time, see any valid reason justifying such a step," it stated, and asserted "the opinion that if national registration and the census are talked about as being one and the same thing, it might seriously harm the taking of the census." The Memorandum suggested that the Government should make known immediately its attitude in this regard in order to avoid any misunderstanding.

Price Control

Regret was expressed that the Government has not yet acceded to the request of the three principal labour organizations in Canada for price control. "There is no longer anything to stop the march of inflation towards economic ruin," the Memorandum declared, "and the first victims are those with small salaries, who see their purchasing power diminishing from day to day. The gains they have made over the last few years are being ruthlessly wiped out."

The Confederation called for the establishment of price control, taking as a basis for determining prices the month of January, 1951. It suggested the setting up of a public tribunal, on which labour unions would be represented, which would have authority to decide on any future increases in prices and to reduce any prices "abusively" increased. "The absence of trade union representation on the War-time Prices and Trade Board was a serious error which should not be repeated," it stated.

Income Tax

While recognizing that the Federal Government must be assured of adequate revenue, the CCCL believed that by making some slight changes in the application of income tax the Government could maintain its revenue and at the same time ease the burden on wage-earners in the lower taxation brackets. It was of the opinion "exempting capital profits from taxation is an injustice to the workers and an encouragement to evasion," and suggested that the Government could recover "by more appropriate taxation of profits" the revenue it would lose by an increase in individual exemptions.

The Confederation proposed that the individual exemption from income tax should be raised to $1,500 for single persons and $3,000 for married persons, plus an allowance in the latter case of $400 for each dependent.

In order to reduce the burden on heads of families, the Memorandum suggested that taxable family income be considered for income tax purposes as having been earned equally by the husband and the wife, and that returns be made as though they were single persons, so that each might "benefit by the exemptions provided for the latter class;" the father's right to exemptions for dependents to continue. It was further proposed that married persons affected by this suggestion should have the privilege of electing to be taxed under either the present method or the one proposed.

Finally, in this connection, it was suggested that a ten per cent deduction from income be allowed for charitable donations, without the necessity of producing receipts.

Canadian Diplomatic Representation at the Vatican

The Confederation again urged the appointment of a diplomatic representative to the Vatican.

Housing

Regret was expressed over the action of the Federal Government in making more severe the regulations governing loans

on construction of dwellings, and in abolishing the additional loan granted since September, 1949. The Confederation was particularly disappointed, the Memorandum added, as it was preparing to ask the Federal Government to co-operate with the provinces and the municipalities "to reduce the initial payment necessary in order to benefit by existing legislation, so that it would no longer act as an obstacle." It was hoped that the Federal Government would see fit to change its policy on housing and view the construction of family dwellings as "necessary to the maintenance of social equilibrium."

The CCCL proposed that (1) the public authorities allow the future owner a contribution of $1,200 for loans not exceeding $6,000, and a contribution of $800 for loans over $6,000 but not exceeding $10,000; (2) 25 per cent of the contribution to be paid by the municipalities, 37½ per cent by the Federal Government, and 37½ per cent by the provincial government.

The CCCL announced its intention of submitting a special memorandum on the question of housing.

Old Age Retirement Pensions

The Confederation expressed gratification that consideration is being given to improving the lot of old people and those on retirement. It stated, however, that it was "not prepared to accept the conclusions of the Joint Committee of the Senate and the House of Commons on this question."

The Memorandum referred to the three-way pension plan adopted at the last annual convention of the CCCL held at Sherbrooke, September, 1950 (L.G., Nov., 1950, p. 1827, and March, 1951, p. 328), and to the brief submitted to the Joint Committee. The plan, as briefly outlined in the Memorandum, includes:—

1. A monthly pension of $50 for women at age 60 and for men at 65, under a universal or general old age pension plan, the cost of which would be paid three-fifths by the Federal Government and two-fifths by the provinces;

2. The setting of a reasonable period of residence in Canada for admission to pension;

3. Abolition of the means test;

4. Establishment of contributory insurance, with a reserve fund, in favour of wage-earners, with a view to a monthly $50 pension at age 60 for women and 65 for men. The wage-earner to pay two per cent of his earnings to the reserve fund; the employer to pay the necessary balance to insure solvency of the fund; and the Governments to assume the administration costs and make up deficits;

5. Safeguarding collective schemes for retirement pensions now in existence, and leaving the etsablishment of other plans, complementary to the schemes suggested above, to collective bargaining;

6. Setting-up of suitable organizations to supervise the application of the law and to ensure the payment of pensions to persons entitled to them.

Unemployment Insurance and Married Women

The Memorandum protested against the amendments to the Unemployment Insurance Act and the Regulations "which place married women in a special category as compared with other insured persons" and requested their revocation. They lay down the principle, the Memorandum stated, that a woman who works in insurable employment automatically loses her right to benefits from the fact of her marriage, unless she proves her desire to remain in the labour market by fulfilling certain exceptional conditions as prescribed by the Regulations. The reasons invoked to justify this principle, it stated further, are "based on statistics showing that a considerable number of women who get married say they are available for suitable employment when such is not the case." The Confederation emphatically declared that it cannot agree to "the disqualification in advance of a whole category of insured persons simply because it is more difficult to verify their good faith." Marriage, in itself should not constitute a sufficient reason for disqualification, it contended.

The Right of Association and Collective Bargaining

One of the great social gains made by the workers, the Memorandum stated, is the right to organize and to bargain collectively. "In Canada," it stated, "these rights are sanctioned not only by provincial legislation but also by Federal law." The CCCL regretted, however, that certain groups of wage-earners—Federal civil servants, employees of the Government Printing Bureau, and Arsenal employees—are deprived of this privilege, and requested the Federal Government "to correct this situation."

Labour Gazette

The Canadian Catholic Confederation of Labour concluded the Memorandum by extending congratulations to the French and English editors of the Labour Gazette on the "splendid work" which they are doing.

Wages Paid to Government Printing Bureau Employees

Following the presentation of the brief, Mr. Georges Aimé Gagnon, President of the Printing Trades Federation of Canada, called attention to the rate of wages paid to employees of the Government Printing Bureau at Ottawa. The Printing Bureau, Mr. Gagnon claimed, has become a competitor with private enterprise, but the wages paid to its employees are lower than the average wages paid in good printing-houses throughout the country.

The Prime Minister's Reply

In replying to the recommendations submitted in the Memorandum, the Prime Minister first referred to organized labour as "a great asset to the nation." He was happy to see, he said, that the unions do not ask for advantages for one class only, but for the general well-being of the people as a whole. "With all the good faith in the world, we cannot look at all our problems from the same angle. The unions put forward their point of view in good faith. In return, they should realize that the Governments are acting with the same good faith for the common good."

The Federal Budget

Referring to the Federal Budget, the Prime Minister said that the Government had tried to impose taxes only to the extent made necessary by the International situation. "It is unfortunate that such a large percentage of our people's income should be spent for defence purposes," Mr. St. Laurent said. "This is a necessity imposed upon Canada, as it is on the other nations, for our collective protection against the spread of Soviet Communism. There is reason to hope that this effort on the part of the twelve allied nations will succeed in preventing war."

The Prime Minister explained that the Minister of Finance in preparing the Budget had not set up any permanent system. "If the international situation gets worse," he said, "it will no doubt be necessary to carry a heavier load, but if it improves we hope the new burdens will be temporary."

Price Control

Replying to the request for the institution of price controls, Mr. St. Laurent said it was estimated that to administer price control and pay for the subsidies that would be necessary to make up the differences between the domestic and international markets, it would cost around $405,000,000 a year. This, he said, would mean doubling the additional taxes announced by the Minister of Finance in his Budget.

Canada exports, Mr. St. Laurent said, from a quarter to a third of her products, and her imports are in the same proportion, so that prices in a large section of the country's economy depend on international fluctuations and not on domestic conditions.

Price control, the Prime Minister added, has been tried in other countries—the United States is one—without success. The Government will not take any steps to set up a system of control until it is absolutely certain that it has some chance of making a success of it.

Mr. St. Laurent said he was not convinced that the farmers are receiving too large a share of the national income. While they are getting better prices than they did ten years ago, he pointed out, "this improvement is in proportion to the improvement for other classes, and nobody wants to take it away from them."

With regard to the sales tax, Mr. St. Laurent said that calculations, to which the Minister of Finance referred in his Budget, show that the impact of this tax on small incomes is insignificant. If a person spends $2,000, he specified, only about one-quarter of the amount will be subject to this tax.

Housing

The Prime Minister told the delegates that defence needs will result in delaying a great deal of construction work, especially the building of family dwellings, since a large percentage of labour and materials will be earmarked for defence purposes.

"We are delighted that the number of Canadian families has been increasing at the rate of 85,000 a year since 1945," Mr. St. Laurent said, "for a nation is not made up of individuals, but of family units. We want the largest possible number of families to own their own homes, because this is a guarantee against Communist ideas." Under present conditions, however, he said, it is necessary first to provide accommodation for our armed services. "That is why we have had to disappoint the people by warning them that it is unwise to start work now on dwellings which might never be finished because of lack of labour and materials."

Vatican Representation and National Flag

The Prime Minister said he hoped the aspirations of a large number of Canadians will be realized some day, but he felt that at the present time it is important to maintain national unity.

"It did our hearts good to see the reception accorded the President of France, for this was a proof of the unity which exists between the different groups in Canada. We have made a great deal of progress and we do not want to go too fast by opening up controversial subjects. There are still a great many people who, in all sincerity, have not yet realized that these things could be done without causing them any injustice. I am not defending their attitude, but we have to consider all the elements in our population. We can make more progress by preserving harmony than by asserting our rights and aspirations too categorically."

Unemployment Insurance and Married Women

In reply to the suggestions concerning the amendments made to the Unemployment Insurance Act and Regulations relating to the payment of benefit to married women, the Prime Minister pointed out that it was important to keep the Unemployment Insurance fund on a solid basis, but promised that the Confederation's recommendations would be given serious consideration.

Civil Servants and Arsenal and Printing Bureau Employees

Referring to the recommendations concerning the right of association and collective bargaining for civil servants, the Prime Minister pointed out that civil servants are in a special position since they come under the Civil Service Commission, and their salaries are voted by Parliament and paid directly out of the national revenue.

"A system of collective agreements for civil servants," Mr. St. Laurent stated, "is incompatible with their special status in the country. However, there is nothing to prevent them from having their own unions and associations and presenting recommendations to the Government."

Arsenal employees, according to the Prime Minister, have the same freedom of association; however, arsenal managements prefer to negotiate directly with their employees, he said.

In reply to the question brought up by Mr. Georges Aimé Gagnon, President of the Printing Trades Federation of Canada, concerning the rate of wages paid to employees of the Government Printing Bureau, the Prime Minister said the State should pay its employees not better salaries, but just as good. "We do not wish to create a privileged class with our civil servants," he observed. "Where printers are concerned, as well as other groups of civil servants, the Government is attaining its objective, which is to pay salaries and wages equal to the average salaries and wages paid in industry."

The Prime Minister promised that if the charge that wages paid at the Government Printing Bureau are not equal to the average wages paid by good employers should prove to be correct, the Government will take steps to remedy the situation.

Railway Transportation Brotherhoods

On April 12, the Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods, representing the Brotherhood of Railroad Trainmen, the Brotherhood of Locomotive Engineers, the Order of Railroad Telegraphers, the Brotherhood of Locomotive Firemen and Enginemen, the Order of Railway Conductors, and the Brotherhood of Maintenance of Way Employees, presented its annual brief to the Cabinet. The brief, was read by the Committee Secretary, J. B. Ward, in the absence of A. J. Kelly, Chairman of the Joint Committee.

The delegation was welcomed by the Prime Minister, the Rt. Hon. Louis St. Laurent, the Hon. Milton Gregg, Minister of Labour, and other Cabinet members.

In his welcome to the delegates, Mr. St. Laurent said that in presenting the views of its members to the Government, labour "would serve to increase the welfare of the nation generally." Labour's awareness to certain "fundamental truths" was a source of satisfaction to the Cabinet, he said.

Replying to Mr. St. Laurent's welcome, Mr. Ward conveyed Mr. Kelly's regrets that he was unable to attend the meeting and present the Committee's submission.

The Railway Act

Referring to its "comprehensive review and study" of this Act presented to the Royal Commission on Transportation (L.G., April, 1951, p. 444) the Committee said that it had not had sufficient time to make a thorough study of the provisions in the report, and asked the privilege of making representations later. The Government was asked to amend that section of the Act which provided that municipal authorities

could apply to the Board of Transport Commissioners to have warning signals restricted. As a precaution, the Brotherhoods asked that "no such approval shall be given unless proper manual or mechanical warning devices are provided for each crossing within the limits prescribed by the application."

Customs Act

The Committee requested that customs duties and taxes on block signals, and other safety devices manufactured in the United States be removed. The Minister of Transport was commended for his "active interest" in the matter of the installation of such devices.

National Transportation Policy

The Committee expressed the view "that the basic question of division of legislative competence and lack of co-operation between governments," were the main problems to be solved in providing a national transportation policy. The practical solution to the problem required consideration by all governments, the brief said. Government action in establishing the Royal Commission on Transportation was commended, and the Committee said "we trust the recommendations of the Commission will be helpful to all."

St. Lawrence Waterways

Noting "recent and anticipated developments" in the factors surrounding the proposed St. Lawrence Waterways project, the Brotherhoods reaffirmed their opposition to the proposal. Recognizing the increased need for steel, the Committee suggested that it would be more beneficial to the Canadian economy to utilize facilities and raw materials available in the Maritime provinces.

The brief said:—

> We regard the value of the proposed seaway to Canada as theoretical, its cost very real, its need very doubtful and its possible effect must be viewed with concern in so far as transportation is involved.

Old Age Security

The Government was commended for appointing the Joint Committee on Old Age Security (L.G., April, 1950, p. 428), "the report of which we believe merits favourable consideration by federal and provincial governments."

The Brotherhoods urged the Government to give "leadership and direction" to protect security, and noted the increased interest and support of the public in the establishment of a comprehensive program of social security.

Industrial Relations and Disputes Investigation Act

It was claimed that although the Act provided an interpretation of the term "employers' organization", there was no interpretation for like groupings of employees, and it was urged that this deficiency be corrected.

Railway-Highway Crossings

The brief recommended that "in the construction and relocation of highways necessary to the Trans-Canada Highway project, no new level crossings should be permitted where engineering possibilities permit constructing the highway under or over the railway." The Brotherhoods also acknowledged the increased appropriation to the Grade Crossing Fund.

Unemployment Insurance Act

The recommendation was made that the Act be amended so that employees of the National Harbours Board railways are not excepted from coverage under the Act's provisions. At present, these employees on attaining permanent status, are excepted from the Act, and forfeit all previous contributions, the brief said.

Education

The Government was urged to "recognize and accept a share of the responsibility for the education of our citizens and lend assistance where the need can be shown to be beyond the reasonable capacity of those on whom the burden now falls. The same reasons which prompt the support of measures to protect and improve health can be quite properly applied to education."

Income Tax

It was requested that exemptions of $1,500 be allowed for single persons, $3,000 for married persons and $500 for each dependent. Dependents would include all students, regardless of age.

Price and Rent Control

The Brotherhood's brief considered: "the matter of price control will become increasingly important," because of the international situation and Canada's obligations, and strongly requested the reimposition of controls. The brief re-stated the stand adopted by labour in the presentation to the Cabinet on February 20 (L.G., April, 1951, p. 448).

Immigration

The committee approved the Government's policy of "selective immigration" and "partial financial assistance" for transportation. The brief said:—

> It is our view that with our natural resources and the expansive areas of Canada, capable of production and yet unpopulated, we cannot deny a haven to selected immigrants who are in need of an opportunity to become useful citizens. In turn we believe that with proper selection, supervision and encouragement those whom we befriend will assist in improving our national economy. The application of this policy demands extreme care in selection and a provision for education in our languages and way of life. It should also provide appropriate action to deal with those found to be unworthy.

Housing

General satisfaction was expressed by the railwaymen for Government action in providing "shelter and homes to meet the unprecedented demand." However, it was suggested that future policy be aimed at giving assistance "toward building of the average-priced permanent homes." The Government was asked to control the allocation and price of construction materials to facilitate such a program.

Labour and Public Bodies

Appreciation was expressed for the Government's policy of placing labour representatives on public bodies, boards and commissions. It was urged that this policy be extended to include the Senate.

Other Recommendations

Approval was also given the Government's leadership in scientific medical research, and health services. The Committee re-affirmed previous approval of government control of radio broadcasting through the Canadian Broadcasting Corporation.

Government's Reply

The Prime Minister, and Mr. Howe, Minister of Defence Production, explained the Government's attitude toward price controls at the present time.

Mr. Howe stressed the relationship between living costs in Canada and prices in the countries with which Canada trades, particularly the United States.

"If price control in the United States is effective—and they are having a difficult time of it—we will be able to do it," Mr. Howe told the delegation.

"But we honestly do not believe we can make it work today until the United States stabilizes prices," he declared.

In replying to this statement, Mr. Ward said: "Every Canadian citizen is a shareholder in the country. Recently over one million of those shareholders had asked for price controls, and tens of thousands more felt the same way. Because of the lack of controls, there was a feeling of frustration. The new budget added to this frustration because it lowered the standard of living. People on fixed incomes could not retain their living standard, and pensioners and others were finding it increasingly harder. Referring to the successful operation of controls during the war, and labour's willing participation, he said that as a result Canada had come out of the war better off than any other country in the world. People now wondered why the same thing could not be done," he concluded.

MINISTER OF LABOUR SPEAKS ON CANADIAN MANPOWER

Manpower problems connected with the preparedness program were dealt with by the Hon. Milton F. Gregg, Minister of Labour, in an address to the Ninth Annual Personnel Conference, in Toronto on April 13. Dealing with the employment outlook, in the light of future labour requirements, Mr. Gregg discussed methods of obtaining the necessary labour with the requisite skills, and stressed the importance of bearing in mind the human aspects of manpower problems. The text of the speech follows.

The subject which has been assigned to me tonight—Canadian Manpower—is a large and many-sided one. It involves in one way or another over five million men and women, engaged in thousands of different jobs under greatly varying conditions from one end of the country to the other.

The one factor, however, which stands out in all our plans on manpower is that we are dealing with a human problem.

It is this fact which I am sure is paramount in most of your thoughts and actions as personnel people. It is also the aspect of manpower which has always been of greatest interest to me.

And you, as personnel men, do I know join with me in thinking of the men and women we group under the term "Manpower", as our fellow-Canadians in Canada's work.

With a consciousness of this deep mutuality of interest, I am pleased to be able to talk to you tonight about some of the more important features of our present manpower situation.

Employment Aspects of Preparedness

This question, as is true today of most other aspects of our national life, is brought into bold relief by a concern about the manpower needs of our defence industries and of our armed forces. These have first priority in all our minds.

All the manpower problems connected with preparedness have not been solved, however, when the defence industries have been manned and the armed forces have been brought to required strength. Canada is still one of the world's most important raw material producing countries.

Canadian production of base metals and foodstuffs for example is essential, not only to the manufacture of military equipment and supplies, but also to the living standards in Canada and elsewhere. If in meeting the labour needs of the armed services and the defence industries proper, we leave the primary industries short of manpower we will not have made our maximum contribution.

Nor will we be playing our full part, if we fail, through lack of manpower, to continue to develop our industrial capacity. In the steel processing industry, for example, a new investment program is underway, which is expected to increase Canadian ingot capacity by about 20 per cent. All such additions to the capital equipment of the country are of particular importance should we have ahead of us a long period of preparedness.

We have, therefore, four main tasks before us—to increase our armed forces, to man the defence industries, to keep sufficient workers in our essential primary industries, and to have enough manpower for those investment projects necessary for further development of our natural resources and industrial capacity.

Let me turn to a brief review of the current employment situation with these four tasks in mind.

The Current Employment Situation

At present, overall requirements and supplies of manpower in Canada are in fairly close balance for this time of the year when judged by previous peacetime experience.

In the Maritime Provinces and in British Columbia, as well as in some parts of Quebec, we have some surpluses. In other parts of Quebec, in Ontario and in the Prairie Provinces, on the other hand, some shortages of certain skilled workers are appearing, with a few places with temporary surpluses, e.g., Windsor.

According to reports from our National Employment Service offices, we have now passed the usual seasonal decline in employment. As we enter the spring season, we can expect a steady increase in job opportunities.

The number of applications for employment at local employment offices across Canada reached a peak of 304,000 early in February. By March 29, this figure was down to 290,000.

Most of those now seeking work are unskilled and semi-skilled men and women who have been released from their seasonal jobs in agriculture, forest, transportation, construction and services. A smaller group of the unemployed has come from seasonal manufacturing industries and some have been laid off because of shortages of materials.

Relatively few are qualified at the moment to meet the demand for skilled workers in the metal fabricating industries. Machinists, tool and die makers, welders, sheet metal workers, draughtsmen and engineers are the skills at the moment most needed.

This specialized demand for workers is an indication that some defence industries are in a preliminary tooling up stage. The now-expanding aircraft industry, for example, is assembling its staff of key skilled workers on whom the employment of large numbers of semi-skilled men depends.

At present, a large proportion of skilled machine shop tradesmen are employed by firms producing automobiles, electrical apparatus, and machinery. Consumer demand for automobiles and household appliances has been especially strong in the last few months, although this demand may be modified following the changes recently made in the federal sales tax on such items.

Anticipation of price rises and material shortages has also meant an increase in plant expansion and production. This has meant that the skilled personnel in many of these industries has been fully employed.

Additional Labour Requirements

It is difficult to anticipate in any precise manner what the employment picture will be during the coming months when the world situation is so uncertain. Some general observations can be made, however, on the basis of existing trends and commitments.

The upswing in seasonal industries, which has now commenced, will absorb a major portion of the people now looking for jobs. Over and above this, additional men and women will be needed for the armed forces and for the expanding defence preparedness program, especially for the manufacture of aircraft, electronic equipment, naval vessels and sea installations and the construction of Navy, Army and Air Force training facilities.

Not all phases of this expanding program will involve new jobs. To some extent, manpower needs will be met by an internal shift in production from civilian to defence goods. Industries such as shipbuilding with unused capacity, can increase production without adding to all types of staff. On the other hand, a considerable proportion of present defence preparedness activities represents additional production; and to this extent involves additional labour requirements.

The expansion of long-term industrial capacity complementary to direct defence production is also important and the demands for manpower from this source are increasing. Hydro-electric power projects, iron ore and base metal developments and the construction of steel, petroleum refining and pulp and paper plants are all heavy labour-using activities.

Credit restrictions on residential construction are easing the situation somewhat, but the continuing high level of contracts awarded indicates that requirements for construction workers are not likely to fall off.

Available Labour Supplies

Where, you might ask, are the needed additional workers to be found? Broadly speaking, there are five groups which are available: (1) The normal seasonal increase in the labour force; (2) Natural increase; (3) Immigration; (4) Reserves of manpower; and (5) Transfers from non-essential to essential activities.

In the first of these, there is always a large group of workers in Canada employed only during the summer months. This group, composed mainly of students, women and retired persons, has numbered during recent years somewhat around 350,000. These additional seasonal workers, together with many of those unemployed during the winter months, go a long way towards meeting the peak summer labour requirements each year.

The second additional source of labour which can be counted upon every year is the natural increase in the labour force, amounting to something over 50,000 young workers annually (in addition to the number lost by retirement). We can expect our labour force to have a net increase by at least this amount during the coming twelve months on this account.

Another important source, if present expectations are realized, will be immigration. It is anticipated that around 150,000 persons (approximately 70,000 workers) may come to Canada during 1951. This would be the largest annual movement of workers into Canada since the twenties. Allowance must be made, on the other hand, for annual emigration which has

83139—3

amounted to approximately 15,000 workers during recent years, mostly to the United States.

Judging by World War II experience, it is possible, should it become necessary, to enlarge the regular labour force still further by drawing upon some potential reserves of labour. In 1950, for example, it was estimated that 54 per cent of all men and women in Canada, of 14 years of age and over, were in the labour force.

At the peak of employment in World War II, in 1944, the corresponding figure was 61 per cent. The participation ratios are much higher for males than females but it was the employment of more women during the war years that was largely responsible for the high total participation ratio at that time.

There are, then, a considerable number of workers in the present population, some of whom have had industrial experience, who can be drawn into the labour force if the need arises. If we assumed the same rates of participation and allowed for a nominal amount of unemployment arising from the movement of workers from one job to another, the potential reserve at June, 1950 was about 235,000 men and 475,000 women.

That is not to say that this number of workers would be as ready to participate in the labour force today as they or others did in 1944. The present situation is not the same as it was then. At that time we were in a state of total war and there was a concerted campaign to draw all grades of skill into the labour force.

Moreover, more women now have family responsibilities than during the war years, as is shown by the continuing high birth rates of recent years. The present scarcity of technical personnel is also likely to encourage a larger proportion of younger persons to remain longer in school.

The transfer of workers from non-essential to essential production is another important potential source of labour. As credit restrictions limit further increases in the demand for many goods and as certain materials are diverted into essential industries, we may expect further limitations on the expansion of non-defence industries. In some plants, shortages of materials may cause layoffs, which will release workers for jobs in defence industries.

It is not always necessary for men to change jobs, however, in order to produce defence equipment and supplies. Firms making parts for automobiles, for example, will not need to change their staff to make similar parts for aircraft. But even though some reconversion like this may take place, a certain amount of dislocation is inevitable.

This is all the more likely because there is not the same assurance as in the war period that the slack production in non-defence plants will immediately be filled by a defence order. The highly specialized defence program is significant here. Certainly we might expect pockets of unemployment in some areas, along with heavy demand for workers in others.

Thus, there are several sources of manpower available if the need arises. But we are today in a much better position to anticipate and to assist in meeting various manpower problems than we were ten years ago.

Much of the administrative machinery which was developed during World War II to handle the tremendous problems of those years is still available. In addition, the effectiveness of many of the more important of these manpower programs and agencies has since been considerably increased.

Manpower Agencies

Before referring to some of our regular agencies, I would like to mention the recently established National Advisory Council on Manpower. This Council composed of representative men and women from many sections of the country, including both management and labour, was set up to consider all aspects of manpower questions in the light of current developments. The Council is advising us on plans which are under review, as well as suggesting other plans which might be developed in order to make for the most effective utilization in the national interest of the present and potential working force in Canada.

Closely associated with the activities of this Council, as well as with those of our regular operational agencies, is the work of our Economics and Research Branch. Current analyses of the changing manpower situation are constantly made by this group as well as numerous enquiries into other aspects of labour problems. These analyses and research are especially important these days when conditions are changing so rapidly.

One of the key manpower agencies is our well-established National Employment Service. In almost 200 of the more important localities across Canada there is today a local National Employment Service office, staffed by well-trained and experienced personnel.

These offices perform a variety of services.

One of the most important has to do with the mobility of workers. Through a system of regional and national clearance, employers in areas of labour shortage are assisted in getting workers from areas of labour surplus. Another service to both employers and workers is that of finding suitable openings for handicapped persons.

A second development of the war years was the Federal-Provincial Farm Labour Program, organized by the Federal Department of Labour in co-operation with the Provincial Departments of Agriculture. Through this program, regular seasonal movements of workers are arranged between localities in different provinces, and between localities in Canada and in the United States.

Under a joint arrangement, begun shortly after the end of World War II, between the Department of Labour and the Department of Citizenship and Immigration, groups of workers from other countries are recruited and brought to Canada for types of work in which labour shortages exist. The efforts to bring together workers and jobs on an international basis through this joint program have proved beneficial to Canadian industries as well as to the workers themselves.

Another method of helping to match men and jobs is through training. The Canadian Vocational Training Program, developed by the Federal Department of Labour in co-operation with the Provincial Departments of Education, was greatly expanded during the war years.

This program has continued to provide valuable assistance in this important field during the post-war period.

The years required to train a fully qualified tradesman is an investment in the future growth of employment and production. On him depends the jobs of a large number of workers with lesser skills. An increase in the supply of skilled men is as essential as investment in new plant and machinery.

Since most of the training must be given on the job, school courses are at best only a supplement. In the training of skilled men, employers inevitably have a major responsibility. It is gratifying to know that some firms already have training programs in their plants.

In addition to training, productive capacity can be increased by skilful management practices which enlist the full co-operation of the workers.

I am sure you, as personnel men, know a great deal more about the day to day problems of measuring productivity than I do, and I do not presume to give you ready-made solutions.

What I want to do is draw your attention to the Labour Management Production Committees—the LMPC's as they are called—which the Industrial Relations Branch of my Department sponsors.

At the moment, there is a record of some 700 of these committees in operation, involving about 280,000 workers.

LMPC's are composed of representatives of labour and management and meet to discuss problems of production and efficiency. Typical LMPC's are concerned with ideas for reducing waste and rejects, with changes in design to overcome sales resistance, with suggestions for reducing accident hazards, for conserving tools and equipment, and for better use of skills. Though each item in itself may seem minor, the cumulative effects of a host of small improvements can bring significant increases in productivity. LMPC's are not for collective bargaining.

I am not suggesting, of course, that the establishment of an LMPC will create co-operation and understanding automatically. Like anything worthwhile, this can be acquired only by the cultivation of good-will and by co-operative efforts.

In Conclusion

Let me conclude briefly. In its simplest form, this manpower question is a matter of determining the qualifications and locations of our workers, to determine where they are most needed, and decide on the best method of getting them there.

If these steps can be taken by the use of existing instruments of government responsible to Parliament and the people, then these instruments should be used as Canada is using them. If our objectives can be accomplished with the minimum of compulsion and regimentation, that method should be maintained as long as possible. Whatever our methods, we must keep firmly in mind that these problems are, above all, human problems.

If the human side of the manpower problem is of paramount importance on the national level, it is even more vital in the plant. No elaborate machinery, no system of organizing the flow of production, however efficient it may appear on paper, can be fully effective if it fails to enlist the co-operation of the man on the job.

You, as personnel managers are the vital link between the men and women, your

83139—3½

fellow-Canadians, who work in your plants, and your top Executive. It is a role of increasing importance for greater production, for a higher standard of welfare of working personnel and finally for creating a good climate for the maintenance of industrial peace. With the tasks before Canada today, the industrial peace which now reigns is a condition of such vital importance we must all work together to see that it continues.

I notice your motto "Teamwork in Industry". I think it is a good one. I commend its spirit to you, in all your efforts and I wish your association great success.

CANADA'S NATIONAL ACCOUNTS: INCOME AND EXPENDITURE, 1939-1950

In 1950, Canadians produced goods and services to a total value of almost $18 billion. Canada's National Accounts show the components of this record production, expressed in terms similar to those used in the profit and loss statement of a business undertaking.

Statistics appearing in the *National Accounts: Income and Expenditure,** represent an attempt "to portray the working of the economy in much the same way as a profit and loss statement indicates the operations of a firm." Familiar accounting principles are used to describe transactions that take place in the country as a whole. Costs of production are entered on one side and receipts on the other. The cost side gives *gross national product,* and the other side *gross national expenditure.* A part of the cost shows earnings arising from production. These earnings are known as *net national income at factor cost.*

The working of the country's economy can best be summed up by a measure of its total production. This production includes: the goods and services provided by private industry, including individual enterprises; and services rendered by governments.

An adjustment must be made in the accounts to allow for foreign trade. Canadians not only receive goods and services from within the country, but also from abroad. Similarly, goods and services are exported to other countries. The trade balance between exports and imports, is an important factor in the national accounts.

The gross national product and gross national expenditure are *consolidated* accounts in the sense that sales of raw materials and other goods between businesses "are not counted as such because they are already accounted for in the market valuation of the components. For example, the market price of an automobile sold by firm A includes the value of tires bought from firm B. The value of these tires is not included again . . ."

The sequence of charts on the following pages is an attempt to give a graphic representation of the National Accounts. The accompanying tables present the accounts in detail. The following paragraphs define the expressions used in the accounts, and explain something of what they reveal of the national economy.

Net National Income and Gross National Product

Explanation of Terms.—The net income received by Canadians in a year can be measured by adding together the income earned by the four factors of production; capital, labour, land, and management. Estimates of the income earned by each of these factors is broken down to show the income derived by each one.

The estimate of salaries and wages is the largest single component of national income. In addition to cash payments to workers, it includes estimates of "supplementary labour income", which "comprise board and living allowances, employer contributions to pension and social insurance funds, and also the estimated value of board and living allowances received in kind."

The remainder of the net national income is made up of military pay and allowances; income from investment and profits from business; and the net income from agriculture and other unincorporated

* Published by Dominion Bureau of Statistics.

business, such as the corner grocery, doctors, lawyers, etc. Included in the total of military pay and allowances (in addition to actual cash payments), is an estimate for food and clothing received in kind.

Investment income consists of all returns on capital. It includes corporation profits before taxes, profits of government-owned enterprises such as Polymer Corporation, the Canadian National Railways, etc., net rental income received by persons, and money received in the form of interest from bank deposits, bonds and mortgages, etc.[1]

In general, these accounts include only "money incomes that arise in the production of goods and services going through market channels." Goods and services produced and consumed within the household (e.g. services of housewives) are not included.

There are some money receipts which are excluded from the national accounts. In particular, capital profits and losses, and certain cash payments within the economy ("transfer payments"), are excluded. These transfer payments are excluded "because they do not arise from current production of goods and services and cannot be called earnings from productive operations." Examples of this type of payment are unemployment insurance benefits, war service gratuities, family allowance, and interest on government debts not issued to finance existing real assets.

[1] The chief source of explanatory material in this article has been *The Canada Year Book*, 1947.

In computing the total of agricultural income, the amounts tabulated are confined to income received by farm operators from their farm operations only. Ancillary earnings from other sources such as forest work in winter, fishing, etc., are included elsewhere. An allowance is also made for food and other produce produced and consumed on the farm, as well as imputed rents. These amounts are included in the figures.

Gross national product "differs from national income in that it includes depreciation allowances and indirect taxes as measured at market prices." These items represent a part of the final market cost of goods and services to consumers or other final uses of the nation's output. Any subsidy payments to producers by governments are deducted because they "are regarded as enabling the public to buy goods and services at less than the prices that would otherwise prevail." These subsidies help to offset indirect taxes (such as sales, excise and real property taxes, treated as business costs), levied by governments.

Trends 1942-1949.—Both *gross national product* at market prices, and *net national income* at factor cost, have risen appreciably in the period between 1942 and 1950. It will be seen from Table 1 that gross national product fell below the previous year's total in only one year, 1945. (The peak of the war effort came in 1944). However, the decline in that year was only slightly over $100 million.

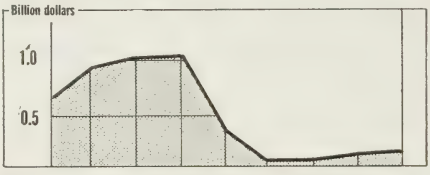
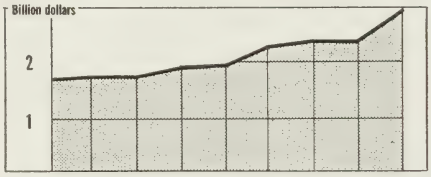
CANADA'S NATIONAL ACCOUNTS:

A BALANCED ACCOUNT OF THE OPERATION

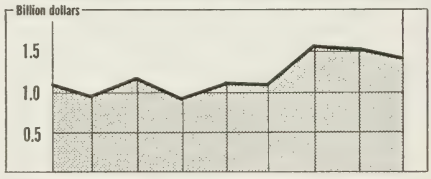


Canadians produced goods and services to a total value of $10½ billion in 1942, representing Canada's "INCOME" account, shows how the value of all the goods and market value of the goods and services produced. The right hand series, representing from one another, to the value of what they had produced.

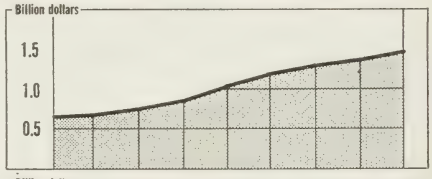
INCOME



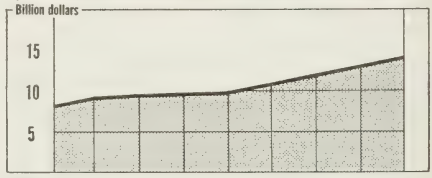
The greater part of the value of goods and services produced went to Canadians in the form of salaries and wages, which rose steadily between 1942 and 1950 . . .



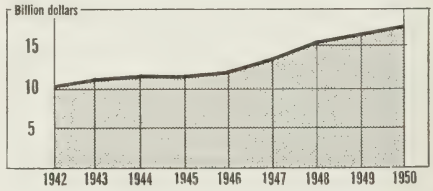
Military pay and allowances reached their wartime peak in 1945; then decreased rapidly after demobilization. In 1949, the figure again began to rise . . .



Investment income rose steadily between 1942 and 1948; declined in 1949 because of a lessening in corporation profits and increased again in 1950 . . .



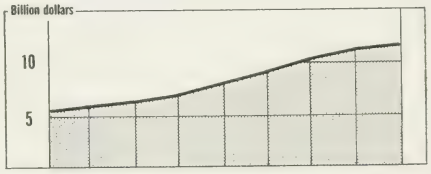
Income from farm operations fluctuated due to changes in prices and crop yield . . .



The operators of small unincorporated businesses enjoyed steadily increasing income . . .

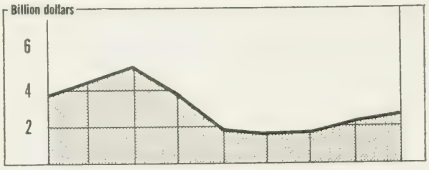
The total of these items represents the net cost of producing all the country's goods and services expressed in terms of the remuneration received by workers and capital; total income shared by Canadian workers and capital was therefore as follows . . .

To this total must be added indirect taxes, depreciation allowances, and similar business costs. The result gives the gross market value of the country's goods and services (defined as "gross national product at market value").



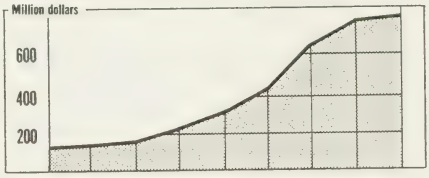
INCOME AND EXPENDITURE

OF THE NATIONAL ECONOMY, 1942—1950

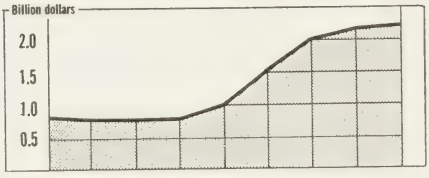


rising to a value of about $18 billion in 1950. The left-hand series of charts, services was divided among Canadians in the form of income, and gives the total Canada's "EXPENDITURE" account, shows how Canadians bought goods and services

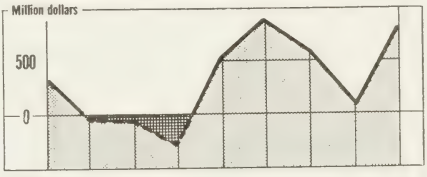
EXPENDITURE



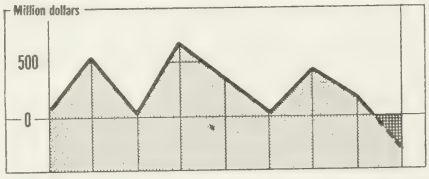
Canadians more than doubled their spending on consumer goods and services between 1942 and 1950 . . .



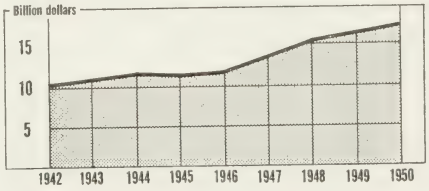
Government expenditures on goods and services reached their peak in the war years; declined sharply thereafter; and showed an upward movement after 1948 . . .



Expenditures on new residential housing increased nearly 6 times between 1942 and 1950 . . .



Expenditures by industry (including government corporations) on new plant and equipment reached their wartime peak in 1942. After the war, such capital investment expanded enormously . . .



Inventories declined during the period of wartime scarcities, but have increased in each subsequent year. The chart shows the net change in each year . . .

Canada maintained a favourable balance of trade, although there were wide variations, until 1950 when a deficit occurred . . .

All these items combined give the total value of Canada's goods and services, expressed in terms of expenditure, and defined as "gross national expenditure at market prices" . . .

In 1949, gross national product reached $16,382 million, a 4 per cent increase over 1948. The tables reflect the high level of economic activity in the country during the past few years. "Since it is measured in terms of current dollars, the gross national product reflects price changes as well as changes in the physical volume of production. If adjustments are made for the influence of price changes, an increase of approximately 2 per cent in (real) output of goods and services is indicated for 1949 over 1948.

"During the post-war years, from 1946 to 1949, the value of total output increased by 34 per cent. The rise in value was most rapid during 1947 and 1948, the years of the greatest price increases. However, with the effect of price increases removed, the total volume of output shows a steady gain of approximately 2 per cent per year.

"The national income, measured in current dollars increased about 5 per cent from 1948 to 1949, from $12,474 million to $13,169 million. The increase was mainly due to a rise in salaries, wages, and supplementary labour income of $661 million, from $7,139 million to $7,800 million, which more than offset small declines in net income of farm operators from current farm production, and in investment income. Net income of farm operators fell by 4 per cent, from $1,567 million in 1948 to $1,509 million in 1949, despite higher wheat adjustment payments to farmers. The decline was largely due to a lower volume of physical production. Investment income also declined slightly, from $2,379 million in 1948 to $2,367 million in 1949, attributable to a decline in corporation profits, the largest single component of investment income."

Preliminary Estimates for 1950.—Preliminary estimates by the Bureau of Statistics, for gross national product during 1950, reached a record total value of $17·8 billion. This is a gain of $1·4 billion (8 per cent) over the former peak of $16·4 billion reached in 1949. It is estimated that a substantial part of the rise is due to price increases, but between three and four per cent of the rise represents an increase in the volume of goods and services produced.

National income also increased by eight per cent in 1950 over 1949, from $13,169 million to $14,308 million. "Salaries, wages and supplementary labour income showed a gain of six per cent, rising from $7,800 million in 1949 to $8,300 million in 1950. High levels of employment, combined with an increase in average hourly earnings, were mainly responsible for the rise in labour income. Most of the major industrial groups shared in this increase with the exception of agriculture. This industry experienced a decline in the number of farm workers.

"Investment income increased by approximately 20 per cent, from $2,367 million in 1949, to $2,996 million in 1950. Corporation profits, net rents received by individuals, and trading profits of government enterprises shared in this increase.

"Net income of farm operators from farm production was somewhat lower in 1950

[2] Excludes certain government housing expenditures.
[3] Excludes UNRRA, Mutual Aid, etc.
[4] Includes Newfoundland.

than in 1949. Farm cash income was substantially lower, mainly as a result of a lower initial payment price of wheat, and lower equalization and participation payments from the Canadian Wheat Board. At the same time, operating expenses were higher in 1940 than in 1949. However, there occurred a substantial accumulation of inventories held on farms. The net effect of these factors was that net farm income declined by six per cent, from $1,513 million to $1,424 million. On the other hand, net income of other unincorporated businesses, including professional income, rose by nearly six per cent, from $1.374 million in 1949 to $1,451 million in 1950."

Among the items showing an increase in 1950, were indirect tax collections, depreciation costs, and similar business costs. The rise in indirect tax collections resulted from higher prices, a greater volume of purchases, and the increased indirect tax rates approved by Parliament in September. In connection with this, there was a slight decline in subsidies. Indirect taxes (less subsidies) increased about 8½ per cent from $1,831 million in 1949 to $2.001 million in 1950. The 11 per cent rise in depreciation allowances and similar business costs, from $1,321 million in 1949 to $1,471 million in 1950, "is largely the result of depreciation allowances on the large volume of new capital investment which was completed in 1950."

Gross National Expenditure

Explanation of Terms.—The gross national product side of the national accounts shows the market value of final goods and services produced in the country. However, these goods and services must be disposed of in some way. They are sold, either at home or abroad, or added to inventories. This disposal of the national product is accounted for in the *gross national expenditure* at market price which is a measure of the same total as gross national product, but appearing in a different way.

Four main components are added together to give gross national expenditure. These are: personal expenditures on consumer goods and services; government expenditures on goods and services; gross home investment in plant, equipment, housing and inventories; and net investment abroad (exports of goods and services minus imports).

Consumer expenditures are made up of purchases by Canadian residents for personal goods and services, such as food, clothing, rent, automobiles, etc. Expendi-

[1] Includes all government debt interest paid to persons.
[2] Includes Newfoundland.

tures for new housing are not included with personal expenditure, but are listed under housing, which appears under investment.

Government expenditures include purchases by all levels of government, federal, provincial and municipal, of final goods and services. Broadly speaking, this total falls into two groups: government expenditures on services (salaries, wages and interest); and purchases of the products of business. Other government expenditures for both war and non-war purposes are shown separately, and outlays for things other than goods and services (e.g. transfer payments) are not included in the accounts. (See above p. 657.)

Outlays for investment at home are divided into "expenditure on new plant and equipment, including residential and commercial construction as well as expenditure for replacement of existing plant and equipment; and the net change in inventory." It is here that investment by government enterprise such as the CNR, TCA, and utilities appear.

Lastly, entries are made to show the values of Canada's exports and imports of goods and services abroad. Included in the total of gross national expenditure is Canada's net balance of trade for the year, exports of goods and services, minus imports. Exports of Canadian goods and services represent a part of the total Canadian production of these products. Imports, on the other hand, represent goods and services produced outside of Canada, and are not a part of Canadian production.

Trends 1942-1949.—In analysing this table of gross national expenditure, the Dominion Bureau of Statistics has noted that:—

"All components of the gross national expenditure except exports and investment in inventories showed an increase between 1948 and 1949. Personal expenditure on consumer goods and services increased from $10,151 million in 1948 to $11,086 million in 1949. If corrections are made for price changes, an increase of about 2 per cent in the real volume of consumer goods and services is indicated.

"Government expenditure on goods and service increased by $291 million, from $1,797 million in 1948 to $2,333 million in 1949. This increase is mainly due to increased defence expenditures and larger outlays by the provincial and municipal governments on public health, hospital care, maintenance of highways, education and certain capital expenditures.

"The aggregate of gross home investment showed a decline of $194 million, from $3,272 million in 1948 to $3,078 million in 1949. As indicated above, this decline was due entirely to a decline in investment in inventories from $609 million in 1948 to $108 million in 1949. Investment in housing, on the other hand, rose

substantially from $647 million in 1948, to $753 million in 1949. If price changes are accounted for, the rise in the volume of new housing was approximately 11 per cent. While the value of investment in plant and equipment increased slightly from $2,016 million in 1948 to $2,076 in 1949, a small decline actually took place if the influence of price changes is eliminated.

"Total exports of goods and services declined slightly from 1948 to 1949, by $43 million. Imports, on the other hand, increased by $201 million, thus leaving a net foreign balance of $174 million in 1949 compared with $418 million in 1948."

Preliminary Estimates for 1950.—All sectors of the economy, business, persons and governments, increased their expenditures during 1950, according to preliminary estimates. Personal expenditures on goods and services showed an increase of almost 7 per cent, from $11,086 million in 1949, to $11,810 million in 1950. The Bureau of Statistics said that "much of this increase was taken up by higher prices, but a gain of approximately 3 per cent in the volume of consumer purchases is indicated."

Commenting on the gross national expenditure figures for 1950, the preliminary statement said: —

"Expenditure on goods and services by federal, provincial and municipal governments rose approximately 10 per cent, from $2,106 million in 1949 to $2,333 million in 1950. At the federal level there was a considerable increase in defence expenditure. The rise in expenditure at the provincial and municipal levels was mainly due to higher operating costs, increases in capital expenditure, and flood relief in Manitoba. Despite these increases, government expenditure on goods and services absorbed only about 13 per cent of the nation's total production in 1950, approximately the same as in 1949.

"Expenditures on construction and equipment for general government purposes is included in the figures of government expenditures on goods and services referred to above. The remainder of the nation's outlay for capital investment in housing, plant, equipment, and inventories, made by private and government-operated businesses and by individuals is analysed below.

"The value of new residential construction was $782 million in 1950 . . . (compared with) the figure of $741 million in 1949. Investment in plant and equipment increased from $2,220 million in 1949 to $2,375 million in 1950, a gain of 7 per cent. At the same time, investment in inventories showed a large increase in both value and volume terms. In 1950 the change in inventories amounted to $805 million, compared with $108 million in 1949. Both farm and non-farm inventories shared in the rise in inventory accumulation. Taken together, total investment in housing, plant, equipment, and inventories by private and government businesses and by individuals, apparently absorbed a larger percentage of the gross national product in 1950 than in 1949.

"The upsurge of demand related to expanding defence programs, rising levels of income, the progressive removal of import restrictions, and the relaxation of exchange controls in 1950, led to a marked upswing in the value of merchandise imports from the United States. At the same time a gradual recovery of production in Europe and the improved bargaining position of the European seller in Canadian markets resulting from the re-alignment of currencies in 1949, made possible an increase in merchandise imports from the non-dollar countries. Thus, the value of total imports of goods and services showed an increase of 17 per cent over 1949, rising from $3,837 million to $4,482 million.

"On the other hand, the value of total exports of goods and services increased only moderately in 1950, from $4,011 million to $4,173 million, or by 4 per cent. Although merchandise exports to the United States showed a notable rise of approximately 35 per cent over 1949, this increase was offset to a considerable extent by a decline of 33 per cent in the value of merchandise exports to the United Kingdom.

Personal Income and Its Disposition.—How much Canadians spend for consumer goods and services depends upon their personal incomes, their taxes and how much they decide to save, borrow or spend out of previous savings.

Personal income includes unearned income such as family allowances and unemployment insurance benefits, in addition to current earnings paid out to persons. This amounted to $13,327 million, a gain of 5 per cent over 1949. The increase is mainly attributable to salaries, wages and supplementary labour income, but government transfer payments and interest, dividends and net rental income of persons also increased considerably.

"As indicated above, personal expenditure on goods and services increased by 7 per cent from 1949 to 1950, but there was considerable variation as between com-

ponents of personal expenditure. Major gains were recorded for purchases of most durable goods, particularly automobiles, which rose by approximately 60 per cent over 1949. On the other hand, a number of components in the semi-durable goods group, such as clothing, showed a decline. The increase in expenditure on food was almost entirely accounted for by price increases. Of the services, user-operated transportation, and household utilities including rents, showed the highest increases."

VIEWS OF ROYAL COMMISSION ON RELATIONS BETWEEN RAILWAY COMPANIES AND EMPLOYEES

On March 15, the Report of the Royal Commission on Transportation was tabled in the House of Commons (L.G., April, 1951, p. 444). The Commission devoted Chapter XII of its Report to an examination of labour-management relations in the railway industry, and this chapter is reprinted herewith.

The submissions to the Commission on the subject of wages to railway employees were most general in character. The Province of Manitoba said that these wages should be "looked into". The City of Winnipeg and the Winnipeg Chamber of Commerce said they should be "investigated". The Manitoba Federation of Agriculture said that wage increases should be "scrutinized". The Alberta Dairymen's Association made reference to the fact that the Board has no jurisdiction over the "largest single item of operating expenses" of the railways. The Canadian Federation of Agriculture stated that railway employees are the best paid workers in Canada and suggested that the Board should have power in hearing applications by the railways for rate increases to examine whether improvement in the efficiency of railway operations had followed wage increases. Other briefs suggested that the railway employees were receiving higher average pay than the employees of other industries and that the Commission should study the propriety of these wages.

The Canadian Congress of Labour represented that railway freight rates must be sufficient to enable the railways to pay proper wages and that there should be an obligation on the Board of Transport Commissioners to see that this object is attained. They said that railway freight rates should be high enough to ensure proper wages to employees and a proper return to the railways on their investment. The International Railway Labour Organization said that it does not believe that the Board of Transport Commissioners should exercise any authority over wages.

The spokesman for the Brotherhood of Railroad Trainmen said that wage rates on Canadian railways are approximately 20 to 25 cents per hour below those on American railways and made the statement that: "there cannot be full satisfaction of the employees' views and demands until the Canadian-United States parity is restored." This last reference is to the substantial parity which existed between 1918 and 1922 by reason of the McAdoo Award.

The wage disbursements of a railway company is a significant item in its operating costs. In 1949 the ratio of wages to operating expenses was 56·5 per cent in the case of the Canadian Pacific with a payroll of $202,700,000 and 59·5 per cent in the case of the Canadian National with a payroll of $284,500,000.

Relations Between Companies and Employees

In the ordinary course of business, relations between railways and their employees in respect of their reciprocal obligations, including wage questions, are the same as in the case of other industries. Special regulation of industrial relations, intended to define and govern the respective rights and duties of employees and employers and to provide a procedure for the settlement of their disputes, is set up in the Industrial Relations and Disputes Investigation Act, 1948. This Act deals mainly with such subjects as (1) the right of employers and employees to organize for the protection and advancement of their respective interests; (2) the prevention of unfair labour practices; (3) collective

bargaining and collective agreements; (4) strikes and lockouts; (5) conciliation proceedings, and (6) industrial inquiries directed to the maintenance of peaceable relations, between employers and employees and the promotion of conditions favourable to the settlement of disputes.

The Act provides that the Minister of Labour shall be charged with its administration and creates and defines the powers and duties of the Canada Labour Relations Board as a successor to the Wartime Labour Relations Board which was established in 1944.

The object of the Act is to preserve the ordinary rights of employers and employees in industry, directing and limiting them only in so far as is necessary to secure just and reasonable conditions of employment and to promote the speedy settlement of disputes in the interest of the parties primarily concerned and of the public whom the industry serves.

In the matter of strikes and lockouts the Act imposes no obligations on the parties which would, in the long run, deprive the employer of the right to declare a lockout or the employees of the right to go on strike. The Act merely enjoins a reasonable delay in the exercise of these rights by setting up a procedure which the parties must follow and which must be allowed to complete its course before the strike or the lockout can take place.

When the dispute has come to a head a conciliation board is appointed whose duty it is to endeavour to bring about agreement between the parties. After the completion of its proceedings the Board, either unanimously or by a majority of its members, reports its findings and its recommendation to the Minister. If both parties accept the recommendation of the Board by agreement in writing, it becomes binding on them. If either declines, the attempt to settle the dispute has failed and both parties become free to exercise the rights held in abeyance during the course of the proceedings. The strike or lockout will then take place unless, of course, the parties, spontaneously or by mediation, effect a settlement on some other basis.

Recent Experiences

In the winter of 1948, a demand for a wage increase by railway employees led to the appointment of a Conciliation Board. The Board recommended an increase which was less than the employees had asked for and which they rejected. A strike was declared for a future date and there was no legal impediment to its taking place. Before the date arrived mediation was undertaken on the initiative of the Minister of Labour in the interest of the public. The wage demand was for an increase of 35 cents per hour. The Conciliation Board had recommended an increase of 7 cents. As a result of the mediation an increase of 17 cents per hour was agreed upon by the railways and the workers, and the strike was averted.

In the summer of 1950 a similar situation arose. Another wage demand was followed by the appointment of a Conciliation Board, the Board made a recommendation which the employees rejected, and a strike date was set. Again mediation was initiated by the Minister of Labour. This time the mediation failed and the strike took place.

The effect of the strike was calamitous. The truck, the bus, and the plane, put forth a great effort of relief. But the Canadian people realized at once that the economic life of this country of great distances is dependent upon the service of the railways. Parliament was called into special session and emergency legislation was passed directing the resumption, within 48 hours, of railway transportation services by the companies and by their employees. The government stated that the purpose of the legislation was to deal with the national emergency then existing, and that it was not intended to provide a permanent procedure for the handling of relations between the railway companies and their employees.

The companies and the employees complied with the emergency statute and railway operations were resumed. The strike had lasted from the 22nd to the 30th day of August. The differences outstanding between the parties were then settled by an arbitrator appointed under the provisions of the legislation.

Suggestions for the Future

As appears from the foregoing, relations between railway companies and their employees have been governed by the same rules as those which prevail in the case of all other industries within the jurisdiction of the Parliament of Canada. It has been suggested that a change be made and that a new scheme of regulation in these matters be set up by statute.

The principal suggestion made for the handling of railway wage questions is founded on the postulate (1) that wages are a major item of railway operation costs consuming as they do over 50 per cent of the earnings of the companies; (2) that these earnings consist of revenue derived from rates paid by shippers; (3) that therefore the real conflict in rate and wage disputes is between labour and the shippers;

(4) that, in consequence of all this, railway wage negotiations should be conducted by a body upon which the shippers are represented, either by a person nominated by shippers' organizations or by a member of the Board of Transport Commissioners acting in their interests.

Railway operations, by their very nature, require a great expenditure of manpower. Whether the use of manpower is greater in the case of railways than in that of other industries whose output of goods or services might be measured with the output (transportation) of railways, is a question which has not been determined. No information on this subject was furnished to the Commission probably because of the difficulty which would be encountered in trying to build up a fair comparison. But the argument founded on the volume of labour involved in railway operations seems to intimate to railway employees that, because there are so many of them, they should agree that the principal factor in fixing the exchange value of their labour should not be its real money value, as in the case of other workers, but rather the compensation which the "consumers", of what they help to produce, can be brought to agree upon; that in effect these consumers (the shippers) are their employers and not the companies who engage them and regulate their work.

Although all industries must depend for their revenue on the sale to the public of the fruit of their production, the Commission knows of no other industry whereof the workers are asked to assume the position here assigned to railway employees; where they are required to bring their wage demands, not to the company for which they are presumed to be working, but to the consumers of the article (transportation) which the company produces, in part by their labour, and offers for sale. The consumers of coal, of clothing, of automobiles and probably of all other industries, have no such voice in the fixing of the wages of miners, of textile workers, of the employees of car factories, etc. It may well be imagined how the enforcement of such a peculiar doctrine in the case of railway employees would lead in course of time (if it led to nothing worse), to the desertion of that industry by the labour element of the population.

At the same time railway employees themselves must bear in mind that they have a common interest with the companies in keeping the cost of operation within limits which will enable the railways to compete on a fair basis with other transportation agencies.

It is further consequence of the above doctrine of shipper-participation in the fixing of the wages of railway employees, that these same shippers would continue to have nothing to say in regard to the other items of expense which the companies incur in the course of their operations and which enter also into the cost which must be met by rates. These other necessary ingredients of operation would continue, as is the case today, to be purchased by the companies at their market price notwithstanding their effect on the sum of the freight rates paid by the shippers. The "purchase" of labour only would be subject to the approval of the "consumers".

The foregoing suggestion goes on to recommend that a larger wage-fixing body than the present Conciliation Board provided by statute be set up to deal with railway wage demands and that the findings of this body be made binding upon all concerned. In effect this is the procedure of compulsory arbitration. It is then said, however, that if the principle of compulsory arbitration should be found too drastic, another procedure should be set up which would meet a situation of wage demands on the one hand and the opposition of shippers' interests on the other, by recommending the payment of government subsidies to satisfy the demands wholly or in part. The body empowered to make this recommendation would be the Board of Transport Commissioners or another body upon which that Board would be represented by one of its members.

It would be a grave mistake to impose upon the Board of Transport Commissioners the duty of fixing or of taking part in the fixing of the wages of railway employees or of recommending subsidies to be paid by the Government. The duty of the Board of Transport Commissioners is to fix just and reasonable rates, that is just and reasonable in respect to the carriers on the one hand and the shippers or consignees on the other, for the service performed. It would be impossible for them to perform this duty adequately if these extraneous questions of the fixing of railway wages and the recommending of subsidies were mixed with it.

No special legislation should be passed for the handling of railway wage disputes and the prevention of strikes or lockouts. Legislation of the kind suggested would be highly provocative and in practice ineffective. It would settle nothing and encourage dangerous agitation. The railway industry should continue to be governed in this respect by the provisions of

the Industrial Relations and Disputes Investigation Act as in the case of all other industries regulated by Federal authority.

The strike of 1950 is the first general railway strike in Canada's history, that is in all the 83 years since Confederation. It has served one good purpose in that it has made all Canadians, railway officers, railway employees and citizens in general, realize what a disastrous occurrence such a strike is. We are not likely to have another such experience in the near future. The best thing to do now is to leave the situation as it is in so far as legislation is concerned. If another similar emergency ever occurs it will have to be dealt with by those in charge of national affairs at the time of the occurrence.

INTERNATIONAL STUDY OF PROFIT-SHARING PLANS

That a profit-sharing plan should be among the last, and not among the first, items to be introduced in a well-rounded industrial relations program, is the conclusion reached by an official of the International Labour Office following a study of profit-sharing plans operating in a number of countries.

As a method of promoting employer-worker collaboration and increasing the productivity of labour, profit-sharing has been attracting widespread interest. Recent developments in this field in a number of countries are surveyed briefly in an article by Mr. P. S. Narasimhan, of the International Labour Office, in the December issue of *International Labour Review*. Both voluntary schemes, with special reference to experience in the United Kingdom and the United States, and compulsory schemes established by law or by awards of industrial tribunals, are reviewed.

Principles of Profit-Sharing

Profit-sharing, the author points out, is "a method of industrial remuneration under which an employer gives the bulk of his employees a share in the net profits of the enterprise in addition to their regular wages," and must not be confused with systems of incentive payments such as the production or attendance bonus, which are not directly related to profits earned. A scheme, to be genuine, he explains, should satisfy four requirements:—

(1) it should provide for a regular grant to the employees, in addition to the wage or salary, of a share in the net profits;

(2) it should apply not only to a few executives in responsible managerial positions, but to the bulk of the employees;

(3) the share of the profits set aside for distribution among the workers, and the formula by which each individual share is calculated, when once announced, should not be subject to changes introduced unilaterally by management; and

(4) the grant, being subject to fluctuations, should in no sense be regarded as a substitute for wages.

Voluntary Schemes

The earliest known schemes of profit-sharing, according to the review, date back at least to 1820 in France, to the 1860's in England, and to 1869 in the United States. In none of these countries has there been any attempt to make profit-sharing a statutory obligation.

Objectives.—The objectives which have led managements to institute profit-sharing schemes have been diverse and not always explicitly stated. More important among the declared objectives have been:—

(1) the prevention of strikes and improvement of worker morale;

(2) an incentive to greater efficiency and increased output;

(3) achievement of a measure of flexibility in the total payroll, enabling automatic adjustment of the total remuneration of labour to business fluctuations;

(4) reduction of labour turnover and stabilization of the labour force;

(5) promotion of thrift and a sense of security among the workers;

(6) greater publicity for the firm;

(7) preservation of capitalism by giving the worker a stake in its continued existence.

Occasionally, the author states, managements have been impelled by "more dubious and less publicized objectives," such as a desire to use profit-sharing schemes to weaken a trade union; as an alternative to paying the prevailing wage scales; or as a convenient way of meeting the workers' demand for retirement pensions without committing management to a definite schedule of contributions, such as would be required under a formal pension plan with fixed benefits. Another motive, which was perhaps the most important reason for the wartime and immediate postwar popularity of profit-sharing in the United States, has been the desire to avoid taxation.

Methods.—The formulae adopted for determining the proportion of the profits to be distributed among the employees, and the method of allocation, were found to vary widely but, broadly, they fall into three main types:—

(1) the direct sharing of profits;
(2) the wage-dividend plan; and
(3) the percentage of pay system.

The most common is the first type, under which the employees' share is fixed at a definite percentage of the profits earned. In some schemes the profits are divided before making any provision for a return on capital or the payment of taxes, while in others only the balance after such deductions is taken into account in computing the employees' share. Under the wage-dividend plans, the employees' share is related only to the dividends declared for shareholders. Under the third type, each time the profits reach a specified level the employees receive a percentage on their pay as a bonus.

The share accruing to each worker may be paid to him either in cash at regular intervals ("current distribution" plan), or it may be credited to his account in a trust fund ("deferred distribution" plan), from which he can draw his accumulated share, with interest, only in certain specified contingencies such as retirement, termination of employment, illness, or permanent disability. Profit-sharing plans of the first type have generally proved to be the more popular, as distribution of the wage-earner's share of the profits in the form of cash at regular intervals, as and when the shareholders receive their dividends, has the advantage of bringing home to him more clearly his interest in the prosperity of the concern. The method of distribution, however, depends on the objective of the plan.

Results.—The history of profit-sharing in all countries where it has been left to voluntary enterprise, as in the United Kingdom and the United States, is "full of examples of plans started with high hopes and ended in failure, sometimes after many years of operation," the author states. "In a few rather exceptional cases it has been a spectacular success, but judging from the long list of abandoned plans and the comparatively small number that have endured for more than a few years, the contribution that profit-sharing can make to the promotion of healthy and happy industrial relations, and to more efficient production, seems to be rather problematical."

Evidence as to the extent to which the various objectives which led to the setting up of profit-sharing schemes have been realized is conflicting. A survey made by the National Industrial Conference Board in 1947 of 167 firms in the United States with profit-sharing plans, disclosed that as many as 40 per cent of the firms with deferred distribution plans, and 41·8 per cent with current distribution plans, either felt that profit-sharing had made no contribution to improving employee morale or found its contribution too difficult to evaluate.

The evidence is equally conflicting regarding the effect on employee efficiency and stability of the labour force. One of the firms covered by the survey reported an increase of 11 per cent in over-all efficiency and a reduction of 50 per cent in scrapped material. Another commented that a profit-sharing plan does not take the place of properly conceived incentives: "It is all but impossible in a large organization for an individual employee to connect his efforts particularly with the over-all profits earned by the company. Again, in years of poor business he knows that he has worked just as hard and perhaps harder than he did during the prosperous years and yet there is no profit to share, or a blunder of management has offset his best efforts for twelve months."

A general complaint is that after a certain time the employees come to regard the profit bonus as a part of their regular wages, often spend the expected income in advance, and become discontented if on account of a fall in profits the bonus has either to be reduced or suspended.

In some cases, carefully formulated plans of profit-sharing, worked out in full co-operation with the trade union concerned, and introduced after a good deal of employee education, have led to substantial decreases in the labour cost of production per unit but, on the whole, profit-sharing does not seem to have increased efficiency appreciably, it is observed.

An examination undertaken by the United States Senate in 1938 of the strike records of profit-sharing companies did reveal that they had significantly fewer strikes, both major and minor, than non-profit-sharing firms.

Commenting on the claim that profit-sharing can be used to give the worker a sense of security, by providing for his retirement benefits financed from a trust fund, the author says, "Organized labour is increasingly coming to regard the provision of a minimum measure of income security as part of the social obligations devolving on the state, to be financed partly by fixed contributions from the employer calculated on an actuarial basis, instead of by contributions which would fluctuate with the profit-ability of the business." The hope that by basing a retirement plan on company profits the employees might be made more conscious of the connection between their own efforts and the profits earned by the enterprise has in most cases failed to materialize, he observes.

A major factor in determining the fate of most profit-sharing schemes has been the attitude of organized labour, it is stated. In a number of cases the unions have opposed them on the grounds that any profits a business can afford to distribute to its employees should be included in their basic wage rates; that a share in the profits can in no circumstances be a substitute for a fair wage; and that profit-sharing schemes hinder the mobility of labour and militate against the organization of the employees.

Statutory Profit-Sharing Schemes

In a number of Latin-American countries profit-sharing in one form or another has been made compulsory by law. Such legislation, the author states, seems to have been prompted more by a belief in profit-sharing as an instrument to promote social justice, by granting the worker a share in the net income earned by the undertaking employing him, than by any belief in it as a method of reducing industrial strife or of increasing labour efficiency.

As the lines on which the worker's share of the profits is calculated are prescribed by law, there is no question of adjusting the profit-sharing scheme to the needs of a particular undertaking, or of working out its details in co-operation with representatives of the employees.

Schemes vary considerably between the Latin-American countries, both as regards selection of the industry brought within their scope, and the workers' share and method of distribution. In some countries the compulsory sharing of profits applies to all industries and commercial undertakings earning a net profit or a profit in excess of a stated amount, while in others the amount of capital and number of employees are the determining factors.

The workers' share of the profits is in some cases a specified percentage of the net profits, sometimes with a proviso that it shall not exceed a stated percentage of the wage. In Colombia, the participation by each employee is determined in accordance with a points system based on wage or salary earned, family responsibilities, seniority, regularity of attendance, and efficiency and honesty. In most cases, a portion only of the workers' share is distributable in cash, the remainder being deposited on his behalf, and withdrawal permitted only under certain specified conditions.

The Labour Code of Chile provides that half the share of the profits shall be paid to the works union of the undertaking, to be used for purposes specified by law, and the other half to be distributed among those employees who are members of the union, and who have worked the required number of days.

Collective Schemes in Eastern Europe

A different type of profit-sharing, in which a share of the profits earned by an undertaking is not given individually to each of its employees, but is allotted to the workers' organization concerned for the financing of welfare measures which benefit the workers as a group, has recently been adopted in some of the countries of Eastern Europe. Such a scheme was introduced by statute in Czechoslovakia in 1945. Provision is made for the setting up of a works fund in each national undertaking, financed by a share of the profits made by the undertaking. The main purpose of the fund, it is stated, is the improvement of the social, health and cultural conditions of the workers.

In Hungary, a system of profit-sharing in state undertakings was introduced in 1949 to reward workers who help to cut costs of production in accordance with plans drawn up by such undertakings. Under the system, the sum-total of profits to be paid to the Treasury by all undertakings in one economic category is first determined, and a sum representing two per cent of the total amount of the profits

to be paid by the group is divided by the total number of workers employed in all the undertakings belonging to that category in the preceding year. The quotient so obtained is regarded as the average amount to be paid to each worker, and every undertaking concerned is paid a share corresponding to this average multiplied by the number of its employees. When the profits of an undertaking are in excess of the amount anticipated, its share is increased, but may not exceed 10 per cent of the profits.

The share paid to the undertaking is utilized by its manager in consultation with the works committee. Forty per cent must be set aside for individual rewards, and 60 per cent used for purposes of general interest to all the workers in the undertaking.

A similar scheme is also reported to be in operation in Bulgaria, where five per cent of the net profits of State undertakings are deposited in a fund for the grant of bonuses to workers and the amelioration of their living conditions.

Awards of Industrial Tribunals

In India, a number of profit-sharing schemes have been introduced in recent years, either voluntarily by employers or compulsory by awards of industrial tribunals. The greater proportion, however, have resulted from awards.

In a number of industrial disputes during recent years, the author reports, the tribunals have, in general, upheld the claim of the workers to a share in the profits earned by the enterprises in which they work, taking the view that profits are the result of the joint effort of the workers and management, and should be shared by both. They further justified the award on the twofold grounds that the worker's wage in the industry concerned fell short of a living wage, and that the industry was earning much more than a fair return on the capital employed.

In determining the share of the bonus, different tribunals have adopted different criteria, though all of them have generally tried to link it to the net profits earned by the industry during the year, its financial condition, and capacity to bear the burden.

"It is difficult to see," the author comments, "how schemes enforced by the awards of industrial tribunals could either create between capital and labour that sense of partnership in a common venture, or provide that direct incentive to increased efficiency which are among the most important advantages claimed on behalf of profit-sharing."

Conclusions

The first element which should be present if a scheme is to be a success, the author states, is "a record of management-labour co-operation and mutual tolerance and confidence." The ideal type of profit-sharing, he concludes, would appear to be one under which each enterprise works out the details of the scheme in co-operation with the trade union representing its employees, and introduces and administers it in full and complete collaboration with the union. "Such a scheme could be adjusted to meet the special needs of each enterprise. It would be clearly understood by the employees, and might be expected to reduce industrial strife and promote efficiency. It could be modified from time to time, as the need arose, by mutual agreement between the employer and the union, and would promote between them that sense of partnership in a common adventure which is the basic condition necessary for success."

Little detailed information is available as to the actual working of compulsory profit-sharing schemes introduced by legislation, he states, but clearly these cannot secure the above advantages to the same degree as schemes introduced as a result of voluntary agreement between employer and employee, both of whom are interested in their successful working.

"It cannot be too strongly emphasized," the author continues, "that it is not only futile, but positively dangerous, to regard profit-sharing as a substitute for the payment of a living wage or as a method of weakening the organization of labour, or as a remedy for poor management. Experience in the United Kingdom and the United States shows conclusively that it is only firms which pay a fair wage which enjoy the confidence of the trade unions, and which are very efficiently managed, that can operate a profit-sharing plan successfully.

"In other words, a profit-sharing plan should be among the last, and not among the first, items to be introduced in a well-rounded industrial relations program.

"Nor is it safe to regard profit-sharing mainly as a method of inducing labour to put forth more effort. Generally, most profit-sharing schemes introduced in the expectation of immediate material gains have proved disappointing to their sponsors, either because the share of profit received by each worker has been too uncertain and too small in amount to provide any effective incentive to greater effort, or because the worker has failed to recognize any

(Continued on page 696)

Many LMPC's Conduct Scrap Reduction Campaign

How to reduce scrap, conserve tools and material and safeguard quality are problems for which many Labour-Management Production Committees are at present seeking answers. Many different ways of attacking the problems are being used.

The Labour-Management Production Committee at the Aluminum Company of Canada, Ltd., Kingston, Ont., has launched a scrap reduction campaign with the purpose of emphasizing to all workers the cost involved when metal becomes scrap. "Scrap Prevention Requires YOUR Attention" has been chosen as the campaign slogan. The committee gathered several examples of scrap and is displaying them together with information about the money loss involved. Where reasons for the scrap are known, instruction on how to avoid them is displayed along with the defective material. United Steelworkers of America (CIO-CCL) and the International Association of Machinists (AFL-TLC) are the unions in this plant.

The Employer-Employee Relations Committee at Anthes-Imperial Company Limited, Winnipeg, Manitoba, has scheduled a series of talks on scrap reduction for presentation at its monthly meetings. The foundry superintendent gave the first address, dealing with two of the company's products, soil pipe and fittings. For demonstration purposes he displayed some scrap fittings and explained why they were defective. At the next meeting a foreman spoke on universal fittings; he also displayed defective castings and outlined the causes of their unsatisfactory condition. Both speakers emphasized that quality workmanship is necessary in order to retain customers and expand markets. Delivery of defective products, it was pointed out, will involve lost time and added expense to customers and seriously damage the company's reputation. The three employees on this committee are delegated by Local 3239 United Steelworkers of America (CIO-CCL).

The Conservation sub-committee of the LMPC at Canadian Car & Foundry Limited's automotive division, Fort William, Ont., is holding a series of meetings with foremen and leadhands in a campaign to reduce waste and conserve tools. The sub-committee first collects facts and figures on wastage and tool losses in each department in turn, then calls a meeting of the department's foremen and leadhands. There a chairman, a member of the sub-committee or one of the foremen, outlines the purpose of the meeting and leads a discussion on ways and means to combat waste and tool loss. Soon after the series of meetings was begun, it was noticed that employees became more interested in the conservation problem. Two AFL-TLC unions participate in this LMPC: Lakehead Lodge No. 719, International Association of Machinists, and Local 81, Office Employees' International Union.

A meeting of the LMPC at Firth Brown Tools (Canada) Limited, Galt, Ont., was devoted to a discussion of scrap reduction. The meeting opened with the presentation by the Superintendent of a detailed analysis of material scrapped during the previous two months. Representatives then discussed the problem from all angles and offered several recommendations for its solution. Employee members of this committee are delegated by the United Steelworkers of America (CIO-CCL).

* * *

An LMPC which continued to meet throughout a change in company ownership and bargaining agents has recently completed four years of successful operation. The committee is the one in The McLagan Furniture Company (Canada) Limited, Stratford, Ont., formerly the Stratford Chair Company, where the International Woodworkers of America (CIO-CCL) absorbed the National Union of Furniture Workers (CCL), which was the bargaining agent when the LMPC began operations. During the four-year period, labour-management relations have been excellent and many worthwhile suggestions on production efficiency have come from LMPC meetings.

Establishment of Labour-Management Production Committees (LMPCs) is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions set up LMPCs, the Service provides publicity aids in the form of booklets, films and posters.

Industrial Relations and Conciliation

Collective bargaining between the two major railways and labour organizations representing employees in the railway running trades was concluded during March.

Two important settlements were facilitated by Conciliation Officers.

Introduction

The last issue of the LABOUR GAZETTE reported the consummation of certain agreements between railway labour organizations representing employees in the running trades and the Canadian National Railways and the Canadian Pacific Railway Company for different regions of the two companies. During March direct negotiations continued between the running trade unions and the railways and, by the beginning of April, it was announced that collective bargaining had been completed and agreements signed covering all regions of railway operations.

The new agreements between the railways and the Brotherhood of Locomotive Engineers provided for an increase of 11 per cent in basic wage rates. On the Prairie and Pacific regions of the companies, this increase was retroactive to December 1, 1950, while on the Central and Atlantic regions of both companies the effective date of the increase was March 1, 1951.

Wage increases retroactive to December 1, 1950, were also provided for in collective agreements for all regions of the Canadian National Railways and Canadian Pacific Railway Company covering those classes of service represented by the Brotherhood of Locomotive Firemen and Enginemen, Brotherhood of Railroad Trainmen and the Order of Railway Conductors. In general, the wage and rule adjustments for these classes of employees were equivalent to 14·5 cents per hour. Certain minor changes were made in several working rules.

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

During March the Minister of Labour appointed a Conciliation Officer to deal with a dispute between the Polymer Corporation Limited, Sarnia, Ont., and Local 14, United Gas, Coke and Chemical Workers of America. A mutually satisfactorily settlement of the dispute was secured by the Conciliation Officer and a new collective agreement was signed between the parties on March 20, 1951. Among other things, the new agreement provided for increases in hourly rates of pay representing a 12 per cent increase in the former rates. Approximately 1,000 employees of the company were affected.

A second important dispute, among six to which the Minister of Labour assigned Conciliation Officers during the month of March, was between the Shipping Federation of Canada, Inc., and Local No. 375, International Longshoremen's Association. This dispute, which involved the wages and working conditions of some 3,200 longshoremen at the Port of Montreal, was settled by the Conciliation Officer during the early part of April. Under the terms of the settlement, the parties agreed to an increase of 15 cents per hour in the basic wage rate; payment for a minimum of one hour when employees are called for work at one p.m. and no work is available; and a reduction from 2,000 pounds to 1,800 pounds in the weight to be placed in slings during the unloading of ships.

The following statement concerns the scope and administration of the Industrial Relations and Disputes Investigation Act.

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The Branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the Board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certifications given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within Federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the Federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of Conciliation Officers, Conciliation Boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of March. The Board issued seven certificates designating bargaining agents and rejected three applications for certification. During the month, the Board received 10 applications for certification, and one application for certification was withdrawn.

Applications for Certification Granted

1. The Railway Station Restaurant Employees' Local 526 (Montreal) of the Hotel and Restaurant Employees and Bartenders International Union, on behalf of a unit of employees of the Canadian Pacific Railway Company, employed in the station restaurant, coffee shop (including snack bar), and buffet located in the station concourse, Windsor Station, Montreal (L.G., March, 1951, p. 346).

2. Division No. 282, Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of a unit of garage employees of Quebec Central Transportation Company, Sherbrooke, Que. (L.G., April, 1951, p. 502).

3. The Brotherhood of Locomotive Firemen and Enginemen, on behalf of locomotive engineers, handling steam or other classes of motive power, employed by the Canadian National Railways in its Atlantic Region, Newfoundland District (L.G., April, 1951, p. 501).

4. Local No. 955, International Union of Operating Engineers, on behalf of a unit of employees of the Canadian National Railways employed in the Engineering Department of the Macdonald Hotel, Edmonton (L.G., Jan., 1951, p. 55).

5. The National Catholic Longshoremen's Syndicate of Sorel, Inc., on behalf of longshoremen regularly employed by the Eastern Canada Stevedoring Co., Limited, in the loading and unloading of ships and vessels at Sorel, Que. (L.G., April, 1951, p. 502).

6. Local 38-163, International Longshoremen's Association, on behalf of a unit of employees of General Sea Transportation Limited, Vancouver, comprising coastwise longshoremen employed in loading and unloading the coastwise vessel, ss. *Northern Express* (L.G., April, 1951, p. 502).

7. Malt and Grain Process Workers, Local 105, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America, on behalf of a unit of employees of the Red River Grain Company, Limited, comprising

employees at the Company's elevator, feed mill and warehouse, and seed cleaning plant, located at Dupuy Street, St. Boniface, Man., and at the Company's elevator located at Archibald Street, St. Boniface, Man. (L.G., April 1, 1951, p. 502).

Applications for Certification Rejected

1. The Brotherhood of Locomotive Firemen and Enginemen, applicant, and the Canadian Pacific Railway Company (Prairie and Pacific Regions), respondent (L.G., Dec., 1950, p. 2051) (See Reasons for Judgment below).

2. The Brotherhood of Locomotive Engineers, applicant, and the Canadian National Railways (Atlantic Region, Newfoundland District), respondent (L.G., April, 1951, p. 501). The application was rejected for the reason that it was not supported by a majority of the employees affected.

3. The Seafarers' International Union of North America, Canadian District, applicant, and the Victoria Tug Company, Limited, Victoria, B.C., respondent (L.G., April, 1951, p. 501). The application was rejected for the reason that it was not supported by a majority of the employees affected.

Applications for Certification Received

1. The Canadian Tankermen's Union, on behalf of unlicensed personnel employed by Shell Canadian Tankers Limited, Toronto (Investigating Officer: C. E. Poirier).

2. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of clerical employees of the Canadian Pacific Railway Company, employed in the Windsor Street Station Ticket office, Montreal (Investigating Officer: C. E. Poirier).

3. Local No. 882, International Union of Operating Engineers, on behalf of a unit of employees of Canadian Pacific Air Lines, Limited, employed in the operation and maintenance of the Company's steam plant at Vancouver Airport, Sea Island, B.C. (Investigating Officer: D. S. Tysoe).

4. The Brotherhood of Railway and Steamships Clerks, Freight Handlers, Express and Station Employees, on behalf of five units of employees engaged in the loading and unloading of freight cars, trucks, and vessels in the Port of Quebec and employed by (1) Robin Hood Flour Mills Limited; (2) W. G. McCauley; (3) Clarke Steamship Company, Limited; (4) Albert G. Baker Company, Limited, and (5) Anglo-Canadian Pulp and Paper Mills Limited (Investigating Officer: L. Pepin).

5. Malt and Grain Process Workers, Local No. 105, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America, on behalf of units of employees of (1) the St. Boniface Grain and Feed Company, Limited, Winnipeg, and (2) Midland Flour Mills Limited, St. Boniface, Man. (Investigating Officer: J. S. Gunn).

Application for Certification Withdrawn

The National Association of Marine Engineers of Canada, Inc., applicant, and the British Columbia Steamships Co. Ltd., Vancouver, respondent (L.G., April, 1951, p. 502).

REASONS FOR JUDGMENT in application for certification affecting

Brotherhood of Locomotive Firemen and Enginemen, *Applicant,*
and
Canadian Pacific Railway Company, *Respondent,*
and
International Brotherhood of Locomotive Engineers, *Intervener.*

This is an application for the certification of the Applicant as bargaining agent for a unit of employees of the Respondent described as a craft unit composed of locomotive engineers handling steam or other classes of motive power, employed on the Canadian Pacific Railway in its Prairie and Pacific Regions.

The Wartime Labour Relations Board upon the application of the International

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, E. R. Complin, A. Deschamps, A. J. Hills, A. R. Mosher, G. Picard, and H. Taylor, members. The Judgment of the Board was delivered by the Vice-Chairman.

Brotherhood of Locomotive Engineers, now the Intervener, certified officers of that organization and the Intervener as bargaining representatives of locomotive engineers handling steam or other classes of motive power employed as such in Canada by the Canadian Pacific Railway (including the Quebec Central Railway) under date of March 8, 1946, pursuant to the Wartime Labour Relations Regulations.

The certification thus granted to the Intervener has continuing force and effect under the Industrial Relations and Disputes Investigation Act by virtue of section seventy-two of the said Act.

In effect by this application the Board is asked to divide the craft unit which the Wartime Labour Relations Board found to be appropriate for collective bargaining in 1946 into two territorial units of the same craft.

Prior to certification in 1946, the Intervener had represented the locomotive engineers covered by that certification for many years.

The Applicant claims in support of the present application that since certification in 1946 the Intervener has divided its jurisdiction in respect of the craft group into two bargaining units, one for the Eastern Region and one for the Western Regions of the Railway, that this territorial demarcation is still in force, and that there are two separate collective agreements between the Intervener and the Respondent in force, namely an agreement covering engineers employed in the Eastern Region, dated May 25, 1950, and one agreement covering engineers employed in the Western Regions, dated October 17, 1949.

The Applicant also referred to subsection four of section seven of the Act, which provides that where there is an existing collective agreement covering employees in a proposed bargaining unit, the application for certification may not be made until after the expiry of ten months of the term of the agreement without the consent of the Board. The Applicant submitted that in view of the several collective agreements covering employees in the existing bargaining unit bearing different dates, this provision would in effect debar the Applicant from making an application for certification covering all engineers in the existing unit, and indicated that this was one factor influencing its decision to confine the present application to locomotive engineers in the Western Regions.

The Intervener points out that at the time the Wartime Labour Relations Board found the existing unit to be appropriate in 1946, there were three separate collective agreements in effect between the Intervener and the Respondent, namely:—

1. Canadian Pacific Railway (Western Lines)—effective April, 1929;
2. Canadian Pacific Railway (Eastern Lines)—effective February 1, 1929;
3. Quebec Central Railway—effective May 1, 1936;

that this information was before that Board in making its decision, and that bargaining between the Intervener and the Respondent in respect of employees in the craft unit is conducted on the same regional basis now as at that time simply as a matter of mutual convenience. The Intervener submits, therefore, that the existence of two or more collective agreements at the present time has no more significance today than at the time the existing certificate was issued to it in 1946.

The Board is of opinion that ordinarily it is not conducive to stable labour relations or orderly collective bargaining negotiations to subdivide a well-established craft unit of employees of an employer found to be an appropriate unit by the Board into several units consisting of segments of the same craft group of employees. Consequently, in any particular case where it is sought to do this, convincing grounds for so doing should be established.

In the present case, it does not appear to the Board that the facts which are put forward by the Applicant as grounds for breaking down the existing craft unit differ materially from the facts which were put before the Wartime Labour Relations Board at the time that board determined that the existing craft unit was appropriate for collective bargaining. The fact that the Intervener and the Respondent have found it mutually desirable to continue the practice followed prior to the existing certification of completing separate agreements on a territorial basis covering employees in the unit is not in itself, in the opinion of the Board, a sufficiently convincing reason for splitting the bargaining unit at this time.

Regarding the concern of the Applicant arising from the differing effective dates of the several collective agreements, the Board has authority under subsection four of section seven of the Act to give leave to any applicant to make an application for certification before the expiration of ten months of the term of the existing collective agreement if, in its opinion, the circumstances so warrant. Consequently, the Applicant may have recourse to this provision to obtain the consent of the

Board to the making of an application for certification where, as in the present case, the existence of more than one collective agreement with different effective dates covering groups of employees within an established bargaining unit would otherwise operate as a bar to an application for certification.

As the Applicant has not satisfied the Board that the existing craft unit found appropriate by the Wartime Labour Relations Board should be sub-divided on a territorial basis, the application is rejected.

(Sgd.) A. H. Brown,
Vice-Chairman and Acting Chairman for the majority of the Board.

I dissent:

Dated at Ottawa, March 15, 1951.

Dissenting Opinion of Mr. W. L. Best

This is an application for certification of the Brotherhood of Locomotive Firemen and Enginemen as bargaining agent for a unit of employees of the Respondent composed of locomotive engineers handling steam or other classes of motive power on the Canadian Pacific Railway operating through its Prairie and Pacific Regions.

In the Reasons for Judgment of the majority of the Board (from which I dissent), unusual emphasis is placed upon certain considerations which seem to form the basis for that Judgment—and rejection of the application—chief among which are: Certification of the Intervener by the Wartime Labour Relations Board in March, 1946, as bargaining agent of locomotive engineers handling steam and other classes of motive power in Canada on the CPR; that the certification thus granted to the Intervener has continued in force under the Industrial Relations and Disputes Investigation Act by virtue of section seventy-two of the Act; that prior to certification in 1946, the Intervener had represented locomotive engineers covered by the certification for many years; that, in effect, by this application the Board is asked to divide the craft unit which was found to be appropriate for collective bargaining in 1946 into two territorial units of the same craft; and finally, that "As the Applicant has not satisfied the Board that the existing craft unit found appropriate in 1946 should be sub-divided on a territorial basis, the application is rejected."

A few pertinent facts of record may serve as sufficient reply to the major considerations above cited.

Representations and evidence submitted before the Board in support of the application seemed to be both sound and logical; also quite in harmony with Section 7 and other relevant provisions of the Act. From that evidence the applicant claimed "to have as members in good standing a majority of employees" covered by the application. Moreover, the Applicant assumed that the Board would afford reasonable opportunity, by ordering a vote of the eligible employees, which of the two unions those employees desired to have represent them. This, in my opinion, is one of the primary and essential functions of the Board, namely to determine by a vote taken the designated and authorized *representative desired by the employees* in any craft or class in an industry or public utility, when a dispute arises among them. Why the Board did not order a vote of the eligible employees concerned, *as requested by the Intervener and concurred in by the Applicant,* is rather difficult to understand, especially as that has been the usual method employed in similar cases where there was any doubt as to the relative membership standing. In other words, the fact that a collective agreement has been in effect "for many years", whether or not the union holding that agreement has been certified, is not in itself a guarantee that such agreement shall run in perpetuity, especially when another union is able to establish by an orderly vote of the eligible employees its right to make and hold an agreement.

In my opinion, membership figures submitted by the Applicant justified the taking of a vote; but leaving those figures aside, for the present, those submitted by the Board's Investigating Officer show: A total of 1,448 eligible employees; and of those the Applicant claimed as members in good standing 896, and the Intervener (B of LE) claimed 980; but it also shows 444 eligible employees who were members in good standing in both organizations. To have ascertained by a vote of all eligible employees *the expressed desire of those 444*

persons seemed but simple justice to all eligible employees, as well as to the Applicant.

To illustrate the ultimate change in collective agreements in effect "for many years", these may suffice. For several years the Order of Railway Conductors held collective agreements for road conductors on the Michigan Central Railroad, the Père Marquette Railroad, and the Wabash Railroad, all operating in Canada. Pursuant to application to the Wartime Labour Relations Board, the Brotherhood of Railroad Trainmen was certified as the bargaining agent for road conductors on these three properties, on July 20, 1945. Likewise, on the Canadian Pacific Railway the Order of Railway Conductors held the collective agreements for road conductors, for a period of about a half century. Pursuant to application to the Wartime Relations Board the Brotherhood of Railroad Trainmen was certified as bargaining agent for road conductors on Eastern Lines of the CPR, on February 2, 1945, and for road conductors on Western Lines of the CPR, on January 15, 1947. These, and many other instances which might be given, clearly show that where the right of a vote is given to employees concerned in an application, an existing agreement *is not a bar* to certifying another union that is able to establish as a result of that vote that it has as members in good standing a majority of the employees.

In a recent application by the Intervener (B of LE), for certification as bargaining agent for locomotive engineers on the Newfoundland Railway (on which property the B of LF & E, has always held the collective agreement for locomotive engineers, firemen and hostlers), the Board accorded the Applicant the privilege of having a vote taken, notwithstanding clear evidence being produced that the union holding the collective agreement had as members in good standing a majority of locomotive engineers employed on that property. Evidently a doubt existed, hence a vote was ordered to be taken, that vote resulting in the rejection of the application. Other instances might be given to indicate that there is no uniform policy or practice which interferes with or makes impracticable the sub-dividing of portions of an industry, especially in a public utility, for purposes of collective bargaining. As above indicated, this is particularly true when a majority of employees in a region or territorial section of that utility have expressed a preference for representation by another organization.

To briefly summarize the foregoing, it is respectfully submitted:—

(1) That the right of representation for purposes of collective bargaining should be determined by a vote of eligible employees concerned.

(2) That the practice of sub-dividing a portion of an industry or territory of a public utility is not new, but has passed the experimental stage.

(3) That the Applicant union is both competent and appropriate for purposes of collective bargaining (It now holds agreements for engineers to the number of ten in Canada and 150 in the United States).

(4) That to have rejected the Application for the reason stated in concluding paragraph of Judgment, before a vote of eligible employees had been taken and result announced, was entirely premature.

(Sgd.) W. L. Best,
Member.

Dated at Ottawa, March 15, 1951.

Conciliation and Other Proceedings Before the Minister of Labour

Conciliation Officers Appointed

During the month of March, the Minister of Labour appointed Conciliation Officers to deal with matters in dispute between the following parties:—

1. Local 14, United Gas, Coke and Chemical Workers of America, applicant, and Polymer Corporation Limited, Sarnia, Ont., respondent (Conciliation Officer: H. Perkins). Later in the month, the Conciliation Officer reported the settlement of all matters in dispute.

2. Hull City Transport Employees' Syndicate, applicant, and Hull City Transport Limited, Hull, P.Q., respondent (Conciliation Officer: L. Pepin).

3. The Flin Flon Transportation Workers' Federal Union No. 272, applicant, and Northern Bus Lines Limited, Flin Flon, Man., respondent (Conciliation Officer: R. H. Hooper).

4. Local No. 375, International Longshoremen's Association, applicant, and the Shipping Federation of Canada, Inc.

(Longshoremen, Port of Montreal), respondent (Conciliation Officer: R. Trépanier).

5. Local No. 6, Radio and Cables Department, Canadian Communications Association, applicant, and the Canadian Overseas Telecommunication Corporation, respondent (Conciliation Officer: L. Pepin).

Conciliation Board Appointed

On March 21, the Minister appointed a Board of Conciliation and Investigation to deal with matters in dispute between Canada Steamship Lines, Limited, and the Brotherhood of Railway and Steamships Clerks, Freight Handlers, Express and Station Employees, affecting waterfront freight handlers at Fort William and Port Arthur. The Board was appointed following receipt of the report of R. H. Hooper, Conciliation Officer (L.G., April, 1951, p. 502) and was fully constituted on the same date with the appointment of His Honour Judge A. H. Dowler, Port Arthur, Ont., as Chairman. Judge Dowler was appointed by the Minister on the joint recommendation of the other two members, A. F. Hawkins and Alex Anderson, both of Fort William, who had previously been appointed on the nominations of the company and union respectively.

Conciliation Board Reports Received

1. On March 6, the Minister received the report of the Board of Conciliation and Investigation appointed to deal with matters in dispute between Canada Coach Lines Limited, Hamilton, and Local No. 1454, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (L.G., Feb., 1951, p. 193). Minority recommendations were received from the company's nominee. The texts of the report of the Board and of the minority recommendations are reproduced below.

2. On March 19, the Minister received the report of the Board of Conciliation and Investigation appointed to deal with matters in dispute between the Alberta Wheat Pool and Local No. 333, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America (L.G., April, 1951, p. 503). The text of the Board's report is reproduced below.

REPORT OF BOARD in dispute between

Canada Coach Lines Limited, Hamilton,
and
Local No. 1454, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America.

To the Hon.
The Minister of Labour:

Members of Board

His Honour Judge R. Stewart Clark, Chairman.

Mr. A. F. MacArthur, Union Nominee.

Mr. R. V. Hicks, Company Nominee.

Appearances

For the Union

Messrs. C. L. Dubin, K.C., Counsel; James McGinnity, International Representative; Russell Parkinson, President of the Local Union 1454; Murray Johnson, Secretary; John Statts, Vice-President, and A. Grieve.

For the Company

Messrs. N. L. Mathews, K.C., Counsel; Francis Farwell, President; C. J. Gravelle, General Manager; John McColl, Assistant to the General Manager; C. H. Abray, Manager of Mechanical Department; F. W. Lake, Personnel Manager; J. J. Wall, Comptroller; and John Rae, Consultant Economist.

On March 6, 1951, the Minister of Labour received majority and minority reports from the Board of Conciliation and Investigation appointed to deal with a dispute between Canada Coach Lines Limited, Hamilton, and Local No. 1454, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (L.G., Feb., 1951, p. 193).

The Board was composed of His Honour Judge R. S. Clark, Guelph, Ontario, Chairman; R. V. Hicks and A. F. MacArthur, both of Toronto, members appointed on the nominations of the company and union respectively.

The texts of the Board's majority and minority reports are reproduced herewith.

Hon. Sir:

Pursuant to my appointment by you as Chairman and Third Member of the Conciliation Board in the above matter, dated December 14, 1950, after consultation with the other members of the Board and

through them, with the parties, I duly convened the first sittings of the Board at the Court House in the City of Hamilton on Monday, January 15, 1951, and continued on the following day and also on the 29th and 30th of the said month, on which days the submissions of the parties were heard and attempts made to reach agreement on the various matters in dispute. At these meetings, the above named representatives attended before the Board and participated in the representations made.

Having failed to reach agreement as a result of the meetings above mentioned, the Board met further on February 9 and February 14 to review the evidence and to attempt to reach agreement on the findings of its individual members so that recommendations of a constructive nature might be made to you which we felt would assist in solving the difficulties which have arisen between the parties.

While the Board is unanimous on many of the issues, its members are divided on some and it has been considered advisable to put forth the views of the Chairman and permit the members to concur in those issues in which they are in agreement and to attach dissenting comments on those issues on which they entertain views different to mine. In view of the nature of the submissions made, it has also been considered advisable by the Board to divide the report into three parts, namely: (I) Matters relating solely to the operators' hourly rates of pay; (II) Matters relating to the demands of all other employees other than drivers; and (III) Matters of mutual concern to all employees.

PART I

Operators.—The operators, or bus drivers, requested an increase in hourly rate of pay of 23 cents per hour. Their rate at the present time is $1.04 per hour, and they are paid this rate during all the time they are on duty. There are, according to the evidence, several phases included in a normal day's work of the average operator which make up what is referred to as a "pay hour". These phases include Driving Time, Layover Time, Loading Time, Reporting Time, and Deadhead Driving.

The Union submitted comparative rates paid to drivers in competitive companies operating in Ontario which tended to show that the rates of Canada Coach Lines were lower than other companies whose rates ranged from $1.20 per hour to $1.40 per hour. Further submissions by the Union contended that, due to the high wage level existing in the City of Hamilton and the sharp rise in the Cost-of-Living Index since their last adjustment in wage rates, their demands were justified.

The Company in the course of their submission, filed a written brief which was supplemented by numerous exhibits setting out in detail much valuable information as to operation of the company.

One of its main contentions, in answer to the demands of the Union, was, that while its hourly rates to drivers may be lower, layover time and all other phases of the "pay hour" were paid for at the full rate of $1.04, and that in effect, they were paying full wages to operators at times during their work period when they were idle and they pointed out that they were the only company operating who recognized the full time payment system. Other comparable companies, according to their exhibits filed, either followed the practice of paying one-half time for layover periods or paid their drivers on a mileage basis.

The Company contended that it operated with a higher percentage of layover rate than any of its competitors, and in their exhibit No. 47, pointed out that it amounted to over 30 per cent of the total time served. In exhibit No. 28, the Company pointed out by means of a table, that only 63·1 per cent of the total pay hour was driving time, and it argued that the cumulative time of all other operations amounting to 36·9 per cent constituted layover time. It expressed readiness to adopt a substantial increase in time occupied in driving alone if the remaining time were reduced to one-half the rate for driving time.

I find myself unable to agree with the argument put forth by the Company that over 30 per cent of the pay hour is at present layover time. Its exhibit No. 28 divides the pay hour as follows:—

	Per Cent
Deadhead Driving.....	2.43
Reporting Time.....	6.15
Loading Time.....	10.96
Layover Time.....	17.36
Driving Time.....	63.10
Total Pay Hour.....	100.00

It seems to me that the test to be applied is whether the operator is actively in charge of his vehicle and whether he is doing something that may be in preparation for a trip. It would, therefore, seem proper that neither reporting time or loading time should be included in the category known as layover time and in order to

clarify the definition of layover time, I would suggest the following wording be inserted in the agreement.

> Layover Time shall include Deadhead Driving and shall mean that portion of time spent in the exclusive employ of the Company when the operator has completed a run from one destination to another and having unloaded his bus and parked it and having no other duties to perform is awaiting the commencement of his duties preparatory to embarking on another run.

If this definition is adopted by the parties, it will provide a proper basis for distinction between the operations involved and at the same time will serve to show that the percentage claimed by the Company as layover is considerably reduced. In proceeding on this basis, it is evident that while there is nothing being done by the operator during layover time that will produce revenue for the Company, it is also evident that having regard to the nature of the industry an operator who is engaged in layover is unable to augment his income by doing any other work during such period. The transportation industry is governed largely by the needs of the travelling public and schedules must be arranged in such a way that neither the employer or employee have control over the problem of layover time.

Having regard to this feature, I am of the opinion that there should be a differential in the rates paid for operating time and layover time as above defined, and I would recommend that all time worked by bus drivers engaged on any of the Company's scheduled routes or charter runs, including reporting time and loading time, be paid at the rate of $1.20 per hour and that all layover time, as defined above, be paid at the rate of $1 per hour.

In their submissions, the Union has asked for guaranteed hours for spare drivers. I believe the Board fully recognizes the need for some assurance of work for those who are not on regular runs, and it is therefore recommended that 72 hours work be guaranteed to spare drivers for each day period, and that this guarantee be in lieu of call up pay and on the understanding that the spare drivers are available and report regularly for work.

Mileage Logs.—The Board appear to be unanimously in favour of the request that when Mileage Logs are being made, a representative of the local Union will be notified and permitted to accompany the representative of the Company and it so recommends.

PART II

Cost Matters Relating to All Employees other than Bus Operators.

Wages.—As in the case of the operators, the Union asked for an increase to all employees of 23 cents per hour and used the same arguments, namely: comparisons with other competitive companies and the desire for a rise in the standard of living to meet the increasing Cost of Living and having regard to the recommendation made in respect to bus operators, I recommend a general increase to all employees covered by the agreement other than the bus operators referred to, of 15 cents per hour.

Overtime for Garage Employees, Including Premium Pay for Sundays and Off Days.—It is the understanding of the Board that the Company has agreed to the establishment of a standard 40-hour work week. Accordingly I believe it to be the view of the whole Board that such standard work week should be achieved and proceeded with without delay and that the parties then negotiate further as to all of the mechanics involved in such change, including overtime premium payment. Failing mutual agreement, the Board recommends for the consideration of both parties, the adoption of the provisions of Clauses numbered 85, 86, and 87 of the agreement, dated October 1, 1949, between The Toronto Transportation Commission and Division 113, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America.

Paid Statutory Holidays.—The very nature of the transportation industry wherein the travelling public must be served at all times, gives rise to serious thought in respect to Statutory Holidays. Transportation facilities must be continued on these days as well as on regular days. After careful thought and having regard to all the circumstances, I am of the opinion that four statutory holidays to be chosen by agreement, should be paid for at straight time when not worked, and that four statutory holidays if worked, should be paid for at one and one-half times the hourly rate.

Off Shift Premium.—I believe it to be the unanimous opinion of the Board that there is need for recognition of a differential for those employed other than operators on the evening or night shift, and that there should be a premium of 3 cents per hour paid to employees on the evening shift, and a premium of 5 cents per hour on the night shift.

Coverage for Ticket Clerks.—The Union has asked for some protection against loss by ticket clerks to the amount of $50 per annum. While no further submissions were made to the Board, I am of the opinion that some consideration should be given to these particular employees because of unusual conditions at rush hours and week ends, at which times they are required to combat confusion due to large and sometimes inconsiderate and impatient crowds. I would therefore recommend that ticket clerks be covered against loss in the amount of $30 per annum, and that any surplus or coverages be returned to the Company.

Meal Allowances and Pass Privileges.—After full discussion on both of these matters, I am of the opinion that the Board is not prepared to make any recommendations in respect to them.

PART III

Matters of Mutual Concern to All Employees.

Union Security.—One of the principal items under this heading is the matter of Union Security. The present Union was certified by the Canada Labour Relations Board on August 11, 1950, having replaced the Canada Coach Lines Independent Union which had been parties to collective bargaining agreements from 1943 to December 31, 1949. It is to be noted that the employees operated without a contract in the year 1950, and negotiations for the present proposed agreement have been proceeding since certification in August, 1950. Evidence was produced to show that of 295 eligible voters, 228 favoured the present bargaining agency, 35 were against, and 32 refrained from voting. Under previous agreements with the Independent Union, a Union Shop provision was in effect.

The Union requested at this hearing a Union Shop with a 30-day probationary period in effect before being required to join the Union. The Company on the other hand, filed an exhibit indicating that a majority of their competitors had agreements which provided for voluntary membership in the Union and that the only ones with a Union Shop were the Gray Coach Lines (TTC) who obtained a Union Shop in 1946 although a Union has been working with that Company during fifty-two years, and the Eastern Canada Greyhound Lines which has had a Union Shop since 1949 and has been working with the Company for one year.

After earnest and careful searching for a solution of this problem, I am led to the conclusion that certain important features must be considered. For the Union's contention, it can be said that in so far as their employees are concerned, over 52 per cent have been in the service over five years and therefore have lived under the Union Shop plan as have a proportion of the 44·7 per cent who have been in the Company's employ from six months to four years. This is set out in the Company's exhibit No. 4. It is therefore contended by the Union that anything less than a Union Security provision would be a retrograde step in their relations with the Company. On the other hand, the Company argues that their position is greatly embarrassed by the fact that if a Union Shop were granted at once, it would give to the Union what the employees of the Hamilton Street Railway, a sister organization, whose directorate and control are closely associated, took almost half a century to achieve. It seems to me that a Union should undergo some sort of probationary period in the same manner as an individual employee and that its relationship with the Company should be tested in the same manner as that of an employee. Having regard, however, to the peculiar situation existing in this particular case, I am inclined to think that the Union has passed the preliminary stages of relationship and should not be expected to start at the bottom of a ladder of full recognition.

I would therefore recommend a modified Rand Formula which would provide that all persons who were not now members of the Union need not join nor remit moneys equivalent to dues, but that all employees within the bargaining unit who were now members must remain members as a condition of their employment and that their dues be remitted monthly to the secretary of the Union. After a probationary period of sixty days, all new employees must either join the Union and pay their monthly dues, or, in the alternative, consent to a deduction from their wages of an amount equivalent to the monthly Union dues, such amount to be forwarded by the Company to the Secretary of the Union either as dues or as a contribution for Union purposes and such consent to such deduction to be a condition of employment.

I also suggest that with a view to achieving a Union Shop within as short a time as is feasible, the Company might agree to a clause which recognizes that for the establishment of better relations with the Union that progressive steps toward a Union Shop might be favourably considered with the renewal from year to year of their agreement.

Having carefully examined clause 303 of the proposed agreement in regard to intimidation, I can see no reason for any change therein.

Arbitration.—Clause 601 (C) refers to the appointment of a third arbitrator. Considerable discussion took place in regard to the qualification of a Chairman. Having regard to the views submitted, I recommend that a clause be adopted which provides that the Minister of Labour shall have power on the application of either party, to appoint as a third arbitrator and chairman, some person who, in his discretion, shall be capable of so acting, and that the appointment shall not be restricted to members of one particular field or profession in order that there be some flexibility of choice where the appointment of a technical expert is required.

Seniority.—During the course of the submission, the Company made it clear that they would have to curtail their operations rather than extend them by acquiring other lines, and if this be the case, the Union's fear of employees from acquired lines cutting in on their seniority seems groundless and I recommend that this matter be left for further discussion if the matter arises. I make no recommendations in regard to changes in the wording of the remaining seniority clauses suggested in the draft agreement.

Strikes and Lockouts.—I make no recommendations in regard to these clauses.

Rights and Privileges.—The Union has asked for a clause to be inserted in the agreement providing for all rights and privileges now enjoyed by the employees to be continual.

The relationship between the employees and the management appears to have been extremely good over a period of years and it would appear to me to be quite unnecessary for such a clause to be included in the agreement and it might lead to many a misunderstanding which does not now exist.

Retroactivity.—According to the evidence the Union was certified on August 11, 1950, so that approximately six months have elapsed since it was first entitled to negotiate on behalf of the employees involved. Bearing in mind the impracticability of applying the new dual wage structure retroactively, I feel that a lump sum payment should be made in lieu thereof. After giving considerable thought as to the amount which might be recommended, it would appear that the sum of $50 payable to each employee presently on the payroll of the Company, or a proportion thereof if engaged since August 11, 1950, would be most fair and adequate. I have reached this amount on the basis of taking twelve weeks approximately, or one-half of the time elapsed since the Union was certified, at approximately 8 cents per hour (actually 7·7 cents), for a 54-hour work week. Bearing in mind that negotiations concerning first agreements usually take a month to three months, and that this would represent an adjustment equivalent to approximately one-half of the general increase being recommended by the Board, I feel that it should be fair to both parties.

In submitting the above report, may I take this opportunity to express the gratitude of the members of the Board for the able manner in which the briefs were submitted by both parties which greatly assisted us in our deliberations.

All of which is respectfully submitted.

Dated at Guelph, this 22nd day of February, 1951.

(Sgd.) R. Stewart Clark,
Chairman of the Board.

(Sgd.) A. F. MacArthur,
Member of the Board.

Member of the Board.

Minority Report

Hon. Sir:

As a member of the Conciliation Board herein, I beg to submit the following Report:—

I have had the privilege of reading the recommendations of His Honour Judge R. Stewart Clark, Chairman of the Board. I am pleased to concur with all of the Chairman's recommendations with the exception of those concerning Paid Statutory Holidays, Coverage for Ticket Clerks, and Union Security. I regret that I cannot adopt the Chairman's recommendations in respect to these three matters and I dissent therefrom with the greatest respect.

In connection with the Union's request for the payment to garage employees of Statutory Holidays when not worked, it must be borne in mind that it is inherent in the Company's operation to operate on Statutory Holidays (unlike manufacturing industry generally). In fact, due to extra traffic on holiday week-ends it is imperative for the Company to increase its facilities in order to provide efficient service to the public. It is my understanding that there is no general practice in the industry of granting pay for Statutory Holidays if

not worked. With these considerations in mind, therefore, I would recommend that the Company change its existing practice of paying straight time for Statutory Holidays worked by granting time and one-half for authorized work performed on four Statutory Holidays throughout the contract year.

The matter of Coverage for Ticket Clerks was not argued before the Board during the hearings herein. In these circumstances, it is my view that without any evidence being submitted on this point in support of the Union's request that no recommendation should be made thereupon.

In dealing with the Union's request for a Union Shop condition it is important to recognize that these proceedings concern the first Agreement between the parties since the Union was certified as recently as August 11, 1950. Further, while the last Agreement between the Company and The Canada Coach Lines Independent Union contained Union Shop provisions, these had only been conceded by the Company following several years' collective bargaining relationship between the parties. It should be noted in this connection that only nominal union dues at the rate of 50 cents per month were payable to the Independent Union.

A further important consideration in this regard is that on the basis of the evidence before the Board, Union membership or payment of union dues for the most part is on a voluntary basis throughout the industry. As a matter of fact, the voluntary revocable check-off was adopted within the last six months by another Hamilton Local of this Union and the Hamilton Street Railway Company, closely associated with The Canada Coach Lines, Limited, after half a century of collective bargaining relations. Having regard to these facts, I feel that anything further than a voluntary revocable check-off is unjustified and that the parties should be given the opportunity of maturing together in their relationship before any compulsory forms of Union Security are considered.

All of which is respectfully submitted.

Dated at Toronto, Ontario, this 23rd day of February, 1951.

(Sgd.) Robert V. Hicks,
Member of Board.

REPORT OF BOARD in dispute between

Alberta Wheat Pool,
and
Local No. 333, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America.

Hon. Milton F. Gregg,
Minister of Labour,
Department of Labour,
Ottawa, Ont.

Dear Sir:

Board members consist of—G. E. Street, Chairman; Mr. J. P. MacKenzie, Company's nominee; Mr. James Bury, Union nominee.

In the matter of wages a majority of the Board composed of Mr. J. P. MacKenzie and G. E. Street, Chairman recommends that an increase of 12½ cents per hour for all company employees working on an hourly basis and 7 per cent increase to all classifications working on a monthly basis.

A majority of the Board composed of Mr. James Bury and G. E. Street, Chairman recommends that the wages be made retroactive to December 1, 1950, on which date the agreement becomes effective.

Respectfully submitted.

(Sgd.) G. E. Street,
Chairman.

(Sgd.) J. P. MacKenzie,
Company Nominee.
(Sgd.) J. Bury,
Union Nominee.

On March 19, 1951, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between the Alberta Wheat Pool and Local No. 333, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America, affecting employees of the Pool in Vancouver (L.G., April, 1951, p. 503). The Board was composed of G. E. Street, Vancouver, as Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, and J. P. MacKenzie and James Bury, members appointed on the nominations of the employer and union respectively. The text of the Board's report is reproduced herewith.

Collective Agreements and Wage Schedules

Recent Collective Agreements

A file of collective agreements is maintained in the Economics and Research Branch of the Department of Labour. These are obtained directly from the parties involved and through the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts, etc., are summarized in a separate article following this.

Mining

Non-metallic Mineral Mining

THETFORD MINES, P.Q.—ASBESTOS CORPORATION LIMITED AND LE SYNDICAT NATIONAL DES TRAVAILLEURS DE L'AMIANTE DE L'ASBESTOS CORPORATION LIMITED, INC. (NATIONAL SYNDICATE OF ASBESTOS WORKERS).

Agreement to be in effect from January 1, 1951, to December 31, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect (L.G., April, 1950, p. 511) with the following changes and additions:—

Paid holidays: the number of paid statutory holidays is increased from 4 to 5.

Hourly wage rates are increased 15 per cent over the previous rates.

Escalator clause: the cost-of-living bonus is to be based on the Dominion Bureau of Statistics' cost-of-living index for November, 1950 (170·7), instead of on the index figure for January, 1949 (159·6), as in the previous agreement. The bonus will amount to 40 cents per week for every increase of one full point in the cost-of-living index above 170·7; it is to be adjusted downward on the same basis. The bonus shall be calculated on a daily basis and shall apply only to normal working days (not less than 4 hours) and to the 5 paid holidays.

Off-shift differential: a provision that the company will pay a shift differential of 2 cents per hour to all employees working the afternoon shifts, and a shift differential of 3 cents per hour to those working the night shifts has been added.

ASBESTOS, P.Q.—CANADIAN JOHNS-MANVILLE COMPANY, LIMITED, AND JOINTLY THE SYNDICAT NATIONAL DE L'AMIANTE D'ASBESTOS INC. AND THE FEDERATION NATIONALE DES EMPLOYÉES DE L'INDUSTRIE MINIÈRE, INC.

Agreement to be in effect from February 1, 1951, to January 31, 1952, and thereafter from year to year, subject to notice. The agreement is similar to the one previously in effect (L.G., April, 1950, p. 512) with the following changes and additions:—

Paid holidays: the number of paid holidays is increased from 4 to 5.

Hourly wage rates are increased 15 per cent over the previous rates.

Escalator clause: the present agreement provides that a cost-of-living bonus of 40 cents per week shall be added to the above rates for every increase in the Dominion Bureau of Statistics' cost-of-living index of one full point above 170·7 (index figure for November, 1950), instead of 159·6 (index figure for January, 1949), as provided in the previous agreement. In the event that the index should exceed 170·7, the cost-of-living bonus is to be adjusted downward on the same basis. The bonus shall be calculated on a daily basis and shall apply only to normal working days and to paid holidays.

Night shift differential: a provision that the company will pay a premium of 2 cents per hour to all full time workers employed on the second shift and 3 cents per hour to those employed on the third shift has been added.

Metal Mining

FALCONBRIDGE, ONT.—FALCONBRIDGE NICKEL MINES LIMITED AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 598.

Agreement to be in effect from September 12, 1950, to September 11, 1951. The company recognizes the union as the exclusive bargaining agent for all eligible employees. There shall be no discrimination against any employee because of his membership or non-membership in any lawful union or because of his race, colour, religious beliefs or political opinions.

Check-off: the company shall deduct during the life of the agreement, as a condition of each employee's continued employment, the monthly union dues from the pay of each employee and remit same to the union.

Hours: the company will, not later than 2 months after the date of the execution of the agreement, institute a new work schedule to provide for reducing the number of normally scheduled working hours in each succeeding 2 week work period to 88 hours. *Overtime:* time and one-half for work in excess of 8 hours in any day or for work in excess of the scheduled work week (except where such excess is due to regular change of shift); double time for work on 6 specified *paid holidays* (previous agreement provided for 4 paid holidays).

Vacations with pay: after one year's service one week, after 5 years' service 2 weeks and after 20 years' service 3 weeks.

Wages: the existing hourly wage rate shall be increased to such an amount as will ensure to each employee relatively the same pay for the 44-hour average week as he would have received had he worked the 48-hour week at the rate in effect prior to the effective date of the agreement. The increased rates shall come into effect as of September 12, 1950; they shall be further increased by 6 cents per hour, such additional increase to come into effect as of the date of the execution of this agreement.

Off-shift differential: employees shall be paid an off-shift premium of 4 cents per hour for work during the afternoon shift hours, 6 cents for work during the evening shift hours, and 8 cents per hour for work during the night shift hours, provided in each case that such off-shift hours were not scheduled for any other shift hours.

Apprentices: the company agrees to reimburse apprentices, who have successfully completed an approved course for electricians, machinists, plate workers or carpenters, an amount not exceeding one-half of the cost to the apprentice of such course, provided that the cost to the company shall be limited to $100 and that the apprentice is in the employ of the company on the completion of the course. The company will not hire or create any third or fourth classes of tradesmen: those who are presently in the third and fourth classes will be upgraded as they qualify and as vacancies occur.

Provision is made for *seniority rights, grievance procedure* and the establishment of a *Welfare Fund.*

Manufacturing

Vegetable Foods

CARDINAL, ONT.—THE CANADA STARCH COMPANY LIMITED AND THE UNITED FOOD PROCESSORS UNION, LOCAL 483.

Agreement to be in effect from January 1, 1951, to December 31, 1951, and thereafter from year to year, subject to 6 weeks' notice. The company recognizes the union as the exclusive bargaining agency for all eligible employees.

Check-off: there shall be a voluntary and revocable check-off of monthly union dues.

Hours: 8 per day, a 48-hour week. *Overtime:* time and one-half for work in excess of 8 hours in any one day or shift, for work on Sunday or the assigned day off, and on 7 specified *paid holidays* (previous agreement provided for 5 paid holidays).

Vacations with pay: 6 days after 1 year's service, 12 days after 5 years' service and 18 days after 25 years' service (the last provision is a new one). Where an employee has been absent without authorization in excess of one working day in each month, the excess will be deducted from the vacation to which he otherwise would be entitled.

Hourly wage rates for certain classes: for male employees: dry starch division—dry starch miller, cooker and acidifier, repairman (packaging), roll operator $1.11; cellar man (days), Hercules operator $1.06; hypochlorite operator, cellar man (nights) $1.02; leverman, blend and pack specialists, tester (starch control) 98 cents; pack and sew amijel, load kilns, blend celluloid and linit, utility work, Oswego press operator, unload and dump, sew bags, head barrels, packing bulk 94 cents; unload trays, tray repairs, car loaders, paper baler, general labour 90 cents; refinery division—convertor operator $1.11; pans operator, deodorizer operator, filter man, syrup line operator $1.06; centrifugal operator, kiln fireman $1.02; neutralizer operator, press operator, bone puller, syrup mixing 98 cents; repair barrels, stencil and truck cases, handle supplies (mazola), syrup packers 94 cents; seal cases and place on truck, store full barrels, unloading cans 90 cents; wet starch division—miller, feed house operator $1.17; oil expeller repairs $1.11; oil expeller operator, steepman, night utility mechanic $1.06; flusher, separator operator $1.02; silk repairman, press operator 98 cents; washing machine operator, silk washer, tank cleaner, load feed cars 94 cents; dump feed, press ragger, sweeper 90 cents; mechanical division—machinist (specialist), welder (certified) $1.30; machinist mechanic, pipe fitter mechanic, carpenter (specialist), boiler maker $1.23; tinsmith mechanic, welder, machine operator mechanic, chief oiler $1.17; carpenter mechanic, crane operator, blacksmith, rigger boss $1.11; machinist general, pipe fitter general, welder general $1.06; babbitman, oiler, tool crib attendant, beltman, improvers grade 2 $1.02; truck driver, track repair, improvers 98 cents; unload coal boats, signalman 94 cents, general labour 90 cents; females: dry starch division—wrapping machine operator 80 cents; machine operator (gloss pack), inspect packages, Miehle press operator, weigh laundry starch, line packages, fill packages 76½ cents; sweeper, bag cleaner 73½ cents; refinery division—label machine operator, operate expander, cappers on syrup line, capping mazola cans 76½ cents; handling cans to and from storage, general clean up 73½ cents; stores—seamstress 80 cents, assistant 73½ cents; apprentices—beginners 90 cents, after 8 months 94 cents, after 16 months 98 cents, after 24 months $1.02, after 32 months $1.06, after 40 months reclassification to occupation.

Shift differential: a shift bonus of 3 cents per hour will be paid to employees whose working hours rotate on regular shifts and employees working temporarily or permanently on second or third shifts.

Provision is made for *seniority rights, grievance procedure* and the *safety and health* of employees.

Textiles and Clothing

WINNIPEG, MAN.—GARMENT MANUFACTURERS ASSOCIATION OF WESTERN CANADA AND AMALGAMATED CLOTHING WORKERS OF AMERICA, LOCAL 459.

Agreement to be in effect from December 15, 1950, to December 14, 1951.

Union security: every worker covered by the agreement must be a member of the union in good standing, except in the case of learners and beginners who shall be given 6 weeks time to become members of the union. No worker shall be discriminated against for union activities and the union shall not require the discharge of any worker unless such worker is replaced by the union by another worker satisfactory to the manufacturer. No worker shall be allowed to change his or her position from one manufacturer to another without first receiving an express written permit from the union No manufacturer shall engage an experienced union employee unless the latter procures a working permit from the union; beginners may be hired without a permit. Whenever in need of a worker, a manufacturer shall apply to the union representative, who shall be given a reasonable time to supply a worker acceptable to the manufacturer. If the union is unable to supply such help, whether temporary or permanent, the manufacturer may secure such help but the latter must join the union within 6 weeks.

Check-off: each and every manufacturer agrees to deduct from the wages of each

union worker, covered by the agreement, the union dues and any initiation fee as well as such contributions as may be payable by the worker to the Garment Manufacturers' and Employees' Fund and to remit same to the union.

Hours: 8 per day Monday through Friday, a 40-hour week. *Overtime:* time and one-quarter shall be paid for the first 4 hours of work in excess of 8 hours from Monday to Friday, time and one-half thereafter and for work on Saturdays and triple time for work on 7 specified *paid holidays* (previously time and one-quarter was paid for all overtime on Monday to Friday and double time for work on all Dominion and Provincial holidays, only one of them a paid holiday). There are to be two 10-minute *rest periods* (this is a new provision). During slack seasons each manufacturer "shall have the option of dividing the work so that each worker will receive approximately an equal amount of work or of dividing the hours on equal working time".

Vacations with pay: one week to employees with one year's continuous service of at least 1,800 hours of actual work; an additional week shall be given to employees with 2 or more years' continuous service who have worked at least 1,800 hours in each of such years.

Wage rates: the rate for first class cutters shall be $1 per hour to which shall be added 8 per cent plus 10 per cent of such rate; second class cutters $37 per week for the first and $40 per week for the second year; cutters' apprentices $26.50 per week by the end of the first, $28.50 by the end of the second, and $31.50 per week by the end of the third year; piece rates and time rates for single needle operators, special machine operators, folders, pressers, cleaners, examiners, bundle boys and service girls are increased 10 per cent over the 1947 rates. All these workers shall be paid an additional 5 per cent, provided they have worked the full 40 hours during the previous week. After the above pay system has been computed, all union employees shall be paid a supplementary 6½ cents per hour plus overtime (if any) on the 6½ cents. All learners shall be paid a minimum wage according to Government requirements.

Provision is made for the *settling of disputes, seniority rights* and the continuance of the *joint health insurance fund.*

Metal Products

BROCKVILLE, ONT.—PHILLIPS ELECTRICAL WORKS LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 510.

Agreement to be in effect from October 22, 1950, to October 21, 1951, and thereafter from year to year, subject to notice. The company recognizes the union as the sole and exclusive collective bargaining agency for all eligible employees. There will be no discrimination, intimidation or coercion because of an employee's membership or non-membership in the union.

Check-off: the company shall deduct monthly union dues and/or initiation fees from the pay of all employees who so authorize and remit same to the union. An employee shall have the right to cancel the authority for the check-off only during the last 7 days of the agreement year.

Hours: 8 per day Monday through Friday, a 40-hour week. *Overtime:* time and one-half for the first 4 hours' overtime after 8 hours' work in any one day, Monday to Friday inclusive, and for the first 12 hours' work on Saturday, double time thereafter and for work on Sundays and double time and one-half for work on 8 specified *paid holidays.*

Vacations with pay: one week after one year's continuous service, 2 weeks after 3 years' and 3 weeks after 20 years' continuous service; employees with 6 months' seniority will be entitled to 2 days, those with 8 months' to 3 days and those with 10 months' seniority to 4 days.

Hourly wage rates are increased by 8 cents. The starting rate for new male employees shall be 98 cents and that for new female employees 90 cents per hour, with an automatic increase of 5 cents per hour after 6 weeks. The rates for certain classes are: Rod mill division—manipulator $1.14 to $1.22; roughing mill operator, guide setter $1.06 to $1.12; furnace operator $1.04 to $1.10; coiler operator $1.04 to $1.09; stickers 98 cents to $1.15; truck drivers 98 cents to $1.09; bar handler, rod cropper, labourer 98 cents to $1.06; conveyor operator, furnace loader, rod washer 98 cents to $1.07; clerk, scrap bundler 98 cents to $1.08. Wire and cable division—annealing furnace operator, brazing operator, bunching machine operator $1.04 to $1.09; clerks, male 98 cents to $1.11, female 90 cents to $1; drawing machine operators $1.05 to $1.16, helpers 98 cents to $1.08; enamel machine operators $1.06 to $1.18; stranding machine operators 98 cents to $1.13; spooling machine operators 98 cents to $1.08; twisting machine operators 98 cents to $1.09; winding machine operators 90 cents to $1.09; spoolers (female) 90 to 96 cents; labourers 98 cents to $1.08. Telephone division—automatic screw machine operator and set-up man $1.16 to $1.25, buffing operators $1.04 to $1.13, hand screw and turret lathe operator $1.05 to $1.11; iron work layout man and operator $1.05 to $1.14; painters 98 cents to $1.12; plater $1.06 to $1.12; coil winders (female) 90 cents to $1.01; assemblers, male 98 cents to $1.09, female 90 to 97 cents; cable formers, male 98 cents to $1.08, female 90 to 97 cents; mechanical adjusters 98 cents to $1.09. Service departments—engineer (stationary) $1.11 to $1.43, electricians $1.04 to $1.31, blacksmith $1.07 to $1.14, carpenters $1.04 to $1.20, machinist $1.06 to $1.25, maintenance mechanic $1.17 to $1.42, roll turners $1.06 to $1.18, steam fitters $1.05 to $1.29, laboratory technicians $1.11 to $1.30, tool and die makers $1.15 to $1.52, tool crib attendant $1.06 to $1.12.

The matter of hourly wage rates may be opened for negotiation by either party on April 22, 1951, by giving from 15 to 30 days' notice. In addition, it may be opened once during the life of the agreement, on 15 days' notice by either party, if the Dominion Bureau of Statistics' cost-of-living index for any consecutive 2 months' period, after the expiry of 4 months from the date of signing of this agreement, shows a variation of not less than 5 points from 169·8. If either party avails itself of the right to open the matter of hourly wage rates on April 22, 1951, the party giving the notice shall not be entitled subsequently to reopen it again during the life of the agreement, unless the cost-of-living index for any consecutive 2 months' period after the expiry of 4 months from April 22, 1951, shows a variation of

not less than 5 points from the index figure to be published by the Dominion Bureau of Statistics in April, 1951. If, after 30 days of such negotiating, an agreement cannot be reached the matter will be arbitrated as provided in the agreement. The decision of the majority of the Arbitration Board shall be accepted by both parties.

A *night shift differential* of 10 per cent will be paid for night shift work.

Provision is made for the *safety and health* of the employees, *seniority rights* and *grievance procedure.*

MONTREAL, P.Q. — PHILLIPS ELECTRICAL WORKS LIMITED AND THE UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 528.

Agreement to be in effect from October 22, 1950, to October 21, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one between the company for its Brockville, Ontario plant and Local 510 of the United Electrical, Radio and Machine Workers of America, summarized above.

Hourly wage rates for certain classes: power cable department—cabling machine operator $1.10 to $1.17, helper 98 cents to $1.07; Cambric taping machine operator $1.04 to $1.09, dip tank operator $1.04 to $1.10, hammering machine operator 98 cents to $1.08, paper insulating machine operator $1.05 to $1.11, clerk 98 cents to $1.08; telephone cable department—belting machine operator, paper cutting machine operator, quadding machine operator $1.04 to $1.09; insulating machine operator, male (night only) 98 cents to $1.08, female 90 to 98 cents; clerk, male 98 cents to $1.08, female 90 to 97 cents; labourer 98 cents to $1.09; retest and repair man 98 cents to $1.08; spoolers 90 to 97 cents; telephone cable stranding machine operators $1.04 to $1.13, helpers, male 98 cents to $1.07, female 90 to 95 cents; twisting machine operator, male (night only) 98 cents to $1.08, female 90 to 97 cents; lead and impregnating department—impregnating tank operator $1.13 to $1.20; lead press operators $1.08 to $1.21, helper 98 cents to $1.07; lead press reeler $1.04 to $1.09; test department—inspectors $1.10 to $1.32, tester $1.06 to $1.13; service department — engineer (stationary) $1.06 to $1.18, electricians $1.04 to $1.18, fitters $1.11 to $1.35, maintenance mechanics $1.17 to $1.42, machinists $1.06 to $1.25; steam fitter $1.19 to $1.29, helper $1.05 to $1.11; carpenters $1.05 to $1.20, reel assemblers 98 cents to $1.11, stockkeepers 98 cents to $1.12; packing and shipping departments—labourers 98 cents to $1.08, shipping clerks 98 cents to $1.12.

MONTREAL, P.Q.—AMERICAN CAN COMPANY AND THE CAN WORKERS UNION, LOCAL 353 OF THE TRADES AND LABOUR CONGRESS.

Agreement to be in effect from December 1, 1950, to November 30, 1951, and thereafter from year to year, subject to notice, except that provisions regarding hours of work, overtime and premium compensation shall be effective from December 18, 1950. The Group Insurance Plan and the Pension Plan provided for under the agreement shall be effective until November 30, 1955, and shall not be subject to further negotiations prior to such date.

Union security: all employees who, 15 days after the effective date of the agreement, are members of the union in good standing and all those who become members thereafter, shall, as a condition of continued employment, maintain their union membership in good standing for the duration of the agreement.

Check-off: the agreement provides for a voluntary but irrevocable check-off of monthly union dues.

Hours: the standard work day shall be 8½ hours and the standard work week 42½ hours (previously 9 and 45 hours, respectively). *Overtime* shall be paid at time and one-half for work in excess of the above hours and for all work on Saturdays; double time for work in excess of 12 hours per shift and for all work on Sundays and on 8 specified holidays, 6 of which are *paid holidays* if they fall on a regularly scheduled work day.

Rest periods: all employees will be given two 15-minute relief periods during each scheduled shift.

Vacations with pay: one week to employees with one years' (1,700 hours) service with the company. Thereafter, employees will be granted one week if they have worked a minimum of 1,275 hours during the preceding calendar year and correspondingly shorter periods if they have worked less than 1,275 hours. Additional vacation with pay shall be granted employees on the basis of one week after 5 years, 2 weeks after 15 years and 3 weeks after 25 years of accredited service.

Hourly wage rates are increased by from 12½ to 17½ cents over the previous rates and are now as follows: males—group 1 $1, group 2 $1.02½, group 3 $1.05, group 4 $1.07½, group 5 $1.12½, group 6 $1.17½, group 7, $1.22½, group 8 $1.22½ to $1.32½, group 9 $1.32½ to $1.42½, group 10 $1.42½ to $1.52½; females—group 1 89½ cents, group 2 92 cents, group 3 94½ cents, group 4 99½ cents, group 5 $1.04½, group 6 $1.09½. The hiring rate is 5 cents below job rate for 13 weeks. Leadmen shall receive 5 cents above the job rate while performing the duties of a leadman.

Shift differential: a premium of 5 per cent will be paid for all work performed on regularly scheduled afternoon shifts which begin at or after 1 p.m. and end at or before midnight and a premium of 10 per cent for all work on regularly scheduled night shifts extending past midnight.

Provision is made for *seniority rights, grievance procedure,* the *health and safety* of employees, a non-contributory *group insurance plan* and a *pension plan.*

BRANTFORD, ONT.—THE ROBBINS AND MYERS COMPANY OF CANADA, LIMITED, AND THE INTERNATIONAL UNION UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 397.

Agreement to be in effect from September 1, 1950, to August 31, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect (L.G., July, 1949, p. 874), with the following changes:—

Check-off: this agreement provides for the compulsory check-off of initiation fees as well as of the monthly union dues.

Paid holidays are increased from 6 to 7.

Hourly wage rates for male employees are increased by 8 cents and for female employees

83139—5½

by 5 cents. The hiring rate for adult male employees shall be 93 cents and that for female employees 70 cents per hour.

Provision is made for the setting-up of a *Labour-Management Committee, seniority rights, grievance procedure* and an *apprenticeship plan.*

Non-metallic Minerals and Chemicals

ASBESTOS, P.Q.—CANADIAN JOHNS-MANVILLE COMPANY, LIMITED, AND JOINTLY THE SYNDICAT NATIONAL DE L'AMIANTE D'ASBESTOS INC. AND THE FEDERATION NATIONALE DES EMPLOYÉES DE L'INDUSTRIE MINIERE, INC.

The agreement summarized above under "Mining" applies also to the "Canadian Products Division".

MCMASTERVILLE, P.Q.—CANADIAN INDUSTRIES LIMITED, BELOEIL EXPLOSIVES WORKS, BELOEIL AGRICULTURAL CHEMICALS WORKS AND BELOEIL CENTRAL RESEARCH LABORATORY, AND LE SYNDICAT DES TRAVAILLEURS DES PRODUITS CHIMIQUES DE MCMASTERVILLE (CHEMICAL PRODUCTS WORKERS SYNDICATE OF MCMASTERVILLE).

Agreement to be in effect from February 6, 1951, to February 5, 1952. Either party may, on 10 days' notice, require the other party to enter into negotiations for the renewal of the agreement within 2 months of the expiry date and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such renewal. The company recognizes the union as the sole and exclusive bargaining agent for the employees of the company. There shall be no discrimination, intimidation, interference, restraint or coercion because of membership or non-membership in the union.

Check-off: the company will deduct monthly union dues from the wages of all employees who so authorize and remit same to the union; the authorization may be revoked only during the 2 weeks immediately preceding the anniversary of the effective date of this or any succeeding collective agreement. (Previous agreement provided for a voluntary and revocable check-off.)

Hours: 44 per week—for single and for certain multiple shift operations 9 per day for 4 days and 8 on one day each week; for continuous and certain multiple shift operations 8 hours per day for 5 and 6 days during alternate weeks. *Overtime:* time and one-half for work in excess of the normal daily hours and double time for work on Sunday or the regularly assigned day of rest and on 8 specified *paid holidays* (an increase of 2 from previous agreement).

Rest periods: employees assigned to operations not requiring continuous duties will be granted a 10-minute rest period during the first half of the working day or shift and from May 15 to October 15 also during the last half of the working day or shift Monday to Thursday, inclusive. Employees assigned to single and 2-shift per day operations will be allowed 5 minutes wash-up time at lunch hour and from 5 to 30 minutes at the end of the shift, depending upon the class of work they are performing.

Hourly wage rates are increased by 9 cents and are now as follows: high explosives department—$1.04 to $1.37, trained labour $1, nitro-glycerine department—$1.21 to $1.30; acid department—$1.04 to $1.37; black powder department—$1.11 to $1.30; maintenance department—mechanic, machinist, electrician, pipefitter, carpenter, welder and/or leadburner, first class $1.37, second class $1.24, first helper $1.11, second helper $1.04; brickwork repairman, cement finisher, area greaser $1.11; blacksmith, first class $1.34, helper $1.11; painters $1.04 to $1.24; power house department—shift engineer $1.37; repairmen $1.21 and $1.30; firemen $1.11 and $1.17; bulldozer tractor operator $1.14; coal passers $1.04 and $1.08; helpers $1.04 and $1.11; labour department—track repairman $1.17, helper $1.04; pay-loader operator $1.14; pony tractor operator $1.11; motor truck operator, locomotive operator $1.08; watchmen $1.08 and $1.14; teamster, loading explosives $1.04; guard, labour, janitor $1; miscellaneous—material checker $1.11; stores helper $1.04 and $1.11; laboratory helpers $1 and $1.11; learners 95 cents; agricultural chemicals division—$1 to $1.34. A working leader shall be paid 4 cents per hour more than the highest scheduled hourly rate paid any employee in his group or section.

Night shift differential: a premium of 5 cents per hour shall be paid for work on evening shifts commencing between 2 p.m. and 9.59 p.m. and of 7 cents per hour for work on night shifts commencing between 10 p.m. and 4.59 a.m.

Provision is made for *seniority rights, grievance procedure* and the *safety and health* of employees.

BROWNSBURG, P.Q.—CANADIAN INDUSTRIES LIMITED, AMMUNITION WORKS, AND UNITED MINE WORKERS OF AMERICA, DISTRICT 50, LOCAL 13148.

Agreement to be in effect from February 13, 1951, to February 12, 1952. Either party may, on 10 days' notice, require the other party to enter into negotiations for the renewal of the agreement within 2 months of the expiry date and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such renewal. There shall be no discrimination, intimidation, interference, restraint or coercion with respect to any employee because of membership or non-membership in the union.

Check-off: the company agrees to deduct monthly union dues from the wages of all employees who so authorize and to remit same to the union; the authorization shall be revocable or, at the option of the employee, irrevocable.

Hours: for day workers—8 hours and 48 minutes per day Monday through Friday, a 44-hour week: for shift workers—8 hours per day, alternately 5 and 6 days per week, an average of 44 hours per week. *Overtime:* time and one-half shall be paid for work in excess of the normal daily hours and double time for work on an employee's regularly assigned day of rest and on 7 specified *paid holidays.*

Rest and wash-up periods: the company shall grant to all employees, except power house employees, one 12-minute and one 4-minute rest period during their normal daily

hours of work and also 2 wash-up periods of 5 or 15 minutes each, depending on the department in which the employee is employed.

The application of the Industrial Relations Plans shall continue in respect of the employees in conformity with their general application throughout the company.

Hourly wage rates for certain classifications: males—group I: labourer, janitor I, primer sparker, crib attendant II 92 to 98 cents; group II: serviceman B, production operator C, lapper II, pointer II, mixer and drier C 94 cents to $1.02; group III: production operator B, casemaker 97 cents to $1.05; group IV: serviceman A, crib attendant I, tractor operator, trades helper, truck driver, oiler 99 cents to $1.05; group V: toolsetter II, lapper I, pointer I $1 to $1.08; group VI: mixer and drier B, production operator A, chrome plater II, heat treat operator II, laboratory operator $1.03 to $1.12; group VII: toolsetter I, machinist III, tool inspector II, grinder operators, die reaming operator, lathe operators, carpenter II, painter, millwright II, pipefitter II, toolmaker III, blacksmith $1.07 to $1.17; group VIII: armourer, electrician II, tool inspector I, carpenter I, millwright I, pipefitter I, mixer and drier A, bricklayer, plasterer $1.15 to $1.26; group IX: chrome plater I, heat treat operator I, machinist II $1.20 to $1.31; group X: stationary engineer II, electrician I, toolmaker II, welder $1.24 to $1.36; group XI: machinist I $1.34 to $1.45; group XII: toolmaker I $1.39 to $1.50; group XIII: machine shop specialist $1.43 to $1.60. Females—group I: production operator F, crib attendant IV 63 to 70 cents; group II: production operator E, janitor II, crib attendant III 66 to 73 cents; group III: production operator D, technical operator II 70 to 78 cents; group IV: technical operator I 74 to 85 cents; group V: tool inspector III 74 to 90 cents. The above rates represent increases of 8 cents per hour for males and 5 cents per hour for females over previous rates.

Shift differential: a premium of 5 cents per hour will apply to regularly scheduled shifts which start between 3 p.m. and 3 a.m.

Provision is made for a *Plant Advisory Committee, seniority rights, grievance procedure* and the *health and safety* of employees.

Service

Business and Personal

EDMONTON, ALTA.—CERTAIN LICENSED HOTELS AND BEVERAGE DISPENSERS' INTERNATIONAL UNION, LOCAL 579.

Agreement to be in effect from November 1, 1950, to October 31, 1951, and thereafter from year to year, subject to 30 days'

Union security: all employees covered by notice.

this agreement shall be members of the union in good standing. All beverage room employees shall be hired through the union office. When there are no beverage dispensers suitable to the employer available, he may hire a suitable person who is not a union member; the latter must apply for membership in the union within 15 days after commencing work. All spare beverage room employees must carry a union work permit, duly stamped for the current month.

Check-off: the employers shall deduct union dues from the pay of all employees who so request and remit same to the union; the order to deduct union dues shall continue in force for a period of 3 months and thereafter until revoked by the employee.

Hours: the normal working week shall be 44 hours to be divided into 6 working days. *Overtime:* time and one-half shall be paid for all overtime and for work on 9 specified *paid holidays.* No shift shall be split more than once and in no case for a period of more than one hour. Shifts shall be arranged so that all employees shall get at least one night off during each week.

Vacations with pay: after 1 year's service 1 week, after 2 years' service 2 weeks and after 10 years' service 3 weeks.

Weekly wage rates: tapmen $51; waiters, glass washers $45; sparemen $1.05 (per hour). All other beverage room employees, members of the union, shall receive an increase in proportion to that received by the above classifications. Men who work on 2 jobs, such as waiter and tapman, shall be paid at the higher classification rate.

Uniforms: employees who are required to wear uniforms or special apparel during working hours shall have same supplied, laundered and kept in proper repair by the employers free of any charge to the employees.

Provision is made for *seniority rights* and *grievance procedure.*

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec,* include the repeal of one agreement, the extension of one new agreement and the amendment of eight others. In addition to those summarized below, they include: the amendment of the agreements for barbers and hairdressers at Sherbrooke and at Three Rivers gazetted February 24, and the amendment of the agreements for retail stores at Windsor and

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the LABOUR GAZETTE, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

for hospitals and charitable institution employees at St. Hyacinthe in the issue of March 17.

Requests for amendments to the agreements for the men's and boys' clothing industry in the province and for the building trades at Joliette and at Sherbrooke were gazetted February 24. Requests for amendments to the agreements for tavern employees and for the glass processing industry at Quebec, for the building trades at Hull, for barbers and hairdressers at Three Rivers and at Montreal and for clockmakers in the eastern townships were gazetted March 3. A request for a first agreement for retail gasoline sales establishments at Chicoutimi and requests for amendments to the agreements for the building trades at Chicoutimi and for retail stores at Mégantic in the issue of March 10. A request for a new agreement for the sheet metal fabricating industry at Montreal and requests for amendments to the agreements for the men's and boys' clothing industry and for the corrugated paper box industry in the province, and for the building trades at St. Jean and Iberville were all gazetted March 17.

Orders in Council were also published approving the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties to certain agreements.

Manufacturing

Vegetable Foods

BAKERS AND BAKERY SALESMEN, QUEBEC.

An Order in Council, dated February 15, and gazetted February 24, amends the previous Orders in Council for this industry (L.G., Jan., 1951, p. 63).

Territorial jurisdiction comprises the city of Quebec, the city of Lévis, and within a radius of 35 miles from their limits with the exception of those municipalities within the county of Dorchester.

Textile and Clothing

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated March 7, and gazetted March 17, amends the previous Orders in Council for this industry (L.G., May, 1946, p. 627, July, p. 930, Sept., p. 1249, Nov., p. 1583; April, 1948, p. 332; May, 1949, p. 604; Jan., 1950, p. 77, and previous issues).

Cost-of-living bonus: all employees, with the exception of homeworkers and those apprentices earning less than 50 cents per hour, whether working on a time work or a piece-work basis, will receive a cost-of-living bonus of 7½ cents per hour in addition to their prevailing wages. Homeworkers will receive as a cost-of-living bonus an additional sum equal to 15 per cent of their earnings as provided for in the present agreement. Apprentices earning less than 50 cents per hour will receive a cost-of-living bonus of 5 cents per hour.

All employers must file a report to the Joint Committee for the Dress Industry of the Province of Quebec showing separately all payments of cost-of-living bonuses to all employees governed by the provisions of the present agreement.

Employers bound by those clauses of a lease and hire of work with their employees, either verbally or in writing, before or after the coming into force of the present agreement, which provides for higher wages than those fixed in the present agreement, must maintain such higher wages and rates, with respect to those employees with whom such agreements were made.

Metal Products

CLOCKMAKERS, MONTREAL.

An Order in Council, dated February 8, and gazetted February 24, repeals the previous Orders in Council for this industry (L.G., April, 1948, p. 333, Nov., p. 1246).

SHEET METAL MANUFACTURING, MONTREAL.

An Order in Council, dated February 21, and gazetted March 10, extends the term of the previous Orders in Council, for this industry (L.G., Aug., 1950, p. 1185; March, 1951, p. 358) to May 1, 1951.

GARAGE EMPLOYEES, SHERBROOKE.

An Order in Council, dated March 7, and gazetted March 17, makes obligatory the terms of a new agreement between the Automobile Dealers' Association of the Eastern Townships and "L'Association des Employés de l'Auto-Voiture des Cantons de l'Est", affiliated to the National Metal Workers' Federation and to the CCCL.

This agreement to be in effect from March 17, 1951, until March 16, 1952, and thereafter from year to year, subject to notice. The agreement governs professional employers, artisans and employees, including stockroom clerks and janitors in garages, parking grounds, scrapping yards and machine shops.

Territorial jurisdiction comprises the city of Sherbrooke and all municipalities within a radius of 10 miles from its limits.

Hours for garages, machine shops, scrapping yards and parking grounds—9 hours per day distributed between 7 a.m. and 6 p.m. Monday through Friday, between 7 a.m. and 12 noon on Saturday, regular week of 49 hours; stockroom clerks 52 hours per week.

Overtime: time and one-half for work after 6 p.m. Monday through Friday and for work on Saturday afternoon; double time for work on Sunday (except service men) and for work on any of 12 specified holidays. All employees will be entitled to double time for work performed on their weekly day of rest. Overtime for stockroom clerks shall commence only after the regular work week of 52 hours.

Paid holidays: employees engaged on a weekly basis are entitled to 12 specified paid holidays but those employees engaged on an hourly basis shall only receive pay for 2 of the specified 12 holidays, New Year's Day and Christmas Day. If New Year's Day and Christmas Day fall on Sunday, the following Monday will be observed.

Minimum hourly and weekly wage rates: journeymen wheelwrights, machinists, electricians, mechanics, glaziers, painters, upholstery cleaners, dyers, vulcanizers, wheel

aligners, motor tune-up and brake repair specialists, welders, radiator repairers, bodymen, blacksmiths, upholsterers and testers from 75 cents to 85 cents per hour; greaser and service man from 55 to 65 cents per hour; apprentices in all categories—(16 to 20 years of age) from 30 cents per hour in first year to 55 cents in fourth year, (20 to 26 years of age) from 50 cents in the first year to 65 cents in the fourth year; stockroom clerk in garages—manager $45 per week, assistant manager $37 per week, apprentices from $15 per week in first year to $30 per week in fourth year; janitor $30 per week. Wage rates higher than the minimum rates established by this agreement shall not be reduced after its coming into force.

Vacation with pay: one week after one year of continuous service (May 1 of one year to April 30 of the next) for the same employer; one-half day for each calendar month of service to those employed less than one year. Vacation pay shall be equal to the wages an employee would have earned during his vacation period (if he is paid on a weekly basis) or 2 per cent of the wages earned during the period of service entitling him to his vacation if he is paid on any other basis. Upon termination of service an employee is entitled to the remuneration payable to him at the time of his taking the vacation to which he has a right, if he has not taken such vacation, or 2 per cent of the wages earned by him after May 1 preceeding the date of his departure.

The terms of this agreement also include provisions governing apprenticeship regulations. uniforms and tools. Home work is prohibited.

Construction

Building Trades, Chicoutimi and District.

An Order in Council, dated March 7, and gazetted March 17, amends the previous Orders in Council for this industry (L.G., Jan., 1948, p. 51, April, p. 334, Aug., p. 872; Aug., 1949, p. 987; Aug., 1950, p. 1185, Nov., p. 1904; March, 1951, p. 358, and previous issues).

Minimum hourly and weekly wage rates for the building trades at Chicoutimi are shown in the accompanying table. The minimum rates for zones I, II and III shall be in effect from November 15, 1950, and those rates for zone I-A from January 1, 1951. (The minimum rates for zones I, II and III are 5 cents per hour higher than those rates previously in effect as provided for by a cost-of-living wage adjustment published in the Labour Gazette issue of August, 1949, p. 967). (The minimum rates of zone I-A, effective January 1, 1951, represent a wage increase of 5 cents per hour over those rates previously in effect as provided for in an amendment published in the Labour Gazette issue of March, 1951, p. 358, as well as in the present amendment.)

Cost-of-living wage adjustment: in zones I, II and III the rates shown in the accompanying table shall be adjusted according to the fluctuations of the Federal cost-of-living index as follows: taking 170 points (previously 160) as a calculation basis: for each 10 point increase or decrease in the cost-of-living index the hourly minimum rates shall be 5 cents per hour higher or lower, as the case may be.

Minimum Hourly and Weekly Wage Rates for the Building Trades at Chicoutimi and District

Trades	Hourly and Weekly Wage Rates Zones I	I-A	II	III

Industrial Standards Acts, etc.

Schedules of Wages and Hours Recently Approved By Provincial Orders in Council in Ontario and Saskatchewan

Recent proceedings under the Industrial Standards Acts, etc.* include seven new schedules, all summarized below.

* In six provinces—Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan and Alberta—legislation provides that, following a petition from representatives of employers and employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the Labour Gazette, April 1950, page 518.

ONTARIO

Construction

Painters, Ottawa.

An Order in Council, dated February 8, and gazetted February 24, makes binding the terms of a new schedule for the painting and decorating industry in the Ottawa zone, to be in effect from March 6, 1951, "during pleasure".

Hours remain unchanged and are as follows: 8 per day, Monday through Friday, a 40-hour week from November 1 to March 31 inclusive; 8 per day, Monday through Friday, 4 on Saturday, a 44-hour week during the rest of the year. Where work is of such a nature that it cannot be done during the regular working day and if the employee does not work more than 8 hours in any night-shift, the work may be done at night and such work shall be known as *night work*.

Overtime is payable at time and one-half; double time on Saturday in the winter months, on Saturday afternoon in the summer months, on Sunday and on 5 specified holidays. No overtime work, with the exception of one hour to be performed imme-

diately following the working period of a regular working day, shall be performed without a permit from the advisory committee. No permit for overtime work on a holiday shall be issued except in cases where life or property is in danger or where repairs on buildings must be done in order to prevent loss of employment to those persons regularly employed therein. (Provisions governing overtime are similar to those previously in effect.)

Minimum hourly wage rates are increased from $1.25 to $1.37 for spray-painting and from $1.10 to $1.22 per hour for all other work; an additional 10 cents per hour is paid for *night work*. The advisory committee may fix a specal lower minimum rate for handicapped workers.

BUILDING LABOURERS, OTTAWA.

An Order in Council, dated February 8, and gazetted February 24, makes binding the terms of a new schedule for labourers in the Ottawa zone, to be in effect from March 6, 1951, "during pleasure".

Minimum hourly wage rates remain unchanged and are as follows: 61 cents per hour, but when an employee is a helper to a bricklayer or plasterer he shall be paid 75 cents per hour. The advisory committee may fix a lower minimum rate for handicapped workers.

PAINTERS AND DECORATORS, TORONTO.

An Order in Council, dated February 8, and gazetted February 24, makes binding the terms of a new schedule for the painting and decorating industry in the Toronto zone, to be in effect from March 6, 1951, "during pleasure".

This schedule is similar to the one previously in effect (L.G., Feb., 1950, p. 210), with the following exceptions:—

Overtime: one hour of overtime work may be done immediately following the working period of a regular work day without permission of the advisory committee. Except in cases of extreme necessity where life or property is in danger or where repairs on buildings must be done in order to prevent loss of employment to those persons regularly employed therein, no permit will be issued for overtime work on Saturdays, Sundays, or 7 specified holidays.

Minimum hourly wage rates for work performed during the regular working period and for night work are increased from $1.35 to $1.50 (to and including April 30, 1951), and shall be further increased to $1.55 on and after May 1, 1951.

PLUMBERS, WINDSOR.

An Order in Council, dated February 8, and gazetted February 24, makes binding the terms of a new schedule for plumbers in the Windsor zone, to be in effect from March 6, 1951, "during pleasure".

Hours: 8 per day, Monday through Friday, a 40-hour week as formerly in effect.

Overtime: double time for overtime and for all work on Saturdays, Sundays and 8 specified holidays. However, overtime is payable at the regular rate for work on emergency repairs between 8 a.m. and 12 noon on Saturday, where the owner of the shop does not work on emergency repairs and does not employ more than one journeyman mechanic on the emergency repairs. No overtime work to be performed without a permit from the advisory committee.

Minimum hourly wage rate is increased from $1.75 to $1.85 per hour. Men working on *night shift* will be paid 8 hours' pay for 7 hours' work. The advisory committee may fix a lower minimum rate for handicapped workers.

ELECTRICAL WORKERS, LONDON.

An Order in Council, dated February 8, and gazetted February 24, makes binding the terms of a new schedule for the electrical construction and repair industry in the London zone, to be in effect from March 6, 1951, "during pleasure".

Hours: 8 per day, Monday through Friday, a 40-hour week. (Weekly hours are reduced by 4.) Where work is carried on in 2 or more shifts, employees shall be deemed to be employed during a regular working day where an employee does not work more than 8 hours in any 24-hour period (this work to be known as shift work).

Overtime: as previously in effect all overtime is payable at double time, except that not more than one hour's overtime may be added immediately following a regular working day and paid for at time and one-half. Except in cases of extreme necessity where life or property is in danger or where repairs on buildings must be done in order to prevent loss of employment to those persons regularly employed therein, no permit will be issued by the advisory committee for work on Saturdays, Sundays, or 8 specified holidays.

Minimum hourly wage rates are increased from $1.15 (L.G., June, 1947, p. 827) to $1.65 per hour. Men working on *night shifts* will be paid 8 hours' pay for 7 hours of work. The advisory committee may fix a lower minimum rate for handicapped workers.

ELECTRICAL WORKERS, OSHAWA AND WHITBY.

An Order in Council, dated February 8, and gazetted February 24, makes binding the terms of a first schedule for the electrical repair and construction industry in the Oshawa and Whitby zone, to be in effect from March 6, 1951, "during pleasure".

Hours: 8 per day, Monday through Friday, 4 on Saturday, a 44-hour week. Where work is performed in 2 or more shifts, employees shall be deemed to be employed during a regular working day where an employee does not work more than 8 hours in any 24-hour period (this work to be known as shift work). Where 2 or more shifts are worked on the same job, only one shift shall be a day shift.

Overtime: time and one-half for work performed during the 4-hour period immediately following the working period of a regular work day; double time for all other overtime and for work on Sunday and 8 specified holidays. Except for one hour of overtime work to be done immediately following the working period of a regular working day no overtime work shall be performed without a permit from the advisory committee.

Minimum hourly wage rates: $1.30 per hour. Men who work on *night shift* will be paid 8 hours' pay for 7 hours' work. The advisory committee may fix a lower minimum rate for handicapped workers.

SASKATCHEWAN

Manufacturing

Vegetable Products

BAKERS AND BAKERY SALESMEN, REGINA.

An Order in Council, dated February 13, and gazetted February 24, makes binding the terms of a new schedule for the baking industry at Regina and within a radius of 5 miles, to be in effect during pleasure.

Hours remain unchanged at 8 per day, 42 hours in a week.

Overtime: all work performed in excess of 8 hours in any one day or 42 hours in any one week will be considered as overtime. Every employee who works on any of the specified holidays shall be paid one day's wages at his regular rate and, in addition, one and one-half times his regular rate of wages for every hour or part of an hour during which he works. (The overtime rate of time and one-half for work performed in excess of regular daily or weekly hours which formed a provision of the former schedule is not mentioned in the present schedule.)

Minimum weekly wage rates: doughmen $43, doughmen's helper $36; ovenman, bench and machine hands, bread wrapper, receiver, stableman $38; bakers' helpers and bread racker, bread wrapper's helper, stableman's helper $32; finishers, cake wrapper, box makers, cake shop dishwasher (female) $28; female help in cake shops (doing bench work over half time), female on cake depositor and doughnut machine, female cake shipper $30; shippers, utility man (second class) $34; janitor $35; engineer's helper $40; truck driver $36; utility man (first class) $39. (In most cases the above rates are $2 per week higher than those previously in effect.) A $22.50 basic wage rate per week (previously $21) shall be paid to all regular salesmen plus 5 per cent wholesale and 10 per cent retail on all sales of cakes and pastry, and ½ cent wholesale and 1 cent retail per loaf on all bread sales; guaranteed weekly wage rate of $35. Relief outside salesmen receive a minimum of $36.50 per week (previously $32); salesmen in training $30 per week for a period of 4 weeks (previously $27), thereafter $35 per week instead of $32 as formerly in effect. Part-time employees shall be paid 10 cents per hour above the *pro rata* rate. New employees will begin at 10 per cent less than the rates shown above for their classification and will reach the high rate after 6 months as follows: 10 per cent less during the first 3 months, 5 per cent less during the second 3 months and at the end of 6 months the prevailing rate. *Night workers* receive a bonus of 5 cents per hour. Female employees performing the duties of a male shall be paid wages equal to 100 per cent (previously 90 per cent) of the classification of said work. All employees not governed by any classification in this schedule shall be paid at the rate of wages provided for under the Minimum Wage Board Order.

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the LABOUR GAZETTE for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded during February

(1) *Works of Construction, Remodelling, Repair or Demolition.*

During the month of February the Department of Labour prepared 224 fair wages schedules for inclusion in building and construction contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 68 construction contracts was awarded by the various Government departments. Particulars of these contracts appear below.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates".

(2) ***Contracts for the Manufacture of Supplies and Equipment.***

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

Department	No. of contracts	Aggregate amount
Agriculture	3	$ 222,460.25
Canadian Commercial Corporation	10,117	29,311,881.40
Post Office	12	80,656.34
R.C.M.P.	1	3,564.00

(3) ***Arrears of Wages***

During the month of February the sum of $21,353.68 was collected from 3 employers who had failed to pay the wages required by the labour conditions attached to their contracts. This amount was distributed by the Department to the 252 employees concerned.

Contracts Containing Fair Wages Schedules Awarded During February

(The labour conditions of the contracts marked (*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of 8 per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

PROFIT SHARING

(Concluded from page 670)

direct correlation between his own effort and the profit bonus he receives. If the main objective is to increase productivity of labour rather than to promote collaboration between management and labour, incentive payment systems which directly relate wage payments to the worker's output would appear preferable to profit-sharing.

"Briefly, the very essence of profit-sharing is the philosophy of joint employer-employee collaboration in the task of production; and it can work successfully only when the emphasis is on the basic philosophy and not on the other material gains which it is likely to bring in its train."

Legal Decisions Affecting Labour

The Canada Labour Relations Board order revoking certification of the Canadian Seamen's Union was upheld in the Supreme Court of Ontario.

The Quebec Superior Court set aside an injunction which had restrained a council of arbitration from deciding a question arising out of the hours provision of a collective agreement.

In the United States Supreme Court, the Wisconsin Public Utility Anti-Strike Act was held unconstitutional in that it was in conflict with the Taft-Hartley Act.

Application of Canadian Seamen's Union for Court review of decertification order dismissed.

The High Court of Justice of Ontario, in a judgment delivered on February 23, dismissed the application of the Canadian Seamen's Union for a Court order quashing the order of the Canada Labour Relations Board revoking its certification. The Board on December 7, 1950, had found that the Canadian Seamen's Union was no longer entitled to certification as bargaining agent for a unit of employees of Branch Lines Limited, Sorel, Quebec, on the ground that it was not a trade union within the meaning of the Industrial Relations and Disputes Investigation Act (L.G., 1951, p. 190).

The Canadian Seamen's Union requested the Court to review the Board's order on the following grounds: (*a*) that the Board had no jurisdiction to make the revoking order; (*b*) that the Board had no power to order decertification for the reasons given; (*c*) that there was no evidence before the Board on which it could make the order; and (*d*) that the order was contrary to and constituted a denial or violation of natural justice.

Mr. Justice Barlow, in giving the reasons for decision, reviewed the action taken by the Canada Labour Relations Board. On July 6 Branch Lines Limited made application to the Board for an order revoking the certification of the Canadian Seamen's Union which had been in effect since November 20, 1947. This application came before the Board for hearing on August 9, 1950, with counsel for both parties present. The Board reserved its decision and on November 9, 1950, its Chief Executive Officer wrote to the solicitor for the Canadian Seamen's Union stating that the Board had decided to accept as evidence a certain white paper of the British Government, and further stating that the Board was prepared to receive any written representations which the Canadian Seamen's Union wished to submit. The letter was acknowledged but no representations were made. On December 7, 1950, the Board issued a unanimous judgment with reasons, revoking the certification. Mr. Justice Barlow held that the Board had proceeded in accordance with the Industrial Relations and Disputes Investigation Act in good faith and in a fair manner.

> The law is well settled that the Board must proceed within the four corners of the Act, and it must proceed fairly, in good faith and give the parties an opportunity to be heard. After a careful perusal of all the steps taken it appears to me that this was done.

The Court noted that the Act "gives the Board the widest possible latitude as to the evidence and information which it may receive and accept". The Act provides that:—

> 58. (5) The Board shall have the powers of commissioners under Part I of the Inquiries Act.
>
> (6) The Board may receive and accept such evidence and information on oath, affidavit or otherwise as in its discretion it may deem fit and proper whether admissible as evidence in a court of law or not.

Counsel for the Canadian Seamen's Union argued that unless a decertification order can be made under Section 11 of the Act it cannot be made. Section 11 permits the Board to revoke certification where, in the opinion of the Board, a bargaining agent no longer represents a majority of employees in the unit for which it was certified. In this case the Board found that the material before it did not show that the applicant no longer represented the majority of the employees in the bargaining unit, and the

Board did not purport to base its order on Section 11. The Board's order was made on the ground that the Canadian Seamen's Union was not an organization of employees formed for the purpose of regulating relations between employers and employees.

Mr. Justice Barlow pointed out that, when making an order for certification, the Board must decide (1) that the organization applying is a "trade union" as defined in the Act ("any organization of employees formed for the purpose of regulating relations between employers and employees" but not including an employer-dominated organization) and (2) that it represents a majority of the employees. The Act (Section 61) further provides that if in any proceeding before the Board a question arises as to whether an organization or association is a trade union, "the Board shall decide the question and its decision shall be final and conclusive for all the purposes of this Act", and the Board may reconsider any decision or order and may vary or revoke a decision or order. The Board was, therefore, acting within its powers in reconsidering an earlier decision, in which the Canadian Seamen's Union was found to be a trade union under the Act. Mr. Justice Barlow stated that it was not for the Court to consider the evidence on which the Board made the second order, holding that "the weight of the evidence is for the Board".

The Court concluded that "the Board had ample power under the Act to make the order in question in these proceedings".

Mr. Justice Barlow then dealt with the contention that the Canadian Seamen's Union was not a "juridical entity" and was accordingly not entitled to bring the application before the Court. Stating that at common law a trade union has no right of action, he cited *Society Brand Clothes Ltd.* v. *Amalgamated Clothing Workers of America and Others* (1931), SCR 321:—

> We must accordingly reach the conclusion, that, while, under the prevailing policy, our legislation gives to unincorporated labour organizations a large measure of protection, they have no legal existence; they are not endowed with any distinct personality; they have no corporate entity; they constitute merely collectivities of persons.

Therefore, the Canadian Seamen's Union would have no right to bring the present proceeding unless it were given a status to bring the proceeding by reason of the terms of the Industrial Relations and Disputes Investigation Act. Section 45 of the Act provides that a union shall be a *person* for the specific purpose of a prosecution for an offence, but the proceedings which may be taken by a union as such are limited by the Act. Mr. Justice Barlow held that the Canadian Seamen's Union was not a legal entity for the purposes of this motion, and had no legal right to bring the application. *Canadian Seamen's Union* v. *Canada Labour Relations Board and Branch Lines Limited,* Ontario High Court of Justice, February 23, 1951.

In the Quebec Superior Court a council of arbitration was held to have jurisdiction to deal with the performance or the non-performance of a term of a collective agreement.

An injunction restraining a council of arbitration was set aside by the Superior Court of Quebec on May 5, 1950, on the grounds that the council had the right to adjudicate on the performance as well as on the existence of obligations arising out of a collective agreement. The term of the collective agreement at issue was the provision concerning hours.

The case arose out of a dispute between a textile company and the union representing a group of the company's employees. A collective agreement had been in effect between the company and the union from September 1, 1948. A dispute arose out of the company's reduction of hours during the period from February 28, 1949, to May 1, 1949. The company maintained that a decline in orders had compelled it to reduce its output, and therefore the hours of work of certain of its employees. The union contended that the agreement guaranteed the employees a stated number of hours of work. The agreement provided for final decisions by arbitration in accordance with the Trade Disputes Act.

After the union complained about the reduction of hours of work, a conciliation officer was appointed. He failed to effect a settlement, and, upon his recommendation, a council of arbitration was established.

The company and the union each nominated a representative to the council of arbitration, and the two representatives agreed upon a chairman. The council of arbitration sat at different times, heard witnesses, held hearings at which both parties were represented by counsel, and finally received written briefs. On August 17, 1949, the company asked for a reopening of the inquiry. The council on August 26, 1949, refused to hear further evidence. The company applied for an injunction restraining the council of arbitration, which was granted on August 27, 1949.

In contending that the council of arbitration had exceeded its jurisdiction, the company argued that the question which the council had to determine was whether the company had the right to reduce hours from February 28 to May 1, 1949. The

company further contended that the question at issue was not a dispute within the meaning of the Trade Disputes Act, in that it had nothing to do with the performance or non-performance of a provision of the agreement. The question submitted to the council was simply whether an obligation existed.

Mr. Justice Girouard, in giving the decision of the Superior Court, found that the reduction of the hours of work affecting some of the employees had been the point at issue at the conciliation proceedings and at the hearings before the council of arbitration, and in neither case did the company object to the procedure taken in accordance with the Trade Disputes Act. Both parties had been given every opportunity to present their case before the council of arbitration.

The Court further pointed out that the agreement contained clauses relating to hours of work and the parties were bound to refer any difference which might arise to final and binding arbitration. Where there is a written agreement, a council of arbitration is obliged to interpret the agreement with regard to the facts.

The Court rejected the company's application with costs. *M. E. Binz Co. Ltd.* v. *Hon. Juge Pettigrew, et al et Syndicat National Catholique du Textile de Montmagny Inc., Mis en cause,* Rapports Judiciaires de Quebec (1951), CS Nos. 1 and 2, 46.

Wisconsin law prohibiting strikes in public utilities and substituting compulsory arbitration for the settlement of disputes found to be invalid by the United States Supreme Court.

The Supreme Court of the United States, in a decision given by Chief Justice Vinson on February 26, 1951, held that the Wisconsin Public Utility Anti-Strike Act, which forbids all strikes and lockouts in public utilities, is unconstitutional because it conflicts with the federal Labour Management Relations (Taft-Hartley) Act. The issue came before the Court when unions representing workers employed by a transit company and a gas company applied for review of decisions of the Wisconsin Supreme Court.

The union which represents the employees of the Milwaukee Electric Railway and Transport Company for collective bargaining purposes for many years had entered into collective agreements with the company without resorting to strike. In 1948, however, the parties were unable to agree on wages, hours and working conditions, and the union called a strike to enforce its demands. The Wisconsin Employment Relations Board, which is charged with administering the public utilities strike legislation, secured an *ex parte* order from a State Circuit Court restraining the strike. In compliance with that order the union postponed its strike. Thereafter, the Circuit Court entered a judgment under which the union and its officers were "perpetually restrained and enjoined from calling a strike . . . which would cause an interruption of the passenger service of the transit company". The Wisconsin Supreme Court affirmed the judgment.

Substantially the same situation obtained with respect to the employees of the Milwaukee Gas Light Company. A strike was called in 1949, and the gas workers left their jobs. As with the transit workers, an injunction was obtained ordering the union to notify all employees called out on strike to return to work immediately. Although the strike was quickly settled, the Circuit Court found that the union had not obeyed the order and it was fined for contempt of court.

The Public Utility Anti-Strike Act provides that,

> It shall be unlawful for any group of employees of a public utility employer acting in concert to call a strike or to go out on strike, or to cause any work stoppage or slowdown which would cause an interruption of an essential service.

A similar prohibition of lockouts follows. An "essential public utility service" is defined in the Act to include water, heat, gas, electric power, public passenger transportation and communications. Whenever collective bargaining results in an "impasse or stalemate" likely to cause interruption of the supply of an essential public utility service, the Wisconsin Employment Relations Board is empowered to appoint a conciliator. If conciliation fails, the Board is directed to select arbitrators who shall "hear and determine" the dispute. The Act establishes standards to govern the decision of the arbitrators and provides that the order of the arbitrators shall be final and binding upon the parties, subject to judicial review. Thus, the Act substitutes arbitration upon order of the Board for collective bargaining whenever an impasse is reached in the bargaining process, and as part of the statutory scheme denies utility employees the right to strike. In upholding the constitutionality of the Act, the Wisconsin Supreme Court stressed the importance of utility service to the public welfare and the plenary power which a state is accustomed to exercise over such enterprises.

The United States Supreme Court, reversing the judgment of the Wisconsin courts, found the Act unconstitutional because it

was in conflict with federal legislation. The National Labour Relations Board had exercised jurisdiction in respect to labour relations in both the gas and transit company as being work affecting inter-state commerce.

Mr. Justice Vinson first summed up the extent of federal regulation of peaceful strikes for higher wages in industries affecting commerce as interpreted in recent Supreme Court decisions.

> We noted that Congress . . . expressly safeguarded for employees in such industries the "right . . . to engage in . . . concerted activities for the purpose of collective bargaining or other mutual aid or protection", e.g., to strike. We also listed the qualifications and regulations which Congress itself has imposed upon its guarantee of the right to strike, including requirements that notice be given prior to any strike upon termination of a contract, prohibitions on strikes for certain objectives declared unlawful by Congress, and special procedures for certain strikes which might create national emergencies. Upon review of these federal legislative provisions, we held: "None of these sections can be read as permitting concurrent state regulation of peaceful strikes for higher wages. Congress occupied this field and closed it to state regulation".

Mr. Justice Vinson then discussed the opinion by the Wisconsin Court that a local public utility should be distinguished from a national manufacturing organization so far as the rights conferred by the Labour Management Relations Act were concerned. He cited the *Consolidated Edison Co.* v. *Labour Board* case, 1938, which established that federal labour legislation, encompassing as it does all industries "affecting commerce", applies to a privately-owned public utility whose business and activities are carried on wholly within a single state. He further pointed out that no distinction between public utilities and national manufacturing organizations has been drawn in the administration of the federal Act, and when separate treatment for public utilities was urged upon Congress in 1947, the suggested differentiation was expressly rejected. He concluded that "Creation of a special classification for public utilities is for Congress, not for this court".

Another point on which the Wisconsin Court had relied was that since the federal Act provided a procedure for *national* emergencies, Congress intended, by silence, to leave the states free to regulate *local* emergency disputes. However, Mr. Justice Vinson pointed out that the Wisconsin Act was not "emergency" legislation but a comprehensive code for the settlement of labour disputes between public utility employers and employees. Far from being limited to local emergencies, the Act has been applied to disputes national in scope, since arbitrators were appointed under the Act to determine the Wisconsin phase of the national telephone strike which threatened in the spring of 1950. Likewise, the Act has been applied when an emergency did not exist as it was invoked to avert a threatened strike of clerical workers of a utility. A proposal to make settlement by arbitration compulsory in public utility disputes was expressly rejected by Congress when the federal Act was amended in 1947, not because of any desire to leave the states free to adopt it, but as being inconsistent with federal policy.

Mr. Justice Vinson referred to the "debatable policy questions" raised in the argument. The unions involved and the National Labour Relations Board contended that prohibition of strikes with reliance upon compulsory arbitration for final settlement destroys the free collective bargaining declared by Congress to be the bulwark of the national labour policy, and leads to more unrest and disruption of service than is now experienced under a system of free collective bargaining, accompanied by the right to strike. The utility companies, the State of Wisconsin and other states stressed the importance of public utility services to the community and held that problems in such services are best left to the local government to solve. In the view of the Supreme Court, these questions cannot properly be resolved by the Court. They are for determination by Congress through legislative enactment, and in the Labour Management Relations Act, Congress had pronounced upon them.

In a dissenting opinion, Mr. Justice Frankfurter, with whom Mr. Justice Burton and Mr. Justice Minton concurred, took the position that there was no essential conflict between the Wisconsin Act and the federal labour law. The Taft-Hartley Act does not, in specific terms, deal with the problem of local strikes in public utilities. "Due regard for basic elements in our federal system makes it appropriate that Congress be explicit if it desires to remove from the orbit of state regulation matters of such intimate concern to a locality as

the continued maintenance of services on which the decent life of a modern community rests". After discussing previous decisions of the Supreme Court dealing with the sections of the Taft-Hartley Act on which the "right to strike" is based, he concluded that,

> To derive from the general language of the federal Act a "right" to strike in violation of a state law regulating public utilities is to strip from words the limits inherent in their context.

Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 998, et al v. *Wisconsin Employment Relations Board; United Gas, Coke and Chemical Workers of America, CIO, et al* v. *Same,* Labour Relations Reporter, Vol. 27, No. 35, 2385.

United States Railway Labour Act Amended

Union-shop and check-off clauses are now permitted in collective agreements under the Railway Labour Act.

An Act to amend the Railway Labour Act (Public Law 914 approved by the President January 10, 1951) permits union shop clauses in collective agreements, subject to certain conditions, and also permits clauses providing for the check-off of union dues. The Railway Labour Act governs the labour relations of railroads and air lines and their employees.

A new paragraph is added to Section 2, authorizing, notwithstanding any other provisions of the Act, agreements requiring, as a condition of continued employment, that within 60 days following the beginning of employment, or the effective date of the agreements, whichever is the later, all employees shall become members of the labour organization representing their craft or class.

Two conditions are imposed for the execution of union shop agreements. First, a union cannot require union membership as a condition of employment if, under its constitution, it refuses to accept the membership of persons of certain classes or offers them only limited membership. Second, an agreement may not require membership in a union as a condition of employment with respect to employees to whom membership was denied or terminated for any reason other than the failure of the employee to pay the dues uniformly required as a condition of acquiring or retaining membership. This provision removes from the requirements of the agreement as to union membership any employees to whom membership has been denied or who have been expelled from membership for any cause except nonpayment of dues. In such cases, nonmembership in the union would not be a reason for dismissal.

Under the amendment, agreements may contain a check-off clause, but this clause must provide that no deduction shall be made until each individual employee has furnished the employer with a written assignment of dues to the union, and this assignment shall be revocable in writing after the expiration of one year or upon the termination date of the collective agreement, whichever is the sooner.

The Act, as now amended, does not *require* the execution of union-shop agreements; it merely permits railway and airline companies and the representatives of their employees, through the voluntary process of collective bargaining, to include union-shop provisions in their collective agreements. Neither does the Act *require* a collective agreement to provide for the check-off. It merely allows the check-off to be adopted by agreement between the parties.

All forms of union security agreements and deduction from wages of union dues had been prohibited under the Railway Labour Act since 1934. The Senate Committee on Labour and Public Welfare, in reporting on the amendment, explained that the 1934 prohibitions were imposed because of the use of union security agreements by employers as devices for establishing and maintaining company unions. It was estimated that in 1934 there were over 700 agreements with company unions, or about 20 per cent of the total number of agreements in the industry. Since that time, company unions have practically disappeared. Labour organizations, which had in 1934 accepted the statutory prohibitions in order to reach the problems of company control over unions, have recently sought the right to bargain collectively with regard to union-shop agreements and check-off, a right which is possessed in substantial measure by unions representing employees in industry generally under the terms of the Labour Management Relations Act as they have been administered.

Under the Labour Management Relations Act (Taft-Hartley Act), employers and unions may agree to a union shop (each employee must become a member of the union 30 days or more after the date of his employment or the effective date of the collective agreement, whichever is the

later) if (1) the union is the certified representative of the employees in the appropriate bargaining unit and is not company-dominated; and (2) the majority of the employees have voted for it in an election conducted by the National Labour Relations Board. The Board will not hold a vote unless the union can show that 30 per cent of the employees in the unit want the union shop.

Labour Legislation Enacted by the Quebec Legislature in 1951

The Quebec Legislature made no major changes in the labour legislation of the Province at its recent session. The Legislature, which convened two months earlier than usual in order to provide financial aid to people in Rimouski and Cabano who lost their homes through fires last spring, met from November 8-16, 1950, and was adjourned to meet again from January 24 until March 17. During the session Acts were passed to provide for rent control, to make decisions of the Labour Relations Board and councils of arbitration immune to Court action, to permit collective agreements to be made for a term of one, two or three years, and to increase the composition of the Labour Relations Board from five to seven members.

Duration of Collective Agreements

By an amendment to the Labour Relations Act, collective agreements may now be made for a term of one year, two years or, at the most, for three years. Previously, the term of collective agreements made under the Act could not be a longer period than one year but the parties could agree that an agreement should be renewed automatically each year unless notice of termination was given by either party between the sixtieth and thirtieth day preceding the expiration of the agreement.

It is now provided that a one-year agreement which contains an automatic renewal clause will be renewed each year for a further period of one year unless one party gives the other written notice between the sixtieth and the thirtieth day before the end of the agreement that it wishes to terminate or amend the agreement or to negotiate a new one.

Further, if the parties to an agreement wish to make a new agreement for a term beginning at a later date than that of the existing one, they may either prolong their agreement for a period of less than a year or make a new one covering the interval between the expiry of the existing agreement and the date on which they desire the new one to commence.

The other provincial Labour Relations Acts and the federal Industrial Relations and Disputes Investigation Act do not limit the duration of collective agreements. They merely provide that the minimum term of an agreement is one year.

Labour Relations Board not Subject to Court Action

By amendments to the Labour Relations Act and to the Trade Disputes Act, decisions of the Labour Relations Board of the Province of Quebec or of councils of arbitration will not be subject to revision by the Courts. The amendments specifically provide that writs of *quo warranto,* of *mandamus,* of *certiorari,* of prohibition or injunction may not be issued against the Labour Relations Board, against a council of arbitration or against any of their members as a result of a decision, procedure or any act which relates to the carrying out of their duties. These writs are the means by which an appeal against a decision of the Board or a council of arbitration can be made to the Courts.

Further, Article 50 of the Code of Civil Procedure which declares that, "Excepting the Court of King's Bench, all courts, circuit judges and magistrates, and all other persons and bodies politic and corporate, within the Province are subject to the superintending and reforming power, order and control of the Superior Court and of the judges thereof", is declared not to apply to the Labour Relations Board and to councils of arbitration, including councils of arbitration established under the Act

respecting municipal and school corporations and their employees. A section prohibiting judicial writs being issued against councils of arbitration set up to settle disputes concerning municipal and school employees was included in the Act passed in 1949 (L.G., 1949, p. 612).

Composition of Labour Relations Board

The Labour Relations Board has been increased by the addition of two members. By an amendment to the Labour Relations Act, a chairman, vice-chairman and five other members appointed by the Lieutenant-Governor in Council will now make up the membership of the Board instead of a chairman, vice-chairman and three others, as formerly. According to a statement by the Minister of Labour, the amendment was made to give the Board wider representation. The Minister said that the Canadian Congress of Labour had requested the Government to have a representative appointed to the Board.

Rent Control

The Government of Quebec will take over rent control for the Province when the federal Government evacuates the field, by an Act respecting the regulation of rentals which will come into effect on Proclamation. The Act, which will apply in every city and town in the Province, will freeze rents at their level on April 30, 1951, until August 1 of this year and, except under special circumstances, no person may be evicted during that period.

Thereafter, if the parties to a lease are unable to agree to prolong the lease or to make a new one, the lessee may apply to the local administrator to prolong the lease and fix the rent. One local administrator will be appointed in areas with a population of less than 100,000 persons, an administrator and an assistant in more populous areas. Their decisions are subject to appeal to the Rental Commission, a Board of from three to five persons set up as the rental authority for the Province with the authority to fix general rental scales for the different areas. The Act will terminate on May 1, 1953.

Housing

Amendments were made to the legislation which was first passed at the 1948 session of the Legislature to facilitate the building of homes (L.G., 1948, p. 1267).

The powers granted to municipal corporations to enable them to remedy the housing shortage have been extended until February 1, 1954. The powers granted by the original Act include authority to cede land at $1 per unit to co-operative building societies or individuals and to reduce the valuation of any new dwelling for taxation purposes to 50 per cent of its real value for a period of 30 years. Previously, January 15, 1952, was the date fixed for the expiry of these powers.

By a further amendment, the Government is authorized to spend an additional $8,000,000 for the purpose of paying the interest in excess of two per cent on loans made for the building of new homes, such homes to be not more than two-unit dwellings. This additional sum will bring the total amount which has been allotted for this purpose during the last three years to $20,000,000. The period within which homes may be built and advantage taken of the provisions of the Act has been extended to February 1, 1954.

An additional credit of $25,000 has been added to the original sum of $100,000 which was set aside in 1948 for carrying out an inquiry into the housing problem in the Province. The Act authorized the appointment of a commission of from three to five persons for this purpose.

Teachers' Associations in Sherbrooke

By an amendment to the Act respecting Education in the City of Sherbrooke, Roman Catholic teachers' associations may not include workers of another category. The amendment provides that only a professional association of male and female teachers exclusively composed of persons in the service of the Board of Roman Catholic School Commissioners of Sherbrooke may be certified as bargaining agent by the Labour Relations Board of Quebec and may negotiate and sign a collective agreement with the school board. In negotiations with the school board, the professional association may only be represented by one of its members.

Old Age Pensions

An Act, to remain in effect for one year, was passed to authorize the Quebec Government to enter into an agreement with the Government of Canada regarding payment of old age pensions and pensions for the blind. The Provincial Government is also authorized to consent to a well-defined constitutional amendment which will permit the payment of such pensions on a fair basis and in co-operation with the federal authorities.

The Act was passed as a result of a federal-provincial conference held in December, 1950. At this conference the

federal Government proposed that a contributory old age pension scheme should be inaugurated under which the federal Government should provide pensions for all persons 70 years of age and over without a means test, and the federal and provincial Governments should share equally the cost of providing pensions to persons between the ages of 65 and 69 with a means test (L.G., 1951, p. 8).

Amendments to the British North America Act are necessary in order to give the federal Government jurisdiction to implement its part of the old age security plan. Draft constitutional amendments have been submitted to the provincial Governments for their consideration.

Co-operatives

An Act was passed authorizing the Lieutenant-Governor in Council to appoint three Commissioners to revise, co-ordinate, consolidate and suggest amendments to the laws of the Province governing co-operative syndicates. Various systems of taxation in relation to co-operatives will be studied by the Commissioners who will then make recommendations, taking into account the special nature of these organizations and the general economy of the Province. The Commissioners must submit a report of their work and their recommendations to the Lieutenant-Governor in Council within 12 months of their appointment unless the Lieutenant-Governor in Council fixes a later date.

Annual Report of the New Brunswick Department of Labour

Continuing good labour relations are noted in the Annual Report of the New Brunswick Department of Labour. A new Minimum Wage Order is now applicable to nearly all women workers in the Province.

The Department of Labour of New Brunswick is responsible for the administration of the Factories Act, 1946, the Stationary Engineers' Act, 1946, the Apprenticeship Act, 1944, the Labour Relations Act, 1949, the Minimum Wage Act, 1945, the Industrial Standards Act, 1948, and the Trades Examination Act, 1949. The Annual Report of the Department for the year ending October 31, 1950, summarizes the year's activities under each of these Acts.

Labour Relations

Good employer-employee relations during the year under review are reported. Only four strikes occurred. The total number of employees involved in strike action amounted to 421 and the time-loss in man-working days totalled 4,764. In six disputes, the Minister of Labour was requested to provide conciliation services. In each case a Conciliation Officer was appointed to confer with the parties, and in two cases where such conciliation was unsuccessful a Conciliation Board was appointed to deal with the matters in dispute.

During the year the Labour Relations Board received 30 applications for certification of bargaining agents. Of these 19 were granted, one was dismissed and 10 were pending at the close of the year. In three cases the Board directed that a secret ballot of all employees in the bargaining unit be conducted by an official of the Department in order to determine whether a majority of the employees in the unit supported the applicant union as their bargaining agent. As the result of such a vote the Board revoked the certification of one union.

Minimum Wages

During the year the Minimum Wage Board renewed the Minimum Wage Order affecting male employees engaged in producing pulpwood, pitprops or logs for the period from April 30 to September 30, 1950 (L.G., Oct., 1950, p. 1707). After giving consideration to information obtained from employers and workers and after conducting an extensive survey of wage rates and existing conditions, the Board decided to allow the Order to expire on September 30. This action was taken as the Board was ". . . convinced that renewal would serve no useful purpose in view of the strong demand for woodsworkers and the general upward wage trend."

The report notes that considerable difficulty was experienced in the administration and enforcement of a General Minimum Wage Order for women workers and of an Order affecting women employees in wholesale and retail merchandizing establishments. These Orders had provided for a minimum rate of $14.40 per week for a standard work-week of 48 hours or less and

also for a minimum rate of 30 cents per hour for part-time employees (L.G., Oct., 1950, p. 1707). Frequently, the question arose as to what number of hours constituted a standard work-week, particularly in seasonal employment and also in plants where hours varied in different departments.

To meet this situation, the Board revoked these Orders and replaced them with a General Minimum Wage Order, effective September 1, 1950, and applicable to all women workers in the Province with the exception of those already covered by a Minimum Wage Order governing hotels, restaurants, etc. (L.G., 1948, p. 492) and those exempted by the Minimum Wage Act.

The new Order established a minimum hourly rate of 35 cents for women working 48 hours or less in a week. The minimum overtime rate for work in excess of 48 hours a week was set at 50 cents per hour.

Departmental inspectors conducted 320 inspections during the year. Twenty-one violations for paying less than the minimum rate, and 102 for failure to post minimum wage orders were discovered and ordered corrected. Reports received from auditors of the Unemployment Insurance Commission have brought apparent violations to the attention of the Department resulting in better enforcement of minimum wage orders.

Industrial Standards

Two Industrial Standards Schedules, affecting the carpentry trade and the plumbing and the pipe-fitting trades in the Saint John zone, expired during the period under review. Both were renewed and came into force on June 15, 1950, and August 1, 1950, respectively.

In accordance with the Industrial Standards Act, an advisory committee, equally representative of employers and employees, was established by the Minister to assist in enforcing each Schedule.

The report notes that Industrial Standards Schedules were well received by both employers and employees. Inspections and investigations secured compliance with the Schedules without resort to court action in any case.

Factory Inspection

During the year the Factory Inspection Branch of the Department inspected 785 establishments employing 21,304 male and 6,229 female workers. As a result of these investigations 703 recommendations were issued with respect to such matters as improved safety, properly equipped lunch and rest rooms, first aid kits, machinery safeguards, improved lighting and ventilation, properly equipped lavatories, etc.

The report draws attention to the fact that, through the Canadian Association of Administrators of Labour Legislation, arrangements were made during the year for the preparation by the Canadian Standards Association of a model safety code for the woodworking industry. Representatives of Governments and industry throughout Canada, assisted by technical experts, have formed a committee to study the matter and to formulate a code of safe practices for this industry.

During the year, local advisory committees established in connection with the control of the employment of children in factories continued to advise on applications for employment by persons under 16 years of age. These committees, composed of representatives of the church, police and educational institutions, recommend that authorization to employ children be given by the Minister in cases where the circumstances warrant such an authorization. Committees are functioning at Saint John, Shippegan, Moncton, Baie Ste. Anne and St. Stephen.

Boiler Inspection

During the year 360 uninsured boilers and 1,099 pressure vessels were inspected by boiler inspectors and inspection certificates issued. In the same period 2,052 stationary engineers' and stationary boilermen's licences were issued.

Apprenticeship

The Apprenticeship Training Program of the Department continued to develop satisfactorily. Seventy-one apprentices completed their training and were given certificates of qualification as journeymen. The trades of pipe-fitter, stationary engineer and switchboard operator and lineman were declared appropriate for contracts of apprenticeship. Welding was also declared a trade appropriate for apprenticeship, to be effective on July 1, 1951.

Pre-employment training, provided for by the Dominion-Provincial Apprenticeship Agreement of January 3, 1949, was continued in the bricklaying, carpentry, electrical, machine shop, motor vehicle repair, plumbing, and body and fender repair trades. A total of 58 candidates successfully completed such training during the year, and 93 per cent were continuing their apprenticeship in the trade in which they received pre-employment training.

Another part of the Apprenticeship Training Program was the part-time classes, usually four hours a week, which were held

in the various vocational schools of the Province. A total of 243 apprentices attended these classes.

Stress was laid on supervision of training-on-the-job. Transfers to other shops are arranged so that the apprentice receives the broadest possible work experience in his trade.

Full-time refresher courses in trade theory and practical work in blueprint reading and drafting, machine shop work, motor vehicle repair, plumbing, welding and body and fender repair were conducted in Saint John and Moncton. During the year 23 apprentices took advantage of these courses which were of up to three months' duration.

Certification of Electricians

Under the Trades Examination Act, 1949, the electricians trade was designated as a trade to which the Act applies, and the Electricians Board of Examiners was appointed to examine candidates and to issue certificates of qualification in the trade. The Board decided that a candidate for a certificate must be at least 16 and must have had five years' practical experience in the electricians trade or hold a valid certificate of apprenticeship in the trade issued by the Apprenticeship Branch of the Department. It was also decided that examinations should consist of written, oral and practical tests and that a pass mark should be 65 per cent. At the first examinations conducted by the Board in Moncton 24 out of 26 candidates were issued certificates of qualifications. Examinations are to be held in other centres as soon as possible.

LABOUR LEGISLATION IN WESTERN GERMANY

Extensive labour legislation has been adopted in Western Germany since the close of World War II, at first by the Occupying Powers, and more recently by the Federal Government and by the state governments. The new legislation represents a return to the kind of democratic procedures that were destroyed under Naziism.

In the labour laws issued under the occupation of Western Germany, there have been strong indications of a return to democratic institutions and procedures which first had been established by the Weimar Republic and then destroyed in 1933 under Naziism, according to an article by Oscar Weigert of the United States Labour Department's Division of Foreign Labour Conditions, appearing in the *Monthly Labour Review* of December, 1950.

Four distinct stages have marked the progress of labour legislation during the five years of Western Germany's occupation, the article states: (1) The Four Occupying Powers imposed several new labour laws without any German participation, to be applied in all Occupation Zones; (2) with the end of Four Power Legislation in 1947, the Laender in the United States and French Zones enacted their own labour statutes; (3) in 1948, the authority to pass Land* labour legislation was extended to the British Zone, and German bizonal labour legislation was authorized by the British and American Military Governors; (4) establishment of the Federal Republic in the United States, British and French Zones delegated to the Federal Government the power, concurrent with that of the Laender, to enact labour law.

As a consequence of these various changes, Mr. Weigert points out, existing labour legislation in Western Germany is not a unified national system. It is a legal patchwork of statutes varying in origin and differing from Land to Land. This complex situation, he states, is "a natural but undesirable incident of divided Occupation and also of a policy of decentralization which favoured the development of separate legislative programs in the 11 West German Laender."

At the beginning of the Occupation, the Allied Powers faced a three-fold task: to eliminate Nazi methods and doctrines from labour statutes and practices; to overcome

* Land—A political unit somewhat similar to a state in the United States. Plural: Laender.

the chaotic conditions existing in the defeated country; and to establish the elements of a new legal system capable of guiding future German legislation.

The numerous Nazi labour laws were handled in different ways by the Allied Control Council in Berlin, the common agency of the four Powers. Highly objectionable statutes were abolished. Others which were indispensable such as the wartime legislation on wage and employment controls, and protective labour legislation, were retained.

Supporting the revival of trade unionism and collective bargaining, the Council authorized the restoration of works councils in individual plants and prescribed the re-establishment of labour courts and of machinery for conciliation and arbitration.

Land Labour Legislation

The first body of post-war labour law of German origin appeared in the constitutions which were made public by the seven Laender in the U.S. and French Zones in 1946 and 1947 and approved by the Occupation authorities. The Land constitutions guaranteed freedom of association, recognized collective bargaining, and provided for works councils in individual plants and for labour's right to participate in managerial decisions. In the subsequent years, each of the Laender in the American and French Zones worked out labour laws based on the constitutions. In the British Zone, labour legislation was least developed because of temporary restrictions of legislative powers and the inclusion of fewer specific labour provisions in the Land constitutions. It was most advanced in the Laender of the French Zone to which the bizonal legislation, initiated in 1948, did not extend.

Bizonal Laws

From 1948 to 1949 two laws enacted by the German Economic Administration for the U.S. and British Zones were of major importance. One of them ended wage controls and opened the way for genuine collective bargaining and the other re-established a legal framework for such bargaining.

Federal Jurisdiction

The 1949 provisional constitution of the Republic, while it did not contain a special section on labour matters, did nonetheless lay down "basic rights" such as freedom of association, free choice of occupation, and equal status of men and women.

"The Republic," Mr. Weigert points out, "has broad powers in regard to labour laws. Federal legislation is permitted, for instance, if it is needed for 'the preservation of legal or economic unity beyond the area of an individual Land, in particular for the preservation of uniform living conditions.' Outstanding German labour jurists contend that this clause establishes federal jurisdiction in almost all labour matters. Federal laws, when enacted, supersede Land laws."

The provisional constitution recognizes as federal law nation-wide labour laws which were not abolished by the Nazis or by the Occupying Powers. The bizonal labour laws of 1948 and 1949 also became federal law, but only in the U.S. and British Zones. They are effective in the French Zone as well on condition that the Laender accept them.

Scope of Recent Laws

While a balanced and inclusive system of labour law was impossible under the shifting economic and political conditions of the past five years, almost every field of labour law has actually been touched upon by recent legislation. "In some areas," states the article, "recent legislative provisions were limited to establishing fundamental and binding principles such as freedom of association or the right to equal pay for equal work. In the protective labour legislation field, only minor changes were made in the existing body of nation-wide statutes. In some other fields, recent labour laws are no longer valid."

Collective Bargaining

There are certain remaining areas of labour law where legislation announced during the Occupation is in effect and may considerably influence future trends. Among these are laws concerning collective bargaining. From the outset, American and British authorities helped to revive the tradition of such bargaining, which was highly developed at the time of the Weimar Republic but was suspended under the Nazi régime. With the lifting of wage controls in November, 1948, collective agreements again became an important factor in labour relations.

The bizonal law of 1949 defines the partners to the collective agreement and describes the latter's form and content. The contract has binding force on both the members of the organizations (company and unions) in the agreement and the organizations themselves. Changes in employment conditions are legal only if they are allowed in the agreement or if they are to the worker's benefit.

One provision which bizonal law adopted from pre-Nazi legislation was authorization

for the Labour Administration to extend the binding power of collective agreements to employers and workers who are not parties to the agreement but work in the same geographical area and industry or occupation. In the new law the conditions for such an extension are more explicitly defined and more narrowly drawn than in the earlier legislation.

The three Laender in the French Zone, as a result of this change, decided to regulate collective bargaining by laws of their own. In most of its provisions a 1949 law in Rhineland-Palatinate follows the bizonal statute but gives more freedom to the Land Labour Minister on the extension of collective agreements. The enactments of the other two Laender—Baden and Wuerttemberg - Hohenzollern — even provide for government intervention in collective bargaining itself. "Collective agreements," states the article, "become valid only by registration with the Land Labour Ministry, and registration can be refused by the Ministry. The advocates of this legislation contend that economic conditions in Western Germany are not stable enough to allow more than a 'controlled freedom' of collective bargaining as a part of a 'compromise between a free and a controlled economy.'"

Labour-Management Disputes

In 1946 the Control Council restored the two methods of adjusting labour-management disputes effective in the Weimar era. The first concerned disputes over the application of laws or agreements and these were handled by labour courts which adjudicated matters of law and contractual terms. Under the second method, public agencies intervened when the parties could not agree on original terms, renewal, or change of collective agreements.

The Control Council Law on Conciliation and Arbitration differs from the Weimar statutes in two essential points: (1) the public agencies intervene only if requested by all parties to a dispute; (2) awards are not compulsory (except in special cases where a dispute affects the interests of the Occupation). The author notes that both unions and employers oppose return to compulsory arbitration. During recent years, the few major labour disputes that did occur in Western Germany were settled by voluntary arbitration.

Further legislation adopted in recent years has concerned works councils, protection of workers in cases of dismissal and paid vacations.

Co-Rule in Coal and Steel

On January 26, the *New York Times* reported an important agreement between West German trade unions and industrial leaders on a proposed "co-determination" law, in the coal and steel industries.

Following agreement, Chancellor Konrad Adenauer instructed Labour Minister Anton Storch to draft, for passage through Parliament, a proposed law granting workers a 50 per cent share in the management of the steel and coal industries. The law would provide for creation of a series of councils in each plant and mine, and an over-all "Senate" for the respective industries, half of whose members would be selected by management and half by the unions.

The Economist states that the settlement provides for the following organization in the iron, steel and coal companies:—

(1) two out of eleven members of the board of directors to be nominees of the main trade union concerned, and two more to be trade unionist employees of the firm, who will be nominated by the works council, and may be rejected by the TU headquarters;

(2) a fifth director to be nominated by the trade union but to be a neutral individual having no connection with the industry;

(3) the employers to have similar rights of nomination;

(4) the "eleventh man," as he is popularly termed, will be an expert and an arbitrator, who will be nominated by the rest of the directors. The general meetings are to elect the nominees.

In the board of managers a labour manager will sit with the technical and commercial managers—all of them on a year's probation unless they are already tried men. Finally, two new bodies, called "Senates," will be set up over the steel and coal industries to resolve disputes and give recommendations. They will consist of nominees of the employers and unions chosen by the Government.

JOB ANALYSIS PROGRAM WILL FACILITATE SELECTION OF WORKERS FOR DEFENCE JOBS

The Unemployment Insurance Commission has recently started training a staff of officers to become job analysts, with a view to improving its placement services. While primarily designed as an extension of its normal services, the program is expected to be of particular value in selecting workers for defence production.

At a time when the manpower requirements of Canada's defence effort call for the most effective utilization of the nation's working force, the job analysis program on which the Unemployment Insurance Commission has recently embarked assumes an importance beyond the normal employment placement procedure. Unlike the position in World War II, when both Canada and the United States had an existing and potential labour supply upon which to draw or train, the approaching situation is likely to be marked by manpower shortages, particularly of skilled craftsmen. The Commission's job analysis program is aimed at making the most effective use of the working force by attempting, through examining and analysing jobs at the place of work, and ascertaining the skills of workers, to "match" the skilled worker with the skilled job.

Matching men with jobs is a fundamental function of the Employment Service, and it is an essential requirement that the employment officer know the man—his qualifications, experience, education and other attributes—and that he know the job and what it requires to do it successfully. In the larger offices of the Commission some degree of specialization on the part of employment officers is possible, and many officers are able to concern themselves only with fields of employment with which they are thoroughly familiar. In all too many cases, however, because of the impracticability of having specialists in the 12,000 and more occupations in Canada, employment officers are often called upon to select workers for jobs for a knowledge of which they have to rely upon specifications laid down in employers' orders, by occasional conducted plant visits, by past experience, or by reference to other occupational information.

The main source of information about jobs to be filled is, of course, the employer's order form. But because in many instances an employer's order is given by telephone, the employment office, particularly in the case of new and unfamiliar jobs, is sometimes severely handicapped in acquiring anything but a general guide as to the type of person capable of filling the job successfully. Precise selection in these circumstances, except where the employment officer is familiar with the occupation, is impossible. Sometimes two or even more referrals must be made for a single job opening before the right man is placed, and a poor placement has the undesirable results of involving the employer in expense in training and expense arising out of high turnover, and, to the worker himself, dissatisfaction with a job which he is ill-equipped to perform.

The Unemployment Insurance Commission, recognizing these facts, has always encouraged the accumulation of knowledge about jobs, and over the years the local employment offices have, by various means, built up a fund of information concerning many of the jobs they have been called upon to fill. The Commission has been active, too, in devising and improving methods for the proper appraisal of applicants' suitability for jobs. Interviewing techniques, occupational coding systems, oral trade questions and, recently, a testing program for local offices, are all steps by means of which the Commission seeks to increase the effectiveness of its employment operations.

The job analysis program recently inaugurated, and still in its early stage of training officers to become job analysts, is directed towards those areas of the employment field where it can be most economically and profitably applied. It will result in standardizing methods at present in use, of accumulating and recording essential facts about jobs, and will instruct personnel in those offices where such techniques have not yet been employed in any scientific manner.

Job Analysis Technique

The technique or process of job analysis involves observation of the worker on the job, interrogating both the worker and his supervisor, and so identifying the factors required for successful job performance. The practical knowledge thus acquired is recorded on a job analysis schedule which is quite comprehensive, including such factual information as the job title, the number employed in that job, and the seasonal pattern of employment in the job. The most important information recorded, however, is a precise and detailed description of the work performed, broken down into its various task elements. This is followed by job requirements such as previous job experience, on-the-job training necessary before proficiency is attained; formal training required and whether in-plant, technical or vocational; hobbies which assist in acquiring certain skills; if apprenticeship is necessary; relationship of the job to other jobs in terms of possibilities of advancement or transfer; type of supervision given and received; responsibility for materials, equipment and safety of others; mental abilities and personality factors of the worker; physical characteristics the worker must possess, such as manual dexterity, good eyesight; knowledge of machines, products and processes necessary.

The job analyst is also required to note and record the physical demands the job makes on the worker—such as whether it requires standing for long periods of time, lifting heavy weights—as well as the working conditions surrounding the job. This information is particularly useful in the placement of physically handicapped workers.

Besides facts about individual jobs, job analysts are required to collect information regarding the employment policy of the firm, as to the employment of women and certain types of workers such as handicapped persons.

Once the job analysis survey has been completed the information gathered is transferred to permanent cards, which are designated by the local employment office as job specifications. This, of course, is done only after they have been thoroughly discussed with and approved by the employer. When the employer requires workers for a job for which there is a job specification on file in the local office, it is necessary for the employment officer to inquire only as to the number of workers required, the hours of work and rates of pay, which may fluctuate. The job specification remains as a permanent job order, consequently the processing of the order is facilitated by the fact that the essential information about the job is complete.

Provides Basis for Effective Selection

The time factor, however, while important to a busy local office and to a busy employer, is not by any means the main benefit derived from job specifications. A greater benefit, perhaps, is that it results in a more precise matching process, a better selection of workers and, with possible shortages of labour developing, a fuller utilization of the available work force. There is little doubt that as the defence production program intensifies, shortage of skilled workers will demand the breaking down of skilled jobs so that they can be performed by women and by semi-skilled or unskilled workers. The fact that these jobs are termed semi-skilled or unskilled does not mean that anyone can perform them successfully. Almost all jobs have certain requirements which must be met, some physical, some mental, some involving educational attainments, some requiring similar or related experience. An analysis of such new jobs would appear to be a prerequisite to the economical selection of workers.

A further advantage in having job specifications is that the local employment office is enabled to impart information to the applicant about the nature of the work he will be called upon to perform, also the working and environmental conditions surrounding the job.

Factors Determining Jobs to be Analysed

The program, of course, requires the co-operation of employers and any analysis conducted will only be made at the request or with the fullest approval of the employer concerned. It is not the intention of the Commission to analyse all jobs but, as previously stated, only those jobs and areas where it is felt that any analysis is necessary, and where the technique can be economically and usefully applied.

The following factors will be considered in determining in what establishments, and for what jobs, job analysis surveys might be undertaken:—

1. Success or otherwise of the local employment office in supplying the employer with suitable applicants;
2. The size of the establishment and the amount of hiring business done through the local employment office;
3. The number and types of recurring orders placed by an employer with the local office;

4. Labour turnover in a plant in relation to turnover for similar plants or in the industry as a whole;
5. Employers who have job openings of a type frequently recurring in clearance (i.e., the system whereby job orders which cannot be filled locally are extended to other areas, to other regions, or across the country);
6. Employers who have indicated an interest in hiring handicapped workers;
7. Employers setting up new jobs—jobs for which requirements are unknown to the local office;
8. Industrial employers whose hiring specifications for a particular job or jobs are much higher or lower than those given the office by other employers for the same type of job;
9. Employers whose hiring specifications for a particular job or jobs are found, upon referral of an applicant, to be either much higher or lower than those originally given on the employers' orders;
10. Employers who request the assistance of the local office in solving hiring problems in terms of recruitment, selection and turnover.

Job Analysis Manual

In preparation for the job analysis program, officers of the Commission, after intensive study of the subject, prepared a technical handbook to serve as an instructional guide to those officers engaging in the actual work of job analysis. The handbook is designed also as a source of reference for the information of all employment officers regardless of whether their duties are concerned with registration, selection, employer-relations work, or employment counselling, on the assumption that all of these functions require an insight into occupations and jobs.

No program of this kind and scope, dealing as it does with a highly technical subject, can be launched without considerable training. The first course of training was conducted at the Commission Head Office early this year, and was given to a group of staff training officers and employment specialists. These officers, still under the guidance of Head Office technicians, are extending the training to similar groups at regional and large local offices. It is expected that by mid-summer local offices in several regions will be trained to undertake job analysis surveys in employers' establishments.

The efficiency of a public employment service is often measured by the number of placements effected over a given period. Canada's employment service makes almost 800,000 placements annually. However, there is a growing appreciation of the qualitative aspect of placements, and a realization that the proper selection and fitting of workers into jobs can have a far-reaching effect upon the productivity of a country's working force. While the adoption of more scientific techniques and methods of selection can be regarded as logical steps in the development of the employment service, it is timely that in the face of threatening shortages of skilled workers and, in consequence, the necessity for the fullest utilization of the labour force, Canada's employment offices will be better equipped than ever before to serve employers seeking workers, and workers seeking jobs.

Selected Decisions of Umpire Under the Unemployment Insurance Act

The decision printed below relates to the disqualification of married women from benefit under Benefit Regulation 5A, which became effective on November 15, 1950. Because of its importance it is printed in full.

Held: (1) That the question of the constitutionality of the regulations passed by the Commission and approved by the Governor in Council is not one which comes within the purview of the Umpire.

(2) That the claimant, a married woman, was rightly disqualified from the receipt of benefit under Benefit Regulation 5A for the period of 2 years following the date of her marriage as she could not meet any of the exceptions provided in the said regulation.—CU-B 655 (March 22, 1951).

DECISION

Summary of the Facts:

The claimant, 28 years of age, was last employed as an assembler (plate straight-

ener) by a radio condenser manufacturing company in Toronto, Ont., from February 4, 1946 to October 5, 1950.

On October 6, 1950, she filed an initial application for benefit stating that she had been dismissed from her employment as a result of a labour dispute at the premises at which she was employed. The Insurance Officer disqualified her from the receipt of benefit under Section 39 of the Act. This disqualification, however, was subsequently removed by a Court of Referees as from November 11, 1950. On November 24, 1950, the claimant was married.

Benefit Regulation 5A, which became effective on November 15, 1950, reads as follows:—

> 5A (1) Every married woman shall be disqualified from receiving benefit for the period of two years following her marriage unless she is relieved sooner from any such disqualification as provided in this section.
>
> (2) In order to be relieved of any such disqualification she shall in addition to proving the fulfilment of all other conditions of entitlement to benefit, prove her attachment to the labour market by working, for an aggregate of at least 90 days, under a contract of service in excepted employment other than employment by persons connected with her by blood relationship, marriage or adoption, or in insurable employment, or partly in insurable employment and partly in such excepted employment; and the period within which such 90 days must fall shall commence on the day following her marriage if she was not then in employment, and shall commence on the day following her first separation from employment subsequent to her marriage if she was in employment at the time of her marriage; and after proving her attachment to the labour market as aforesaid she shall then be relieved of such disqualification for periods of unemployment subsequent to the last of such 90 days.
>
> (3) No disqualification shall be imposed under this section upon a married woman whose first separation from employment following her marriage is by reason of a lay-off due to shortage of work, nor upon a married woman whose employment terminates within two weeks prior to her marriage or at any time following her marriage, solely by reason of her employer's rule against retaining married women in his employ.
>
> (4) Where a married woman's husband has died, has become permanently and wholly incapacitated, has deserted her or has been permanently separated from her, she shall be relieved of any such disqualification from the date of any such occurrence.

Pursuant to paragraph (1) of the above quoted regulation, and inasmuch as she could not meet the exceptions provided in paragraphs (2), (3) and (4) of that regulation, the claimant was disqualified by the Insurance Officer, from the receipt of benefit, for the period from November 25, 1950 to November 24, 1952.

From the decision of the Insurance Officer, the claimant, on December 12, 1950, appealed to a Court of Referees, which heard the case in Toronto, Ont., on December 27, 1950. Mr. J. Hurley, District Organizer of the United Electrical Radio and Machine Workers of America, of which union the claimant is a member, was present at the hearing and gave evidence. The Court unanimously upheld the decision of the Insurance Officer.

From the decision of the Court of Referees, the union, on January 5, 1951, appealed to the Umpire on behalf of the claimant and submitted an elaborate memorandum in which it concludes as follows:—

> To summarize our objections to the decision in this case:
>
> 1. Regulation 5A violates the statutory conditions of the Act as set out in Section 28.
> 2. Had the amendment to Section 38 of the Act intended to give the Commission the power it has usurped to itself in Regulation 5A, it would have been necessary to amend the statutory conditions as set out in Section 28.
> 3. In making Regulation 5A, the Unemployment Insurance Commission went beyond its terms of reference as set out in Section 38 of the Act, Subsections 1 and 2.
> 4. In recommending Regulation 5A the Unemployment Insurance Advisory Committee went beyond its terms of reference as set out in Section 84 and Section 85 of the Act.

An oral hearing was requested and it was held before me in Ottawa, on February 21, 1951. Those who attended and made representations were Mr. J. Hurley, District Organizer, United Electrical Radio and Machine Workers of America, on behalf of the claimant, Mr. A. Andras, Assistant Research Director, Canadian Congress of Labour, and Messrs. C. Dubuc and H. S.

Relph, K.C., Legal Adviser and Chief Claims Officer respectively of the Unemployment Insurance Commission.

CONCLUSIONS:

The finding of the Court of Referees is in accordance with facts and law and therefore must be upheld.

Benefit Regulation 5A, under which come this case and many others which are before me for decision, has been the object of considerable criticism. Some Courts of Referees have expressed doubt as to its constitutionality while others have suggested that it is too rigid and that some discretionary power should be given to the adjudicating authorities.

In oral and written representations, labour organizations have asked me to rule that the regulation is "improperly conceived and administered" or at least to recommend to the competent authorities that it be rescinded along with the authorizing statute which is Section 38 (1) (*d*) of the Act. They also expressed the opinion that the Commission had not given sufficient public notice of its intention to make that regulation.

The question of the constitutionality of Benefit Regulation 5A is not one which comes within the purview of the Umpire under the Act. The regulation was approved by the Governor in Council and, in accordance with Section 98 (1) of the Unemployment Insurance Act, it has the same effect as if enacted in the Act.

There can be no doubt however that the application of the regulation to actual cases has shown that while it serves its purpose of checking the unforeseen drain on the Unemployment Insurance Fund by married women claimants who have actually withdrawn from the labour field, it also creates discrimination.

Paragraph (1) of the regulation provides for the disqualification of every married woman for the period of two years following the date of her marriage and no distinction is made between those who have established their rights to benefit prior to November 15, 1950 and those who have not. While this appears to be a retroactive feature, nevertheless it is in accordance with the authorizing statute. Paragraphs (2), (3) and (4) of the regulation set out definite exceptions to the general rule whereby certain claimants can be relieved from the disqualification, but there are no provisions for equally deserving claimants.

I believe in the principle of a restrictive measure which will prevent married women who are not genuinely in the labour field from draining the Unemployment Insurance Fund to the detriment of the workers of this country for which the Act was really intended. Conversely, I do not feel that married women who are obliged to seek employment because of the low income of their husbands or other reasons of an equally compelling nature should be made victims of too restrictive a regulation.

For those reasons, while I am not prepared to act on the unions' request that I recommend that Regulation 5A be rescinded along with the authorizing statute —although I must say that the latter is not as clear and as unequivocal as it could be—I would suggest that the regulation be so amended as to provide, instead of a general disqualification with exceptions, additional conditions for the entitlement of married women to benefit and that such conditions be elastic enough to prevent discrimination.

Section 38 (2) of the Act reads:—

> The Commission shall give such public notice as it considers sufficient of its intention to make regulations under this section and shall receive any representations which may be made to it with respect thereto.

According to the information before me, representatives of the largest groups of workers in Canada sat on the Advisory Committee which, pursuant to Section 98 (2) of the Act, studied the proposed regulation for married women and the Committee's reports to the Governor in Council on the question appeared in the LABOUR GAZETTE of November, 1949 and October, 1950. As there are apparently no organizations of women workers which could have been consulted, it was not unreasonable for the Commission to feel that adequate and effective notice had been given. In any event, I am confident that the Commission will give full consideration to the opinion expressed by some unions on this matter of public notice.

The appeal is dismissed.

(Sgd:) ALFRED SAVARD,
Umpire.

Dated at Ottawa, Ont., this 22nd day of March, 1951.

Unemployment Insurance Statistics, February, 1951*

The monthly report issued by the Dominion Bureau of Statistics on operations under the Unemployment Insurance Act states that during the month of February, 1951, a total of 109,709 initial and renewal claims for unemployment insurance benefit were filed at local offices of the Unemployment Insurance Commission. While this is a decline of about 36 per cent from the 172,269 claims filed during the month of January, it is a slight increase over the 109,282 claims recorded in February one year ago.

Ordinary claimants on the live unemployment register on February 28 numbered 208,039 (169,626 male and 38,413 female), compared with 220,539 (177,752 male and 42,787 female) on January 31, and 286,163 (232,385 male and 53,778 female) on the last day of February, 1950.

Regular and supplementary claimants on the live register at the end of February totalled 252,533, of which 35,758 represented supplementary benefit claimants. Those on the register seven days or more numbered 207,565 or 81 per cent of the total.

During February, 120,000 initial and renewal claims were disposed of: 77,080 were considered entitled to benefit and 42,920 were not entitled. However, total non-entitlements on all claims adjudicated (including supplementary benefit and revised claims) numbered 57,558. Of these, 33,602 represented regular claims disallowed (due to insufficient contributions), and 15,573 represented claimants disqualified. Chief reasons for disqualification were: "voluntarily left employment without just cause" 5,757 cases; "not unemployed" 3,496 cases; and "refused offer of work or neglected opportunity to work" 1,548 cases.

Persons commencing the receipt of payments on initial or renewal claims during the month numbered 79,421, compared with 104,667 in January, and 112,745 in February, 1950.

Benefit paid in respect of 3,853,024 proven unemployed days amounted to $9,589,561 for the month of February. In January, claimants received $9,367,276 as compensation for 3,788,241 days of proven unemployment, and in February, 1950, benefit payments amounted to $13,605,340 for 5,585,337 days.

During the week February 24 to March 2, 158,045 persons received a total of $2,331,336 for 936,027 compensated days, while for the week January 27 to February 2, 149,816 benefit payments were made amounting to $2,195,606 for 885,092 days.

Average daily rate of benefit for the week February 24 to March 2, was $2.49, compared with $2.48 during the week January 27 to February 2, and $2.44 in the week February 25 to March 3, 1950. The average duration remained the same during the three weeks under review (5·9 days).

Supplementary Benefit

Of the 33,602 regular claims disallowed during the month of February, 33,545 were considered for supplementary benefit. Renewal claims by supplementary benefit claimants totalled 801. A total of 34,421 claims were adjudicated, of which 24,443 were entitled to benefit. Claimants ineligible for supplementary benefit because they could not satisfy basic requirements under any of the four classes numbered 8,383. Benefit payments amounted to $1,093,565.

Insurance Registrations

Reports received form local offices of the Unemployment Insurance Commission showed that during the month of February, 1951, insurance books were issued to 4,161,805 employees who had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1950. This was an increase of 55,562 from January 31, 1951.

As at the end of February, there were 243,271 employers registered, representing an increase of 398 during the month.

* *See* Tables E-1 to E-8.

WAGES, HOURS AND WORKING CONDITIONS IN THE PRIMARY TEXTILE INDUSTRY, OCTOBER 1950*

Average hourly wages in the Primary Textile Industry increased more than 6 per cent in 1950. Almost one-half of the mill employees were on a 5-day week; and most were working 45 or 48 hours. Time and one-half was the predominant rate for overtime work. One week with pay was the general vacation period after a year of employment, with many mills increasing this after longer periods of employment. Most of the workers were paid for some or all of the statutory holidays observed.

Average hourly wages in the Primary Textile Industry increased 6·2 per cent during the year ending October 31, 1950, according to preliminary results of a survey of the industry by the Economics and Research Branch, Department of Labour.[1] This increase, which was somewhat less than the 8·5 per cent rise during the previous year, raised the wage index to a high of 258·5 (base 1939=100). Since 1945 average hourly wages in the industry have increased just over 70 per cent.

During the year there have been no significant changes in the hours or working conditions for which comparable information in 1949 is available.[2] The largest groups of employees were normally working 45 and 48 hours a week at the time of the 1950 survey; and almost one-half of the workers were on a 5-day week. Time and one-half was the predominant rate for overtime after daily or weekly hours, and for work on Sundays and statutory holidays.

Most of the workers in the Primary Textile Industry are employed in mills which reported giving an initial vacation of one week with pay, or the equivalent, after a year or less of employment. In most cases this vacation period is increased to two or three weeks with pay after longer periods of employment. Almost all of the employees were in mills which observed from 6 to 10 statutory holidays, and all but 11 per cent were paid for some or all of these holidays when they were not worked.

Regular rest and wash-up periods are fairly common in the Primary Textile Industry, with the largest group receiving rest periods being allowed two 10-minute periods and the largest group receiving wash-up time being allowed two 5-minute periods daily. A shift differential was paid to most of the production employees on the evening or night shifts, a higher differential generally being paid to workers on the night shift.

Geographical and industrial distributions of the 314 mills and 66,132 mill workers is given in Table I. The Primary Textile Industry is predominately located in Quebec and Ontario, with but a small number of mills in the Maritime and Western Provinces. The largest group of mill workers in the Industry, about 55 per cent, were located in Quebec, and the next largest group, just under 40 per cent, in Ontario. The four main divisions of the Primary Textile Industry included in this article are: Cotton Yarn and Cloth, employing about 33 per cent of the mill workers; Woollen Yarn and Cloth, employing 16 per cent; Rayon Yarn and Fabric, 23 per cent; and Knit Goods, 29 per cent.

Women workers comprised about 44 per cent of all mill employees in the Primary Textile Industry.

Average Wages.—The largest increase in average hourly wages during 1950 occurred in the Rayon Yarn and Fabric Division of the Primary Textile Industry, whereas the

---

* Information in this article was prepared from data obtained in the annual survey of wage rates and working conditions for 1950 conducted by the Economics and Research Branch of the Department of Labour. Employers were asked to report on wage rates (straight-time earnings for piece-workers) and certain conditions of work in their establishments during the last pay period preceding October 31, 1950.

1 Final index numbers and detailed information on average wages and hours for selected occupations in the four major divisions of the industry will be published shortly in the eighth annual report on *Wages and Hours in the Primary Textile Industry in Canada, October 1950.* This publication will be available on request.

2 "Wages, Hours and Working Conditions in the Primary Textiles Industry, October 1949," THE LABOUR GAZETTE, May 1950, p. 719.

smallest increase occurred in the Cotton Yarn and Cloth Division. The 1950 index numbers (base 1939=100) of the four major divisions of the industry together with the percentage increases since 1949 and 1945 are as follows:—

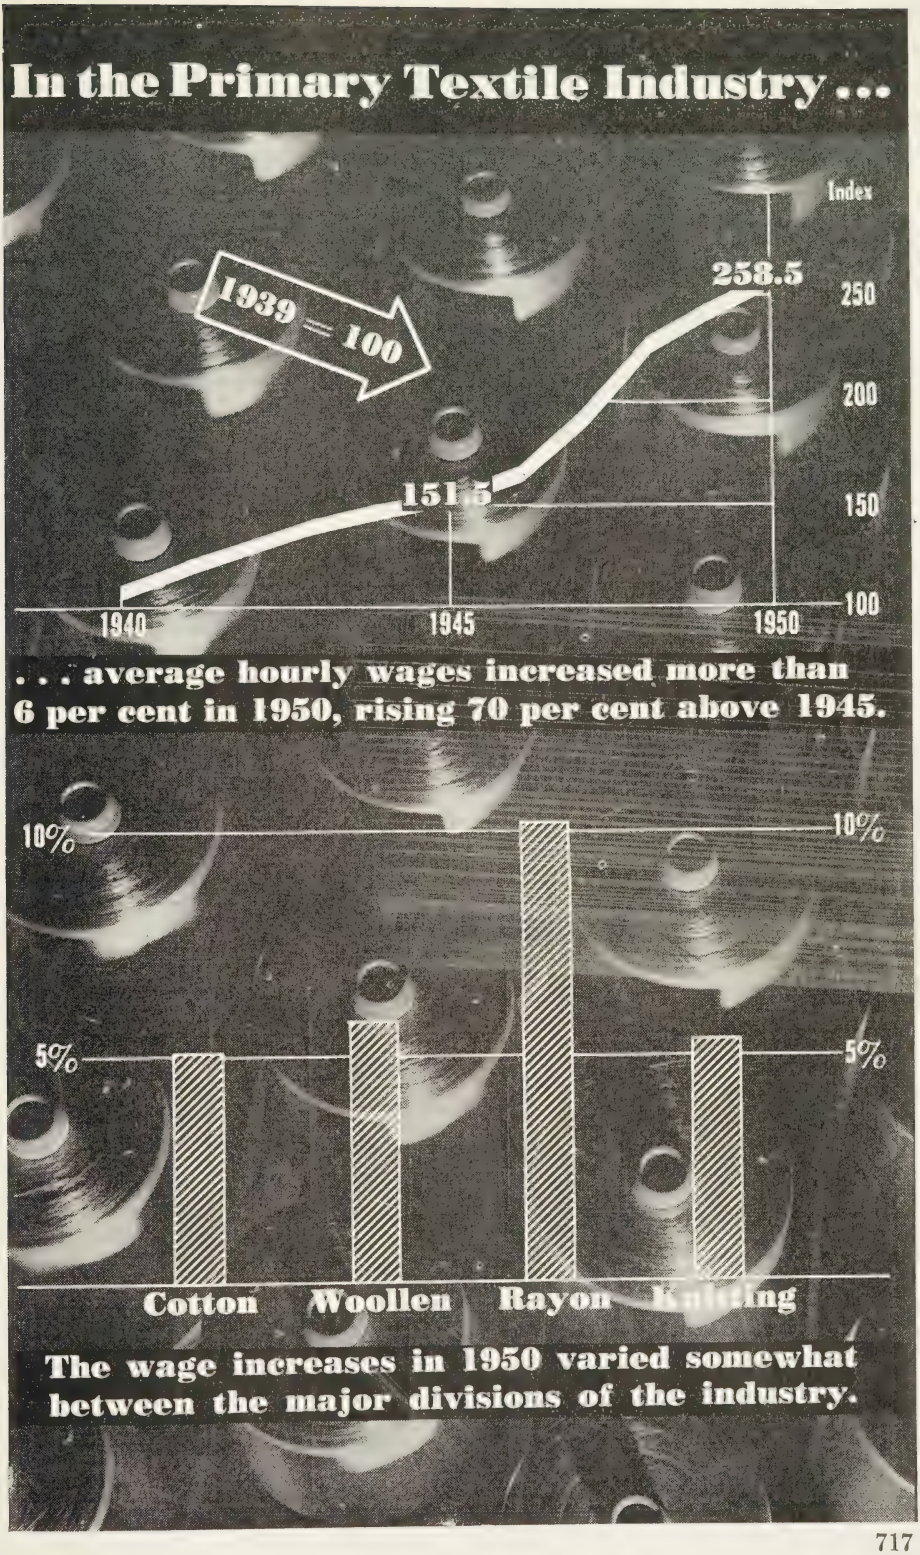
	1950 Index (Base 1939=100)	Increase 1949-50	Increase 1945-50
		%	%
Cotton Yarn and Cloth	261.4	5.1	75.8
Woollen Yarn and Cloth	274.8	6.3	68.1
Rayon Yarn and Fabric	274.1	10.3	84.1
Knit Goods	243.2	5.6	61.8

The average hourly wages used to calculate the above index numbers are based on average wage rates of time workers and average straight-time hourly earnings of piece workers.

The Normal Work Week.—The normal weekly hours of work in 1950 were similar to the weekly hours as they were at the time of the 1949 survey. More than 90 per cent of the mill employees were normally working from 40 to 48 hours a week, with most of the remainder working more than 48 hours (Tables IIa and IIb). About one-third of the workers were on a 45-hour week and one-quarter on a 48-hour week. Sixty per cent of the employees were working 45 hours a week or less.

The largest group of workers engaged in the manufacture of Rayon Yarn and Fabric were normally working 48 hours a week, but the largest single groups in the other three divisions of the Primary Textile Industry were reported to be working 45 hours. In Quebec, 38 per cent of the mill employees were working 44 or 45 hours a week and 37 per cent were working 48 hours, as compared with 53 per cent and 10 per cent respectively in Ontario.

The proportion of employees on a 5-day week in 1950, 48 per cent, was the same as in 1949. More than one-third of these workers were on a 45-hour week and about 20 per cent on a 40-hour week. The 5-day week was most common in the Woollen Yarn and Cloth and the Knit Goods Industries. In Ontario 87 per cent of the workers were on a 5-day week, whereas in Quebec just 23 per cent were on this work week. Between the cities of Toronto and Montreal the corresponding proportionate difference was even greater, with 93 and 21 per cent of the employees respectively being reported on a 5-day week.



Overtime Payment.—Time and one-half was the predominant rate reported for overtime after daily or weekly hours, and for work on Sunday (Tables IIIa and IIIb). Thirteen per cent of the workers, however, were in establishments which paid double time for work on Sunday, most of whom were in the Rayon Yarn and Fabric and the Knit Goods Industries. About two-thirds of these employees were working in Ontario and most of the remainder in Quebec.

Time and one-half was also the predominant payment for work on statutory holidays, although a number of mills reported paying regular rates of pay, particularly on those holidays which are normally paid for when not worked. When work is necessary on these paid statutory holidays, the general payment of time and one-half is in addition to the regular holiday pay which the worker would have received if he had not worked.

Annual Vacations with Pay.—Almost all of the employees were in mills which reported an initial vacation of one week with pay, generally after a year of employment (Tables IVa and IVb). The amount of payment for the period was based on straight time rates or average straight-time earnings for a normal week's work, 2 per cent of annual earnings or one-half day's pay for each month worked. Eighteen textile mills, employing about 8 per cent of the workers, reported giving an initial vacation of two weeks with pay, or the equivalent. Most of these workers were in the Cotton Yarn and Cloth Industry.

More than 80 per cent of the workers were employed in mills which increased the period of vacation with pay as the worker's term of employment increased. About one-half of these workers may become eligible to receive a maximum of two weeks vacation, generally after 5 years of employment; and most of the remainder may become eligible to receive three weeks with pay, usually after 15 to 25 years of employment. The majority of this latter group may receive an intermediate vacation period of two weeks with pay after 5 years of employment, and in many cases a graduated percentage-of-annual-earnings payment is given.

The majority of mills shut down for a summer vacation period in 1950. Thirty per cent of the workers were employed in

113 mills which shut down for one week and about two-thirds of the workers were in 165 mills which shut down for two weeks. Seven of these latter mills shut down for one week in the summer and one week in the winter. A few mills did not indicate the period of shut-down.

Statutory Holidays.—More than 95 per cent of the workers in the Primary Textile Industry were employed in mills which observed from 6 to 10 statutory holidays in 1950 (Tables Va and Vb). Thirty-eight per cent observed 8 statutory holidays and 25 per cent observed 9. The workers in Quebec were in mills which tended to observe a greater number of statutory holidays than did the mills in Ontario. In Toronto, however, the largest group of workers observed 8 holidays, whereas in Montreal the largest group observed 6 days.

The number of holidays observed, in this article, is the number of days when the mill is not operating because of Dominion, Provincial or Municipal holidays, or religious holidays regularly observed by the closing of the mill.

All but 11 per cent of the workers were paid for some or all of the statutory holidays when these days were not worked. About 40 per cent of the workers were paid for 6 days and 21 per cent were paid for 8. Most of the workers being paid for 6 statutory holidays were located in Quebec, while most of those being paid for 8 days were in Ontario. There has been a definite increase, since 1949, in the number of statutory holidays paid for, as the proportion of workers being paid for 6 or more days has risen from 54 to 67 per cent.

Rest and Wash-up Periods.—Regular rest or wash-up periods are fairly common in the Primary Textile Industry (Table VI). Fifty-eight per cent of the workers are in mills which permit a regular rest period, most of whom are allowed two 10- or 15-minute rest periods a day.

Wash-up periods are permitted to about one-third of the mill workers in the industry. About 80 per cent of these workers are allowed two wash-up periods a day, each generally of 5 or 10 minutes duration.

Shift Differentials.—Almost one-fifth of the mill employees in the Primary Textile Industry were reported to be working on the 2nd or evening shift at the time of the 1950 survey, and 7 per cent were reported on the 3rd or night shift (Table VII). Most of these workers, particularly those on the night shift, received a wage differential for this shift work. Differentials of 5 cents an hour and 5 per cent of earnings were predominant for workers on the evening shift, whereas 6 to 10 cents an hour and 10 or 15 per cent of earnings were most common for those on night shift.

1 Sunday work does not include work performed on this day when it forms part of a regular weekly shift.

2 "Holiday pay" in this group means the amount workers receive on statutory holidays when they do not work. This amount is usually equivalent to a regular day's pay.

Employment Conditions

An analysis of the current employment situation prepared by the Economics and Research Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

March 1951 . . .

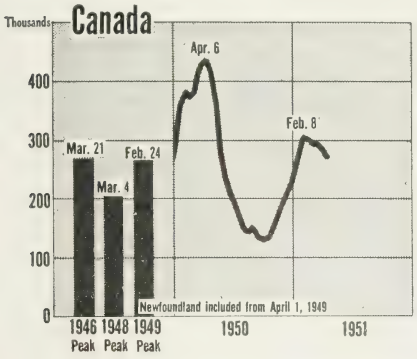
. . . saw the beginning of seasonal expansion in such industries as construction and transportation and a gradual decline in winter unemployment. The improvement was particularly noticeable in the Ontario and Pacific regions, while in Quebec and the Maritimes, the end of hauling operations meant some slackening in woods employment.

During March, job opportunities increased considerably for nearly all types of workers. Construction firms were beginning to hire their crews for the coming season and many projects were already under way; work on roads was also beginning, and the opening of Great Lakes shipping on March 15 was much earlier than usual. The strong demand for skilled workers continued in manufacturing industries in industrial centres.

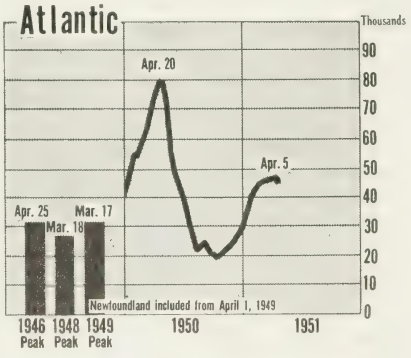
This increase in employment was reflected in a gradual decline in the number of applications for work at National Employment Service offices. These totalled 290,300 at March 29, a decrease of 6,400 since the beginning of the month. The decline was mostly confined to applications from male workers, since the seasonal expansion in industries employing a large proportion of women had not yet begun.

Only in the logging industry in eastern Canada was there any marked slackening of activity. As hauling operations were completed in many areas, woodsworkers were beginning to move out of the woods to seek spring and summer employment in such industries as construction and agriculture. Nevertheless, in response to the heavy demand for pulpwood, some companies had already begun their spring cut, in spite of poor ground conditions. Although there was an overall surplus of woodsworkers in both Quebec and the Maritimes, the early spring cutting meant job openings for loggers in some areas both here and in the Lakehead district. The British Columbia logging industry was moving into a more active period in March but early in the month a heavy snowfall occurred and poor road conditions hampered activity in some interior camps.

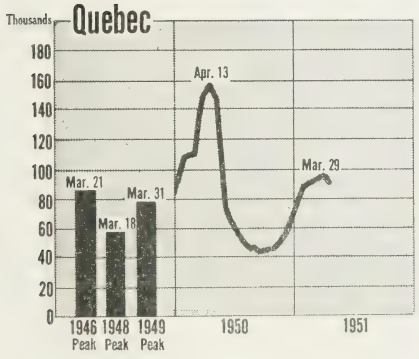
Manufacturing employment continued to run above last year's levels, with shortages of skilled manpower and some essential materials creating some production problems. In March, there was a continued strong demand for experienced workers in the metalworking trades—machinists, lathe and milling machine operators, and iron moulders among others. Shortages of materials, especially of metals, textiles, plastics and leather, were becoming increasingly widespread during the month, and resulted in some short-term lay-offs. In addition, there were staff reductions, partly seasonal in nature, in confectionery and boot and shoe firms. On the other hand, there was an upswing in employment among dairy, sawmill, shipbuilding and aircraft firms.



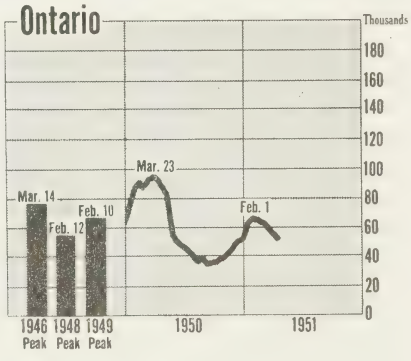
Regional Analysis



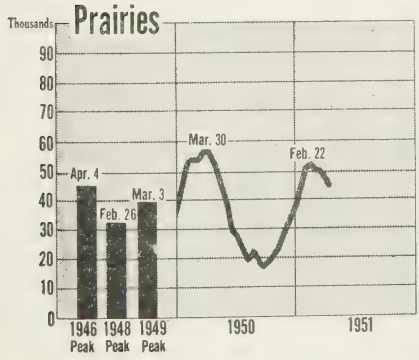
During March, the ***Newfoundland*** economy began its transition to spring and summer activity, this year without a large proportion of the attendant unemployment of other post-war years. Applications for jobs at NES offices increased by only 500 during the month to total 12,400 at March 29. The strength of world demand for newsprint and wood pulp was by far the most important single factor in the relatively improved situation. Among the indications of increasing activity were the start during March of south coast bank fishing, herring fishing and herring packing, and the acceleration of preparations for the early opening of coastal navigation.



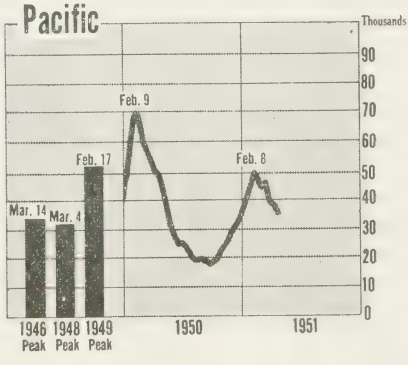
In the ***Maritime*** region, there was little change in the employment situation. At March 29, applications for work on file at NES offices totalled 34,300 compared to 33,300 at the beginning of the month.



Unfavourable weather conditions, together with an exodus of logging workers into construction and farming, contributed to a further slackening in the forestry industry during the month. Farming, fishing and construction activity had not yet begun on any large scale and a lack of orders cut back the operations of smaller coal mines. However, most manufacturing industries, especially basic steel, were very active; shipbuilding and aircraft employment was also expanding. Employment on the water front at the major ports was at high levels.



The peak of seasonal unemployment in Canada was reached earlier this winter than last, and was less severe. This is indicated in the chart below which shows the number of persons registered at National Employment Service Offices in Canada and its regions, giving the peak dates for 1946, 1948, 1949, and 1950, and the trend since 1950.



Employment conditions in the region as a whole were substantially improved over those of last year. Above normal construction employment in the larger cities, lighter seasonaly lay-offs in steel and paper mills, higher levels of mining employment and the heavy labour demand in the woods, have all contributed to higher employment and income in the past winter.

Marked counter movements in employment levels in industries in the ***Quebec*** region produced a slight net rise in overall unemployment during March. Applications for work on hand at NES offices increased from 92,500 at March 1 to 95,600 at March 29. Increases in employment in mining, manufacturing, farming and construction were counter balanced by the decline in woods employment.

Heavy iron and steel, aircraft, aluminum, pulp and paper, chemicals and electrical parts industries maintained high level activity or expanded further during the month, and there was a steady demand for skilled workers. On the other hand, scarcity of wool and nylon meant production cut-backs, short-time and lay-offs for primary textile mills, while secondary textile production and employment were expanding. Although ground conditions have not favoured the start of work on new construction, work on projects already under way has been accelerated.

In the ***Ontario*** region, there was a steady decline in registrations at local employment offices during the month from 63,400 at March 1 to 56,700 at March 29. Such improvement was largely due to the sustained high-level activity and expansion in manufacturing since it was too early in the season for any marked upswing on construction. With the opening of lake navigation, many workers were also returning to jobs in transportation. In Collingwood and Midland, there was an increase in shipbuilding employment. At the same time, lumbering and logging workers were being laid off as the winter cutting and hauling season came to an end.

A rise in manufacturing employment, particularly in the aircraft, heavy iron and steel, electrical and chemical industries, took place despite further scattered work interruptions attributed to steel shortages and seasonal slackening in confectionery and tobacco processing firms.

In the ***Prairie*** region, the annual transition from winter to summer work began during March. Workers were gradually leaving their winter occupations in the woods and mines either to return to their farms or to take up other seasonal work. Industrial activity was slight during the month, as the spring thaw made pulp cutting difficult, and closed down sawmill operations and mining exploration. Spring work in agriculture, construction, and railway maintenance had not yet begun on a large scale. As a result, applications on hand at NES offices declined only moderately from 50,800 at March 1 to 49,600 at March 29.

Although spring seeding had not yet begun, many farmers were placing orders for help with the NES during March. In Saskatchewan, there was some difficulty in meeting requirements, in part because workers seemed to prefer construction and other occupations to agriculture.

Although bush work was slackening off in the Lakehead area, there were still almost three thousand job vacancies for bush workers. Because of an anticipated shortage of labour, the larger companies are attempting to hold workers over until summer work begins.

The rapid recovery from winter unemployment which started in the last half of February in the ***Pacific*** region, was checked early in March by heavy snowfalls. Construction projects and spring work on farms were delayed and once again, logging operations on Vancouver Island were brought to a standstill. With the return of milder weather at the end of the month, there was a gradual resumption of full-scale production. By March 29, there were 41,800 registrations for work on file, compared to 44,800 at March 1.

Most of those registered for work were from the forest and construction industries but, with the continuing strong demand for lumber and newsprint and the large construction program planned, it is expected that these workers will be very quickly absorbed. New pulp plants on Vancouver Island and at Prince Rupert have begun operations, and orders for lumber are still running at 65 per cent above the level of the past two years.

In the base metal mining districts in the region, exploration and development is going forward, refining equipment is being set up and old mines reopened. Although the demand for labour resulting from these operations has not been large, experienced hard rock miners were scarce in the Pacific region.

Employment Service Activities

By March 29 applications on hand from men totalled 228,900 and from women 61,300 which was 3,400 and 3,000 respectively less than at March 1, and 6,800 and 6,600 below the winter high in applications.

Up to this date the decline in applications took place mainly in construction, transportation and the metalworking trades.

An increase in registrations of loggers, from 5,400 to 8,300 during the month offset somewhat the slight downward trend, evident in all major occupations. Applications were slightly fewer in the unskilled occupations and Easter activity brought about a decline in registrations in sales work.

There were 2,500 more jobs on file for men and 1,200 for women at March 29 than at the beginning of the month, bringing the total unfilled to 27,100 and 14,300 respectively at the March 29 date. Orders for farm help almost doubled during March although the number on file at the month-end was still small. Vacancies in the metalworking trades rose from 1,800 to 2,800, in construction from 500 to 800, and in unskilled occupations from 3,600 to 4,600. In the metalworking trades, there is some hesitancy on the part of employers to report vacancies because of the known shortage of suitable applicants. Clearance facilities do offer an incentive, however, since it can broaden the field of recruiting to anywhere in Canada, and even abroad, if desired.

Placements showed a minor advance, increasing by about 200 a week to total 14,100 on an average each week in March.

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index advanced from 179·7 to 181·8 between March 1 and April 2. Nearly one-half of this increase of 1·2 per cent, or 2·1 points, was accounted for by butter which moved to high levels during the latter half of March and the early part of April, and then dropped sharply. The balance of the increase was largely due to other foods, clothing, home furnishings and miscellaneous items. The food index rose from 233·9 to 238·4. There were numerous but slight increases in foods other than butter, although decreases were registered for eggs, pork, and fresh vegetables. The clothing index moved from 196·3 to 198·8 following advances in men's wear and footwear. Increases throughout home furnishings were sufficient to raise the index of home furnishings and services from 188·6 to 190·7. The miscellaneous index advanced from 137·8 to 138·8 as a result of higher indexes for personal care, transportation and theatre admissions. Higher prices in some centres for coke and electricity raised the fuel and light index from 146·5 to 146·7. Rents were not surveyed during April and the rent index remained unchanged at 137·6.

Cost of Living in Eight Cities

Cost-of-living indexes for the eight regional cities registered sharp increases between February and March corresponding to that recorded for the Dominion index. Further substantial advances for foods, notably meats, eggs, butter and fresh vegetables, except potatoes, were mainly responsible for the index increases. Other groups to register gains at most centres were clothing, home furnishings and services, miscellaneous items and rentals. At eastern centres, except Saint John, fuel and lighting costs were higher while at western cities they were unchanged.

Composite city increases between February 1 and March 1 were as follows: Saskatoon 5·2 points to 177·8; Toronto 4·9 to 176·4; Halifax 4·8 to 167·1; Edmonton 3·8 to 172·8; Montreal 3·7 to 184·3; Saint John 3·6 to 174·8; Winnipeg 3·5 to 173·6 and Vancouver 3·4 to 179·2.

Wholesale Prices, February, 1951

Wholesale prices rose 2·7 per cent to a new all-time high of 240·0 (1935-1939=100), in February, 1951. This compared with a gain of 3·3 per cent in January.

For the second consecutive month, Textile Products and Animal Products registered the largest group gains. Further sharp increases in raw wool, woollen yarns, knit goods and cloth, combined with general increases in cotton yarns and cotton fabrics to advance the Textile Products index 5·3 per cent to 314·6. Animal Products moved up 4·7 per cent to 304·0 in response to increases in all subgroups except Fishery Products; prices for livestock and fresh meats contributing most heavily to the rise. Iron and Steel Products rose 2·7 per cent to 201·7 under pressure of advances in rolling mill products, hardware and wire. In the Vegetable Products group, eastern grains, bread and vegetable oils were largely responsible for a percentage increase of 2·3 which brought the index level to 219·0. Higher prices for soap, fertilizers, inorganic chemicals and paint materials moved the Chemical Prod-

* *See* Tables F-1 to F-6.

ucts index 1·9 per cent higher to 183·1. Wood Products climbed 0·7 per cent to 286·5 with pine lumber, cedar lumber and shingles being largely responsible although other lumber items continued to show small gains. Non-metallic Minerals at 168·3 recorded an advance of 0·6 per cent in response to a 6 per cent increase in building stone, reinforced by small increases in coal and coke, natural gas, cement and crushed stone. In the Non-ferrous group, tin, antimony and solder moved up sharply while the over-all increase of 0·5 per cent brought the February index level to 175·5.

Among individual commodities, increases were recorded as follows between January and February, 1951: men's woollen hosiery 26·8 per cent, antimony 26·3 per cent, raw wool, western domestic, 25·0 per cent, sodium sulphate 25·0 per cent, potatoes No. 1, Saint John, 24·0 per cent, mink skins 20·6 per cent, calf skins 20·0 per cent, nitric acid 19·4 per cent, onions, Vancouver, 17·5 per cent, white pine lumber, No. 4, 16·0 per cent, linseed oil 15·5 per cent, building stone, 15·2 per cent. Among commodity decreases recorded in the same period were the following: Whitefish, fresh, Ontario, 25·9 per cent, corn meal 5·3 per cent, cheese, new, Toronto, 4·7 per cent.

The Canadian Farm Products Index of prices at terminal markets moved up 4·7 per cent to 253·7 between January and February, 1951. The Animal Products group was mainly responsible for the rise with an increase of 6·0 per cent to 329·6. Field Products advanced 2·5 per cent to an index level of 177·9.

STRIKES AND LOCKOUTS

Canada, March, 1951*

The time lost in disputes resulting in work stoppages was little changed from the low level of the previous two months and was somewhat less than the total for March, 1950. There were 22 new stoppages but for the most part they involved few workers and were of short duration. Only four stoppages showed a time loss greater than 1,000 days. A strike of milk salesmen and dairy workers at Toronto was the most important stoppage of the month.

Preliminary figures for March, 1951, show 27 strikes and lockouts in existence, involving 4,754 workers, with a time loss of 15,135 days, as compared with 18 strikes and lockouts in February, 1951, with 4,508 workers involved and a loss of 18,878 days. In March, 1950, there were 22 strikes and lockouts, involving 5,600 workers, with a loss of 25,041 days.

For the first three months of 1951, preliminary figures show 53 strikes and lockouts, involving 15,032 workers, with a time loss of 50,776 days. In the same period in 1950 there were 34 strikes and lockouts, with 10,054 workers involved and a loss of 88,500 days.

Based on the number of non-agricultural wage and salary workers in Canada the time lost in March, 1951, was 0·02 per cent of the estimated working time, the same percentage as in February, 1951; 0·03 per cent in March, 1950; 0·02 per cent for the first three months of 1951; and 0·03 per cent for the first three months of 1950.

Of the 27 strikes and lockouts in existence during the month, three were settled in favour of the workers, seven in favour of the employers, seven were compromise settlements, and five were indefinite in result, work being resumed pending final settlement. At the end of the month five strikes and lockouts were recorded as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes and lockouts about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., and Edmonton, Alta., on May 30, 1946; electrical apparatus factory workers at Vancouver, B.C., May 11, 1950; cotton and rayon underwear factory workers at Sherbrooke, P.Q., May 11, 1950; laundry machinery factory workers at Toronto, Ont., June 16, 1950; and cleaners and dyers at Toronto, Ont., October 4, 1950.

* *See* Tables G-1 and G-2.

Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. Statistics given in the annual review issued as a supplement to the LABOUR GAZETTE for April, 1951, and in this article are taken, as far as possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppage of work and gives some details of the more important ones.

The number of work stoppages beginning in January, 1951, was 129 and four were still in progress from the previous month, making a total of 133 during the month. In all stoppages of work in progress in the period there were 24,100 workers involved and a time loss of 84,000 working days was caused.

Of the 129 disputes leading to stoppages of work which began in January, 15, directly involving 2,900 workers, arose out of demands for advances in wages, and 41, directly involving 6,000 workers, on other wage questions; two, directly involving 300 workers, on questions as to working hours; 23, directly involving 9,300 workers, on questions respecting the employment of particular classes or persons; 42, directly involving 1,600 workers, on other questions respecting working arrangements; three, directly involving 100 workers on questions of trade union principle; and three, directly involving 1,200 workers were in support of workers involved in other disputes.

New Zealand

For the third quarter of 1950, figures show 31 strikes, involving, directly and indirectly, 27,174 workers, and causing a time loss of 118,597 man-days.

United States

Preliminary figures for February, 1951, show 400 strikes and lockouts beginning in the month, in which 220,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 1,700,000 man-days. Corresponding figures for January, 1951, are 400 strikes and lockouts, involving 185,000 workers with a time loss of 1,200,000 days.

SELECTED LIST OF PUBLICATIONS RECEIVED IN LIBRARY OF DEPARTMENT OF LABOUR, OTTAWA*

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

Deposits $000,000	.....	3,493	3,270	2,952	2,163(6)	1,089(6)

NOTE.—Latest figures subject to revision. Many of the statistical data in this table are included in the Canadian Statistical Review issued by the Dominion Bureau of Statistics.

† Comparable statistics are not available.

(1) Population figures are as at the first day of December, for 1950, 1949 and June 1, for 1944, 1939.

(2) Labour Force Survey figures given are as at November 4, 1950, October 29, 1949. Detailed figures for November 1950 will be found in the February issue of the Labour Gazette.

(3) Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index base: Average 1946=100.

(4) Newfoundland is included after April 1, 1949.

(5) Average 1935–39=100.

(6) Year end figures.

(7) Figures for 1939–44 are production data rather than shipments.

(8) Includes ordinary live claimants plus claimants for supplementary benefit. Latter totalled 27,103 at February 1, and 35,758 at March 1, 1951.

TABLE C-4.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners) SOURCE: Man-Hours and Hourly Earnings, D.B.S.

Tables C-4 to C-6 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3 They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

TABLE C-7.—EARNINGS, HOURS AND REAL EARNINGS FOR WAGE EARNERS IN MANUFACTURING INDUSTRIES IN CANADA

SOURCE: Hours Worked and Hourly and Weekly Wages D.B.S. Real Wages Computed by the Economics and Research Branch, Department of Labour

Date	Average Hours Worked per Week	Average Hourly Earnings	Average Weekly Earnings	Index Numbers (Av. 1946=100)		
				Average Weekly Earnings	Cost of Living	Average Real Weekly Earnings
		cts.	$			
Monthly Average 1945	44·3	69·4	30.71	103·3	96·7	106·8
Monthly Average 1946	42·7	70·0	29·87	100·0	100·0	100·0
Monthly Average 1947	42·5	80·3	34.13	114·0	109·6	104·0
Monthly Average 1948	42·2	91·3	38.53	129·0	125·4	102·9
Monthly Average 1949	42·3	98·6	41.71	138·4	130·1	106·4
Monthly Average 1950	42·5	103·6	44.07	145·8	134·7	108·2
Week preceding:						
February 1, 1950	42·3	100·9	42.68	141·2	130·7	108·0
March 1, 1950	42·5	101·4	43.10	142·6	132·4	107·7
April 1, 1950	42·8	101·7	43.53	144·0	132·7	108·5
May 1, 1950	42·4*	102·5	43.46*	143·8	132·7	108·4
June 1, 1950	42·0	103·5	43.47	143·8	133·8	107·5
July 1, 1950	42·5	103·9	44.16	146·1	135·5	107·8
August 1, 1950	42·5	104·2	44.29	146·6	136·3	107·6
September 1, 1950	41·9	104·4	43.74	144·7	137·4	105·3
October 1, 1950	42·9	105·3	45.17	149·5	138·1	108·3
November 1, 1950	43·0	106·4	45.75	151·4	138·1	109·6
December 1, 1950	43·1	107·8	46.46	153·7	138·4	111·1
January 1, 1951	43·0*	108·9	46.83*	155·0	139·6	111·0
February 1, 1951(1)	42·9	110·2	47.28	156·5	141·7	110·4

NOTE: Average Real Weekly Earnings were computed by dividing the index of the cost of living into an index of the average weekly earnings, both indexes having been calculated on a similar base (Average 1946=100).

* Figures adjusted for holidays. The actual figures are May 1, 1950, 42·6 hours, $43.67; January 1, 1951, 40·1 hours, $43.71.

Cumulative totals	34		10,054		88,500	0·03

* Preliminary figures.

‡ Strikes unterminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout or an industrial condition which is undoubtely a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, MARCH, 1951 [1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars[2]
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to March, 1951				
MANUFACTURING—				
Fur and Leather Products—				
Handbag factory workers, Montreal, P.Q.	1	23	345	Commenced February 27; protest against disciplining one worker for absenteeism; terminated March 17; return of workers; in favour of employer.
Textiles, Clothing, etc.—				
Knitting factory workers, Whitby, Ont.	1	30	60	Commenced February 26; for a new agreement providing for increased wages and check-off following reference to conciliation board; terminated March 2; negotiations; compromise.
Printing and Publishing—				
Bookbinders, Toronto, Ont.	1	27	400	Commenced February 20; protest against decision to eliminate union shop clause from memorandum of agreement signed February 16; employment conditions no longer affected by the end of March; indefinite.
Metal Products—				
Refrigerator factory workers, Brantford, Ont.	1	200	2,200	Commenced February 13; interunion dispute *re* bargaining agency; terminated March 15; conciliation, provincial, and return of workers pending vote *re* union affiliation; indefinite.
Steel barrel factory workers, Hamilton, Ont.	1	19	75	Commenced February 28; protest against suspension of a worker following disagreement with foreman; terminated March 6; conciliation, provincial; in favour of employer.
Strikes and Lockouts Commencing During March, 1951				
LOGGING—				
Loggers, Menzies Bay, B.C.	1	325	675	Commenced March 9; for re-instatement of a faller dismissed for failure to bring in his saw from the bush, see strike February 8; terminated March 13; negotiations; in favour of workers.
MINING—				
Coal miners, Alexo, Alta.	1	72	350	Commenced March 19; for payment of guaranteed minimum wage to miners who fail to make minimum wages on contract work; terminated March 26; negotiations; in favour of employer.
Coal miners, Drumheller, Alta.	1	168	168	Commenced March 29; protesting lay-off of miner for being absent without leave; terminated March 29; negotiations; in favour of workers.
MANUFACTURING—				
Vegetable Products—				
Flour mill workers, Humberstone, Ont.	1	165	1,270	Commenced March 2; for a new agreement providing for increased wages and reduced hours; terminated March 16; conciliation, provincial, and negotiations; compromise, increase in wages granted.
Rubber and Its Products—		[3]		
Tire factory workers, Kitchener, Ont.	1	150	350	Commenced March 21; protesting new method of payment for calender operations; terminated March 26; return of workers pending reference to provincial conciliation; indefinite.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, MARCH, 1951 [1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars[2]
	Establishments	Workers		
Strikes and Lockouts Commencing During March, 1951—*Continued*				
Textiles, Clothing, etc.—				
Pants factory workers, St. Therese, P.Q.	1	13	50	Commenced March 5; for union recognition and alleged discrimination in dismissal of one worker; terminated March 17; negotiations and partial return of workers; indefinite.
Sportswear factory workers, Toronto, Ont.	1	28	270	Commenced March 6; for a union agreement; terminated March 19; negotiations and return of workers pending certification of union; indefinite.
Silk and nylon factory workers, Galt and Mitchell, Ont.	2	146	580	Commenced March 19; for a new agreement providing for increased wages, elimination of wage differential between the two plants, and other changes, following reference to conciliation board; terminated March 22; negotiations; compromise.
Silk and rayon factory workers, Dunnville, Ont.	1	20	120	Commenced March 22; alleged discrimination in dismissal of four workers; unterminated.
Miscellaneous Wood Products—				
Saw and planing mill workers, Stewiacke, N.S.	1	[4] 25	100	Commenced March 9; for increased wages; terminated March 13; negotiations; partially successful.
Furniture factory workers, Kitchener, Ont.	1	88	1,340	Commenced March 12; for union recognition and agreement providing for extension of vacation plan, payment for statutory holidays, overtime rates, sickness and accident insurance, following reference to conciliation board; unterminated.
Furniture factory workers, Waterloo, Ont.	1	31	400	Commenced March 14; alleged discrimination in lay-off of nine workers; unterminated.
Sash and door factory workers, St. Joseph de Beauce, P.Q.	1	95	285	Commenced March 15; for a union agreement providing for increased wages, maintenance-of-membership and check-off; terminated March 17; conciliation, provincial; in favour of workers.
Metal Products—				
Boilermakers, Vancouver, B.C.	1	14	70	Commenced March 7; protest against foreman doing mechanical work; terminated March 13; return of workers and replacement; in favour of employer.
Metal alloy factory workers, Beauharnois, P.Q.	1	561	210	Commenced March 13; for dismissal of three key men following dispute over changes in operations; terminated March 13; return of workers; in favour of employer.
Motor vehicle factory workers, painters, Windsor, Ont.	1	[5] 25	150	Commenced March 19; protest against alleged excessive fumes in body-paint division; terminated March 27; negotiations; in favour of employer.
Motor vehicle factory workers, stock room and jitney drivers, Windsor, Ont.	1	[6] 200	125	Commenced March 30; for employment of an extra helper; terminated March 30; return of workers; in favour of employer.

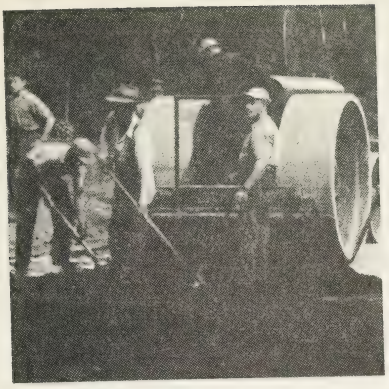

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, MARCH 1951 [1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars[2]
	Establishments	Workers		
Strikes and Lockouts Commencing During March, 1951				
Non-Metallic Minerals, Chemicals, etc.—				
Fibrous glass factory workers, Sarnia, Ont.	1	75	145	Commenced March 3, 5, 13 and 14; for a new agreement providing for increased wages; terminated March 14; negotiations; compromise, increase in wages and cost-of-living escalator clause.
CONSTRUCTION—				
Buildings and Structures—				
Carpenters, Toronto, Ont.	1	24	155	Commenced March 8; jurisdictional dispute as to whether labourers or carpenters should erect forms for poured concrete floors; terminated March 16; negotiations; compromise, work to be done on a 50–50 basis.
TRADE—				
Milk salesmen and dairy workers, Toronto, Ont.	15	2,165	4,300	Commenced March 21; for a new agreement providing for increased wages, retroactive to October 1, 1950, following reference to conciliation board; terminated March 23; conciliation, provincial; compromise, increase retroactive to December 15, 1950.
Wholesale grocery warehouse workers, Sault Ste. Marie, Ont.	1	7	42	Commenced March 24; alleged discrimination in dismissal of one worker; unterminated.
SERVICE—				
Business and Personal—				
Hotel employees, Windsor, Ont.	1	58	900	Commenced March 12; for a union agreement providing for increased wages; unterminated.

[1] Preliminary data based where possible on reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

[2] In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

[3] 225 indirectly affected; [4] 25 indirectly affected; [5] 3,000 indirectly affected; [6] 3,000 indirectly affected.

CURRENT LABOUR CONDITIONS

This article summarizes the latest employment and labour information available at June 9, as the LABOUR GAZETTE *went to press. It was prepared by the Economics and Research Branch, Department of Labour.*

THE SEASONAL increase in hiring in construction and agriculture, and the continued expansion in defence and defence supporting industries continued to be the dominant influences on employment during May. Registrations for employment on file at National Employment Service offices declined to 151,100 at the beginning of June, some 94,300 below the total a month earlier.

Although the seasonal industries and defence projects were making heavy demands on the labour supply, there was little sign of a general labour shortage. The situation continues to be one of specialized shortages of fully qualified skilled tradesmen in certain industries and areas. In the manufacturing industries, the list of tradesmen in short supply continued much the same as in the past few months, with fully qualified machinists, draftsmen, welders, specialized skilled aircraft and shipyard workers the occupations most in demand. Employers generally are being quite selective in their hiring, and are demanding fully qualified workers. Relatively few of them have set up programs to train skilled men. The tendency is to look for the fully experienced worker, if necessary in labour markets in other areas, or even abroad.

In very few cases is the shortage of skilled workers critical, in the sense that it is the main factor responsible for holding up production. It is rather the flow of basic materials, especially steel, which is determining the rate of output.

At the same time, it was becoming clear that the new credit restrictions were combining with material shortages to relieve pressures on labour supplies in the metal manufacturing industries. With the new credit regulations slowing down the sales of consumer durables such as autos and washing machines, it is very doubtful if production in such industries will expand much beyond its present rate. In some instances there have been short term layoffs, which may increase as the defence program absorbs more of the essential materials.

IN BRIEF...

Industrial employment in the major non-agricultural industries was moderately higher at the beginning of April, according to preliminary figures issued by the Dominion Bureau of Statistics. The advance industrial composite index, on the base 1939=100, at 173·2 was 0·5 per cent above March 7, and 8·9 per cent higher than at April 1 last year. In manufacturing, the

(Continued on page 796)

Preliminary Index of Wage Rates

The prelminary index of wage rates in Canadian industry, on the base 1939=100, stood at 225·5 as of April 1 this year, according to the results of the second semi-annual wage rate survey of the Economics and Research Branch of the Department of Labour. This index indicates an increase of 5·6 per cent in wage rates between October, 1949 and October, 1950, and an additional 4·3 per cent in the six-month period between October, 1950 and April 1, 1951.

During the year ending October 1, 1950, all of the principal industrial groups, with the exception of Logging, showed increases in wage rates. The Service group had the greatest percentage rise—7·5 per cent; Manufacturing was next with an increase of 6·2 per cent; while Transportation and Communication, Construction and Mining followed with increments of 5·5, 5·3 and 5·0 per cent respectively. The slight decline in the Logging index was due to some reduction of rates in Eastern Canada in this period, employment conditions in Woods Operations being somewhat less favourable than previously. This was due, in part, to an increase in the use of inventory stocks of pulpwood by large paper companies, particularly in the Atlantic provinces.

During the period between October, 1950 and April, 1951, percentage increases in the wage rate indexes for the main industrial groups ranged from less than 1 per cent for Building Construction, where wage settlements normally tend to be made later in the spring, to 5·4 per cent in Manufacturing. Of the remaining groups, a 4·9 per cent increase was registered in Mining, 3·7 per cent in Service, 3·1 per cent in Transportation and Communication, and 2·0 per cent in Logging.

The index number of 185·5 for the Transportation and Communication group as of October 1, 1950 includes the 7-cent per hour increase granted to non-operating Steam Railways' employees, effective the previous August 31; the index number of 191·2 for the same group as of April 1, 1951 includes, in addition, the increases obtained as of December 1, 1950 by the operating employees.

The wage rate information from which the index numbers have been calculated was obtained from the annual survey of wages, hours and working conditions in October of each year and from a semi-annual sample survey in April. The former is on a much broader basis than the latter, statistics of wage rates by occupation having been obtained from about 15,000 establishments, mainly those with fifteen or more employees. The estimate of the change between October, 1950 and April, 1951 is based on information form a sample of about 800 establishments. Index numbers and statistics of wage rates by industry and occupation will be published from time to time in the Labour Gazette on the basis of data from the October, 1950 survey.

The following table shows index numbers for the six main groups of industries as of October, 1949 and 1950, and April, 1951, with percentage changes between succeeding survey dates:—

	Oct. 1949	Oct. 1950	Per Cent Change Oct. 1949 to Oct. 1950	Apr. 1951	Per Cent Change Oct. 1950 to Apr. 1951	Per Cent Change Oct. 1949 to Apr. 1951
Logging	216.2	213.7	−1.2	218.0	+2.0	+ 0.8
Mining	187.6	197.0	+5.0	206.7	+4.9	+10.2
Manufacturing	217.9	231.4	+6.2	243.8	+5.4	+11.9

Trade—				
Retail trade	March	$814,400,000	+21·8	+18·8
Exports	April	$295,200,000	+ 1·7	+43·6
Imports	April	$393,100,000	+14·8	+70·2

(a) Estimated on basis of sample labour force survey. Only those who did not do any work in the survey week are here classified as persons without jobs.

(b) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

(c) Part of this decrease is due to the termination of the Supplementary Benefit program at March 31.

(d) Adjusted for Easter holidays.

Data in this table are preliminary figures from regular reports compiled by various government agencies, including Dominion Bureau of Statistics, the Unemployment Insurance Commission, the Immigration Branch, Department of Citizenship and Immigration, and the Economics and Research Branch, Department of Labour. Detailed information can be found in the statistical appendix of the Labour Gazette.

Notes of Current Interest

Provinces agree to B.N.A. Act amendment for old age pensions

Agreement by all ten provinces in the terms of an amendment to the British North America Act respecting old age pensions was announced by the Prime Minister on May 4. Mr. St. Laurent stated that the amendment is designed to permit the implementing of the report of the Joint Committee of both Houses of Parliament on old age pensions (L.G., 1950, p. 1142), which recommended a contributory old age pension scheme under which the Federal Government would assume the cost of pensions of $40 a month without a means test to all persons 70 years of age and over.

Under the plan, the Federal and Provincial Governments would share equally in the cost of pensions of the same amount with a means test to persons between the ages of 65 and 70. The Committee pointed out that an amendment to the constitution might be necessary to give Parliament authority to impose a social security tax "earmarked" for the payment of old age pensions.

The amendment to the B.N.A. Act which has been agreed upon, unlike the amendment made in 1940 when the Federal Government took over unemployment insurance, makes no change in Sections 91 and 92 which set out the respective powers of the Federal and Provincial Governments. Instead, a new Section 94A will be added to the Act as follows:—

Old Age Pensions

94A. It is hereby declared that the Parliament of Canada may from time to time make laws in relation to old age pensions in Canada, but no law made by the Parliament of Canada in relation to old age pensions shall affect the operation of any law, present or future, of a provincial legislature in relation to old age pensions.

Following a resolution of both Houses of Parliament, a joint address was made to His Majesty the King, requesting that the Parliament of the United Kingdom amend the British North America Act to this effect.

Mr. St. Laurent indicated that as soon as the amendment had been adopted at Westminster, Parliament would proceed at the present session to pass the necessary legislation for the payment of pensions to persons over 70.

At the Dominion-Provincial Conference held last December (L.G., 1951, p. 8) it was agreed that a continuing committee of representatives of the Federal and Provincial Governments under the chairmanship of the Minister of National Health and Welfare should be called together as soon as provincial agreement had been reached on the constitutional amendment to consider what legislation would be appropriate as enabling legislation to deal with the group of people between the ages of 65 and 70. Accordingly, a meeting of the committee was called for May 23.

Prime Minister discusses human rights

Replying to a question in the House of Commons on May 21, the Prime Minister, Rt. Hon. Louis St. Laurent, stated that Government policy does not include a recommendation to Parliament, suggesting that a declaration of human rights and liberties be included in the constitution at this time.

Mr. St. Laurent said that such an addition would require "an amendment . . . to be made by the Parliament at Westminster, and this Government would not recommend an application for such action . . . without the consent of the provincial legislatures or governments." The Prime Minister explained that discussions are presently being carried on between the Federal Government and the provinces towards "the establishment of a satisfactory procedure to have future amendments to the constitution made by Canadian authorities here in Canada."

Explaining why the Government does not plan to initiate discussions on matters such as human rights, while the question of constitutional amendment was being discussed, the Prime Minister said:—

> While these discussions are proceeding this government does not intend to initiate discussions about a matter like that referred to in the question, which is apt to be quite controversial and might retard the solution of the question relating to the establishment of a satisfactory procedure to make future amendments here in Canada.

Speaking on the United Nations Declaration of Human Rights, Mr. St. Laurent said:—

> The Canadian government has already, through the affirmative vote of the Canadian delegation in the general assembly

of the United Nations, accepted the universal declaration of human rights as a general statement of principles to which we subscribe. Before the vote was taken on the declaration, the Canadian delegation stated that it had various reservations on details of the text. The head of the Canadian delegation added that certain important aspects of the declaration were within the field of provincial jurisdiction, and that in regard to any rights defined in the document the federal government did not intend to invade that field of provincial jurisdiction.

Now, since this universal declaration of human rights is not a legal document, the government does not propose to ask Parliament, in advance of the submission for signature of the proposed convention on the same subject which is now under consideration by the United Nations, to endorse the approval expressed by Canada through its delegation.

Early in May, a delegation of nearly 200, representing labour and other interested groups, interviewed members of the Cabinet and recommended that Canada should have a national bill of rights in its constitution; and that the Federal Government adopt an interim declaration of human rights modelled on that of the United Nations.

The delegation was received by the Prime Minister, Rt. Hon. Louis St. Laurent; Hon. Stuart S. Garson, Minister of Justice; Hon. L. B. Pearson, Secretary of State for External Affairs; and Hon. W. E. Harris, Minister of Citizenship and Immigration.

Increase in employment of physically handicapped

During the three-month period December 14, 1950, to March 14, 1951, a total of 3,028 jobs were found for physically handicapped persons by the Special Placements Division of the National Employment Service, as compared with 1,526 during the same period in 1949-50, according to a recent statement by the Hon. Milton F. Gregg, Minister of Labour.

"While this marked increase in placements is partly due to improved employment conditions this year," the Minister said, "it is also an indication of the steadily growing recognition by employers of the value of physically handicapped workers when placed in jobs which are matched with their remaining abilities or skills." The Minister pointed out that this trend may easily become accelerated with the increasing need for manpower in expanding defence industries.

The figures showed that a total of 10,970 placements of persons with disabilities were made by the Special Placements Division in the year ending December 14, 1950. A breakdown of this total showed that 8,089 of the jobs were for physically handicapped men and 2,881 were for women. Included in these figures were 2,960 placements of ex-servicemen and women with physical handicaps.

Of all the jobs filled by handicapped persons during the 12-month period, 421 were filled by men and 43 by women with amputations. Among the other placements were persons afflicted with paralysis, rheumatism, epilepsy, diabetes, defective vision, defective hearing, lung, heart or stomach ailments.

The Minister explained that not every person with a physical disability who applied to the National Employment Service for a job was considered handicapped. Those with a disability which did not prevent them from continuing their regular occupation were referred to jobs through the regular placement channels of the Employment Offices. It was only when disabilities prevented applicants from working at their regular occupations that they were referred to the Special Placements Division. Officials of the Division then studied each case and made an effort to place the worker in a position commensurate with his remaining abilities or skills.

The increasing number of placements made by the Special Placements Division constitutes an achievement which is the result of close co-operation between employers and employment officials, coupled with a careful matching of physical capabilities with the physical requirements of the job, Mr. Gregg explained. However, on March 15, 1951, there were still 8,831 handicapped men and women seeking employment through the National Employment Service, and while such a situation exists the Special Placements Division will not relax its efforts on behalf of those unfortunate enough to have a disability which prevents engagement in their regular occupation (L.G., April, p. 454).

The majority of the 8,831 handicapped persons registered as unplaced on March 15, 1951, were considered by Special Placements officers as immediately employable while the remainder, with specialized efforts, could take suitable occupations, the Minister concluded.

Downward trend in university enrolment

Enrolment in Canadian universities and colleges has been dropping gradually in the past three academic years due to the graduation of large numbers of student veterans who were in receipt of educational benefits from the Department of Veterans Affairs.

According to preliminary figures released by the Dominion Bureau of Statistics there were 68,000 students enrolled in the opening session of the 1950-51 term, including 7,000 war veterans in receipt of educational benefits. In 1949-50, enrolments totalled 74,503. The 1950-51 total, excluding the assisted veterans, was about 70 per cent higher than 10 years ago, when enrolment approximated 36,000.

Undergraduates enrolled in the arts and science courses—largest of the faculties—in the institutions reporting to the Bureau, declined to 28,363 in 1950-51 from 31,246 in the preceding academic year. In engineering and applied science, enrolments declined to 8,047 from 10,549, and in agriculture to 1,701 from 2,283. Enrolments in medicine were 4,395 against 4,284.

In commerce there were 2,857 undergraduates enrolled as compared with 3,457, in education, 1,893 against 1,898, household science 1,246 against 1,313, law 2,375 against 2,476, nursing 1,048 against 945, pharmacy 1,383 against 1,289, dentistry 968 against 1,095, and theology 921 against 1,090.

Post-graduate students in all courses in the reporting institutions were down slightly in 1950-51 to 4,417 from 4,501 in the previous session.

Changes in wages and hours in recent agreements

Results of a survey of 307 collective agreements signed during the first four months of 1951 are published elsewhere in this issue (p. 832). The survey shows the extent to which the agreements provided for changes in wage rates and hours of work.

It also gives information on 46 agreements containing "escalator" clauses providing for periodic wage adjustments in accord with changes in the official cost-of-living index.

Highlights of 1951 provincial labour legislation

A review of the legislation passed at the 1951 sessions of the provincial legislatures indicates wide interest in labour legislation and considerable progress in improving legislative standards.

A survey of the highlights of this legislation appears in the *Labour Law* section of this issue. Future issues of the Labour Gazette will contain the usual articles dealing separately with each province and giving a full summary of the labour legislation adopted at the 1951 session of each provincial legislature.

Workmen's Compensation Act of Newfoundland proclaimed

The Newfoundland Workmen's Compensation Act went into force on April 1, 1951. The Act, which was passed in 1950 to bring into effect a State system of collective liability on the part of employers, did not fix the scale of benefits payable under its provisions. A Workmen's Compensation Committee was appointed to work out the details of the administration of the Act. The three members of the Committee, Irving Fogwill, Clarence Hancock and John Maddigan, were recently appointed as members of the Workmen's Compensation Board, the former being named chairman. The scale of benefits payable has now been issued by 1951 amendments to the Act, which also increase the length of the waiting period and make certain other changes. The first regulations, issued under the Act on March 30, classify the industries covered by the Act in seven groups and exclude from its operation any establishment which employs fewer than three people (see p. 839 of this issue).

The benefits provided by the Newfoundland Act compare favourably with those fixed by most of the other provincial compensation Acts. If an injury results in the death of a workman, his widow will receive a lump sum of $100 and $50 a month until re-marriage or death and if the workman leaves children, an additional $10 a month may be paid for each child under 16. Orphan children under 16 will receive $20 a month each. A maximum of $125 is allowed for funeral expenses of the workman, and where the body has to be taken a considerable distance for burial, a further $125 may be paid.

A workman who is totally disabled is entitled to a weekly payment for life equal to 66⅔ per cent of his average weekly earnings. This payment may not be less than $65 a month unless the workman earned less than $65 a month in which case he will receive the full amount of his earnings. Where a workman suffers a permanent disability, the benefit is a weekly payment for life of 66⅔ per cent of the difference in his earnings before and after the accident. As in the other provinces, temporary total or temporary partial disability is compensated at the same rate as permanent total and permanent partial disability but compensation is payable only so long as the disability lasts.

In computing the workman's average earnings, $3,000 a year is the maximum amount which may be taken into account, the same amount as in Manitoba, Ontario and Saskatchewan.

The waiting period which must elapse before compensation is payable was increased from three to six days, that is, the workman must be disabled for more than six days in order to claim compensation from the date of the injury.

Labour asks for roll-back of prices

Continuing their campaign for price controls, representatives of the four national trade union centres in Canada wrote to the Prime Minister on April 26 asking the Government to roll back prices to the levels existing before war broke out in Korea last June. Such action, it was stated, would correspond with an order issued in the United States by the Director of Price Stabilization calling for similar price changes.

The letter was sent on behalf of the "Continuing Joint Committee," representing the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Canadian and Catholic Confederation of Labour, and the Dominion Joint Legislative Committee of the Railway Transportation Brotherhoods, and was signed by Percy R. Bengough and A. R. Mosher as President and Vice-President of the Committee.

TLC action regarding certain affiliates

The Executive Council of the Trades and Labour Congress met in Ottawa recently and took action on several matters.

The Council decided that delegates representing the United Textile Workers Union seeking to attend TLC conventions, or conventions of any affiliated or chartered bodies, "will be required to satisfy officers in charge that they can comply with the Congress constitution before being seated." This decision, according to the *TLC News*, resulted from reports that no action had been taken by the UTWA following an investigation of the Canadian District, and certain District officers (L.G., Nov., 1950, p. 1781).

An appeal by Vancouver Civic Employees Local 28, against its suspension last December, was dismissed by the Executive Council (L.G., Jan., 1951, p. 11, and Feb., 1951, p. 154). The appeals of sixteen suspended members of the union were also dismissed. The *TLC News* said: "The Charter of Local 28 was suspended . . . on the grounds that the union had failed to be guided by the constitution of the Congress. It was further indicated . . . that the union's affairs were under Communist influence."

The Executive Council accepted into affiliation the Seafarers International Union of America (AFL). The SIU jurisdiction, covering "unlicensed personnel serving on ships plying on inland and coastal waters as well as out of deep sea ports," was "left vacant two years ago when the Congress expelled the Canadian Seamen's Union," the *TLC News* said.

Rubber company to require loyalty affidavit

According to the Canadian Press, Mr. I. G. Needles, vice-president of the B. F. Goodrich Rubber Company of Canada, said on March 13 that all new employees of his company would be required to sign an affidavit attesting that they are not and have never been members of the Communist party.

Mr. Needles said his company has no evidence of Communist infiltration among its 2,600 employees at present but will institute the affidavits to protect itself in wartime.

He said that his was a very essential industry in wartime.

Decline in income of Canadian farmers

Net income of Canadian farmers from farming operations in 1950—excluding estimates for Newfoundland—declined almost 10 per cent from the preceding year, and was approximately 12 per cent below the record high reached in 1948.

According to preliminary estimates released by the Dominion Bureau of Statistics, farm net income for the year was placed at $1,461,735,000 as compared with the revised 1949 figure of $1,615,834,000, and $1,650,699,000 in 1948.

Last year's decrease was the result of a substantial decline in cash income, a smaller value of income in kind, and a continued advance in farm operating expenses and depreciation charges.

Cash income from the sale of farm products for the year 1950 was estimated at $2,223,522,000, down nearly 11 per cent from the 1949 figure of $2,494,781,000, and income in kind at $337,311,000, was down four per cent from $349,483,000 in the preceding year. Farm operating expenses and depreciation charges were almost six per cent above the 1949 level, totalling $1,243,692,000 as against $1,174,406,000. Increases in the year-end, farm-held stocks of grain in 1950 more than offset a decline in year-end livestock numbers to give an overall inventory increase for the first time since 1942.

The physical volume of agricultural production in Canada in 1950 was higher

than in the preceding year, according to index numbers compiled by the Dominion Bureau of Statistics. The index for 1950, on the base, 1935-39=100, stood at 139·8 as compared with the revised figure of 122·5 for 1949, and the all-time high of 164·2 in 1942.

Marsh report on slum clearance in Vancouver

A report on a demonstration slum-clearance and urban rehabilitation project in a key central area in Vancouver has recently been issued by the University of British Columbia.

Dr. Leonard C. Marsh, of the School of Social Work and School of Architecture at the University of British Columbia, is the author of the report which is entitled *Rebuilding a Neighbourhood*.

The purpose of Dr. Marsh's "demonstration" study is to present an approach to the re-development of a particular slum area, which because of its location threatens "the whole future of town planning in Vancouver." Research into this problem was sponsored by the Vancouver Housing Association and by the University of British Columbia. Assistance was provided in the form of grants from the Central Mortgage and Housing Corporation and the City of Vancouver. It applies to an area in Vancouver selected as a suitable example for a large-scale project, but the various aspects of the study have been enlarged upon so that the report may be useful to other urban areas considering similar surveys.

Old Age and Blind Pensioners in Canada

The number of persons receiving old age pensions in Canada increased from 298,473 at December 31, 1950 to 302,173 as at the end of the quarter March 31, 1951.

The Federal Government's contributions under the Federal-Provincial scheme totalled $25,366,213.11 for the quarter ended March 31, 1951 as compared with $25,088,784.17 in the preceding quarter. Since the inception of the Act the Federal Government has contributed $734,007,060.97.

The average monthly pension in the provinces ranged between $34.38 and $38.34. In the Yukon Territory and the Northwest Territories the average was slightly higher.

In only four provinces was the number of pensioners higher than three per cent of the total population.

In addition to the above, pensions were being paid to 11,198 blind persons as at March 31, 1951, as compared with 11,036 at December 31, 1950.

The cost of pensions in respect of blindness to the Federal Government was $995,702.78 for the quarter ended March 31, 1951 and $984,276.45 for the quarter ended December 31, 1950. Since the inception of the Act, the Federal payments have totalled $22,925,973.41. The average monthly pension in the provinces was between $38.13 and $39.46. With only three blind pensions in the Yukon Territory and the Northwest Territories, the average was $40.

Agenda for ICFTU Congress released

The Second World Congress of the International Confederation of Free Trade Unions will be held in Milan, Italy, July 4 to 12, according to the ICFTU Information Bulletin.

The agenda for the meetings includes the following items: resolutions submitted by affiliated organizations; the General Secretary's report; organizational and financial questions; the aims of free trade unionism and its struggle against the totalitarian menace; the role of labour in the international crisis; and the conditions for the establishment and maintenance of world peace.

The Trades and Labour Congress, and the Canadian Congress of Labour will both be represented at the Congress. Mr. Claude Jodoin, TLC vice-president, will represent that organization. The CCL will be represented by Mr. Pat Conroy, secretary-treasurer; Mr. J. E. MacGuire, National Secretary, CBRE; Mr. Silby Barrett, Director, District 50, UMW; and Mr. Fred Dowling, Canadian Director of the United Packing House Workers.

Twelfth session of ECOSOC

At its 12th Session, held in Santiago, Chile, from February 20 to March 21, the United Nations' Economic and Social Council adopted important resolutions dealing with forced labour and trade union rights.

Over strenuous objections voiced by delegates of the USSR, Poland and Czechoslovakia, the Council called for the earliest possible establishment of a committee to study "the nature and extent of the problem raised by the existence in the world of systems of forced or 'corrective' labour . . . employed as a means of political coercion or punishment . . . on such a scale as to constitute an important element in the economy of a given country."

The Ad Hoc Committee on Forced Labour will consist of five independent members to be appointed jointly by the

Secretary-General of the United Nations and the Director-General of the International Labour Office. It will examine the texts of laws and regulations and other evidence, and report its findings to both the Economic and Social Council and the Governing Body of the International Labour Office.

A joint Belgian-Swedish resolution, adopted by the Council established a procedure for dealing with complaints received from several labour organizations concerning alleged violations of trade union rights. Complaints against certain member-nations of the ILO (the Netherlands, Israel, Czechoslovakia, Argentina and Hungary) were forwarded to that body "for its consideration as to referral to the Fact-Finding and Conciliation Commission on Freedom of Association."

Action on complaints against the USSR and other non-members of the ILO was deferred. The USSR, which was asked by the Secretary-General in December, 1950, whether it would consent to having allegations against it investigated by the Fact-Finding Commission, was requested to reply "not later than the next session of the Council."

Spain, Roumania and Japan were informed of the complaints made against them and of the facilities of the Fact-Finding Commission available for the investigation of those complaints.

In the future, complaints concerning violations of trade union rights will be dealt with by the Council at any given session only if they are received by the Secretary-General not less than seven weeks before the first meeting of that session.

British coal industry reviewed

Speaking in London early in the year on results in the British coal industry in the four years since nationalization, the chairman of the National Coal Board, Lord Hyndley, said that a three per cent a year increase had taken place but that this was "not as good as the Coal Board had hoped. Last year was particularly disappointing because of the heavy fall in manpower. Nevertheless it was a solid achievement by the men of the industry."

By the end of 1950, the average manpower of the industry had fallen back to the same figure as just after the war—697,000, but it was more efficiently deployed, he observed. With the same overall manpower, the industry produced 13 per cent more coal in 1950 than in 1946.

The following figures for the four years under review and for the last year before nationalization show the steady increase in the output in tons per man-year which has taken place:—

1946	1947	1948	1949	1950
260	263	273	282	293

The percentage of absenteeism in these years was:—

1946	1947	1948	1949	1950
16	12½	11½	12½	12

While the basis of computation after 1948 is not exactly comparable with earlier years, the following figures indicate the rise that has taken place in the average weekly earnings of all employed in the mines:—

1946	1947	1948
£6 3s. 2d.	£6 18s. 9d.	£8 3s. 10d.

1949	1950
£8 14s. 7d.	£8 19s. 2d.

Reporting on accidents and safety, the chairman stated that in 1950, 493 men were killed in mining disasters, compared with 460 in 1949. The 1950 figure, however, included two major disasters.

Unofficial strikes during 1950 caused a loss in output of 850,000 tons. This figure represents less than one-half of one per cent of the total output and is the lowest on record since nationalization, he said.

Referring to welfare, the chairman reported that 21 new pithead baths, "the largest single item in welfare," were opened and two extended, providing accommodation for 18,500 more men. There are now 413 pithead baths to accommodate 478,700 men. At the end of the year 54 more baths and one extension were being built.

In his statement, Lord Hyndley gave the first news of a new colliery to be opened by the Board, in Staffordshire. Full output from the pit, he said, would not be reached until 1963, but it was expected to start raising coal in 1957 and to build up steadily towards 1½ million tons a year. Provision would later be made for an increase to two million tons.

Study of wartime wage stabilization in U.S.A.

The United States' experience in the settlement of labour disputes and the stabilization of wages during World War II is the subject of an extensive study by the U.S. National Security Resources Board, published in a 400-page report entitled *Problems and Policies of Dispute Settlement and Wage Stabilization During*

World War II, and issued by the Bureau of Labour Statistics, U.S. Department of Labour.

The report points out that from the early stages of the emergency and throughout the war, the cornerstone of the Government's industrial relations policy was "voluntarism"—the acceptance by labour and management of restrictions on their freedom of action in industrial relations. This principle greatly assisted in eliminating the danger of a production program crippled by serious work stoppages.

Another basic principle was "tripartitism". The authors of the bulletin agree that the joint participation of labour and management with the Government in the establishment and administration of the dispute-settling machinery was essential to the success of the voluntary approach. In their opinion, it "contributed greatly to the realism of the decisions reached, to the fairness with which the boards operated, and consequently to the general acceptance of their decisions."

Perhaps the most important decision regarding the character of the wage program was that a wage freeze would not be imposed. In place of a freeze, the program called for a series of more or less flexible limits for various elements in the wage-rate structure. Some limits, such as the "Little Steel" formula, were held very tightly. Others were extended from time to time to cope with the inevitable pressures from unions and employers. By being flexible on the "fringe" adjustments, the Government was able to hold the main line on wage rates. A rigid program could not have been maintained in the light of the inequities which were in existence at the time that stabilization was started or which were created by the dynamics of the war situation.

The decision to separate wage controls from price movements also affected the character of the program. Wages were not adjusted automatically as the cost of living rose or fell, unlike the practice in most other democratic countries.

Since wages are among the most important features of industrial dispute, another main decision was to link administratively wage stabilization with dispute settlement machinery. On the other hand, there was a division of administrative responsibility for wage and price stabilization between the National War Labour Board and the Office of Price Administration. For wage cases involving price increases the Director of Economic Stabilization acted as arbiter. This division was preferable as uniformity in the application of wage policy would not have been possible if the NWLB had been influenced by price considerations, the report states.

On the United States' experience, the authors comment: "We have concluded that, in general, the basic objectives—minimizing of work stoppages and the control of wages as part of general economic stabilization—were adequately achieved. We have also concluded that the joint participation of union and management representatives with the Government in the formulation and administration of the wartime labour program contributed greatly to the realism and fairness of the decisions reached and to their general acceptance. The program did not work perfectly. There was a considerable number of work stoppages, some of which were the result of weaknesses in the administrative machinery. A small number of companies or unions defied Board orders, requiring Government seizure of the establishments involved. Wage stabilization controls were adopted somewhat later than was economically desirable. Particular wage policies, such as the initial approach to the correction of interplant inequities, were too loose. Tripartite administration of the enforcement policy tended in some areas to be lax. Case processing was often unduly delayed. Co-ordination between the labour boards and other branches of the Government sometimes functioned poorly.

"But even if errors had been avoided, the results would have been considerably less than perfect. . . . Under the conditions prevailing during World War II, we have concluded that the policies adopted by the Government were reasonably successful in achieving this balance—with a minimum amount of compulsion and with a high degree of respect for the tenets of a democratic society."

President Truman asks for wider economic controls

On April 26, President Truman sent a message to the United States Congress asking for extension and strengthening of the Defence Production Act of 1950 (L.G., Oct., 1950, p. 1662). The present Bill expires on June 30, 1951.

President Truman's message asked that the Act be extended for two years, and that all of its present provisions and some new and stronger ones be included.

In his message, Mr. Truman outlined what he believed to be "the more important amendments" as follows:—

> Authorize the Government to build and operate defence plants, where necessary, to produce essential materials and equipment.

Permit the use of differential subsidies to obtain essential production from high-cost sources of supply without increasing price ceilings.

Provide for controls over credit on existing housing, and regulation of speculative trading on commodity exchanges.

Allow the parity price for each farm commodity as of the beginning of its marketing season to be used for price control purposes throughout the marketing season.

Provide stronger means to enforce price control regulations.

Authorize effective control over both residential and commercial rents, wherever needed to stabilize the cost of living and the cost of doing business.

These measures would become necessary in the Fall and Winter when the economy would "be hit by the full impact of military production," he said. At the same time the supply of civilian goods would be less, but the demand greater because "military spending will be putting still greater buying power in the hands of the public."

Mr. Truman said that as a result, inflationary pressures would be even greater than at present, and "if . . . it becomes evident that we need further legislative action to assure that our goals are met, I shall make further recommendations to the Congress."

President's Committee holds Conference on handicapped

A one-day meeting of the President's Committee on National Employ the Physically Handicapped Week was held in Washington on May 4. The main theme of the Conference was mobilization of the handicapped.

Several prominent industrial, labour, and government officials addressed the meeting, and highlighted several important facts and developments in relation to successful rehabilitation of the handicapped. Notable in this respect is the fact that through arrangements by the President's Committee, handicapped workers are fully covered by insurance in the same manner as any other worker.

Mr. John A. Stephens, representing the United States Steel Corporation, emphasized two important facts: (1) there should be special training of supervisors in industry who have handicapped persons under their charge; and (2) industry as a whole should co-operate by outlining job classifications in their particular industry which can be filled by certain types of handicapped persons.

The CIO program on the employment of the handicapped and aged was outlined by Mr. Frank Fernbach of the CIO. He emphasized his belief that current high spending on defence should not be the cause of cutting down expenditures for rehabilitation work. He pointed out that the handicapped provided a source of manpower for defence production, and estimated that a speeding up of the rehabilitation program would add two and one half million more people to the working force.

The Conference suggested that publicity dealing with the handicapped should be aimed at telling prospective employers of the advantages of hiring handicapped people.

The Canadian Government was represented at the Conference by Dr. K. C. Charron, Department of National Health and Welfare, and Mr. G. R. Carroll, Industrial Relations Branch, Department of Labour.

U.S. survey of employee-supervisor relations

The Survey Research Centre of the University of Michigan has recently completed the first study of a survey designed ". . . to find out some of the psychological factors related to group productivity."

The study, *Productivity Supervision and Employee Morale,* had three objectives: "(1) to discover the casual conditions making for a high level of group performance; (2) to discover the casual conditions making for a high level of group morale and of satisfaction of individual morale; and (3) to determine the specific techniques for applying the general principles of group motivation and morale to particular functions."

The initial report is the result of research undertaken in the home offices of the Prudential Life Insurance Company. Two large departments of the company, organized on the same pattern, were chosen. The researchers studied the differences in work output between employees doing similar work, and the relation of this output to supervisory values and practices, and employees' attitudes.

The survey divided supervisors and employees into two groups, low production (low work output) and high production (high work output).

The conclusion drawn by the survey was that productivity differences were "primarily a function of supervision and management." It was found that supervisors of high production groups were allowed greater freedom of action by their own superiors. They allowed their staffs a voice in making decisions, and were more inclined to supervise than to actually engage in straight production work.

Supervisors of lower producing groups differed from the higher producing supervisors. The survey found:—

> Evidently, lower production supervisors are so immediately concerned with the goal of production that they try to reach it by what seems to be the most direct route. They appear to lack understanding of the best means of achieving high production through the use of their own time in effectively motivating their own employees. High producing supervisors, on the other hand, assume that the best way of attaining high production is to motivate their employees by enlisting their identification with the work to be done and by giving them a feeling of responsibility.

The matter of employee criticism of company policy was also investigated. The report said:—

> The assumption is often made that criticism of company policy is a sign of low morale and worker disaffection. This assumption must be qualified, however, to take into account both the nature of the criticism and its source.

Mentioning a rating system which had drawn fire from employees the report noted that this system had already been recognized by the company as a problem meriting thorough examination. "It is significant, therefore, that the higher producers were more critical of this system than the low producers," the report stated, adding:—

> The source of criticism is also an important factor to consider. When criticism comes from the better motivated, higher producing employees, it cannot be dismissed as the general negativism of disaffected people.

Several other interpretations were drawn from the findings of the survey. It would appear that people are more effectively motivated with regard to their work, when they have some freedom in the manner in which they are allowed to do it, than when each step is laid out in advance by the supervisors. If they are allowed a share in the decisions to be made, they perform better work, and respond more adequately when they feel that they are treated as individuals and not as cogs in the company machinery. The survey concluded that "when the individual comes to identify himself with his job, and with the work of his group, human resources are much more fully utilized in the production process."

The report stressed that these findings were not to be treated as generalizations applicable to all types of production situations; but rather the findings of the first of a series of reports. Generalizations would have to wait until the complete study is finished, the survey said. The findings "may be limited by the type of production-situation in the Prudential Company, where work methods are very well standardized." However, it is also possible, that even under circumstances "where supervisors have considerable freedom with respect to work-methods, emphasis upon employee motivation can improve productivity."

President Truman reconstitutes Wage Board

On April 21, President Truman issued an executive order reconstituting the Wage Stabilization Board, which had ceased to function in February, following withdrawal of labour representatives from it and other United States mobilization agencies.

The reconstitution of the Wage Board marked the end of the ten-week boycott of mobilization agencies by the United Labour Policy Committee, which acts as spokesman for the AFL, CIO, and the Railway Labour Executive's Association.

According to the Monthly Labour Review of the United States Department of Labour, the boycott was the result of labour's "dissatisfaction with political and economic aspects of the administration of defence mobilization." A declaration issued by the United Labour Policy Committee had asked for "equality of sacrifice . . . (and) equality of representation . . . (in defence agencies) . . . for the major groups in our economy."

A more immediate cause of the boycott was disagreement over the amount of increases to be allowed under the wage freeze declared on January 26. At that time, the Wage Stabilization Board by a vote of 6 to 3 (with labour members dissenting) approved a policy allowing general wage and salary increases of 10 per cent above levels of January 15, 1950.

Press reports indicated that labour members had requested a 12 per cent increase above levels prevailing in June, 1950. Under the regulations, so-called "fringe" benefits already granted were excluded, but any future benefits of this type would be taken into account. It was further ordered that existing escalator clause adjustments would only be allowed within the 10 per cent ceiling. Under the new settlement, the whole problem will be studied by the Board. An increase above the 10 per cent ceiling was granted to railway employees, and news stories have indicated that the rigid pattern established in the wage freeze order will be relaxed in other cases.

The new Wage Board, an eighteen-man agency, was suggested to the President by the National Advisory Board on Mobilization by a twelve to four vote of its members (industry members dissenting). The Mobilization Board was established by

President Truman on April 5, after labour had accepted membership. The Board is composed of seventeen members, four each from labour, industry, agriculture, and the public. The Chairman of the Board is Charles E. Wilson, Director of Defence Mobilization. It is responsible directly to the President, and will advise him on policy regarding defence mobilization.

Dr. George W. Taylor, former chairman of the War Labour Board, was named as temporary Chairman of the Wage Board which is composed of six members from each of labour, industry, and the public. The executive order established the Board's power:—

> To assume jurisdiction of any labour dispute which is not resolved by collective bargaining or by the prior full use of conciliation and mediation facilities and which threatens an interruption of work affecting the national defence, where (*a*) the parties to any such dispute jointly agree to submit such dispute to the board, or (*b*) the President is of the opinion that the dispute is of a character which substantially threatens the progress of the national defence and refers such dispute to the board.

Labour members named to the new Board by Mr. Truman were: Harry C. Bates and W. C. Birthright, AFL vice-presidents; Elmer E. Walker, vice-president IAM; Emil Rieve, CIO vice-president; John Livingston, UAW vice-president; and Joseph Bierne, president of the Communications Workers of America.

The other members of the Board are: *Public:* Nathan P. Feinsinger, William M. Hepburn, Frederick H. Bullen, Clark Kerr, and John T. Dunlop. *Industry:* Milton M. Olanda, Alexander R. Heron, Richard P. Doherty, Henry B. Arthur, J. Ward Keener and R. B. Robertson.

Australian Workers' Union plans affiliation with ICFTU

The sixty-fifth annual convention of the Australian Workers' Union was held in Sydney from January 23 to 25 and January 30 to 31. Delegates from all states of the Commonwealth attended the debates.

In his annual report to the convention, the general secretary, Mr. T. Dougherty, reported on a tour which he and other labour leaders from New Zealand made in United States as guests of the American Federation of Labour. The purpose of the tour was to study that country's labour movement and institutions.

Regarding co-operation among the world's free trade unions, Mr. Dougherty stated: "My talks while in America with leaders of free trade unions from European and Asian countries who are affiliated with the ICFTU (International Confederation of Free Trade Unions) has satisfied me that the ICFTU is truly an international trade union organization working in the interests of the less fortunate people, for lasting world peace . . ." Later in the convention, the Union adopted a resolution that the executive council together with the president and secretary "do everything possible to bring about an affiliation with the International Confederation of Free Trade Unions."

Other resolutions which were adopted concerned stricter price controls, protection of the right to strike, conscription, political action and working conditions in the pastoral industry. The delegates were addressed by the president, Mr. H. O. Davis, and by two guest speakers, Dr. Evatt, acting leader of the federal Australian Labour Party and Mr. Kenneally, general secretary of the ALP.

Credit unions in U.S.A. increase

In the last 18 months, operating credit unions chartered by the United States Government have increased both in number and members. The report of the Social Security Administration, under which chartered credit unions operate, shows that from 1948 to the end of the fiscal year, June 30, 1950, the number of associations grew from 4,058 to 4,775, and memberships from 1,628,399 to two million. Assets increased from $258 million to $363·2 million.

Membership of Indian trade unions increases

At the end of March, 1949, there were 3,150 registered unions in the eleven States (formerly Provinces) of India, the December issue of the *Indian Labour Gazette* reports. This is an increase of 374 over the number of unions in March, 1948.

Information received by the Indian Ministry of Labour concerning membership was submitted by 1,848 unions and it shows a total membership of 1,960,107 at the end of the year under review as against 1,662,929 shown by 1,628 unions in the previous year.

The average membership of trade unions, the *Gazette* stated, was 1,061 in 1948-49. The proportion of women members has gradually increased from 1·2 in 1927-28 to 6·2 in 1947-48; in 1948-49, it was 6·1. The number of women members during the last-mentioned year was 119,355 as compared with 102,299 in 1947-48.

Among workers' organizations, transport (including railways and tramways) accounted for 11 per cent of the unions and about 28 per cent of membership. Textiles represented 12 per cent of the unions and 24 per cent of the reported membership. The seamen's unions showed the highest average membership, that is 4,612.

As for frequency distribution of registered trade unions according to membership, the model group was that of a membership of 100 to 299; this group constituted 30 per cent of the unions and five per cent of the total membership. Unions having a membership of less than 100 accounted for 25·6 per cent of the total number of unions but only 1·3 per cent of the total membership of 20,000 and over but these unions represented 30 per cent of the total membership.

There were 19 federations of trade unions on the register at the end of the year under discussion, two more than the previous year. The Textile Labour Association (Ahmedabad) alone accounted for 82 per cent of the total income of the federations (Rs. 398,817) and 79 per cent of the total expenditure (Rs. 290,526).

NATIONAL ADVISORY COUNCIL ON MANPOWER: SECOND MEETING

The second meeting of the National Advisory Council on Manpower was held in Ottawa on May 18 and 19. The following is a report of the proceedings.

Under the joint chairmanship of Arthur MacNamara, Deputy Minister of Labour, and Norman Robertson, Clerk of the Privy Council, the National Advisory Council on Manpower held its second meeting in Ottawa on May 18 and 19. It discussed various aspects of the manpower situation and related matters, and made several important recommendations.

The two-day meeting was opened by the Hon. Milton Gregg, Minister of Labour. Mr. Gregg reported that many of the recommendations made by the Council at its first meeting (L.G., March, 1951, p. 311), had been acted upon. The Council heard from the Rt. Hon. C. D. Howe, Minister of Defence Production and Trade and Commerce, who discussed the defence production program and its relationship with the demand for manpower. The Hon. Brooke Claxton, Minister of National Defence, also spoke; he outlined the long and short term manpower requirements of the Armed Forces. Several officials of the Department of Labour and the Unemployment Insurance Commission made reports on such subjects as the current manpower situation, the records of technical personnel, and the system of voluntary labour priorities.

National Registration

Following a report by the Deputy Minister of Labour, the Council decided that a national registration was not needed at the present time. It recommended, however, that the Department of Labour should proceed with the advanced planning for a registration, so that one could be held at short notice if an emergency made it necessary.

Mr. MacNamara's report, which was based on a study of all aspects of the question, contained the following conclusions:—

1. The statistics on manpower now being collected regularly, and the data provided by the census to be taken in June will be quite sufficient for the planning and allocation of manpower under present circumstances;
2. Even a greatly expanded preparedness program might not require a national registration, although registration of specific occupational groups at appropriate times might be necessary to obtain information for specific purposes;
3. A national registration should be held if it becomes apparent that the risk of war has substantially increased or that other events have occurred to justify such action; in any event, planning should be based on the assumption that a general registration will be held if war breaks out;
4. Such a registration, in addition to its manpower uses, would be valuable for security purposes and, to a limited extent, for commodity rationing and civil defence.

During discussion on the subject, the Council was told that the manpower requirements of the preparedness program

as currently visualized present no problem which would warrant or necessitate a national registration of manpower. It was repeatedly emphasized that a registration should be held as close as possible to the time when the information obtained would be used. The information provided by a registration, it was pointed out, quickly becomes out-dated due to changes of address and other particulars.

The Manpower Situation

In his informal statement and the discussion which followed, the Rt. Hon. C. D. Howe told the Council that, in general, defence industries were not at the moment having serious difficulty in recruiting essential manpower. The overall manpower situation was "tight", however, and would continue to be during the remainder of the year.

Mr. Howe stated that reports of industries "cutting back" production due to shortages of materials were grossly exaggerated. Some of the cut-backs have been caused by overstocking.

The present situation, Mr. Howe pointed out, was vastly different from that existing in World War II—the demands now were limited whereas then they were almost unlimited. At the present time, the pressure for top production was mainly restricted to the industries manufacturing aircraft, ships, electronic equipment and certain types of guns, and to the construction of certain types of military establishments. There were large scale defence-supporting activities, however, which would extend the demand for labour. These included the iron ore developments in Northern Quebec and Ontario, large aluminum projects in Quebec and British Columbia, and the program of developing other strategic mineral resources.

Although there would be some shifting of labour from civilian industry to defence industry, the Government was making every effort to keep both sides of the economy in balance. No one knew when a war might come, Mr. Howe said. Since we might face the present situation for ten years, we must be prepared for either a long period of defence without war, or for war if and when it comes.

The Council also heard a report on the current manpower situation based on evidence of supply and demand recorded by the National Employment Service. Presented by Mr. George V. Haythorne, Director of the Economics and Research Branch of the Department of Labour, this report outlined the manner in which the situation had changed since the first meeting of the Council. "Labour shortages", the report states, "although still largely confined to skilled metalworking and related trades, have become more evident in a number of areas across the country. There is at present no general manpower shortage, but there is little doubt that the labour supply situation will become tighter during the next few months."

Armed Forces Requirements

In describing the manpower program of the Armed Forces, the Hon. Brooke Claxton dealt with the overall picture and, more specifically, with officers, professional and scientific personnel, tradesmen and women. The armed forces, he pointed out, had increased by 28,000 or 60 per cent since the first of June, 1950. In the current recruiting drive for the 27th Infantry Brigade, over 7,000 men had applied for enlistment; of these, over 4,000 had already been enrolled. The Government, he said, desired to maintain a continuous flow of recruits into all three services.

Rehabilitation of the Physically Handicapped

Following Mr. Claxton's statement, the Hon. Milton Gregg told the Council that the program of co-ordinating rehabilitation services would get under way early in the Autumn. He announced that, in accordance wtih the recommendations made in February by the National Conference on Rehabilitation of the Physically Handicapped (L.G., April, 1951, p. 454), a National Advisory Committee would soon be set up to continue the work of the Conference. The Department of Labour has requested the provincial governments, organized labour, employers' organizations, medical groups and voluntary organizations working in this field to nominate members of the Committee. The Government, Mr. Gregg said, will shortly appoint a full-time co-ordinator.

Voluntary Priorities

At its meeting in February, the Council had advised the Government to develop a plan whereby firms engaged in essential activities could be given preference in the referral to jobs of men and women applying for work at the offices of the National Employment Service.

In a report presented by Mr. W. K. Rutherford, Director of the Employment Service, the Council was told that their recommendation in this regard had been acted upon. An interdepartmental com-

mittee, composed of representatives of the Departments of Labour, Trade and Commerce, and Defence Production, and the Unemployment Insurance Commission, had been established, had arranged to obtain the necessary information on defence contracts and essential undertakings, and would determine the firms which would be given priority in the referral of workers.

Mr. Rutherford's report described the system as follows:—

> Firms will be given this preference for the particular plants actively engaged in defence contracts or in other essential undertakings. Before any preference is given, each project is carefully investigated to determine the national importance of its operations.
>
> It is understood that officers of the employment service have no power to compel workers to accept employment with specific firms or employers. Nevertheless, . . . jobs and activities given a preference will be offered to suitable workers . . . (who will be) . . . counselled to take these jobs. . . .
>
> It is emphasized that while assistance will be given to preferred employers . . . . employers must co-operate in every way in making the employment conditions reasonably attractive if the channelling of workers through counselling is to be effective.

Records of Technical and Scientific Personnel

Members of the Council were told that the Department of Labour was quickly proceeding with the plan, endorsed by the Council at its first meeting, to bring up to date the records of an estimated 60,000 Canadian architects, engineers and scientists.

It was stated, in a progress report on the plan, that all persons known to belong to the technical and scientific group were being asked by means of a questionnaire to record any changes in their training, qualifications or address. Assistance in this work had been obtained from professional associations.

The report also indicated that some 60 per cent of the persons to whom questionnaires had been sent had already replied, and that preparations were well advanced for analysing the information received.

Mobility of Labour

In a discussion on labour mobility, it was suggested to the Council that transportation expenses be advanced to persons unable to find work in their home areas, so that they might take jobs elsewhere. The Council agreed that the Unemployment Insurance Commission should make a study of this suggestion.

Members of the Council again emphasized that, in order to minimize the need for special measures to increase labour mobility, orders for defence production should be placed, wherever practicable, in locations where labour was available. If the defence production program were to be carried out with as little disruption as possible, this procedure was highly desirable.

Vocational Training

The Council examined the possibility of a greater output of tradesmen, especially in those categories where skills would be in greatest demand by defence industries and the Armed Forces. It recommended that vocational training facilities be expanded to the maximum; that a survey of equipment in vocational schools be made; and that ways of using training facilities now existing in industry be investigated.

It was pointed out to the Council that, by making funds available for vocational training facilities throughout the country, the Federal Government in recent years had stimulated provincial and municipal programs for the expansion of vocational training. Up to March 31, 1951, a total of 113 building projects for training purposes had been approved for financial contributions by the Federal Government. Of these, 78 had been completed and were in operation at that date, and 16 were under construction. The completion during the last fiscal year of 14 new vocational schools had brought the total of such schools operating in Canada to 191, as compared with 92 in 1944.

This expansion of facilities is important, it was pointed out, for of 12,000,000 mandays of training provided under the War Emergency Training Program in World War II 75 per cent was given in municipally or provincially-owned premises.

During the vocational training discussion, it was pointed out by Mr. Rhys M. Sale, President of the Ford Motor Co. of Canada, and by others representing employer groups, that in many manufacturing plants there were efficient and fully equipped training divisions in operation. The Council recommended that a survey of these plants be made with the object of entering into a mutually satisfactory arrangement with the management for an extension of the use of training facilities.

FACTORY INSPECTION IN GREAT BRITAIN

The Chief Inspector's Annual Report for 1949 shows that the accident rate fell from 40 per 1,000 employees in 1944 to 26 per 1,000 employees in 1949 but that there were still 192,982 accidents of which 772 were fatal.

Extensive changes in working conditions have resulted from new industrial processes and the introduction of mechanical handling devices.

Considerable progress was reported in making factories cleaner and more cheerful.

More workers had access to canteen facilities and more made use of them.

The standard work week remained at 44 hours and 5 days with considerable overtime worked in many factories.

The Chief Inspector of Factories emphasizes the concentrated effort of the factory inspection staff made necessary by the full employment policy and the dollar export drive. No major legislative changes were made during the year but as a result of two inquiries held under the Act, the Pottery (Health and Welfare) Special Regulations (1949) and Draft Blasting (Castings and Other Articles) Special Regulations were issued. A wide and growing interest in working conditions in industry was evident and reports of Inspectors indicate that industrialists generally are paying greater attention to the safety, health and welfare of their workers, and increasing demands are being made on the Inspectorate to advise on conditions in factories. An unsatisfactory type of industrial premises, especially in the smaller factories, is only but slowly disappearing. Inspectors have used their powers to issue certificates of unsuitability where conditions have been unsatisfactory.

Industrial Development

The expansion of industry during 1949 and the introduction of new processes have brought with them special problems of health and safety. Other changes, particularly the introduction of mechanical handling equipment, tended to remove hazards. The Chief Inspector discusses outstanding instances of changes in working conditions due to industrial developments. New chemical processes in the oil refineries, in factories making chemicals such as industrial solvents, synthetic detergents, etc. from oil, and in factories making the new materials for the plastic industries, bring risks of gassing and explosion, because large quantities of liquid chlorine, ammonia and acetylene are used in these processes. The fact that no major explosion or gassing accident occurred during the year is a tribute to the care taken by the firms concerned. The Factory Department was asked to assist in many instances when the plants were being designed.

Several instances are cited of changes which show how mechanization can greatly assist in improving conditions quite apart from rendering them less arduous. At a gas works a new coal and coke handling plant, a coke screening and storage plant, an ash handling plant, and a producer gas dilution plant are all completely mechanized.

In the pottery industry, one large firm has installed a compulsory new system of calcining flint, in which the whole process, from loading the raw flint into the hoppers to the emergence of the slop flint used at the factory, is fully automatic and dust free. "The District Inspector reports that no greater contrast can be imagined than that between this process and flint calcining in the typical old-fashioned potter's mill with its high incidence of silicosis."

An effective substitute for hand labour in another process in the pottery industry was observed in the decoration shops:—

> One of the most laborious jobs done by women in the decoration shops is transferring, where considerable muscular effort is required to rub the transfer on to the article which is to be decorated. Several potteries have adopted the Wedgwood Pressure Cabinet. This consists of a metal cupboard capable of withstanding air pressure. A number of articles of ware with transfers in position are placed

in the cabinet, which is then closed, and a pressure of 20-25 pounds introduced. After a few seconds pressure is released, and the ware removed with the transferring operation complete.

After discussing several other schemes for modernization of plant and methods, the Report warns that the replacement of one machine or a few isolated machines in the system may effect but little improvement, "for so often the output of the plant as a whole is determined by the speed of the slowest machine."

> Much machinery has a long life and in many factories machines up to 50 years old are to be found. Such machines, although probably representing the latest practice at the time of purchase, have a performance appreciably below that of their modern counterparts. It is therefore necessary in many cases, if efficiency is to be achieved, to replace machines according to production groups in which the units are matched to keep pace in the production line. Where such considerations prevail, mechanical handling can often be introduced as between machine and machine with benefit to the worker by reducing the risk of accident and fatigue.

In the building industry there is a strong tendency for the use of machinery and greater economy in manpower even among small builders. The advantages of mechanical transport both horizontal and vertical is tending to lead to the development of a special mobile crane to serve the purpose of both tractor and hoist.

Mechanical handling devices in the brick-making industry have resulted in a great saving of manpower as well as considerable reduction in accident risk. A chamber containing 76,000 bricks can be emptied with mechanical equipment by two men in about eight hours, a task which formerly occupied four men, using barrows, for about two days. With the new method of handling there is little dust in the air of the kiln because there is no disturbance of dust on bricks, and the two men operating the mechanical equipment spend less time in the hot kiln than if they were using barrows, and hand injuries from falling bricks should be greatly reduced.

A gradual substitution of cellulose nitrate film by less combustible material is taking place, so that the serious risk which exists wherever photographic film of the highly inflammable type is handled or stored will ultimately be removed. Developments in film manufacturing are tending to eliminate the differences in performance of the two materials.

Cargo ships since the war are being equipped with derricks and gear of greater lifting capacity. It is now common to find a 50-ton derrick at the main hold of cargo liners.

> This development serves to focus attention on the necessity for derrick testing, examination and inspection being carried out thoroughly, and by those well able to assess the loads and stresses to which the winches, derrick booms and their gear will be subjected to use.

New methods of testing castings and forgings are bound to make for greater safety in engineering operations. In addition to proof loading tests, detection of cracks by magnetic, fluorescent and ultrasonic methods are among the means now available to engineers for the purpose of ensuring sound castings and forgings.

The Chief Inspector goes on to speak of developments relating to ultrasonics which are of special interest to the Factory Department. The non-destructive testing of materials is a sphere in which ultrasonics has great possibilities and some applications are already in use, e.g. for the on-site testing of welds for possible flaws, as in an all-welded steel structure of a large factory under construction.

> This type of work is based on echo technique not unlike depth sounding and radar. Pulses are applied to the material under test and, as in radar, reflections received in the intervals between the transmitted pulses are shown on the cathode ray tube.

Non-metallic objects such as rubber tires may also be tested by ultrasonic methods. The precipitation of dusts, or even fogs, and the sterilization of food are some of the varied processes in development.

Industrial X-ray sets of higher power are being introduced, and the use of fluoroscopic X-ray sets is extending. A lighter touch in the Report is the description of

> an interesting installation recently for the Christmas trade of a 100 KV. set for the examination of Xmas puddings, passing through the machine on a conveyor belt, for the presence of stones and similar foreign matter which are sometimes present in the currants and may escape the normal washing and cleaning which this fruit receives before incorporation in the puddings.

Radioactive materials are still being used in static eliminators, and radio silver, one of the new isotopes becoming available from the atomic piles at nuclear energy factories, is being used for the reduction of the fog marking of nylon which occurs at certain parts of the machine when the nylon spinning machine is left standing at nights or weekends. The necessary precautions to protect workers at the looms from radiation have been worked out in

collaboration with the British Cotton Industry Research Association at the Shirley Institute. An effort is being made to replace the radium in the static eliminators by another new radioactive isotope, radio thallium, which is cheaper and would also reduce the radiation hazard.

Material for electrical installation work was more readily available during the year and overdue renewals and renovation, replacement of temporary work, and in some cases, the institution of periodic testing, were noted.

> There are places, however, where managements who have found that wartime expedients seem to work reasonably well are quite content and accept breakdowns, cuts in supply and a few minor electric shocks as customary in electrical service. Others assume that their installations possess everlasting life, although allowances for wear and tear are duly made for mechanical equipment. When failures occur a few wires are strung up overhead to the nearest fuseboard, seldom including an earth wire, and service is resumed—the question of repairs being left until somebody has time.

An increase in the number of electrically caused fires in the last fifteen years from about 8 per cent to 16 per cent emphasizes the need for a higher standard of safety.

The requests by occupiers for dust estimations increased during the year. The processes in which dust estimations were carried out included newspaper printing, cutlery polishing, asbestos spraying, the cleaning of metals, and cotton spinning.

Foundries

Inspectors reported steady progress in the implementation of the recommendations of the Joint Advisory Committee on Conditions in Iron foundries, not only in the larger establishments but in many small and jobbing foundries. A new technique for estimating the amount of dust in foundry atmospheres was developed by one of the Engineering Inspectors of the Factory Department, and a team led by one of the Medical Inspectors of Factories completed a medical survey of silicosis risks in iron and steel foundries which has been recently published *(Industrial Lung Diseases of Iron and Steel Foundry Workers)*. The Report shows that nearly all categories of foundry workers are liable to inhale dust which produces abnormal X-ray pictures of the lungs, some of the abnormal shadows representing actual lung fibrosis, others merely indicating deposits of iron oxide which does not cause fibrosis. The study assesses the risk of silicosis in the various types of foundry work. The incidence of active tuberculosis found in the survey was no higher than in the general population.

A summary of improvements made or planned shows progress in cleanliness, particularly in the whitewashing or painting of walls, and the use of vacuum cleaners or brushing down methods. Concrete floors are coming into greater use, and better arrangements for moulding boxes, loom plates, frames, etc. not in actual use are helping to prevent congestion. General improvements have been noted in the heating of foundries, and the coke brazier has been gradually disappearing. Improvements in natural lighting are reported through the use of glass roof lights, patent glass ventilators and use of transparent plastic roofing sheets. Progress in the colour painting of interiors is bound up with the suppression of dust, fume and smoke. In mechanized foundries where there is dust and fume control, colour decoration is becoming common practice; in non-mechanized foundries where the maintenance of clean surfaces is a problem, regular brushing down or washing is necessary to preserve the effect if colour is used. The general tendency is towards use of bright colours rather than pastel shades. One report describes a foundry where bright colouring has been applied as having "blue steelwork and roof, sun yellow walls and orange doors, windows and cranes."

Suitable washing facilities are being installed, particularly in the larger foundries. Supervision to keep ablution blocks clean and tidy is being found advisable.

> No matter how good washing facilities and showerbaths may be, the opinion is expressed that they will not be used fully unless there is an attendant in the larger installations and suitable and convenient facilities for changing clothes are provided. The rooms must be adequately heated and the floor must be properly covered; duck boards are not popular, coconut matting is preferred.

Along with bathing facilities, good clothing accommodations is being provided, "usually consisting of two lockers per man, one for outdoor the other for indoor clothin, so that a workman on leaving the foundry proceeds to his first locker and, after taking off work-soiled garments, goes through the showers or washing rooms to the second locker for his outdoor clothes." With these facilities, the Chief Inspector comments, a man may leave at the end of his day's work without carrying the marks of his trade with him.

The implementation of the Committee's Report on dust, fume and smoke suppression depends upon practical experience such

as is being gained in mechanized foundries, and upon experimental work in others. As employers are required under Section 47 of the Factories Act to take all practicable measures to protect the worker against the inhalation of injurious or offensive dust or fume, it is incumbent upon the industry as a whole and upon individual employers to find and adopt improved methods.

Galvanizing

One of the most significant features of the post-war years has been the modernizing of processes in the older industries, and a general effort to raise the standard of conditions of work. An instance of this is part of the galvanizing industry dealing with hollow-ware in the Black Country of the Midlands. The term hollow-ware covers all such items as buckets, baths, dustbins, watering cans, coal hods, bowls, etc.

The difficulty of providing and maintaining good conditions arose from the nature of the process carried on, which discharges quantities of acid fume, products of combustion and fume from the sal ammoniac added to the surface of the molten zinc. These fumes and the absence of controlled ventilation made it impossible to maintain whitewashed or painted walls in good condition. In a typical plant the floors would be uneven, of dirt or brick rotted by acid, "the walls innocent of and covering other than dirt."

> The difficulties of securing good conditions in galvanizing shops arise, as so often is the case with long established sections of industry, from the very fact that they are old and from the fact that in the 100 years before 1945, there was, in the main, no change in the process used in most of the works. As a result, the old buildings of the nineteenth century continued in use and their design was perpetuated in the shops built for galvanizing even in the early twentieth century. There was no difficulty in obtaining labour and no incentive to spend money on improved conditions. . . . A standard galvanizing shop developed; a brick shell with wooden roof-frame and tiled roof, tall and narrow with openings for doors, iron-barred window spaces, and either earth or brick floors. The high pitched roofs had louvres along the whole length and relied on natural ventilation to remove the copious fume produced by pickling acid, open coke fires and the flux thrown on to the pot. This type of shop became the standard for hollow-ware and odd work, and examples built at all dates between 1875 and 1945 are to be found.

In the last five years working conditions in a majority of these galvanizing plants have been very greatly improved by better control of fumes or by eliminating the problem altogether by substituting a new process which does not produce fumes. The new galvanizing process (known as the "clear" process as opposed to the traditional "black" process) has been satisfactorily adopted in about 20 plants, and in these plants the conditions are good. Greater capital outlay is necessary, and the process requires closer technical supervision. In most other plants which are still using the "black" process a new method of mechanical fume removal has been introduced. Inspectors report that the five years from 1945 to 1950 have seen a revolution in the conditions of three-quarters of the works, either by alteration of the process and increased mechanization or by the provision of exhaust appliances.

Safety Organization

The work of Joint Standing Committees during the year is briefly reviewed, as well as Joint Safety Committees of Joint Industrial Councils. Area Safety Sub-Committees set up by the National Joint Industrial Council for the Flour Milling Industry meet every three months and consider particulars of all accidents, whether notifiable to the Factory Department or not. These meetings perform a useful service in that they can check accident records to a degree impossible when dealing with reportable accidents alone. A move of the rubber industry to set up an Engineers' Sub-Committee of the Accident Prevention Committee to consider the technical problems involved in fencing rubber-making machinery is mentioned as a considerable advance.

Inspectors' reports indicated that some new Personnel Management Departments have been set up, and a growing appreciation of the importance of the personnel management function was indicated by the delegation of well-defined duties to personnel staff.

Training

Steady and successful work in connection with training schemes is reported. A greater degree of co-operation between industry and technical educational authorities and of increased efforts by groups of employers was apparent. One evidence of this was the setting up in the cotton industry of a Pilot School at Blackburn Technical College to train workers in cotton weaving. The scheme will be directed by a governing body comprising representatives of the Manufacturers' Association, the Trades Federation and the local education authority.

The Report describes an extensive scheme of apprentice training put into effect during

the year by an engineering works where a great deal of machine tool work is done and 2,000 workers are employed. The firm built for the purpose a new training school, clean, colour decorated, well lit, equipped with up-to-date machine tools and containing lecture rooms properly equipped for instruction. Thirty-seven apprentices between the ages of 16 and 17½ were enrolled for a five-year course. The object is to train boys to be skilled craftsmen, to give them good theoretical instruction, to develop good qualities of character and to promote physical well-being. For the first two years the boys are given full-time instruction in the school, with one day's attendance a week at technical school. They then serve periods in each department of the factory. Their theoretical training is continued at technical evening classes, and until the five years of their apprenticeship is completed they are under the supervision of the school supervisor. The Report states that this firm is considering whether in exceptional cases the boys will be sent to take a university degree course following the completion of their apprenticeship.

Accidents

The accident rate has fallen from 40 per 1,000 employees in 1944 to 26 per 1,000 employees in 1949. The total number of accidents reported under the Factories Act in 1949 was 192,982 (compared with 201,086 in 1948) of which 772 were fatal (861 in 1948). This is a decrease of 4 per cent in non-fatal accidents and 10·3 per cent in fatal accidents. Of the 78 industry groups, 21 show increases in the number of accidents and 57 show decreases. Metal founding and ship repairing show a marked decrease, and building operations a considerable increase.

The analysis of causes of accidents shows that shafting accidents, accidents on milling machines and those on power presses have been decreased, a result which the Chief Inspector noted as being highly desirable since, though the number of accidents from these causes is comparatively small, they usually cause serious injury. The number of accidents due to handling of goods has decreased, also, due in some measure to introduction of mechanical handling equipment. A big increase in transport accidents is to some extent due to increase in the use of power-driven trucks. The smaller number of cases of sepsis may well be due to the higher standard of cleanliness, and better first aid treatment. Eye accidents showed a decrease of 4·5 per cent, but there were still 9,157 most of which could have been avoided by the use of goggles or eye-shields.

> A large number of accidents is due to guards lacking that completeness necessary to provide secure fencing. The danger of incomplete guards is that they are apt to give a false sense of security by concealing but not preventing danger.

The Report (Table III) shows the accident frequency rates for a selected number of factories in various industry groups for the three years 1947, 1948 and 1949. These are based on information supplied voluntarily by certain factories and are therefore not comprehensive. The frequency rate is calculated according to the international standard and takes into account the number of lost-time accidents (that is, those covering loss of time beyond the day or shift in which the accident occurred), and the number of man-hours worked during the year. The formula used is total number of accidents times 100,000 divided by total man-hours worked. In the selected industries, the frequency rate has gone from 2·27 in 1947, and 2·24 in 1948 to 2·23 in 1949.

A section on accident prevention organization stresses the fact that while formal safety organizations are desirable, it is in the firms, large or small, where safety is regarded as of the highest importance by the proprietor or directors that the highest standards of safety are attained. The Chief Inspector considers that accident prevention needs to be the particular interest of at least one member of higher management, and if this is not so, even where there is a full-time safety officer and committee, no real success is likely to be obtained. There seems to be a growing tendency to add the duties of Safety Officer to those of Personnel Manager, Works Engineer or Assistant Supervisor. In smaller works this is considered sound, provided the Safety Officer's work on safety is not counted as the least important of his duties and only deserving of attention when he has nothing else to do. The fundamental point is that the Safety Officer be directly responsible to someone at the head of affairs, that he possess the necessary authority, and, of course, that he be well trained.

Safety Committees have continued to work well. Some of their efforts are described in the Report.

A novel scheme introduced at one works includes monthly inter-departmental examination of plant by all departmental Managers. Every month one department is visited by all the other Managers, who

are encouraged to offer constructive criticism of any possible hazards they observe in the interests of safety.

At another works a form of financial incentive to improve accident prevention methods is in effect. All foremen and supervisors are employed as active officers in accident prevention, and a no-accident and cleanliness bonus is paid to them. If an accident occurs in any section, the foreman and supervisor lose their bonus for the month.

Efforts are being made to interest apprentices and other young persons in safety, and one firm has proved that interest may be aroused by giving young people responsibility in accident prevention organizations. This firm has junior and senior Safety Committees. The junior committee represents workers under 21 and deals with its own agenda and suggestions under the guidance of senior officials. With some 400 persons employed in this firm there was no reportable accident during the whole of 1949.

In one district, the Chief Inspector reports, many of the principal firms are associated with the Royal Society for the Prevention of Accidents, and in 1949, 77 firms were members of the local Industrial Safety Association which is associated with the Royal Society. Before the monthly evening meetings of the Association, it was the custom for Safety Officers to be invited to one of the member firms for an afternoon session prior to the meeting. At the end of each session there was a general discussion with respect to safety in that particular factory.

An Accident Prevention Officer at one large plant instituted a monthly meeting of representatives of contracting firms engaged in various work at the plant. The meetings were open to contractors' agents, foremen and workmen, and were well attended. The meetings in the main dealt with work on building operations and were helpful in making better known the requirements of the new building regulations.

Accidents to Young Persons

Accidents to young people were less than the previous year, 14,443 in 1948 and 12,668 in 1949. "Lack of supervision and instruction, inexperience and curiosity, with the emphasis on the first, are the root causes of most of the mishaps which befall young persons". The Chief Inspector points out that it should not be beyond the scope of anyone with jurisdiction over young workers to direct their energies along the right lines, reserving the expending of high spirits to organized recreation in a place set apart. Playing fields and similar amenities may not be practicable but some safe place, however small, for games, could be provided by any works. Numerous accidents are cited where supervision was entirely lacking or did not go far enough.

Accidents on railway sidings in premises under the Factories Act numbered 3,024 and included 43 fatalities. This was an increase over the previous year. Gradient shunting operations are especially dangerous; inadequate space between rails and fixed structures such as gate posts or walls of buildings are sources of danger, as well as failure to maintain rolling stock in good working order.

> A warning system, which included visible signals and an electric bell, failed to prevent an accident during wagon movements, because the men supplemented it with an unofficial whistle system which eventually broke down. This accident emphasizes the need to ensure that (*a*) official systems only are used; (*b*) such systems are so designed as to be convenient for the operators, and (*c*) unofficial warning systems do not creep in.

Another risk is the amount of crossing of lines by personnel during the course of their work.

Accidents at Building Operations

A total of 11,777 accidents on building operations were notified to the Department in 1949, an increase of 20 per cent over the previous year, but fatal accidents were reduced by 11 per cent, 183 against 218 in 1948.

The dangers of asbestos cement sheeting on roofs have been pointed out in many previous Reports, but 213 accidents occurred from this cause in 1949 of which 32 were fatal. Ignorance of the danger is widespread.

> Recently a reference to the dangers brought forth declarations of incredulity from an architect and engineer respectively which only an opportune press notice reporting the very pertinent observations of a Coroner at an inquest on a recent victim succeeded in dissipating.

The precautions as stated in the Building Regulations, 1948, are simple. These are that persons should be adequately warned that the roof covering is fragile by prominent notices affixed at all approaches to the roof. Suitable ladders or crawling boards should be readily available, light in weight to facilitate placing them in position on the roof and of sufficient width to provide adequate foothold. Where certain parts of the roof have to be reached regularly, the advisability of establishing

permanent walkways should be considered.

Falls from ladders and stepladders formed the greatest single cause among accidents due to persons falling, being responsible for 734 accidents of which 23 were fatal.

The large number of strains, ruptures and fractures, which were sustained in manual handling accidents, indicates a need for education and training in methods of moving materials, estimating weights and loads, and the use of mechanical handling. A series of descriptions of accidents demonstrates particular hazards and points out the safeguards that would have prevented them.

Electrical Accidents

Electrical accidents notifiable under the Factories Act during 1949 numbered 771 of which 24 were fatal. A survey of one area showed that 50 per cent of the injured persons are electrical staff and nearly all experienced working electricians. A move towards the adoption of low voltage for portable electrical apparatus has been noted. The Department has recommended this particularly in situations where by reason of outdoor use, electric shock was likely to be serious.

Industrial Diseases

Table XI lists the reported cases of industrial poisoning or disease, and a discussion of individual cases and the cause of the disease follows. There were 53 cases of lead poisoning reported during the year of which more than half were among men engaged in shipbreaking. The hazardous nature of this work is well known, and it is clear that the workers need stricter supervision to make sure that full use is made of precautionary measures.

Forty-six cases of compressed air illness were reported, the highest number recorded in any year, but none of the more dangerous forms of the illness was encountered. All but three of these cases resulted from tunneling operations on three sites.

There were 139 cases of chrome ulceration, over half occurring in chromium plating. Of these 23 were cases of ulceration of the nasal septum; in the rest the ulcers were mainly on the hands and were generally of slight severity. In these milder cases ulceration was in the main due to accidental splashing, or to preceding injuries such as cuts or abrasions.

There were 190 cases notified of epitheliomatous ulceration, with 13 deaths, compared with 233 (18 deaths) in 1948. Pitch was the causative agent in 92 of the 190 cases. The Report stresses that since treatment of epitheliomatous ulceration in its early stages is so successful, medical examination as required by the Special Regulations for patent fuel manufacture is of the utmost importance and there should be follow-up of absentees.

Medical Examination of Young Persons

This was the first full year of the operation of Sections 1 and 2 of the Factories Act, 1948, which extended up to the age of 18 the medical examination of all young persons entering employment in factories, and also required annual examinations of such persons in their employment.

In 1949, appointed factory doctors made 284,166 examinations for certificates of fitness for young persons, more than double the number of the previous year.

Luminizers and X-ray Workers

The careful attention to possible health hazards to workers engaged in working with radioactive materials was continued in 1949. All luminizers (145) were examined by one doctor, both clinically and haematologically. Certain abnormalities in the blood picture are described in the Report, but in no case was any slight disturbance of health which occurred related to the effect of radiation. Follow-up examinations of 32 luminizers who had ceased luminizing for one year or longer showed no disturbance of health which could be associated with their former occupation.

The firms were visited where either X-rays or radium "bombs" or "seeds" were being used for industrial purposes. Radium "bombs" varying in amount from 25 to 250 mgms. or a radioactive isotope ("seed") are being used in some plants instead of X-rays to examine castings and other metal parts. Three men employed in testing X-ray apparatus and 30 operatives were examined. In no case was there any disturbance of health, nor were any X-ray burns reported.

Building (Safety, Health and Welfare) Regulations

The code for the building industry came into operation in October, 1948, so 1949 was the first full year in which the Regulations were in operation, and the main impression of the Factory Department was that steady progress has been made with progress more marked among the large contractors than among the small. Cases are still being met with in which the contractor appears to have no knowledge of the requirements. An improvement in the general standard of scaffolding in urban

areas was noted, but much remains to be accomplished in the rural areas. Shortage of material, particularly timber, for scaffolding still presents difficulty. Much that is available is of too low quality and low strength, the proper grades of timber not being imported in sufficient quantities. The sudden collapse of excavations is another source of serious accidents, and here again the shortage of timber suitable for supporting the sides is often blamed. Men working in a trench should be trained to remain within the protection of the timbering.

Asbestos Regulations

Inspectors' reports show that, although the Code of Regulations dealing with the handling of asbestos has been in force since 1931, constant vigilance is necessary to see that precautions are observed. As in other industries where there is a dust hazard, there is scope for research and experiment in the effective application of exhaust ventilation to a variety of processes and machines, and various experiments with exhaust ventilation, or a combination of exhaust ventilation and wet process, are described. One large asbestos factory has at the same time started a new scheme of medical examinations, including initial clinical examination and X-ray screening, followed by yearly examinations of workers employed in the area. Portable asbestos spraying plants are used to an increasing extent by contractors for insulation purposes. Because of the risks to health unless proper precautions are taken, the firm from which these portable plants are hired runs a school where employees of various insulation contractors are given a course of training in the proper handling of the machines, lasting about 14 days.

Raw asbestos fibre is sometimes delivered at a factory shipped from the country of origin in unlined jute bags, and the workers handling them are liable to considerable exposure to dust and fibre. Within the factory, the Regulations require that containers must be constructed of impermeable material and kept in good repair. In handling packages which are not impermeable, an approved type of respirator should be used.

Clay Works

There are hopeful signs, the Chief Inspector reports, that the Clay Works (Welfare) Special Regulations, 1948, have played their part in destroying the old complacent attitude that accepted primitive conditions in brickworks as inevitable. The best progress is reported in the provision of washing facilities, and there has been steady development in the provision of canteens. There is some difficulty in securing compliance with the requirements about protective clothing. Several Inspectors have reported that better provision of the amenities required by the Regulations has gone hand in hand with better methods of production.

Lighting and Colour

Blackout paints from roof lights and windows have been removed in most areas, and the supply of glass has improved so that roof and window lighting has been extended in some plants. Natural lighting has a good psychological effect on the workers.

> The most important factor in good natural lighting is that all glazed areas must be kept clean. Periodical cleaning is essential if the full benefits of daylight are to be obtained, the period depending on the atmospheric conditions outside the factory and the nature of the process carried on inside. With glass or any other transparent substance, even very little dust or dirt will reduce the light by half—a fact not always fully appreciated. Time spent on the maintenance and cleaning of windows is never wasted, and pays good dividends.

Continued improvement in artificial lighting is reported due to the use of the fluorescent tube, but in some small factories artificial lighting continues to be poor.

> Why is it that many of the small factories pride themselves on turning out some of the finest work and yet do not provide the best conditions for the purpose? It has been proved time and again that with a little ingenuity and common sense a lighting installation can be transformed from the mediocre to the very good at small cost, yet workshop after workshop continues to suffer from poor lighting.

The Chief Inspector stresses two points that are frequently overlooked: that safe means of access to lights must be provided, particularly for high lights, and that good maintenance of lamps and fittings is essential for efficient lighting.

The use of colour for factory decoration is increasing and the use of colour on machinery tends to grow more popular. Two examples of the use of colour to indicate hazards are mentioned. Canteens continue to be places for experimenting with colour. Gardens on plant grounds are more frequently seen.

Cleanliness

The standard of factory cleanliness has risen considerably partly because employers

are realizing that it affects health and efficiency and that to achieve it, careful planning and proper organization are essential. The improvements have been mainly along the following lines: reduction of the amount of dirt or dust generated; sound, smooth floors, kept as clear as possible so that regular cleaning can be done quickly and effectively; the use of modern detergents and mechanical cleaning apparatus, such as vacuum cleaners and mechanical floor scrubbers and polishers.

Washing accommodation is now being provided in new factories as a matter of course, and substantial progress is reported in older premises. However, the Chief Inspector remarks that "it is extraordinary that many managements should take so much persuading that oil and grease cannot be removed properly with cold water".

> A curious form of sex discrimination still obtains in some works where the facilities provided for women are often far better than those for men, although the men may be involved in the dirtier processes. One firm went so far as to remove the hot water supply when it ceased to employ women, and the Inspector had some difficulty in persuading them that it was still necessary.

Seats

A new section of the Factories Act which extends the seating requirements to cover all employed persons came into force on October 1, 1950. It provides that seating facilities of a design, construction and dimension suitable for each worker must be provided where there are reasonable opportunities for sitting without detriment to their work. During 1949 an effort was made by the Inspectors to make these requirements as widely known as possible and to encourage research and planning for the proper provision of seats. Many factories have completed surveys of their seating arrangements and are already complying with the Act. Several trade associations are helping their members by giving advice and discussing seating problems peculiar to their trade. There is a wide variety of industrial seats on the market and some factories are designing seats to meet their individual needs. Machinery designers are being encouraged to arrange work, wherever possible, so that it can be done either sitting or standing, as a change of working posture reduces fatigue. Tradition and prejudice are still to be overcome. The Chief Inspector speaks of "a firmly rooted prejudice in the minds of some employers and workers that sitting at work is a sign of slacking and that standing has some moral value."

Hours of Employment

In the greater part of industry 44 hours and 5 days remained the standard working week. This by no means represents the actual hours worked in many factories as overtime in the payment sense up to 48 hours is often worked and overtime in the Factories Act sense of employment over 48 hours has been worked in many factories. Workers are more ready to work overtime than at any time in recent years. Inspectors found some instances of overtime employment that could not be fitted into "the rather rigid framework of the 1937 Act", particularly with respect to women.

> Where women were found illegally employed it was nearly always with their full agreement. Indeed the impatience of many women workers with restraints on their employment has been manifested more strongly than ever. With the security of full employment they feel impatient with protective legislation which sometimes prevents them from rendering in their opinion the most advantageous use of their own skill and the arrangement of hours most convenient to their own domestic affairs. They do not complain of the prevention of excessively long hours but are annoyed at the lack of flexibility.

Where there was a confirmed shortage of workers and genuine production needs, and where the hours were not in themselves excessive, emergency powers were used to permit schemes "which allowed hours more in conformity with the workers' wishes than could have been arranged within the legal framework". Special authorizations for 780 day work schemes and 406 shift work schemes were in effect in November, 1949. More than half of these were for part-time evening employment of women, usually housewives. These shifts are usually fixed some time between 5.30 and 10 p.m. with a weekly total of 20 hours. Employers find these shifts valuable in reducing arrears in departments where work falls behind the rest of the factory, and also in removing the necessity for overtime employment of full-time workers. Judging by the response some firms have had to advertisements, this kind of employment is popular with housewives.

Canteens

In spite of difficulties due to higher costs, very few canteen services were discontinued during the year and many new canteens were opened. More workers than ever had access to canteen facilities and more made use of them. At the end of the year 4,979 factories employing over 250 and 10,849 firms employing less than

250 had hot meal canteens compared with 4,835 and 9,882 at the end of 1948. There was also an increase in the number of firms offering food services of the snack variety. Plans for new factories almost invariably include a canteen. Improved cooking and service, and more variety in the menus made possible by the easing of the supply situation, were noted during the year. Increased prices in many cases were accepted as inevitable by the workers although in several instances, where there was a lack of joint consultation and the reason for the price increase was not explained, the workers boycotted the canteens for a time when the increase went into effect.

Better standards of kitchen hygiene were reported due mainly to improved premises and equipment. Fewer complaints were received than in 1948. In the building industry, the use of mobile canteen vans is increasing. In common with other branches of the catering industry, industrial canteens still need more trained personnel. Canteen Advisers have been instrumental in setting up part-time courses, but it is emphasized that a great deal of training must be planned for all branches of the catering industry if adequate trained staff is to be available.

Staff

In a comment on staff problems, the Chief Inspector reports that the year started with 40 vacancies and ended with 50. Only 8 suitable candidates were selected from the 1949 competition and only 5 of these came forward for appointment. The lack of staff prevents the Department from expanding "on that most important side of its work, viz., the advisory and preventive". Due to staff shortages the demand for information and lectures by the staff from all sides became increasingly onerous. Interest in British methods of factory inspection was evidenced by the considerable numbers of visitors from overseas countries. These visitors were interested not only in organization and methods of administration, but wanted to see factory Inspectors carrying out their normal duties in industry.

ACTIVITIES OF PROVINCIAL LABOUR ORGANIZATIONS

Provincial labour organizations in Newfoundland, Nova Scotia and Ontario, affiliated with the TLC and CCL, have recently presented briefs to provincial governments. In addition, the Saskatchewan Federation of Labour (CCL) submitted a brief to the Saskatchewan Minimum Wage Board. These briefs, and the proceedings of the convention of the British Columbia Federation of Labour (CCL) are summarized below.

Newfoundland Federation of Labour (TLC)

The Newfoundland Federation of Labour (TLC) recently presented its annual memorandum of legislative proposals to the Newfoundland Government. The brief thoroughly reviewed the operation of the Newfoundland Labour Relations Act. The Federation felt that the Act had filled a deficiency in Newfoundland labour legislation, but suggested that certain amendments be made to this Act, and the Trade Union Act.

The brief recommended that the fine of $250 per day for an illegal strike be reduced to $100, the sum provided under federal legislation. The Federation protested against combining the two Acts, stating that Newfoundland was the only province "where unions were compelled to comply with the provisions of a statute other than that governing labour relations before being granted certification and the right to bargain with their employers." The Federation requested that certification proceedings be carried out under the Labour Relations Act.

The Government was asked to delete from the Labour Relations Act a clause permitting the Labour Relations Board to

suspend collective bargaining while an application for certification or revocation is pending. The brief asked that another section of the Act, forbidding unions to solicit members during working hours, be rescinded. Amendments to certain sections of the Trade Union Act were also recommended.

The action of the Newfoundland Government in enacting a Workmen's Compensation Act was commended by the Federation. It recommended that the following provisions be incorporated into the Act:—

At least 75 per cent of wages should be paid as compensation;

Compensation to be paid from the date of injury or disability without waiting period;

All occupations should have uniform coverage;

Payments in respect of claims should be handled without any undue delay;

Compensation payments should be based on maximum earnings of $3,600 per year;

Assessments to be paid on the full payroll of all employers so that reserves may be built up to provide a full income for those dependents who will need the benefits most of all;

Provision for adequate time allowance or convalescent period for the satisfactory healing of the injury or disability;

Setting up of safety committees by employers in every department of their establishments, with labour representation thereon;

Pensions of $60 per month for widows in cases where an accident is fatal, and $17.50 per month for each child; and

Allowance of burial expenses up to and including $250.

The brief contained comments on the cost of living, and praised the report of the Newfoundland Royal Commission which had investigated living costs. The Federation suggested that lower profits would be of more value in lowering the cost of living than what it described as "fruitless research".

Among the other matters discussed in the brief were apprenticeship, labour representation on boards and commissions, sales tax, workers' education, national resources, and the Trans-Canada Highway.

Nova Scotia Provincial Executive of the TLC

The Nova Scotia Provincial Executive of the TLC, recently presented a memorandum of its legislative proposals to the Nova Scotia Government. The brief said that while the attainment of full employment was a major aim, the overall policy of organized labour "is towards the full development of the cultural and economic life of the whole community."

The Provincial Executive described the improved employment situation over the past year as an "artificial economic situation." This situation had been "brought about by the . . . war preparedness program and not by a stabilized economic approach by either industry or governments," the brief said. Warning against any drift into what was described as "the chronic unemployment, poverty and insecurity of the past", the TLC urged "bold steps" by governments to counteract these dangers.

As a basis for Government action to offset the situation it feared, the Nova Scotia Executive outlined a program which could be utilized when necessary. The brief said that the preparedness program was only a form of temporary relief for Nova Scotia's problem, and "periods of depression and unemployment follow these periods of artificial economic improvement."

"Immediate action" was requested on this program which called for: expansion of the primary steel industry and establishment of secondary steel industries; preparation of an "employment budget"; a public works program; town reconstruction; and construction of schools, hospitals, and sanitoria.

The Nova Scotia Government was commended for its school construction policy, but the brief urged that this policy be extended to areas "not now serviced by existing schools". The brief said that higher teacher salaries were needed "to attract those most qualified," and recommended Federal aid for educational purposes.

Among the other recommendations contained in this section of the brief were requests for:—

Immediate construction of a Halifax-Dartmouth bridge;

Action to begin the bridge or causeway over the Strait of Canso;

Extension of hydro services;

Measures to insure the most economic development of forest resources.

Labour Legislation

The memorandum maintained that only *"bona fide"* trade unions chartered by "a national or international body, or a local branch chartered by and in good standing with such organization," should be allowed certification. The Government was requested to amend the Provincial Labour

Relations Act to conform to this recommendation. Amendments were asked to several other sections of the Act.

Other Recommendations

Among the many other recommendations made in the brief were requests for: rent control; an hours of work act; a holidays with pay act; a bill of rights or fair employment practices act; a minimum wage act; a provincial fair wage policy; a revised old age pension act; a subsidized health insurance scheme; provincial action to have a Federal Compensation Act passed; and amendments to the Provincial Compensation Act. Several other matters, not directly connected with labour legislation but of interest to the Executive, were also dealt with in the brief.

Ontario Federation of Labour (TLC)

Based on the findings of the Annual Convention, the annual memorandum of the Executive Council of the Ontario Federation of Labour (TLC), was presented to the Government of Ontario recently. The memorandum contained the Federation's legislative requests for 1951.

The Federation commended the Government for "constructive action" taken during the year, which met with the organization's approval. Consideration was asked for several other proposals presented in the brief.

Labour Relations

Noting the improvements which had been made in the Labour Relations Act, 1948, the Federation asked for further improvements. These improvements were recommended by the annual convention (L.G., Feb., 1951, p. 184) and the Executive said they were designed "to remove the injustices of difficulties which are hindering and hampering the solution of problems in industrial relations."

The memorandum also asked the Government "to forbid the granting of injunctions in connection with legally-conducted strikes."

Health and Social Security

The Federation requested the Ontario Government "to increase their vigilance in the protection of the health of working people," especially in the cases of industrial diseases and work methods requiring heavy lifting. Stricter regulations governing the use of paint spraying machines; and closer supervision of eating establishments were also recommended as health measures.

Government action was requested to alleviate "the serious shortage of hospital accommodation," and "to relieve the shortage of nurses." Increased financial aid for Ontario hospitals, as a means of lowering hospital costs to patients was strongly urged. Other recommendations on health followed the resolutions passed at the annual convention (L.G., Feb., 1951, p. 185).

The Federation presented to the Government its requests for old age security which were based on those of the parent TLC. (L.G., May, 1951, p. 635).

Workmen's Compensation

The Ontario Government was commended for amendments made to the Workmen's Compensation Act in 1950. The Executive Council asked the Government to enact immediately the recommendations of the Roach Commission, as well as certain proposals of the TLC. (L.G., Feb., 1951, p. 185 and April, 1951, p. 450).

Other Recommendations

Recommendations were made on a wide variety of other subjects, including price and rent controls, housing, hours of work, minimum wages, highways, public safety, education, unemployment, racial and religious discrimination, and hydro.

Saskatchewan Federation of Labour (CCL)

The annual submission of the Saskatchewan Federation of Labour (CCL) to the Saskatchewan Minimum Wage Board, was made recently. The submission was made in two parts, on separate occasions. The first brief dealt exclusively with minimum wages as such, and the second with minimum wage orders issued by the board.

The Federation urged that a new minimum weekly wage of $31.50 be established as the "city rate", and $29 as the "country rate". The Federation claimed that the present rates of $21 and $18.50 had been established in 1949, and had not been revised since, despite substantial increases in living costs.* The Federation also recommended an hourly minimum wage of 85 cents.

* Subsequent to the presentation of this brief, minimum rates of $24. and $21.50 were announced by the Government, effective May 1, 1951.

In its second submission, the Federation maintained that further increases to $32.10 and $29.60 in the minimum wage were now required, because of further increases in the cost of living. The brief said, "this observation is of course, without prejudice to our contention that the minimum wage rate of 85 cents per hour should apply everywhere in Saskatchewan."

The remainder of the brief dealt with specific orders of the Board, and noted that employees in hospitals, hotels and restaurants should not have to work 48 hours per week, when employees in offices, shops and factories were working 44.

Other orders discussed dealt with: charges made by employers for employee meals and lodging; minimum wage regulations for all industries; increased minimum rates for employees delivering merchandise on foot or by bicycles; and hours and wages of employees of summer resorts.

British Columbia Federation of Labour (CCL)

Over 80 delegates representing international, national and local unions affiliated with the British Columbia Federation of Labour (CCL) attended the 7th annual convention held in Vancouver. During the three-day sessions the delegates discussed over 85 resolutions on matters of interest to the Federation, and heard speeches by government, civic, and labour leaders.

Price Control

Strongly supporting the labour campaign for reimposition of price controls, the delegates pledged "full support to the campaign", and said that the Federation would "work throughout its affiliates to make this campaign a success." Several of the delegates registered strong opposition to any freezing of wages in connection with price control.

Housing and Rent Controls

The delegates opposed the action of the Federal Government in relinquishing rent controls, and urged in a resolution "that the Provincial Government be requested to take over the administration of rent control if relinquished by the Federal Government."

On the subject of housing generally, the Federation felt that it was "very much a major problem" in the country, and that it was "in danger of being side-tracked because of the stepped-up preparation for national defence." The resolution urged that every possible effort be made by the Federal and provincial governments to alleviate the shortage. A further resolution asked the British Columbia Government "to make provisions at the coming session of the Legislature for a proper low-rental housing plan to be enacted."

Old Age Pensions

The delegates passed a group of resolutions on old age pensions which asked for pensions of $75 a month, payable at 60 without a means test. The resolutions also expressed opposition to a proposed 2 per cent tax for pensions, and asked that "a workman . . . be allowed to draw his unemployment insurance benefits without being asked to go to work," after reaching pension age.

Unemployment Insurance

Several amendments to the Unemployment Insurance Act were suggested. The Convention recommended: that the waiting period be reduced; increased benefits; elimination of the non-compensable day; amendment to the Act so as to provide that "workers will not be disqualified from receiving benefits for refusing to cross a picket line."

Other Resolutions

Among the many other matters dealt with during the Convention were: fair employment practices legislation; labour unity; hospital insurance; taxation; holidays; injunctions; workmen's compensation; hours of work; forests; industrial relations; education; and safety.

Election of Officers

Officers elected included D. Radford, president; J. S. Alsbury, first vice-president; H. Allison, second vice-president; J. Morris, third vice-president; and G. Home, secretary-treasurer.

LAVAL UNIVERSITY STUDIES SECURITY IN THE WORKER'S FAMILY

The sixth annual convention sponsored by the Laval University Department of Industrial Relations was held recently. A summary of the proceedings is given in the following article.

Stressing as its theme, "Security in the Worker's Family", and how to ensure it by full employment, retirement pensions, sickness insurance, access to the ownership of property and the elimination of industrial accidents and illnesses, the sixth annual convention of the Department of Industrial Relations of Laval University's Faculty of Social Science was held in Quebec, April 23 and 24.

The convention closed with the hope that family forces organize themselves for the common good, with the encouragement of the State, and that a vast "union of families" be set up in order to create a stronger bond and a better understanding between the various sections of society and to instill a consciousness of the reality of the family in the life of the nation.

Nearly 500 delegates representing labour, industry, universities, Government and representatives of co-operative organizations and social movements from all parts of the Province of Quebec attended the conference. Among those attending were Mr. V. C. Phelan, Canadian Director of the International Labour Office, Mr. Ernest C. Desormeaux, Secretary General of the Unemployment Insurance Commission, and officials of the Federal Department of Labour.

The Vice-Rector of Laval University, Mgr. Alphonse Marie Parent, welcomed the delegates, while the Very Rev. Father Georges Henri Lévesque, O.P., Dean of the Faculty of Social Science, also extended his felicitations and complimented them on their social progress.

Mgr. Parent told the convention "The things which permit the worker's family to be the fruitful cell in the social structure," are a permanent job and a permanent wage, ensuring the existence of the family, a family dwelling worthy of human beings, social security measures and the moral atmosphere which is fostered when the aforesaid conditions are realized."

The opening session was presided over by Mr. Gérard Tremblay, Deputy Minister of Labour for the Province of Quebec and Director of the Department of Industrial Relations at Laval, who introduced the theme of the convention.

Mr. Tremblay emphasized the fact that this security, which is endangered by social risks such as unemployment, illness, accidents, disability, old age and death, is not foreign to healthy labour relations; rather, it complements and strengthens them and gives them a purpose.

Mr. Maurice Tremblay, Assistant Director of the Department of Sociology and professor in the Faculty of Social Science at Laval, set forth the fundamental ideas and principles of economic and social security in the worker's family.

The speaker said that the underlying principle which must preside over the setting up of an adequate system of family security is: "as much private responsibility as possible, together with as much governmental responsibility as is necessary, keeping in mind the exigencies of the common good".

Mr. René Tremblay, professor in the Economics Department of Laval's Faculty of Social Science, dealt with full employment as a basic factor in the security of the worker's family. He described the main causes of involuntary unemployment and suggested remedies. He said, "only remedies on a national scale can rid modern societies of this terrible evil which is threatening the very existence of our political democracies."

Mr. Jean Lesage, Parliamentary Assistant to the Minister of External Affairs and Chairman of the Federal Parliamentary Committee on Old Age Security, laid before the delegates the problem of old age pensions in Canada. He described the Federal plan for a universal pay-as-you-go system complemented by an assistance scheme. He called this plan "the most progressive in the world, the least costly to the country and the most advantageous to the individual and to the national economy."

During the discussion, Mr. Gérard Picard, President of the CCCL, contended that "the greater part of the collections made for this universal pension plan would come from industrial circles, and that the pension would then be paid alike to agricultural and to industrial classes, to the detriment of the latter".

In reply, Mr. Lesage stated that, as a legislator, he could not recommend a system making these distinctions. Such a plan, on a realistic basis, could not be adjusted to our administrative and economic system.

Mr. René Paré, President of the French-Canadian Artisans' Society and of the Superior Co-operation Council, discussed the risk of illness from the social point of view, and stressed the fact that the problem of insecurity, which affects the output of factory workers should be of interest to the worker, to the employer, to society and to the State.

Dr. Jean Grégoire, Deputy Minister of Health for the Province of Quebec and professor of health legislation at Laval University, spoke on security in the worker's family through the social prevention of illness.

Dr. Grégoire summarized the work of the Health Department in the Province of Quebec in the field of hygiene and preventive medicine, and gave a detailed analysis of demographic statistics. He set forth the results obtained by this program which have resulted in a considerable reduction in infectious diseases.

The Deputy Minister of Health for Quebec expressed the wish "that health, which is a social factor as much as it is an economic one, may always be in the forefront of our thoughts and of our desire for progress".

Mr. Clement Brown, statistician in the Province of Quebec's Department of Labour, dealt with industrial accidents and illnesses as they affect the security of the working-class family.

Stressing the right of the competent and honest worker to be able to keep the job to which he is attached, and which provides a living for himself and his family, for as long as it suits him, the speaker said that the State, the worker, the employer and society have every interest in preventing industrial accidents and illnesses, in offering adequate, equitable and fair compensation to the victims of such accidents and illnesses, and in promoting their rehabilitation and readaptation.

While of the opinion that the problem of industrial accidents and illnesses will always be a factor, Mr. Brown declared that its solution, which will never be more than an approximate solution, should not be left to chance and to empiricism. "It must be sought after in the light of technique, statistics, justice, prudence and charity", he said.

The last speaker at the convention was Mr. Rodolphe Laplante, General Secretary of the Agricultural Credit Bureau, of the Rural Electrification and Family Dwelling Bureau of the Province of Quebec, who spoke on "family security through ownership".

According to Mr. Laplante, the worker is more anxious about regularity in his work than he is about a fair wage, although the two are not mutually exclusive. He added that "the security of the working-class family finds a corrective and a support in the property held by the family".

The speaker pointed out that family security is obtained in the first place through the permanent possession of property, this permanency of possession being possible only when the fixed charges encumbering the property are not too heavy.

The Congress ended in a banquet at which all the delegates and their guests were present. Mr. Gérard Tremblay, Deputy Minister of Labour, presided, and the guest speaker was Rev. Fr. Gonzalve Poulin, o.f.m., head of the Social Service School and director of studies of the Faculty of Social Science at Laval University.

The speaker dealt with the stability of the worker's family and suggested the creation of a powerful "family union" to enable the family to obtain recognition for its political and social rights and to become a force in the nation.

Rev. Fr. Poulin analyzed the two factors causing lack of balance in the family: "Extemporaneous urbanization accounted for by the impromptu transplanting of the family to the city, by that rural emigration which has destroyed the intimate bonds of a primary and parental type which were characteristic of the Canadian family of yesterday; the change in the social function of private property which finds expression in the generalized-wage-earning class."

The speaker then outlined three factors which might alleviate the insecurity of the family viz: humanization of the work environment, the promotion of social security measures and organization of the family on the social-political plan.

Rev. Fr. Poulin stated that "the initiative for organizing family forces comes back, naturally, to the family itself, but that the State, in the common interest,

should foster the birth and development of this organization by assuring it of an advisory position and of representation on its boards and public organizations".

He enumerated several results which might be expected if this idea were put into concrete form:—

"A stronger social bond between the different groups in the nation, and a quickening of the consciousness of the reality of the family;

"A better education of citizens by a more normal co-ordination of joint social responsibilities and the spread of family institutions for mutual aid such as mutual co-operative societies, family services, etc.;

"An enlightened control of public morals and social customs;

"Active participation in the collective good in an atmosphere of trust which is essential to its development and promotion;

"A decentralizing and deconcentrating movement which would spread to all spheres of industrial and social life;

"The revival of the organic function enjoyed by yesterday's family in rural civilization, but in a form adapted to industrial civilization."

Very Rev. Fr. Georges Henri Lesvesque, Dean of the Faculty of Social Science, thanked the speaker and said that security, "the assurance of continuing happiness, as opposed to insecurity, which manifests itself in fear, is essential to families if we want them to continue to play their part as providers of life, riches and progress".

(Concluded from page 765)

index stood at 188·4 an increase of 1·1 per cent over March 1, and 9·5 per cent above April 1 last year . . . . Estimated total salaries, wages and supplementary labour income in February amounted to $741,000,000, unchanged from the preceding month but up 15 per cent above the corresponding month last year. . . . Canadian production of iron and steel was sharply higher in April and the first four months of the year than in the corresponding periods of 1950. Pig iron production in the month amounted to 211,112 net tons as compared with 188,143 in April last year. . . . The cost of living index increased slightly from 181·8 to 182·0 between April 2 and May 1. This advance of 0·1 per cent was principally due to increases in clothing, home furnishings and miscellaneous items, which were largely offset by a decline in the food index.

THE NORMAL WORK WEEK IN CANADIAN MANUFACTURING INDUSTRIES, OCTOBER 1950

Plant Workers

The normal weekly hours of work for plant employees in Manufacturing continued to decrease in 1950. By October the normal work week averaged 44¼ hours, one-third of an hour less than at the same time in 1949. More than 70 per cent of the employees were normally working 45 hours a week or less, with about 30 per cent working 40 hours. Almost 65 per cent of the plant workers were on a five-day week in 1950.

Office Workers

The normal work week for office employees in the Manufacturing industries averaged 38¾ hours in 1950, a decrease of one-quarter of an hour from 1949. Sixty-two per cent of the employees were normally working less than 40 hours a week, with the largest proportion working 37½ hours. Almost 70 per cent of the office employees were reported on a five-day week.

The accompanying article contains industrial, provincial and city comparisons of the normal work week for plant and office employees, indicating the changes that have occurred during the preceding year. Information on the normal work week in Newfoundland has been included for the first time and, where practical, is shown separately.

85256—3½

The normal work week in the Canadian manufacturing industries continued to decrease for both plant and office employees in 1950. The normal week of plant workers averaged 44¼ hours at October 1, 1950, a reduction of one-third of an hour from the same period in 1949; and the work week of office employees averaged about 38¾ hours, a decrease of one-quarter of an hour during the preceding year. The most common work week for plant employees was 40 hours and that for office employees was 37½ hours, with more than one-quarter of each group working these hours. The "normal work week" is the usual number of hours worked by most of the employees, exclusive of any overtime or short time.

The average work week of plant employees was, comparing regions, least in British Columbia, 41¾ hours, and comparing five representative cities, least in Vancouver, averaging 41 hours. Correspondingly, the average work week of office employees was least in Ontario, about 38·4 hours, and in Halifax, 37·9 hours. Among the 17 major manufacturing industries, the Printing, Publishing and Allied Industries had the lowest average work week, 40¾ hours.

The proportion of workers on a five-day week continued to increase in 1950. Almost 65 per cent of the plant employees and 70 per cent of the office employees were reported working five days a week at the time of the 1950 survey. The greatest proportion of plant and office employees on a five-day week, 78 and 83 per cent respectively, were in the province of Ontario. Of the five major cities studied, the largest proportion of employees, both plant and office, were in Toronto. Comparing the plant employees in the major industrial groups, more than 95 per cent of the workers in the Tobacco and Tobacco Products and the Electrical Apparatus and Supplies Industries were reported on a five-day week.

Information in this article was prepared from data obtained in the annual survey of wage rates and working conditions for 1950 conducted by the Economics and Research Branch of the Department of Labour. Employers were asked to report on wage rates (straight-time earnings for piece-workers) and certain conditions of work in their establishments during the last pay period preceding October 1, 1950.

The data for this article were obtained from about 6,300 manufacturing establishments employing more than 724,000 plant and 135,000 office workers during the pay period preceding October 1, 1950. More than one-half of the employees, both plant and office, were working in Ontario, and about 30 per cent in Quebec. Fewer than 10 per cent of the employees were in the Maritime Provinces, the Prairie Provinces or British Columbia. Information on the normal work week in Newfoundland was obtained for the first time in 1950 and where not shown separately has been included with Prince Edward Island, Nova Scotia and New Brunswick in the Maritime Provinces.

Twenty-one per cent of the plant workers and 35 per cent of the office workers in these manufacturing establishments were women.

The distributions of employees has been based on the weekly hours of the majority of workers of each sex. Thus, in those plants (or offices) where the male and female employees normally worked different weekly hours, all of the male plant (or office) workers were included under the hours worked by the largest number of males, and all of the female plant (or office) workers were included under the hours worked by the largest number of females.

Normal Work Week of Plant Employees

The normal work week for plant employees in the Canadian manufacturing industries averaged 44¼ hours at October 1, 1950, a decrease of one-third of an hour during the preceding year.[1] The workers in the Durable Goods Division of Manufacturing averaged just under 44 hours a week and those in the Non-durable Goods Division averaged slightly over 44½ hours.

The most common work week in the manufacturing establishments was one of 40 hours, with 29 per cent of the plant workers on this schedule. About 14 per cent of the employees were normally working 44 hours a week, 19 per cent normally working 45 hours and 20 per cent 48 hours. More than 70 per cent of the employees were on a normal work week of 45 hours or less, and just over 6 per cent were on a

[1] For comparable information on the normal work week in 1949 see, "Working Conditions in Canadian Manufacturing Industries, October 1949", Labour Gazette, November 1950, p. 1837.

work week longer than 48 hours. The proportionate distribution of plant workers by their normal weekly hours in 1950, compared with 1949, is as follows:—

Normal Weekly Hours	Per Cent of Workers 1949	1950
Under 40	.5	.4
40	24.6	29.0
Over 40 and under 44	6.5	9.5
44	16.7	13.5
Over 44 and under 45	.2	.1
45	20.7	18.7
Over 45 and under 48	3.8	3.1
48	20.1	19.5
Over 48	6.9	6.2
Total	100.0	100.0

The five-day week was reported by 57 per cent of the establishments employing 65 per cent of the plant workers in Manufacturing. This proportion of workers on a five-day week represents a 6½ per cent increase over 1949, an 18 per cent increase over 1948, and a 26 per cent increase over 1947.

Provincial Legislation.[2]—There was no major change in the provincial legislation governing hours of work in factories during 1950. Special provincial statutes limit the hours in factories in Ontario, Manitoba, Saskatchewan, Alberta and British Columbia, and factories legislation in New Brunswick and Quebec places some restrictions on the working hours of women and of boys under 18. The maximum weekly hours of work in these provinces are:—

	Hours
New Brunswick (females and boys under 18)	54
Quebec (females and boys under 18)	55
Ontario	48
Manitoba (men)	48
(women)	44
Saskatchewan	44
Alberta	48
British Columbia	44

An industrial undertaking or group of undertakings may be exempted from the Act in Quebec, Manitoba, Saskatchewan, Alberta and British Columbia; and in all the provinces the administrative authority has the power to permit exceptions from the maximum hours shown above. In the case of exemptions in Ontario, women and boys under 16 are not permitted to work more than 60 hours a week.

In Manitoba and Saskatchewan the statutory limits shown above apply unless time and one-half is paid for overtime. Women in Manitoba may not be required to work more than 6 hours a week of overtime in the cities nor more than 8 hours a week in the rural areas. In Saskatchewan, women in factories must receive time and one-half after 44 hours in a week, but in no case may they work more than 48 hours.

Other restrictions may be imposed on some classes of factories by Orders in Council under the Quebec Collective Agreement Act or the Industrial Standards Acts of Ontario, Saskatchewan and Alberta.

DISTRIBUTION OF PLANT EMPLOYEES IN MANUFACTURING BY NORMAL WEEKLY HOURS, 1947 TO 1950

Normal Weekly Hours by Industry.—The average work week of plant employees in the 17 major industrial groups shown in Table Ia[3] ranged from 40¾ hours in the Printing, Publishing and Allied Industries to just under 47 hours in the Paper Products Industry. The normal work week of most of the major manufacturing industries averaged between 42½ and 45½ hours.

The normal weekly hours of work vary greatly within each industry as well as between them. In only 4 of the industry groups were more than half of the plant employees in the industry on the same work week: 56 per cent of the workers in the Rubber Products Industry were on a 40-hour week, 72 per cent in the Paper Products Industry were on a 48-hour week, the same proportion in the Printing, Publishing and Allied Industries on a 40-

[2] This information was summarized from the bulletin, *Provincial Labour Standards Concerning Child Labour, Holidays, Hours of Work, Minimum Wages, Weekly Rest-Day and Workmen's Compensation*, an annual publication of the Department of Labour.

[3] The industrial groupings of the manufacturing industries used in this article follow those contained in the *Standard Industrial Classification Manual*, published by the Dominion Bureau of Statistics in 1948.

hour week, and 74 per cent of the workers in the Products of Petroleum and Coal Industry were also on a 40-hour week.

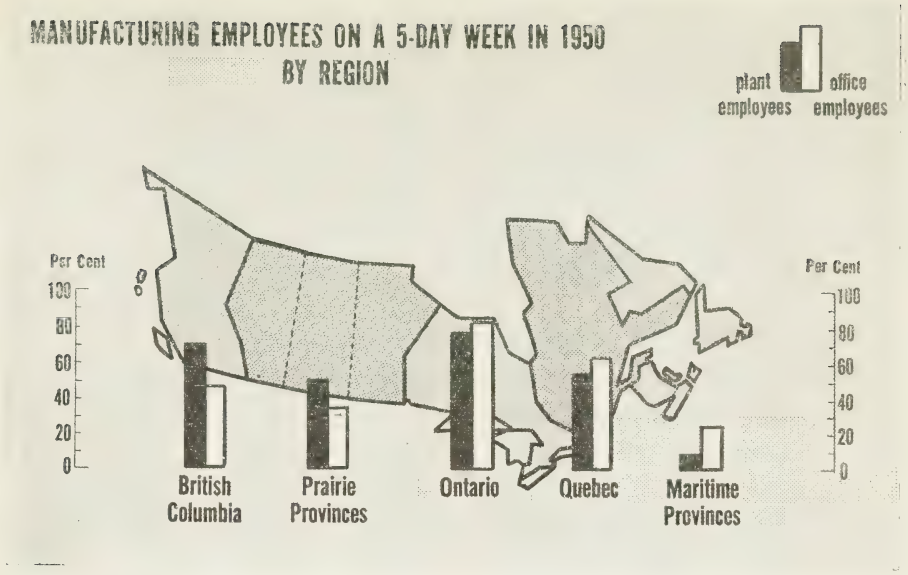
In the Durable Manufactured Goods Division the largest group of employees, 33 per cent, were normally working 40 hours a week, and the next largest group, 21 per cent, were working 45 hours. About 14 per cent of the plant workers manufacturing durable goods were on a 44-hour week and 13 per cent were on a 48-hour week. In the Non-durable Manufactured Goods Division almost equal proportions of the plant employees, 25 per cent, were normally working 40 and 48 hours a week, 17 per cent were working 45 hours and 13 per cent 44 hours.

The variation in the distribution of normal weekly hours of work within and between the major manufacturing industries may be seen in the following table, which gives the proportion of plant employees in each industry normally working less than 44 hours a week, from 44 to 45 hours a week, and more than 45 hours a week:—

Industry	Per cent of plant employees working: Less than 44 hours	44 to 45 hours	More than 45 hours
Durable Manufactured Goods	**43**	**35**	**22**
Wood Products	34	30	36
Iron and Steel Products	47	39	14
Transportation Equipment	37	45	18
Non-ferrous Metal Products	30	30	40
Electrical Apparatus and Supplies	77	20	3
Non-metallic Mineral Products	18	23	59
Non-durable Manufactured Goods	**36**	**30**	**34**
Food and Beverages	31	29	40
Tobacco and Tobacco Products	82	14	4
Rubber Products	56	34	10
Leather Products	19	50	31
Textile Products (Except Clothing)	15	48	37
Clothing (Textile and Fur)	51	32	17
Paper Products	9	16	75
Printing, Publishing and Allied Industries	82	16	2
Products of Petroleum and Coal	84	7	9
Chemical Products	49	32	19
Miscellaneous Manufacturing Industries	43	37	20

The industrial distribution of manufacturing establishments by normal weekly hours of male plant workers (Table Ib) indicates about as much variation as the distribution of employees. The work week of the male plant employees has been used to obtain the distribution of establishments by industry, by province and by city, as in some cases the normal weekly hours are different for male and female workers. In about 550 establishments this was the situation, with the female employees working fewer hours in almost all these plants.

Normal Weekly Hours by Province.— The normal weekly hours of work for plant employees in Manufacturing averaged from 41¾ hours in British Columbia to 49·4 hours in Newfoundland (Table IIa). The average work week was about 47¼ hours in the Maritime Provinces, which includes Newfoundland, 45¾ hours in Quebec, and 43½ hours in both Ontario and the Prairie Provinces.



The normal work week varied to a marked degree in the Maritime Provinces. The work week averaged 49·4 hours in Newfoundland, as mentioned above, 46·4 hours in Prince Edward Island, 46 hours in Nova Scotia and 47·8 hours in New Brunswick. More than one-half of the workers in Newfoundland and Nova Scotia were reported working 48 and 44 hours a week respectively, whereas in New Brunswick 30 per cent were working 48 hours and 25 per cent were working 44 hours.

The largest group of plant employees in Quebec, 30 per cent, were on a 48-hour week, and a further 20 per cent were on a 45-hour week. Sixteen per cent of the workers were reported on a 40-hour week in that province and 11 per cent on a 44-hour week. In Ontario, 35 per cent of the plant employees were on a 40-hour week in 1950, 10 per cent were on a 44-hour week, 23 per cent on a 45-hour week and 15 per cent on a 48-hour week.

The average work week was about the same in the three Prairie Provinces, 43·4 hours in Manitoba, 43·7 hours in Saskatchewan and 43·5 hours in Alberta. The largest groups of workers in Manitoba and Alberta, more than 30 per cent in each province, were working 40 hours a week, whereas the largest group in Saskatchewan, 46 per cent, was working 44 hours.

The predominant work week in British Columbia was one of 40 hours, with almost 60 per cent of the plant employees on that schedule. A further 27 per cent of the workers were on a 44-hour week.

A comparison of the proportion of plant employees normally working less than 44

hours, from 44 to 45 hours and more than 45 hours a week in 1950 will give some indication of the variation in the work week between regions:—

Region	Per cent of plant employees working: Less than 44 hours	44 to 45 hours	More than 45 hours
Canada	**39**	**32**	**29**
Maritime Provinces	7	39	54
Quebec	23	31	46
Ontario	47	33	20
Prairie Provinces	46	31	23
British Columbia	69	27	4

The distribution of manufacturing establishments by province (Table IIb), arranged according to the normal weekly hours of male plant workers, shows the same wide variation within and between industries as does the distribution of employees.

Normal Weekly Hours by City.—The normal work week for plant workers in Vancouver was less than in any of the other four major Canadian cities shown in Table III, averaging 41 hours. The work week averaged 44·2 hours in Halifax, almost 44 hours in Montreal, 42·5 hours in Toronto and 43 hours in Winnipeg.

The 44-hour week was predominant in Halifax, with 64 per cent of the plant employees normally working that schedule. In Montreal and Toronto the largest groups of employees, 30 and 42 per cent respectively, were reported working 40 hours a week; and the next largest groups, 24 and 18 per cent respectively, working 45 hours. One-third of the workers in Winnipeg were normally on a 40-hour week and 27 per cent were on a 44-hour week. In Vancouver, three-quarters of the workers were also on a 40-hour week while the majority of the remainder were normally working 44 hours.

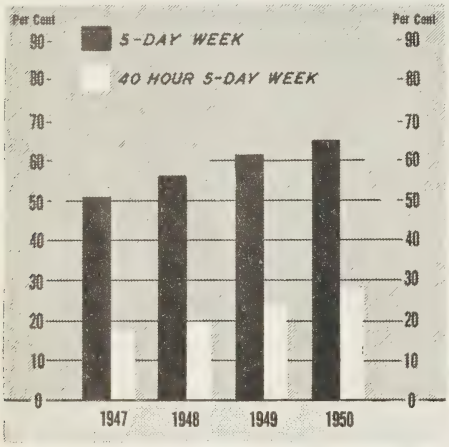
Some indication of the difference in the distribution of normal weekly hours in the five cities may be obtained by comparing the proportion of employees in each city working less than 44 hours a week. Eighteen per cent of the employees in Halifax, 40 per cent of those in Montreal, 65 per cent in Toronto, 50 per cent in Winnipeg and more than 80 per cent in Vancouver were on a normal work week of less than 44 hours in 1950.

The major change in the normal work week during the year previous to October, 1950[4] was the noticeable reduction in hours in both Halifax and Winnipeg. Whereas only 3½ per cent of the plant employees in Halifax were working 40 hours a week in 1949, almost 14 per cent were on

[4] Comparable information on the normal work week in 1949 is contained in the article, "Hours and Working Conditions in the Manufacturing Industries of Halifax, Montreal, Toronto, Winnipeg and Vancouver, October 1949", THE LABOUR GAZETTE, July 1950, p. 1014.

this work week in 1950. One-half of the employees in Winnipeg were normally working 42½ hours or less in 1950, as compared with just over one-quarter in 1949.

The Five-Day Week.—Fifty-seven per cent of the establishments employing 65 per cent of the plant workers in the Canadian manufacturing industries were operating on a five-day week in 1950. Of these employees on a five-day week, 44 per cent were normally working 40 hours a week and 25 per cent were working 45 hours.



In all but four of the 17 industrial groups shown in Table IIa more than half of the plant employees were on a five-day week, and in three of the industries more than 90 per cent of the employees were normally working five days a week. These latter three industries were Tobacco and Tobacco Products, 96 per cent, Rubber Products, 92 per cent, and Electrical Apparatus and Supplies, 97 per cent. As was the case in 1949, the Paper Products Industry had the smallest proportion of workers on the five-day week, just over 20 per cent.

In the Durable Manufactured Goods Division about 73 per cent of the employees were on a five-day week, compared with 58 per cent in the Non-durable Goods Division of Manufacturing.

Comparing regions, the largest proportion of workers on a five-day week, 78 per cent, was reported in Ontario, and the next largest proportion, 70 per cent, in British Columbia. Fifty-four per cent of the plant employees in Quebec, 52 per cent in the Prairie Provinces and 9 per cent in the Maritime Provinces were normally working five days a week in 1950. The greatest proportionate increase in employees on a five-day week during the year occurred in the Prairie Provinces, mainly in Alberta.

The proportion of plant workers on a five-day week varied from 19 per cent in Halifax to 85 per cent in Toronto. Seventy-five per cent of the employees in Montreal, 54 per cent in Winnipeg and 80 per cent in Vancouver were also working five days a week in 1950. Except in Halifax and Vancouver, which had slight drops in the proportion of workers on a five-day week, these percentages show little change from 1949.

PLANT EMPLOYEES IN MANUFACTURING ON A 5-DAY WEEK AND ON A 40-HOUR 5-DAY WEEK, 1947 TO 1950

Normal Work Week of Office Employees

The normal work week of office employees in the manufacturing industries of Canada averaged 38¾ hours at October, 1950, one-quarter of an hour less than the average work week a year earlier.[5] About 47 per cent of the office employees were working 37½ hours a week or less and more than 83 per cent were working 40 hours or less.

The largest group of office workers, 27 per cent, were on a 37½-hour week in 1950, and the next largest group, 22 per cent, were on a 40-hour week. Between 1949 and 1950 there was a slight downward shift in the distribution of office employees in Manufacturing based on their normal weekly hours of work. This is seen in the following table:—

Normal Weekly Hours	Per Cent of Workers 1949	1950
Under 35	1.2	1.1
35	7.4	8.4
Over 35 and under 37½	8.2	10.8
37½	29.0	26.5

In general, the normal weekly hours of office employees were less than the weekly hours of plant workers in the same establishment. The number of days worked per week, however, was more often the same for both office and plant employees. Almost 70 per cent of the office workers, compared with 65 per cent of the plant workers, were on a five-day week in 1950.

[5] See "Salaries and Hours of Office Employees in Canadian Manufacturing Industries, October, 1949", The Labour Gazette, January 1951, p. 25.

Provincial Legislation.—Legislation limiting hours of work in offices applies to the same provinces as that for factories, and provides for the same maximum hours of work. This information has been given in some detail in the section of this article relating to the normal work week of plant employees in Manufacturing (p. 799).

In Ontario, the maximum hours permitted for women and boys under 16 when exempted from the Hours of Work Act is 60 hours, but this restriction does not apply to offices. The limit of four hours overtime a week at time and one-half for women in factories in Saskatchewan applies only in centres from 300 to 500 population for women in offices. In British Columbia the legislation applies only to offices connected with works and undertakings covered by the Hours of Work Act.

Normal Weekly Hours by Province.—The normal work week of office employees averaged 38·4 hours in Ontario and 38·9 hours in Quebec (Table IVa). The corresponding weekly averages were 39·8 hours in British Columbia, 39·8 hours in the Maritime Provinces and 40·5 hours in the Prairie Provinces. In all of these regions the average work week was slightly less than in 1949.

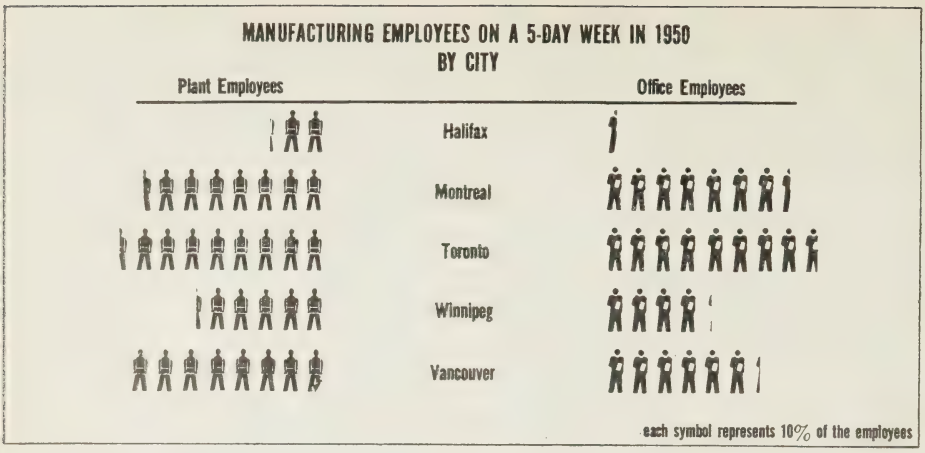
There was a wide variation in normal weekly hours in each of the four Maritime Provinces. About half of the office employees in Newfoundland and Nova Scotia were normally working 37½ hours a week or less, but only 14 per cent in New Brunswick and 3 per cent in Prince Edward Island were in this group. On the other hand, two-thirds of the employees in Prince Edward Island and one-half of those in New Brunswick were working more than 40 hours a week, compared with one-quarter in the other two Maritime Provinces.

In both Quebec and Ontario about 29 per cent of the office employees in Manufacturing were normally working 37½ hours a week, and about one-half were working 37½ hours a week or less. Twenty-six per cent of the workers in Ontario were on a 40-hour week, as were 14 per cent in Quebec. About 19 per cent of the office employees in Quebec and 9 per cent in Ontario were on a normal work week longer than 40 hours.

The largest group of office employees in the Prairie Provinces were normally working 40 hours a week in 1950. Twelve per cent of the workers were on a normal work week of 37½ hours or less and 40 per cent on a work week longer than 40 hours. This latter proportion represents a slight decrease from 1949, when 46 per cent of the office employees were working more than 40 hours a week. One-half of the workers in Manitoba and Alberta and 40 per cent in Saskatchewan were normally working from 38 to 40 hours a week.

In British Columbia, 24 per cent of the office employees were working 37½ hours a week and 22 per cent were working 40 hours. The proportion of employees working 37½ hours or less increased in 1950 from 24 per cent to 32 per cent, whereas the proportion working more than 40 hours a week decreased slightly from 37 per cent to 35 per cent.

The distribution of office establishments according to the normal weekly hours of male office employees (Table IVb) shows an equally wide variation in the work week as does the distribution of employees. The largest group of offices, however, reported operating on a 40-hour week although these did not contain the largest group of office employees. The average size of the office staffs in the various groups of hours indicates that the larger office establishments were operating on a 37½-hour week in 1950.



Normal Weekly Hours by City.—The average normal work week of office employees in the five major Canadian cities ranged from 37·9 hours in Halifax to 40 hours in Winnipeg (Table V). The normal work week averaged 38·1 hours in Montreal and Toronto and 39·4 in Vancouver. The largest change occurred in Halifax, where the average work week decreased one-half an hour from 1949.

In Halifax, 56 per cent of the office workers were on a 36½-hour week in 1950, and a further 16 per cent were on a 44-hour week. Two-thirds of the employees were normally working 37½ hours a week or less, and 21 per cent were working more than 40 hours.

The predominant work week in Montreal and Toronto was 37½ hours, with 37 and 40 per cent of the employees respectively on this work week. Just over 60 per cent of the office employees in both of these cities were normally working 37½ hours a week or less, and more than 85 per cent were working from 35 to 40 hours a week.

The average normal work week in Winnipeg was slightly longer than in the other cities, and the variation in the work week somewhat greater. Just 16 per cent of the office employees in this city were working 37½ hours a week or less, whereas 37 per cent were working more than 40 hours.

In Vancouver, about 36 per cent of the office employees were normally working 37½ hours a week and one-quarter were working 40 hours. Twenty-one per cent of the employees were working more than 40 hours a week, most of whom were working 44 hours.

The Five-Day Week.—Approximately 70 per cent of the office employees in Canadian manufacturing industries were reported on a five-day week in 1950. This is an increase of 4½ per cent over the proportion in 1949. Most of the employees on a five-day week were normally working 37½ or 40 hours a week.

The largest proportion of office employees on a five-day week, 83 per cent, was in Ontario, and the next largest proportion, 64 per cent, in Quebec. About 20 per cent of the workers in the Maritime Provinces were on a five-day week, varying from 3 per cent in Prince Edward Island to 50 per cent in Newfoundland. The corresponding proportions in Nova Scotia and New Brunswick were 14 per cent and 19 per cent respectively. In the Prairie Provinces 34 per cent of the office employees were on a five-day week in 1950, ranging from 27 per cent in Saskatchewan to 35 per cent in Manitoba and 36 per cent in Alberta. Forty-seven per cent of the workers in British Columbia were also on a five-day week.

The proportion of employees on a five-day week in the Maritime Provinces shows a substantial increase in 1950 over 1949, but most of this is due to the inclusion of the information for Newfoundland into this group for the first time in 1950. In Manitoba the proportion on a five-day week increased from 26 to 35 per cent, and in Alberta it increased from 27 to 36 per cent during the same period.

The proportion of office employees working a five-day week in the five major cities ranged from 5 per cent in Halifax to 87 per cent in Toronto. Seventy-six per cent of the workers in Montreal, 41 per cent in Winnipeg and 62 per cent in Vancouver were also on a five-day week in 1950. The largest increase in the five-day week took place in Winnipeg, where the proportion rose from 29 per cent in 1949 to 41 per cent a year later.

Meters, Motors and Men

"Teamwork does not just happen," Burns Morton, British industrial author, has pointed out. "It results from a carefully devised plan effectively executed."

Many Canadian companies are making effective use of carefully devised LMPC plans, suited to their particular situation, to achieve teamwork in production. An outstanding example is Sangamo Company Limited, electric meter and motor manufacturers at Leaside, Ontario. The Labour-Management Production Committee there is the subject of a research study just published by the Labour-Management Co-operation Service. The study is the fifth made on LMPC's in representative Canadian industries.

Entitled *Meters, Motors and Men,* the 32-page illustrated booklet describes the history and achievements of Sangamo's joint committee, in which Lodges 1755 and 235, International Association of Machinists (AFL-TLC) participate. Copies, in both French and English, are available on request.

Fighting Plant Fires

An LMPC at Ridgetown, Ontario, has produced a detailed plan for fighting plant fires, having organized a plant fire brigade, appointed a fire chief and laid down the procedure to be followed in case of fire. The plan calls for the holding of an unheralded fire drill each month.

The day-shift fire brigade at P. D. Bates Co., Limited, metal stamping and die manufacturing plant, consists of 38 men; the night-shift brigade of 24 men. The plant fire chief is an LMPC member. Participating union in this committee is Local 823, United Automobile, Aircraft and Agricultural Implement Workers of America (CIO-CCL).

Another LMPC which gives much attention to fire prevention is that at the Peterborough Lumber Co. Ltd., Peterborough, Ontario. This committee, in which Local 509, International Woodworkers of America (CIO-CCL) is the participating union, has recently formed a Fire Prevention sub-committee of nine members as well as an Accident Prevention sub-committee of six members.

Using Employee Suggestions

Employee suggestions are encouraged by many LMPCs. An idea recently submitted to the LMPC at Penberthy Injector Company Limited, Windsor, Ontario, has reduced production costs and made an operation safer. A worker's suggestion received by the LMPC at the T. G. Bright & Co. Limited winery, Niagara Falls, Ontario, has increased production by more than 20 per cent.

Three outstanding suggestions were submitted recently to the LMPC at Bennett Limited, shoe findings establishment at Chambly Canton, Quebec. One suggestion, relating to the sharpening and finishing of punches, has resulted in a considerable saving of labour and material every month. A suggestion for a new punch increases the efficiency of cutting machines by three per cent. A third suggestion, that used files be reconditioned and returned to service rather than discarded, has increased the usefulness of the files 300 per cent at a relatively moderate cost, the company reports. This LMPC publishes a special bulletin announcing the award for the details of every outstanding employee suggestion.

The LMPC in the Shops and Repair Division, City of Winnipeg, after hearing a superintendent's report on the cost of operations for the past year, sponsored a meeting of all employees to acquaint them with the cost situation and ask their support for a cost reduction program.

Also at Winnipeg, the LMPC at Hilton Brothers Limited, corrugated shipping container plant, hears and discusses at every meeting reports by the manager and the superintendent on business conditions, orders, deliveries, supplies, schedules, equipment and materials. The same type of information is given to employees of Ray-O-Vac (Canada) Limited, also at Winnipeg, in an LMPC-produced newssheet which is inserted in the monthly newspaper of the parent organization, Ray-O-Vac Company, Madison, Wis.

Establishment of Labour-Management Production Committees (LMPC's) is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions set up LMPC's, the Service provides publicity aids in the form of booklets, films and posters.

Industrial Relations and Conciliation

Four industrial disputes were settled during April following Conciliation Board procedure. The Canada Labour Relations Board rejected an application for the amendment of the arbitration procedure in the collective agreement between the Wabash Railroad Company and the Brotherhood of Railroad Trainmen.

Introduction

During the month of April settlements were effected in four industrial disputes following reference of the matters in dispute to Boards of Conciliation and Investigation appointed by the Minister of Labour. In three of these cases, the settlement was reached following further intervention by officers of the Department of Labour.

The one dispute which was settled by direct negotiations between the parties following their receipt of the report of the Board of Conciliation and Investigation affected Canadian Pacific Air Lines Limited and the Canadian Air Line Pilots' Association. The disputes in which further assistance was given by the Department of Labour following the release of the reports of Conciliation Boards involved (*a*) The Railway Express Agency, New York, N.Y. and the Canadian employees of the company represented by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees; (*b*) The Alberta Wheat Pool and employees in its elevator department at Vancouver, B.C. represented by Local No. 333, International Union of Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America, and (*c*) Canada Coach Lines Limited, Hamilton, Ont., and Local No. 1454, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America.

Reasons for Judgment were issued by the Canada Labour Relations Board during April rejecting an application made by the Brotherhood of Railroad Trainmen for the amendment of the procedure in the union's collective agreement with the Wabash Railroad Company for the final settlement of differences between the parties concerning the interpretation or violation of the said collective agreement. The arbitration provision containing the procedure had been established in 1946 by order of the Wartime Labour Relations Board (National). The application for the amendment of the arbitration procedure was made by the Brotherhood of Railroad Trainmen pursuant to a clause to the effect that, if either party should refuse or neglect to comply with the procedure, the other party might apply to the Board for an amendment.

The Brotherhood claimed that the Company had refused to join with it in the arbitration of grievances concerning claims of brakemen for Wabash rates of pay rather than Canadian National rates while engaged in joint way freight service over Canadian National lines between Detroit and Buffalo.

The Company contended that it was prepared to join in arbitration in regard to two claims involving specific persons because these claims had been processed in the manner prescribed in the agreement for submission of individual time claims, but that it was not prepared to arbitrate the general claim made by the Brotherhood for the future payment of certain wage rates. This contention was based on the ground that the submission of a general claim of this nature is premature until it has been processed in accordance with the procedure for submission of time claims contained in the agreement.

The Board stated that it was evident that the Company was under a misapprehension as to the purpose and scope of the arbitration provision and that if the Company's stand was valid, either party could block recourse to the grievance procedure by making a unilateral decision that a particular grievance was not arbitrable. The Board in its Reasons for Judgment pointed out that strikes and lockouts are prohibited while a collective agreement is in force, and that this provision is predicated on the proposition that

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board and the Industrial Relations Branch of the Department.

all differences concerning the interpretation or violation of agreements, not otherwise disposed of, will be finally disposed of under the procedure for final settlement contained in the agreement or established by the Board. The Board stated that the matters at issue were in effect alleged violations of the agreement and, as such, fall within the jurisdiction of an arbitration tribunal. It was stated further that it is a matter for an arbitration tribunal to determine whether, as the Company contends, the Brotherhood is precluded from submitting to arbitration any general claim for future payment for both present and future service, and whether claims of this nature must be individually submitted and processed. In the circumstances, the Board found it unnecessary to amend the arbitration provision.

The following statement concerns the scope and administration of the Industrial Relations and Disputes Investigation Act.

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The Branch also acts as the administrative arm of the Canada Labour Relations Board in matters under the Act involving the Board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certifications given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within Federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the Federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of Conciliation Officers, Conciliation Boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the Minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Certification and Other Proceedings Before the Canada Labour Relations Board

The Canada Labour Relations Board met for two days during the month of April. The Board issued two certificates designating bargaining agents, rejected two applications for certification, ordered two representation votes, rejected one application for the amendment of a provision established for the final settlement of disputes concerning the meaning or violation of a collective agreement, and rejected one application for revocation of certification. During the month, the Board received seven applications for certification and one application for revocation of certification.

Applications for Certification Granted

The National Association of Marine Engineers of Canada, Inc., District No. 3, on behalf of two units of employees, comprising marine engineers below the rank of chief engineer, employed by Colonial Steamships Limited, Port Colborne, Ontario, and Keystone Transports, Limited, Montreal (L.G., Feb., 1951, p. 190).

Applications for Certification Rejected

1. Local No. 12901, District 50, United Mine Workers of America, applicant, and Polymer Corporation Limited, Sarnia, Ontario, respondent, affecting employees in the company's styrene plant (L.G., March, 1951, p. 346). The application was rejected for the reason that the unit of employees affected was not appropriate for collective bargaining.

2. Detroit Local, American Federation of Radio Artists, applicant, and the Western Ontario Broadcasting Company, Limited, Windsor, Ontario, respondent (L.G., April, 1951, p. 502). The application was rejected for the reason that the Detroit Local was outside the territorial jurisdiction of the Board.

Representation Votes Ordered

The Board ordered representation votes of two groups of employees of the Canadian Pacific Railway Company, one group employed in the ticket office at Windsor Station, and the other group employed in the ticket offices at Place Viger Station and Park Avenue Station, all in Montreal. The votes were ordered following consideration of applications for certification submitted by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of the employees concerned (See below and L.G., May, 1951, p. 674).

Application for Amendment of Arbitration Provision Rejected

The Brotherhood of Railroad Trainmen, applicant, and the Wabash Railroad Company, respondent (L.G., 1951, p. 502) (See Reasons for Judgment below).

Application for Revocation of Certification Rejected

The Prescott and Ogdensburg Ferry Co. Ltd., Prescott, Ontario, applicant, and the Canadian Navigators' Federation, respondent. The application, which was received earlier in the month, was rejected for the reason that the Board was not prepared to entertain an application for revocation at the stage reached in the conciliation proceedings between the parties (See Conciliation Proceedings before the Minister of Labour, L.G., March, 1951, p. 347).

Applications for Certification Received

1. The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, on behalf of a unit of employees of the Canadian Pacific Railway Company employed in the Company's ticket offices at the Place Viger Station and the Park Avenue Station, Montreal (Investigating Officer: C. E. Poirier).

2. Canadian Airways Lodge No. 764, International Association of Machinists, on behalf of guards and/or watchmen employed by Canadian Pacific Air Lines Limited at Vancouver airport (Investigating Officer: D. S. Tysoe).

3. The National Association of Marine Engineers, on behalf of marine engineers, below the rank of chief engineer, employed by Canada Steamship Lines Limited, Montreal (Investigating Officer: C. E. Poirier).

4. The Canadian Merchant Service Guild, Inc., on behalf of deck officers employed by Keystone Transport Limited, Montreal, on board the vessels *Keyvive, Keywest, Keyshey, Keydon, Keybar, Keynor, Keybell, Keyport* and *Keystate* (Investigating Officer: C. E. Poirier).

5. United Grain Elevator Workers' Local 333, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America, on behalf of elevator department employees of the Searle Grain Company Limited, Vancouver (Investigating Officer: D. S. Tysoe).

6. Detroit Local, American Federation of Radio Artists, on behalf of radio announcers employed by Essex Broadcasters, Inc., Detroit, a subsidiary of the Western Ontario Broadcasting Company, Limited, Windsor, Ontario (Investigating Officer: R. L. O'Neill).

REASONS FOR JUDGMENT in application for amendment of arbitration provision, affecting

The Brotherhood of Railroad Trainmen, *Applicant*, *and*
The Wabash Railroad Company, *Respondent*.

The Board consisted of Mr. A. H. Brown, Vice-Chairman and Acting Chairman, and Messrs. W. L. Best, E. R. Complin, A. Deschamps, A. J. Hills, A. R. Mosher and H. Taylor, members. The Judgment was delivered by the Vice-Chairman and Acting Chairman.

This is an application for the amendment of the procedure established by Order of the Wartime Labour Relations Board of April 24, 1946, for the consideration and settlement of differences concerning the interpretation or violation of the collective agreement (schedule) entered into between the Applicant and the Respondent, effective May 1, 1924, covering services of railroad trainmen on the Buffalo Division of the Wabash Railroad, as revised and reprinted on October 1, 1942.

The Order of the Wartime Labour Relations Board was made under the authority of subsection two of section eighteen of the Wartime Labour Relations Regulations. Section eighteen of those Regulations reads as follows:—

> 18. (1) Every collective agreement made after these Regulations come into force shall contain a provision establishing a procedure for final settlement, without stoppage of work, on the application of either party, of differences concerning its interpretation or violation;
>
> (2) Where a collective agreement does not provide an appropriate procedure for consideration and settlement of disputes concerning its interpretation or violation thereof, the Board shall, upon application, by order, establish such a procedure.

The Industrial Relations and Disputes Investigation Act, which came into effect September 1, 1948, contains in section nineteen thereof provisions to the same effect. The Wartime Labour Relations Regulations were revoked upon the coming into force of the said Act.

Subsection two of section seventy-two of the Industrial Relations and Disputes Investigation Act provides that every Order of the Wartime Labour Relations Board shall in so far as the said Order might be made under the said Act be deemed to have been made by the Canada Labour Relations Board.

While the collective agreement mentioned above was modified in some respects by a subsequent agreement entered into between the parties under date of December 1, 1950, this revision did not modify in any way the provisions of the procedure established and made applicable to the collective agreement by Order of the Wartime Labour Relations Board as aforesaid. The procedure consequently remains in full force and effect as a provision of and applicable to the collective agreement.

The provision so established by the Wartime Labour Relations Board, hereinafter referred to as the "arbitration provision", reads as follows:—

> ARBITRATION
>
> Any grievance which is not settled to the satisfaction of either the Union or the Company by conference or negotiation or otherwise in accordance with the provisions of this Schedule, shall upon the written request of either party, be submitted to an Arbitration Board, provided the grievance involves the interpretation or alleged violation of any provision of this Schedule.
>
> Grievances shall not be subject to arbitration which involve:
>
> (*a*) Any request for a modification of this Schedule;
>
> (*b*) Any matter not covered by this Schedule;
>
> (*c*) Any matter which is subject to final settlement by a government agency;
>
> (*d*) Any matter which by the terms of this Schedule is exclusively vested in the Company.
>
> The Arbitration Board shall be established within thirty days from the date the application for same is filed, and shall consist of three members, one of whom shall be selected by the Union and one of whom shall be selected by the Company and a Chairman selected by the two first-mentioned members of the Board. In the event of the failure of the two members of the Board so selected to agree upon the selection of a Chairman, the matter may be referred by either member to the Minister of Labour for Canada, who shall choose the Chairman.
>
> In event of any vacancy on the Board occurring by reason of death, incapacity or resignation, or for any other reason, such vacancy shall be filled in the same manner as is provided herein for the establishment of the Board in the first instance.
>
> A statement of the dispute or question to be arbitrated shall be submitted by both parties, either jointly or separately,

to all members of the Board within five days of appointment of the Chairman. The Board of Arbitration shall convene within 15 days after the appointment of Chairman unless otherwise mutually agreed by the parties and render its decision as soon thereafter as possible.

The decision of the Board shall be limited to the dispute or question contained in the statement or statements submitted to it by the party or parties. The decision of the Arbitration Board shall not change, add to, vary or disregard any provision of this Schedule.

Decisions of the majority of the members of the Arbitration Board, which are made under the authority of this arbitration clause, shall be final and binding upon the Company, the Union, and all persons concerned.

The expenses, if any, of the Members of the Arbitration Board shall be paid as follows: the Union shall pay the fees and expenses of the member chosen by it; the Company shall pay the fees and expenses of the member chosen by it; the fees and expenses of the Chairman shall be divided equally between the Company and the Union.

If either party shall refuse or neglect to comply with the provisions of this grievance procedure the other party may apply to the Wartime Labour Relations Board (National) who may amend this procedure as it deems appropriate.

The Applicant seeks to invoke the provisions of the last paragraph of the arbitration provision in making the present application for the amendment of the said arbitration provision.

The Applicant claims that the Respondent has refused to comply with the provisions of the arbitration provision in having failed to join with the Applicant in the arbitration of the following grievances, although requested to do so:—

(1) claim of brakemen C. W. Pearson and G. W. Clarke, Buffalo Division, for 113 miles plus 2 hours and 38 minutes road overtime at Wabash local freight rate for the services performed on trip St. Thomas to Jarvis and return to St. Thomas, January 23, 1950, and claim for all Wabash brakemen for Wabash rate of pay while engaged in joint way freight service on the Buffalo Division subsequent to January 23, 1950:

(2) claim of brakeman D. L. Jones, Buffalo Division, for 123 miles plus 8 hours and 5 minutes road overtime at through freight rates in lieu of 100 miles as allowed for services performed January 14, 1950.

The Respondent admits that a request was made by the Applicant for establishment of a board of arbitration in respect of above grievances. At the hearing the solicitor for the Respondent stated that the Respondent was prepared to join in arbitration to determine the claims of Pearson and Clarke, which are claims for Wabash rate of pay rather than for Canadian National rate of pay on the said run, which is over Canadian National Railway lines. The Respondent's solicitor explained that the Respondent is prepared to do this because these claims have been submitted and processed in the manner prescribed in the collective agreement for submission of individual time claims, and will be prepared to arbitrate other cases of a similar nature which have been similarly submitted and processed.

The Respondent is, however, not prepared to arbitrate the general claim which the Applicant has put forward for all Wabash brakemen for the future payment of Wabash rates of pay while engaged in joint way freight service on the Buffalo Division after January 23, 1950.

The Respondent bases its objection to the arbitration of this general claim which is in dispute upon the grounds that the submission of any claim of this nature to arbitration is premature until the claim has been submitted and processed in accordance with the procedure for submission of time claims contained in the collective agreement. The Respondent contends that in the meantime no claim exists which could be dealt with by the arbitrators and, consequently, the arbitrators would have no jurisdiction to deal with this general claim.

The Applicant on the other hand contends that the general claim or question as to whether Wabash rates of pay shall be payable to brakemen while engaged on the aforesaid service after January 23, 1950, is a difference between the two parties concerning the interpretation of the collective agreement and is arbitrable as such in accordance with the provisions of the arbitration provision.

It is evident that the Respondent is under a misapprehension as to the purpose and scope of the arbitration provision.

If Respondent's interpretation of the scope of the authority of the arbitration tribunal established under the arbitration provision was valid, it would be quite feasible for either party to this collective agreement or to any other collective agreement containing an equivalent provision to block recourse to the arbitration provision for disposition of a grievance concerning the interpretation or alleged violation of the agreement, by making a unilateral decision that the particular grievance sought to be submitted to arbitration by the other party is not an arbitrable grievance. The Board does not accept the Respondent's contention on this matter.

The Regulations did and the present Act does prohibit strikes and lockouts while a collective agreement is in force. This provision is obviously predicated upon the proposition embodied in Section 18 of

the Regulations and Section 19 of the Act that all differences concerning the interpretation or violation of the agreement not otherwise disposed of will be finally disposed of under the procedure for final settlement thereof contained in the agreement or established by the Board, as the case may be. The provision for final settlement must operate in a manner which will dispose of any difference between the parties concerning the interpretation or violation of the agreement as otherwise the provision would not be in compliance with the requirements of the Act.

In the present instance the matters which have been raised by the parties before this Board in the course of the hearing are in effect alleged violations of the agreement and as such fall within the jurisdiction of an arbitration tribunal to decide. Clearly it is a matter for an arbitration tribunal to determine whether, having regard for the provision in the collective agreement governing the processing and disposition of time claims, the Applicant is, as the Respondent contends, precluded from submitting for decision at this time any general claim for all Wabash brakemen for future payment for both present and future service for disposition as proposed by the Applicant. It is a matter for the arbitration tribunal to determine whether under its interpretation of the agreement claims of this nature must be individually submitted and processed as the Respondent contends.

This Board dealt with a similar issue in its decision and reasons for judgment issued in the case of La Fraternité Nationale et Catholique des Employés de Transport de Québec, Inc., and Quebec Railway, Light and Power Company under date of March 15, 1950, as follows:—

> It is not the duty or function of this Board to express any opinion as to the merits of the complaints of the employees or as to whether or not the complaints are matters which are in fact subject to arbitration under the provisions of the agreement. The question as to whether or not the grievances which have given rise to this application are matters which may be arbitrated is itself subject to arbitration pursuant to the provision which has been prescribed.

The Board has dealt with the matter of the application of the arbitration provision and the functions of the arbitration tribunal at some length for the benefit and guidance of the parties.

Subsection three of section nineteen of the Act requires that:—

> Every party to and every person bound by the agreement, and every person on whose behalf the agreement was entered into, shall comply with the provision for final settlement contained in the agreement and give effect thereto.

The parties should be governed accordingly.

In the circumstances, it is unnecessary to amend the arbitration provision.

Dated at Ottawa, April 18, 1951.

Conciliation and Other Proceedings Before the Minister of Labour

Conciliation Officers Appointed

During the month of April, the Minister appointed Conciliation Officers to deal with matters in dispute between the following parties:—

1. The Commercial Telegraphers' Union, Canadian Marconi System, Division No. 59, applicant, and the Canadian Marconi Company, respondent (Conciliation Officer: R. Trépanier).

2. The Canadian Air Line Flight Attendants' Association, applicant, and Canadian Pacific Air Lines Limited, respondent (Conciliation Officer: G. R. Currie).

Settlements Effected by Conciliation Officers

1. On April 5, the Minister received a report from R. H. Hooper, Conciliation Officer, indicating the settlement of matters in dispute between Northern Bus Lines Limited, Flin Flon, Manitoba, and Flin Flon Transportation Workers' Federal Union No. 272 (L.G., May, 1951, p. 677).

2. On April 19, the Minister received a report from R. Trépanier, Conciliation Officer, indicating the settlement of matters in dispute between the Shipping Federation of Canada, Inc., and Local No. 375,

International Longshoremen's Association, representing longshoremen in the Port of Montreal (L.G., May, 1951, p. 677).

Conciliation Boards Appointed

1. On April 9, the Minister established a Board of Conciliation and Investigation to deal with matters in dispute between Hull City Transport Limited, Hull, P.Q., and the Hull City Transport Employees' Syndicate. The Board was established following receipt of the report of L. Pépin, Conciliation Officer (L.G., May, 1951, p. 677). Constitution of the Board had not been completed at the end of the month.

2. On April 20, the Minister established a Board of Conciliation and Investigation to deal with matters in dispute between the Canadian Overseas Telecommunication Corporation and Local No. 6, Canadian Communications Association. The Board was established following receipt of the report of L. Pépin, Conciliation Officer (L.G., May, 1951, p. 678). Constitution of the Board had not been completed at the end of the month.

3. On April 27, the Minister established a Board of Conciliation and Investigation to deal with matters in dispute between the Canadian Marconi Company and the Commercial Telegraphers' Union, Canadian Marconi System, Division No. 59. The Board was established following receipt of the report of R. Trépanier, Conciliation Officer (see above). Constitution of the Board had not been completed at the end of the month.

Conciliation Board Fully Constituted

The Board of Conciliation and Investigation established by the Minister on February 14, 1951, to deal with matters in dispute between the Gatineau Bus Company Limited, Hull, P.Q., and Division No. 591, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (L.G., April, 1951, p. 503), was fully constituted on April 2 with the appointment of André Montpetit, K.C., Montreal, as Chairman. Mr. Montpetit was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Jean Gagné, Quebec, P.Q., and C. L. Dubin, K.C., Toronto, who had previously been appointed on the nominations of the company and union respectively.

Conciliation Board Report Received

On April 23, the Minister received a unanimous report from the Board of Conciliation and Investigation established to deal with matters in dispute between Canada Steamship Lines, Limited, and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (L.G., May, 1951, p. 678). The text of the Board's report is reproduced below.

Settlements Following Conciliation Board Procedure

During April advice was received that settlements had been effected in the following disputes following receipt by the parties of the reports of Boards of Conciliation and Investigation:—

1. Canadian Pacific Air Lines Limited and the Canadian Air Line Pilots Association (L.G., April, 1951, p. 503).

2. The Railway Express Agency, New York, N.Y., and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, representing Canadian employees of the Company (L.G., March, 1951, p. 347). The settlement was reached following further intervention by the Department of Labour.

3. The Alberta Wheat Pool (Elevator Department, Vancouver) and Local No. 333, International Union of United Brewery, Flour, Cereal, Soft Drink and Distillery Workers of America (L.G., May, 1951, p. 678). The settlement was reached following further intervention by the Department of Labour.

4. Canada Coach Lines Limited, Hamilton, and Local No. 1454, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (L.G., May, 1951, p. 678). The settlement was reached following further intervention by the Department of Labour.

Complaint Under Section 44 and Application Under Section 46 of Act

On April 24, the Minister received from the Canadian Brotherhood of Seamen a complaint under Section 44 of the Industrial Relations and Disputes Investigation Act that the Gulf and Lake Navigation Company, Limited, had violated subsections 1, 2 (*a*), and 3 of Section 4 of the Act. At the same time the Canadian Brotherhood of Seamen made an application to the Minister under Section 46 of the Act for consent to prosecute the Gulf and Lake Navigation Company, Limited, for the alleged violations. The complaint and application were still under consideration at the end of the month.

REPORT OF BOARD in dispute between

Canada Steamship Lines,
and
The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Seasonal waterfront freight handlers at Fort William and Port Arthur, Ont.)

On April 23, 1951, the Minister of Labour received a unanimous report from the Board of Conciliation and Investigation appointed to deal with a dispute between Canada Steamship Lines Limited and the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, representing seasonal waterfront freight handlers employed by the Company at Fort William and Port Arthur (L.G., May, 1951, p. 678).

The Board was composed of His Honour Judge A. H. Dowler, Port Arthur, as Chairman, appointed by the Minister on the joint recommendation of the other two members, A. F. Hawkins and Alex Anderson, both of Fort William, appointed on the nominations of the Company and Union respectively.

The text of the Board's report is reproduced herewith.

To:
The Hon. MILTON F. GREGG,
Minister of Labour,
Dominion of Canada,
Ottawa, Canada.

SIR,

The Board herein was originally composed of His Honour Judge A. H. Dowler as Chairman, Mr. J. M. Paton, member recommended by the employer and Mr. Alex Anderson member recommended by the bargaining agent and following the resignation of Mr. J. M. Paton reconstituted by the same persons except Mr. J. M. Paton who was replaced by Mr. A. F. Hawkins.

Meetings of the Board herein were duly convened at the City of Port Arthur and representations on behalf of both employer and bargaining agent have been fully heard and considered.

The employer was represented by Mr. L. J. Stock, Superintendent of Operations, Montreal, Mr. N. Larivee, Superintendent of Lakehead operations, Montreal, and Messrs. C. Rogers, F. Tilbury and A. J. Miller and the bargaining agent by Mr. F. H. Hall, Vice-Grand President, Mr. H. Mead, General Chairman, Mr. A. Mose, Assistant to the Vice-Grand President and the following officials of Locals 408 and 418 of the bargaining agent: J. Bahlieda, J. Cizmar, J. Korchuska, T. Sepanary, E. Battiston, J. Hanson, T. Tomljenovich, L. Wavra and A. Harakal.

There had been a written collective bargaining agreement between the parties which has expired. The parties had been unable to agree on a renewal of this agreement and after negotiations between them and with the assistance of a Conciliation Officer were still unable to agree upon ten items but upon the hearing before this Board it was stated and the parties agreed that all such items had been determined amicably except with respect to Working Hours and Call Hours. Consequently, no further reference to any other items appears in this Report.

At the Board's request the parties carried on further negotiations with respect to Working Hours and Call Hours but reported to the Board that they were unable to reach an agreement and the following is a copy of a joint statement presented to the Board by the parties outlining their respective positions with respect to these two items upon which they wish to have the Board's decision:—

"Union Proposals:

1. Working Hours

   7 a.m. to 6 p.m. to be considered as a full day's work. Will work 30 minutes overtime at overtime rates to finish a boat.

   All work performed after 6 p.m. to be paid for at overtime rates of time and a half.

2. Call Hours

   First calls 7 a.m. to 9 a.m.; last call not later than 1 p.m.
   Employees shall not be paid for less than two hours for any call made.

Company Proposals:

1. Working Hours
   The Company agree that 7 a.m. to 6 p.m. be considered as a full day for men working such hours, but insists on the right to do work after 6 p.m. with another shift.

All work performed after 6 p.m. to be paid at a differential of 5 cents per hour.

2. Call Hours

Calls to be whenever work is available between 7 a.m. and 7 p.m., meal hours excepted.

Employees shall not be paid for less than two hours for any call made."

We regret to report that after representations had been made to the Board by the parties in support of their respective positions dealing with these two items that your Board was unable to accomplish an agreement between them.

We herewith submit the following unanimous report:—

1. Working Hours

The working day is to be from 7 a.m. to 12 midnight except meal hours from 12 noon to 1 p.m. and from 6 p.m. to 7 p.m. During such period a full day's work for an employee shall be ten (10) hours. No employee shall be discriminated against for declining to work more than ten (10) hours during such period but may do so voluntarily if requested by the employer.

The employees may be required to work 30 minutes at meal time and 30 minutes after midnight to complete loading or unloading a ship.

Work performed between 7 p.m. and 10 p.m. except on Saturdays; on Sundays and on Statutory holidays named in their agreement shall be paid at a differential of ten (10) cents an hour above the day rate: Work performed between 10 p.m. and midnight except on Saturdays; on Sundays and on Statutory Holidays named in their agreement shall be paid at a differential of 33⅓ per cent more than the day rate: Work performed on Sundays; on Statutory Holidays named in their agreement; after 7 p.m. on Saturdays and also to complete loading or unloading a ship as provided for in the preceding paragraph shall be paid at a differential of 50 per cent more than the day rate.

2. Call Hours

Call Hours to be from 7 a.m. to 9 a.m. and from 1 p.m. to 3 p.m.

Employees shall not be paid for less than two hours for any call made.

During discussions the Board concluded that the previous agreement between the parties contained no satisfactory clause referring disputes to arbitration which had not been amicably settled. We recommend that any future agreement contain an arbitration clause which refers all disputes of every kind and description, except those amicably settled, to arbitration with the employer selecting one arbitrator, the bargaining agent selecting another arbitrator, and the two thus chosen selecting a third arbitrator, if they can agree upon one.

If within seven days after their appointment the two arbitrators cannot agree upon a third arbitrator the Minister of Labour at Ottawa shall appoint the third arbitrator and this Board shall convene and render a decision which shall be final and binding upon both parties to the agreement.

In conclusion your Board wishes to say that the presentations made to it on behalf of both the employer and the bargaining agent were of great assistance in simplifying their understanding of the matters in dispute.

All of which is respectfully submitted this 21st day of April, A.D. 1951.

(Sgd.) A. H. Dowler,
Chairman.

(Sgd.) A. F. Hawkins,
Member.

(Sgd.) Alex Anderson,
Member.

Collective Agreements and Wage Schedules

Recent Collective Agreements

A file of collective agreements is maintained in the Economics and Research Branch of the Department of Labour. These are obtained directly from the parties involved and through the Industrial Relations Branch of the Department. A number of those recently received are summarized below.

Agreements made obligatory under the Collective Agreement Act in Quebec and schedules under Industrial Standards Acts, etc., are summarized in separate articles following this.

Logging

BRITISH COLUMBIA COASTAL REGION—CERTAIN LOGGING FIRMS AND INTERNATIONAL WOODWORKERS OF AMERICA.

Agreement to be in effect from February 16, 1951, to June 14, 1952, and thereafter from year to year, subject to 60 days' notice. This agreement is similar to the one previously in effect (L.G., Oct., 1950, p. 1671) with the following changes and additions:—

Vacations with pay: a provision has been added that, for the purposes of this agreement, the words "two and one-half per centum" will be considered substituted wherever the words "two per centum" appear throughout the Annual Holidays Act of British Columbia.

Wage rates previously in effect shall be increased by 9 cents per hour except fallers, buckers, shingle sawyers and packers, who are paid on piece work rates. In addition, employees earning between $1.25 and $1.39½ per hour will receive an extra cent per hour, those earning from $1.40 to $1.49½ an extra 2 cents, those from $1.50 to $1.74½ an extra 6 cents and those earning $1.75 and over an extra 9 cents; sawmill lumber graders will receive an extra 3 cents per hour. Fallers and buckers, who are paid on a piece work basis, will receive an increase of $1 per day, to be paid on a daily basis; shingle sawyers will be granted an increase of 4 cents per square and shingle packers 3 cents per square, or alternatively, at the employees' option, an increase of $1 per day in lieu of piece work increases. The above increases are retroactive to January 1, 1951. The minimum rate for common labour shall be $1.29½ per hour.

Escalator clause (new): a cost-of-living bonus will be paid to all eligible employees, effective July 1, 1951, and January 1, 1952, based on the rise in the Dominion Bureau of Statistics' cost-of-living index. For each 1·3 point rise in the index above 172·5 (index figure for January, 1951) employees will receive a bonus of 1 cent per hour. If the index drops, the bonus will be adjusted downward by the same amount, provided, however, that a drop in the index below 172·5 will not affect wage rates payable under this agreement.

A Profit Sharing Plan in lieu of any wage increase during the period of the agreement is part of an agreement between the Sovereign Potters Limited and National Union of Pottery Workers.

An unusual agreement for the construction industry has been concluded between the Hydro-Electric Power Commission of Ontario and the Niagara Development Allied Council, A. F. of L., with respect to the "Sir Adam Beck Niagara Generating Station No. 2" project. In this case, the employer negotiated with an integrated council, representing 17 individual unions, on behalf of all unions.

Both agreements are summarized below.

Mining

Coal Mining

DRUMHELLER, LETHBRIDGE AND COALSPUR, ALTA.—THE DOMESTIC COAL OPERATORS' ASSOCIATION OF WESTERN CANADA (DRUMHELLER, LETHBRIDGE AND COALSPUR SECTIONS) AND UNITED MINE WORKERS OF AMERICA, DISTRICT 18.

Agreements to be in effect from February 17, 1951, to February 16, 1952. Sixty days prior to their expiration the 2 parties will meet to discuss a renewal of the agreements.

Union security and check-off: all men who work in and around the mines, who are eligible to become members of the union, shall join same and authorize their employers to deduct from their wages all membership dues, assessments and fines and to remit same to the union.

Hours: 8 per day 5 days a week, a 40-hour week. *Overtime:* time and one-half or rate and one-half for work in excess of above hours and for work on 10 specified holidays. Swing shifts may be employed on all continuous employment, without application of overtime rates, but in no case shall the additional time exceed on the average 2 hours per week.

Vacations with pay: one days' credit will be granted to any employee who has lost not more than 12 hours during the month; however, if any employee averages 20 working shifts per month during the year, he will be entitled to 12 days' vacations with pay. Such vacations may be taken only after 12 months' continuous employment. If a mine is idle on account of mine disability or lack of orders, employees shall be credited with this as a day providing they have not refused to perform work allotted to them.

Wage rates: the agreements contain schedules of rates paid per ton of coal mined, rates for timbering, brushing, etc.

Where daily rates are given, they are for certain classes (where 2 rates are shown, the higher rate or range applies to the Coalspur section): inside—machinemen, electric $12.97, helpers $11.64; miners timbermen, bratticemen, tracklayers $11.54 and $11.75; motormen $11.48; rope riders $11.32 and $11.36; buckers, unclassified labour $10.82 and $10.87; boys $9 to $10.21 and $10.01; outside—power house engineers $11.31 to $11.95 and $11.36 to $12.07; tail rope engineer $11.84 and $12.07; hoisting engineer $11.79 and $11.91; blacksmiths, carpenters, welders (certified) $11.74 and $11.85; locomotive engineer, car repairer, tipple engineer, timber framer $11.32 and $11.36; trade helpers, firemen, tipple dumpers, lampmen, teamsters $10.82 and $10.87; stablemen, slate pickers, car oilers, couplers, unclassified labour $10.59 and $10.87. When a miner is unable to earn the minimum wage of $11.54 or $11.75 (in the Coalspur section) due to abnormal conditions in his working place, the company shall make up the difference, provided the miner has done a fair day's work, and that regard shall be had to the pay period in which a deficiency is claimed. The rate for wet places shall be 50 cents per day extra. House coal and briquette prices to employees shall remain unchanged.

Welfare fund: all coal operators shall pay into the Welfare and Retirement Fund of District 18, United Mine Workers of America, 15 cents per ton on all coal sold or used.

Seniority rights: men having partial disabilities, received in and around the mine, shall be given preference over other workmen in the class of work they can perform. In case of a lay-off or in the taking on of men the employee with the longest continual term of service with the mine shall be given preference within the classification wherein he is employed. Employees' sons shall be given preference over other new men, provided they are able and competent to perform the work required.

Provision is made for the *settling of disputes*, for *checkweighmen* and the fixing of *prices for new work*.

WESTERN CANADA—THE WESTERN CANADA BITUMINOUS COAL OPERATORS' ASSOCIATION AND UNITED MINE WORKERS OF AMERICA, DISTRICT 18.

Agreement to be in effect from February 17, 1951, to February 16, 1952; the two parties will meet 60 days prior to the expiration to discuss its renewal. This agreement is similar to the one between the Domestic Coal Operators' Association and the union, summarized above.

Wage rates: the agreement contains schedules of rates paid per ton of coal mined, rates for timbering, brushing, etc. Where daily rates are given, the rates paid by most companies for certain classifications are as follows: inside—miners, timbermen, bratticemen, tracklayers $11.75; motormen, rope riders $11.36; buckers, unclassified labour $10.87, boys $9.82; outside—power house engineers $11.36 to $12.07, tailrope engineers $12.07, hoisting engineers $11.91; blacksmiths, carpenters $11.85; welders $11.36 and $11.85; locomotive engineers, car repairers, timber framers $11.36; trade helpers, firemen, tipple dumpers, lampmen, teamsters, stablemen, unclassified labour $10.87; boys $9.27.

Manufacturing

Vegetable Foods

SASKATOON, SASK.—THE QUAKER OATS COMPANY OF CANADA LIMITED AND UNITED PACKINGHOUSE WORKERS OF AMERICA, FLOUR AND CEREAL MILL WORKERS DIVISION, LOCAL 418.

Agreement to be in effect from February 1, 1951, to February 1, 1953, and thereafter from year to year, subject to notice.

Union security: every employee who is now or hereafter becomes a member of the union shall, as a condition of employment, maintain his membership; every new employee shall, within 30 days after the commencement of his employment, join the union.

Check-off: the company agrees to deduct from the pay of all employees, who so authorize, monthly union dues and to remit same to the union.

Hours: 8 per day, 44 per week. *Overtime:* time and one-half for work in excess of normally assigned hours and for work on Sundays (except where employees' regular work day or shift falls on Sunday), double time and one-half for 8 specified *paid holidays*. *Rest periods:* employees will be granted two 10-minute rest periods in each shift. Employees on the second shift when plant is operating on a 17-hour basis, and on all 3 shifts, when on a 24-hour basis, will be granted a paid meal period.

Vacations with pay shall be granted in accordance with the provisions of the Saskatchewan Annual Holidays Act (1944) as amended. Employees with 20 or more years' seniority shall receive 3 weeks.

Hourly wage rates for certain classes: male starting rate 99 cents, after 60 days $1.04; warehouse—checkers $1.11, truckers, loaders, labourers, sweepers $1.04, heavy duty loaders $1.08; mills—2nd miller $1.28, trick millers $1.24, bolters, packers $1.11, oilers and sweepers $1.04, grain elevator—maintenance men $1.28, firemen $1.18, distributors $1.13, shovellers, watchmen $1.04, female labour 81 to 87 cents.

Off-shift differential: employees on the second shift shall receive 3 cents and those on the third shift 5 cents per hour over and above the regular rate of the job.

The present guaranteed work plan shall be continued during the life of the agreement.

Seniority shall be on a departmental or occupational basis and shall apply in the case of a reduction of the working force. In cases of promotions, demotions, upgradings or transfers the skill, ability and efficiency of the employee shall be the governing factors, where other things are equal seniority shall apply.

Provision is made for *grievance procedure*.

Textiles and Clothing

MARYSVILLE AND MILLTOWN, N.B., CORNWALL AND HAMILTON, ONT.—CANADIAN COTTONS LIMITED AND TEXTILE WORKERS UNION OF AMERICA, LOCALS 854, 858, 806 AND 962.

Agreement to be in effect from December 18, 1950, to December 17, 1951, and thereafter from year to year, subject to notice.

Union security: all employees shall, as a condition of employment become members

of the union within 60 days of commencement of their employment. Following completion of the 60-day probationary period, a new employee shall be deemed to have been a union member as of the first month of his employment and shall be obliged to pay union dues accordingly, provided, however, that he may be exempted from the requirements of this provision for religious reasons. (Previous agreement provided for a union shop for new employees only, with maintenance of membership for all.)

Check-off: the company agrees to deduct union dues monthly from the pay of employees who voluntarily authorize such deduction, and to remit same to the union. Such authorization may not be cancelled prior to the expiration date of the agreement.

Overtime: time and one-half shall be paid for authorized work performed in excess of the standard work day or week for the shift being worked and double time and one-half for work on 5 specified *paid holidays* (an increase of 3).

Vacations with pay: 2 weeks to all employees having over 3 months' continuous service with pay equal to 4 per cent of the employees total earnings, including overtime, during the preceding 12 months.

Wage rates agreed upon by the parties to the agreement shall be effective for the term of the agreement.

Seniority rights shall be based on mill and departmental seniority, the first to be used as a basic factor in lay-offs and recalls and the second for promotional purposes after knowledge, skill and efficiency on the job have been given primary consideration.

Group Insurance Plan: the company agrees to continue to pay the full premium of the plan which covers life insurance, weekly sickness and accident benefits, hospitalization, surgical and medical benefits.

Provision is made for *grievance procedure.*

Wood Products

British Columbia Coastal Region—Certain Firms Engaged in Manufacturing of Rough and Dressed Lumber, Plywood, Veneer, Boxes, Shingles, Doors, etc., and International Woodworkers of America.

The agreement summarized above under "Logging" applies also to a number of companies engaged in manufacturing the above products.

Printing and Publishing

Montreal, P.Q.—The Employing Printers' Association of Montreal Inc. and The International Typographical Union, Local 176.

Agreement to be in effect from the first full payroll date following December 1, 1950, to November 30, 1951.

Union security: the employers agree to employ in their composing room mechanics and workmen, including foremen, who are members of the union in good standing.

Hours: 8 per shift, 5 days or nights a week, a 40-hour week. Employees shall not be required to work less than a full shift in any day or night, except in case of emergency. *Overtime:* time and one-half shall be paid for the first 3 hours and double time thereafter for work in excess of the regular hours and on the regular off-day or off-night; triple time will be paid for work on 7 specified *paid holidays.*

Vacations with pay: after one year's service 5 days, after 2 years' service 10 days; employees with less than one year's service shall receive one-half day, or pay in lieu thereof, for each 25 days worked.

Minimum hourly wage rates: journeymen, for day work $1.65, for night work $1.89¾; apprentices—from 31 per cent of journeymen's rate during first 6 months to 84 per cent during twelfth 6 months. Employees who lose situations by reason of a consolidation or merger shall be entitled to 2 weeks' severance pay at their regular rate.

Apprentices may be employed in the following ratio: for the first 2 journeymen one apprentice; for each additional 5 journeymen one apprentice; when 4 apprentices are employed an additional one may be employed for each 10 journeymen.

Provision is made for the *settling of disputes* and *seniority rights.*

Montreal, P.Q.—The Employing Printers' Association of Montreal Inc. and The International Printing Pressmen and Assistants' Union of North America, Local 52.

Agreement to be in effect from the first full payroll period following December 1, 1950, to the last full payroll period preceding December 1, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one between the Employing Printers' Association of Montreal Inc. and the International Typographical Union, summarized above.

Minimum hourly wage rates: journeymen pressmen $1.65, two-colour pressmen, perfecting pressmen $1.80, rotary pressmen $1.85, two-colour rotary pressmen $1.90, pre-make ready journeymen $1.80; multiple colour rotary, 1st pressmen $2.10, 2nd pressmen $2; plater pressmen $1.45, rotary, perfecting and two-colour press assistant pressmen $1.45, apprentice pressmen and assistants $1.40; apprentices—from 31 per cent of journeymen's rate during first 6 months to 78 per cent during eighth 6 months, thereafter the equivalent of the full assistants scale of wages. Each succeeding year for 3 years an apprentice pressman shall receive an increase of one-quarter of the difference between the assistant's rate of wages and the journeyman pressman's scale until the full pressman's rate of wages is reached.

Night shift differential: for night work journeymen and assistants shall be paid 15 per cent over the day rate.

Montreal, P.Q.—The Employing Printers' Association of Montreal Inc. and The International Brotherhood of Bookbinders, Local 91.

Agreement to be in effect from the first full payroll period following December 1, 1950, to the last full payroll period preceding December 1, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one between the Employing Printers' Association of Montreal Inc. and The International Typographical Union, summarized above.

Minimum hourly wage rates: journeymen $1.65 for day work, plus 15 per cent for night work; journeywomen 82½ cents for day work, plus 15 per cent for night work;

apprentices, male—from 31 per cent of journeymen's rates during first 6 months to 84 per cent during twelfth 6 months; female—from 45 cents during first 6 months to 70 cents during sixth 6 months, full journeywomen's scale thereafter.

MONTREAL, P.Q.—VARIOUS PRINTING ESTABLISHMENTS (TYPOGRAPHICAL, PRESS AND BOOKBINDING DEPARTMENTS) AND LE CONSEIL SYNDICAL DES METIERS DE L'IMPRIMERIE INC.

The effective dates of the agreements vary, but they are all to be in effect for the period of one year and thereafter from year to year, subject to notice. The employers agree to give preference of employment to members of the union. The union grants the employers, parties to this agreement, the right to use the union label.

Check-off: the employers agree to deduct monthly union dues from the pay of employees who so authorize and to remit same to the union.

Hours: 8 per shift, the first 5 days or nights of a week, a 40-hour week. *Overtime:* time and one-half for the first 3 hours in excess of the regular hours per day or week, double time thereafter and for work on Sunday and on 8 specified *paid holidays*.

Vacations with pay: after one year's service 5 days, after 2 years' service 7 days and after 3 years' service 10 days; employees with less than one year's service will be granted one-half day for each 25 days worked.

Minimum hourly wage rates: journeymen compositors, machine keyboard operators, journeymen pressmen (cylinder) $1.60; assistant pressmen (cylinder) $1.32, feeders (cylinder) $1.14, pressmen on platen presses (automatic or hand fed) $1.40, feeders (platen presses), pressmen on rotary presses $1.80; assistant pressmen and feeders (rotary) $1.40, pressmen on 2-colour presses $1.75, assistant pressmen and feeders (2 colour) $1.40, journeymen bookbinders $1.60, experienced bookbinding girls 80 cents, journeymen castermen $1.60, caster runners, first 6 months 50 cents, second 6 months 61 cents. Apprentices, all departments—from 50 cents during the first 6 months to $1.34 during twelfth 6 months, female, bookbinding—from 50 cents during first 6 months to 75 cents during sixth 6 months.

Night shift differential: for night work employees shall be paid 15 per cent over the day rates.

Provision is made for *grievance procedure*.

MONTREAL, P.Q., OTTAWA, TORONTO, HAMILTON AND LONDON, ONT.—THE CANADIAN LITHOGRAPHERS' ASSOCIATION AND THE AMALGAMATED LITHOGRAPHERS OF AMERICA, LOCALS 27, 40, 12, 42 AND 47, RESPECTIVELY.

Agreement to be in effect from February 12, 1951, to December 31, 1951, and thereafter from year to year, subject to notice. Preference in employment to those who have previous experience or training according to the standards generally recognized in the lithographing industry will be encouraged.

Hours: 8 per shift, Monday through Friday, a 40-hour week. *Overtime:* time and one-half for the first 3 hours in each day, double time thereafter and for work on Saturdays (except when part of a regular scheduled night shift) and Sundays, and triple time for work on 8 specified *paid holidays*.

Vacations with pay: 2 weeks annually after one year's continuous service.

Minimum hourly wage rates: art department—artists (reproducers only) $1.94, engravers and letterers on drug label work $1.55, poster (crayon) $2.05, poster (letterers) $1.76, process (colour correctors) $2.19; camera department—camera operators $1.46 and $1.94, projection machine operators $1.94; plate making department—stone polishers $1.42, other classifications $1.94; plate grainers (up to plate size 44 x 64) $1.42 to $1.80; press department—multicopying machine operator, first year $1.32, thereafter $1.48; journeymen pressmen $1.48 to $2.57, depending on size and type of presses and the number of colours; feeder and feeder operators, first year $1.04 to $1.14, second year $1.13 to $1.32, thereafter $1.21 to $1.52; on 4-colour, sheet fed press 36 x 48 or over, first feeder operator $1.69, second feeder operator $1.57; lithographic press helpers, employed before January 1, 1951, 84 to 96 cents, employed after December 31, 1950, 70 to 80 cents. For new employees engaged as apprentices the minimum starting rate is 70 cents with an increase every 6 months until journeymen's rate is reached. The above rates are approximately 7·5 per cent higher than the previous rates with the exception of the rates for lithographic press helpers, engaged after December 31, 1950, and the minimum starting rate for apprentices; these rates are reduced 8 or 9 cents per hour. Employees below normal physical fitness may be granted permission to work at wages lower than the above.

Night shift differential: employees working on a night shift are to be paid at a rate 15 per cent higher than the day rate; only one shift shall be deemed the day shift, all others are night shifts.

Apprentices: the ratio of apprentices to journeymen is fixed; in no case shall there be more than one apprentice in any department with less than 7 journeymen. The apprenticeship period is 5 years except in the press room, where it is 4 years; however, in the press department an apprentice must serve as a feeder before taking charge of a press. His apprenticeship commences only from the time he takes charge of a press.

Welfare plan: the welfare plan as presently established (L.G., May, 1950, p. 691) shall be maintained for the lifetime of this agreement. Additional benefits for employees only will be provided by the employers under a Medical Expense Reimbursement Plan, such additional benefits to be effective as from January 15, 1951.

Metal Products

MONTREAL, P.Q. TORONTO AND LONDON, ONT.—GENERAL STEEL WARES LIMITED AND THE UNITED STEELWORKERS OF AMERICA, LOCALS 2847, 1111, 2771 AND 3368.

Agreement signed February 15, 1951, to be in effect until June 30, 1952, and thereafter save that from May 10, 1952, to May 30, 1952, or in any subsequent year, either party may, by notice to the other, terminate any provision or propose an amendment of, or substitution for, or addition to any provision in the agreement.

Union security: all permanent employees shall become and remain members of the union as a condition of employment.

Check-off: the company agrees to deduct from the pay of any employee who so authorizes the sum of 50 cents each week as union dues and to remit same to the union.

Hours of work and overtime: time and one-half shall be paid for work in excess of the stipulated hours per day or per night; double time will be paid to permanent employees for work on 8 specified *paid holidays. Rest and wash-up periods:* all employees shall have one 10-minute rest period and one 5-minute wash-up period during each full shift.

Vacations with pay: one week to employees with one year's seniority, 2 weeks to employees with 3 years' seniority and 3 weeks to employees with 25 years' seniority; employees with less than one year's seniority shall receive vacations with pay in proportion to their length of service.

Wage rates: all hourly rates are to be increased 6 cents per hour as of the date of the agreement and a further 5 cents per hour incerase is to be made July 1, 1951. Piece work rates are to be increased on average to equal the increase in the hourly rates, the exact increases to be worked out by the union, having regard to existing inequalities.

Escalator clause: during the life of this agreement, a cost-of-living bonus of one cent an hour shall be paid for every 1·3 points the cost-of-living index, as published in the LABOUR GAZETTE, is higher than 172·5. Such bonus will be effective with the first pay period following publication of the index. (This is a new clause.)

Off-shift differential: all employees working on shifts other than the regular day shift shall be paid a bonus of 5 cents per hour above the regular rates.

Seniority shall, except in special cases, be on a departmental or occupational basis; male and female employees shall be carried on separate non-interchangeable lists except where they are engaged on the same type of work. Seniority among female employees shall apply only to single women except where the employee is dependent on her own earnings.

Provision is made for *grievance procedure* and the *safety and health* of employees.

VICTORIA, B.C.—CERTAIN AUTOMOBILE DEALERS AND AUTOMOTIVE MAINTENANCE WORKERS' UNION, LOCAL 151.

Agreement to be in effect from February 1, 1951, to January 31, 1952, and thereafter from year to year, subject to 60 days' notice. This agreement is similar to the one previously in effect (L.G., June, 1950, p. 870), with the following changes and additions:—

Vacations with pay: this agreement provides that "employees third annual and subsequent holidays shall be two weeks with pay". Previous agreement provided that vacations with pay were to conform to the B.C. Holidays With Pay Act.

Escalator clause: a cost-of-living plan shall be adopted and shall be effective when the Dominion Bureau of Statistics' monthly index rises above the December, 1950, figure of 171·1. The bonus shall be computed on the basis of 25 cents per week for each rise of one point in the index. Adjustments in the wage scale will only be made as the index passes 5-point intervals, up and down, above 171·1.

Hourly wage rates are increased 8 to 17 cents and are now as follows: journeymen—all trades $1.45, mechanic's helper 91 cents to $1.24, lubrication 87 cents to $1.11, washers 86 cents to $1.06, janitors 85 cents, service station attendants 87 cents to $1.11; service salesmen (per week) $50.27 to $62.37, parts men (per week) $31.46 to $57.20. The above rates include the cost-of-living bonus.

Non-metallic Minerals, Chemicals, etc.

HAMILTON, ONT.—THE SOVEREIGN POTTERS LIMITED AND NATIONAL UNION OF POTTERY WORKERS, LOCAL 4 (CCL).

Agreement to be in effect from October 1, 1950, to June 30, 1952, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect (L.G., Jan., 1950, p. 74), with the following changes and additions:—

Hours are reduced to 8 per day, 5 days a week, a 40-hour week (previously 9 per day, 5 days a week or, in certain cases, 8 per shift, 6 shifts a week).

Hourly wage rates are unchanged, but a *Profit Sharing Plan* is agreed upon in lieu of any wage increases during the period of the agreement. According to the plan, the basis of determination of the profits shall be the net profit before federal and provincial corporate income taxes, but after all other normal charges, are deducted. The company shall first deduct from such net profits a sum equivalent to 5 per cent of its capital employed in the business at the beginning of the year. One-half of the balance shall be shared; all employees of the company "shall share equally in the proceeds on the basis of the relationship of the hours worked by each employee to the total hours worked by all employees." Losses in any fiscal year shall not be carried forward in determining the following year's net profit.

TORONTO, ONT.—REXALL DRUG COMPANY LIMITED AND INTERNATIONAL CHEMICAL WORKERS UNION, LOCAL 279.

Agreement to be in effect from December 11, 1950, to December 10, 1951, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect (L.G., April, 1950, p. 515), with the following changes and additions:—

Union security: a union shop clause has been added providing that all present employees who are not members of the union shall, as a condition of continued employment, join the union within 30 days after the effective date of the agreement. (The previous agreement provided for a union shop for new employees only, with maintenance of membership for all.)

Vacations with pay: 2 weeks are now granted after 3 years' service instead of after 4, as previously. The provisions of 1 week after 1 year's service and 3 weeks after 25 years' service are unchanged.

Wages: the previous hourly wage rates only are increased by 8½ cents per hour. Immediate measures will be started by the company to convert all possible finishing operations now on the hour-time basis to the piece-work basis.

Escalator clause (new): if, on June 10, 1951, or thereafter the official cost-of-living index has risen at least 6 points above the stated official index published during the month of December, 1950, one cent per hour shall be added to the hourly wage rate only of all employees for each full one and one-half points rise in the index, such increase to become effective on the Monday following the date of publishing of the applicable official cost-of-living index.

Construction

NIAGARA FALLS, ONT.—THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO (SIR ADAM BECK NIAGARA GENERATING STATION NO. 2) AND THE NIAGARA DEVELOPMENT ALLIED COUNCIL, A.F. OF L., COMPRISING SEVENTEEN INTERNATIONAL UNIONS.

Agreement to be in effect from March 4, 1951, until the completion of the project, provided, however, that on March 1 of each succeeding year the wage rates shall be subject to review at the instance of either party on 30 days' notice prior to the relevant March 1.

Union security: all employees under this agreement shall, as a condition of employment, be members of, or secure membership in, a member union and maintain such membership in good standing. No employee is required to join more than one member union. Questions of jurisdiction shall be adjusted in conformity with the regulations of the American Federation of Labour. Employees secured through sources other than the union must, within 15 days from the date of engagement, apply for membership in the appropriate member union.

Check-off: a check-off system for initiation fees and union dues shall be instituted and made operative for the lifetime of this agreement, deductions under it shall commence on submission by the union of a standard check-off authorization. In the event of a transfer from the project to another construction project of the employer, a member employee's check-off shall continue for a period of 3 months.

Hours: 9 per day Monday through Thursday, 8 on Friday, a 44-hour week, except for camp staffs whose hours on duty shall be 8 per day, 6 days per week. *Overtime:* time and one-half for work in excess of above hours and double time for work on Sundays and on 8 specified holidays. In the event that it should be decided to work in tunnel operations three 8-hour shifts, 6 days per week, 44 hours shall be worked at straight time and the remainder at time and one-half.

Vacation allowances: vacation credits shall be 4 per cent of earnings. The 2 parties shall, before December 1, 1951, examine the question of the method of granting vacations, including the possibility of a shut-down during the Christmas season.

Hourly wage rates for certain classes: electrical workers, plumber, steamfitter, pipefitter and pipe welder, sheet metal workers, terrazzo mechanics, tile setters $1.75; boilermakers (repair work), carpenters, iron workers, welders (certified), blacksmith and drill sharpener, linemen, cribmen $1.70; asbestos mechanics $1.65; engineers $1.15 to $1.75; cement masons on buildings $1.45; cement finishers, firemen, roofers $1.15; machinists $1.55 and $1.70; truck drivers $1.15 and $1.25; tunnel workers, miners and drillers $1.35, muckers $1.10 (plus incentive 5 to 10 cents); powdermen $1.25; conveyor men $1.10; unskilled labourers (minimum rate) $1 (plus incentive 5 to 10 cents). The rates for the Commission's regular employees who are members of the union shall be the rates as set forth above less an amount not in excess of 6 per cent. Tunnel workers, except where listed, shall be paid 10 cents per hour extra. Truck drivers who regularly work both above and below ground will be paid 5 cents per hour extra.

Provision is made for *grievance procedure.*

Transportation and Public Utilities

Water Transport

SAINT JOHN, N.B.—THE NATIONAL HARBOURS BOARD AND THE NATIONAL HARBOURS BOARD EMPLOYEES FEDERAL UNION NO. 24 (TLC).

Agreement to be in effect from November 1, 1950, to October 31, 1951, and thereafter until either party gives 2 months' notice for revision or termination.

Hours: 8 per day Monday through Friday, 4 on Saturday, a 44-hour week; for stationary firemen 8 per day, 6 days a week. *Overtime:* time and one-half for work in excess of regular assigned hours and double time for work on Sunday (or the alternative day of rest) and on 7 specified *paid holidays*, provided, however, that any employee may, at the option of the port manager, when required to work on a paid holiday, be paid at regular rates for normal hours worked and shall be allowed, in addition, vacation leave with pay of one day for each day of normal hours worked. Watchmen shall be paid at straight time rate for all hours worked. Employees who are required to work 8 consecutive hours will be allowed 20 minutes for lunch without deduction of pay.

Vacations with pay: for each of the first 3 years of service, after last entry into harbour service, $\frac{1}{2}$ day per month worked in each such year, for the 4th and 5th years of service $\frac{3}{4}$ days per month in each year and for the 6th and subsequent years one day per month worked in each such year. Vacation leave credit will accrue but no vacation will be granted in the first 6 months of service.

The above provisions regarding hours of work, overtime, paid holidays and vacations with pay do not apply to salaried employees.

Hourly wage rates for certain classes: maintenance and operation—carpenter, electrician, fitter (steam) $1.13; painter $1.05, blacksmith $1.02; fire equipment inspector, rigger $1; fireman (stationary) motorboat operator, timberman 95 cents; utility man, waterman 90 cents; labourer 85 cents, watchmen 80 cents; floating crane—operator $1.20; signalmen $1, deckhand, fireman 95 cents; locomotive crane—operator $1.23, firemen $1, coal tender 95 cents; patrolmen $173 to $183 (per month).

Provision is made for *seniority rights* and *grievance procedure.*

Service

Public Administration

SASKATOON, SASK.—THE CITY OF SASKATOON AND THE FIREFIGHTERS' UNION, LOCAL 80.

Agreement to be in effect from January 1, 1951, to March 31, 1952, and thereafter from year to year unless terminated in accordance with the provisions of the Trade

Union Act or the following provision: if the January 1, 1952, cost-of-living index is 173·8 points or greater, the union may re-open the agreement, if it is 167·6 or below, the city may re-open it at that date.

Statutory holidays are recognized for non-firefighting employees. Firemen, lieutenants and captains shall be paid 4 days' wages and, in addition, they are to receive 4 days' time off in lieu of 8 statutory holidays.

Vacations with pay: all employees shall be entitled to 21 days per year after completing one year of service.

Sick pay: employees shall be allowed sick pay at the regular rate for a reasonable length of time, subject to the discretion of the city commissioner.

Monthly wage rates: firemen $150 to $210, lieutenant $220, captain $235, chief fire inspector $240, fire inspector $220; motor mechanic, maintenance man $235; fire and police alarm superintendent $250, assistant $220. In addition to the above wages all employees shall receive any special cost-of-living bonus which the city council may grant to civic employees for the period January 1, 1951 to March 31, 1951.

Seniority: the promotion of all employees shall be based on record, seniority and written and oral examinations, with the greatest emphasis on efficiency. No officer or man in the fire department shall be promoted after he has reached the age of 57 years except with the approval of the city council.

Provision is made for *superannuation* and *grievance procedure.*

VANCOUVER, B.C.—THE BOARD OF POLICE COMMISSIONERS AND CITY POLICEMEN'S FEDERAL LABOUR UNION, LOCAL 12 (TLC).

Agreement to be in effect from March 1, 1951, to February 29, 1952.

Hours: 8 per day, 5 days a week, a 40-hour week. *Overtime:* employees will be allowed time off for attendance at court. Straight time off will be allowed for an extended tour of police duty up to 2 hours and for 7 specified holidays; time and one-half will be allowed for any time in excess of 10 hours' regular police work and for ordinary call outs of one day. Straight time pay will be allowed for all time in excess of regular detailed working hours for strike duty or civil disturbance, provided, however, that a minimum of 20 men are involved for at least 2 hours.

Vacations with pay: after one year's continuous service employees will be granted 16 days annual leave and after 15 years' continuous service or after attaining the rank of sergeant or detective 23 days. The above periods shall be the maximum leave granted irrespective of the number of weekly leave periods that fall during such periods of annual leave. Employees who join the service prior to August 1 in any year shall be entitled to 7 days' annual leave for the current year.

Monthly wage rates: constable, first class $281, second class $258, third class $230 probationer $202 and $213; detective, patrol sergeant $309; detective sergeant $337; policewoman or matron, first class $241, second class $218, third class $196, probationer $168 and $179. Constables assigned to prowler squad duty shall receive an increment of $8 per month while assigned to such duties.

Uniforms shall be provided by the employer for all uniformed officers. Detectives and plain clothes constables shall be granted a cash allowance in lieu of the uniform.

All members of the force shall be provided with free street-car passes so long as the B.C. Electric Railway Company agrees to continue the present arrangement to that effect.

All police officers shall be covered by the type of accident and sickness policy presently in force, paying compensation at the rate of $30 per week. When an employee is injured while on duty the city shall receive his compensation cheque and pay him his full wages. All employees who so wish may be covered by the Credit Unions and Co-operatives Health Services Society and the city will contribute to the premium $2.50 per month in the case of a man with dependents and $1.25 in the case of a man without dependents.

Provision is made for the *settling of grievances* and *seniority rights.*

Collective Agreement Act, Quebec

Recent proceedings under the Collective Agreement Act, Quebec,* include the amendment of 19 agreements. In addition to those summarized below, they include: the amendment of the agreements for grocers and butchers at Sherbrooke, for retail stores at Richmond and Melbourne and at Windsor and for tannery employees in the province gazetted March 24; for iron oxide miners at Red Mill and for funeral undertakers at Montreal in the issue of March 31, and for barbers at Montreal in the issue of April 21.

A request for the amendment of the agreement for the building trades at Drummond, Arthabaska and Nicolet was gazetted March 24; requests for the amendment of the agreements for garages and

* In Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the Provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship, and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and 30 days are allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. References to the summary of this Act and to amendments to it are given in the LABOUR GAZETTE, January, 1949, page 65. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June 1934.

service stations and for the ornamental iron and bronze industry at Montreal, for barbers and hairdressers at St. Hyacinthe and at Chicoutimi, and for tannery employees in the province were published April 7. Requests for the amendment of the agreements for the handbag manufacturing industry in the province, for barbers and hairdressers at Hull, and for plumbers at Montreal were gazetted April 14. Requests for the amendment of the agreements for garage and service station employees and for the building trades at Quebec, for the building trades at Drummond, Arthabaska and Nicolet and at Sherbrooke were published in the issue of April 21.

Orders in Council were also published approving and extending the term of the levy of assessments on the parties to certain agreements and others approving special by-laws of certain joint committees.

Manufacturing

Textiles and Clothing

MEN'S AND BOYS' CLOTHING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated April 12, and gazetted April 14, amends the previous Orders in Council for this industry (L.G., Aug., 1947, p. 1174; Sept., p. 1306, Oct., p. 1474; April, 1949, p. 450, June, p. 735; Nov., 1950, p. 1903, and previous issues).

Cost-of-living bonus: all employers shall pay to their employees a cost-of-living bonus of 28½ cents per hour (previously 18½ cents per hour) with the following exceptions—employers who pay a sum equal to 3½ cents per hour for each regular and overtime hour worked by their employees into a social welfare plan shall only be required to pay a cost-of-living bonus of 25 cents per hour; employers in the odd pants and sportswear industry producing, in an amount exceeding 25 per cent of their total production garments not covered by this agreement, shall pay to their employees a cost-of-living bonus of 20 cents per hour; employers manufacturing children's sportswear and children's clothing, and girls' clothing (up to 14 years inclusive) shall pay a bonus of 17½ cents per hour; for apprentices with no previous experience in this industry engaged after the effective date of this amendment the cost-of-living bonus herein provided may be reduced by 7½ cents per hour for a period of 13 weeks, thereafter they shall receive the full bonus; for apprentices hired prior to the date of this amendment and engaged by employers who by a collective labour agreement with the union representing such employees, has agreed to give a second week's vacation with pay, to all employees with less than 2 years of service, the cost-of-living bonus herein provided may be reduced by 7½ cents per hour until said apprentices have completed 13 weeks of service. Manufacturers operating within the limits of the city of Quebec shall pay a cost-of-living bonus of 26 cents per hour instead of the general bonus of 28½ cents per hour. Manufacturers who contracted for military uniforms on a lump sum basis for the account of the Federal Government and whose tenders have been accepted prior to February 24, 1951, shall continue to pay a cost-of-living bonus of 18½ cents per hour; however, from August 31, 1951, the general cost-of-living bonus shall be paid on such contracts.

Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated March 28, and gazetted April 7, amends the previous Orders in Council for this industry (L.G., Sept., 1946, p. 1250, Dec., p. 1772; March, 1947, p. 369, April, p. 543, Dec., p. 1803; May, 1948, p. 486; May, 1949, p. 604).

Minimum hourly wage rates: the new ranges of minimum wage rates to be in effect from April 1, 1951, are shown in the table on page 828. (The minimum rates for journeymen compositors, journeymen keyboard machine operators, proof readers, castermen, journeymen bookbinders and operators on machines (bookbinding) are 15 cents per hour higher than those formerly in effect in zone I, 12 cents higher in zone II and 10 cents higher in zone III; rates for journeymen pressmen represent increases ranging from 9 to 17 cents per hour in the 3 zones and for assistant pressmen and feeders from 7 to 13 cents per hour; other classifications benefit by increases ranging from 2 to 13 cents per hour in all zones.)

Provisions governing apprenticeship regulations are included in this amendment.

Metal Products

ORNAMENTAL IRON AND BRONZE WORKERS, MONTREAL, THREE RIVERS AND SHERBROOKE DISTRICTS.

An Order in Council, dated March 22, and gazetted March 31, amends the previous Order in Council for this industry (L.G., Feb., 1951, p. 233).

Territorial jurisdiction: the area affected by this agreement which formerly comprised Montreal and district only is now extended and comprises: zone I—the Island of Montreal, Ile Bizard, the counties of Terrebonne, Laval, Deux-Montagnes, Argenteuil, Soulanges, Vaudreuil, Beauharnois, Châteauguay, Laprairie, Chambly, St. Jean, and Iberville; zone II—the counties of Three Rivers, St. Maurice, Champlain, Maskinonge, Nicolet, Yamaska, Laviolette, Berthier, Drummond, Arthabaska, Portneuf, Joliette, L'Assomption, Montcalm, Rouville, St. Hyacinthe and Sherbrooke.

Minimum hourly wage rates in zone I remain unchanged at $1.25 for mechanics and erector, $1.12 for fitter and blacksmith, $1 for helper (shop and field); in zone II the new minimum wage rates are: mechanics $1, fitter, blacksmith 90 cents per hour; helper (shop or field) 80 cents.

The present agreement does not govern erection work in zone II nor does it apply to employers and employees in zone II executing contracts signed prior to January 1, 1951.

Non-metallic Minerals and Chemicals

GLASS PROCESSING INDUSTRY, QUEBEC.

An Order in Council, dated April 12, and gazetted April 21, amends the previous Orders in Council for this industry (L.G., Oct., 1950, p. 1679). This amendment to be in effect from February 1, 1951.

MINIMUM HOURLY WAGE RATES (DAY WORK) FOR JOB PRINTING TRADES, MONTREAL ISLAND AND WITHIN 100 MILES OF IT IN THE PROVINCE OF QUEBEC

—	Zone I	Zone II	Zone III
	$	$	$
Composing Room			
Journeyman compositor, journeyman machine keyboard operator, proof reader, casterman	1.55	1.27	1.15
Caster runner	.48— .73	.41— .62	.38— .59
Press Room			
Journeyman pressman (rotary presses, flat bed, cylinder presses, etc.)	1.55—1.72	1.27—1.33	1.15—1.26
Assistant pressman and feeders for above presses	1.10—1.33	.88—1.05	.82— .99
Journeyman pressman (platen presses and multicopying machines)	1.33	1.05	.99
Feeder on above presses	1.02	.83	.77
Bookbinding and Finishing Department			
Journeyman bookbinder and operators on machines	1.55	1.27	1.15
Paper trimmers and choppers	1.04	.83	.77

All Departments			
Apprentices (male)	.48—1.31	.41—1.05	.38— .99
Helper (male) unskilled	.48— .59	.41— .51	.38— .48

Overtime provisions which provide double time for work on 3 specified *paid holidays* are extended to include St. Jean Baptiste Day.

Minimum hourly wage rates: the minimum wage scale previously in effect has been revised and instead of showing minimum and maximum rates only, it is now divided into 2 parts and the occupations are grouped as follows: part 1: setters class "A"—$1.03 per hour, class "B"—91 cents, class "C"—75 cents, first year 65 cents; bevellers, silverers, cutters class "A"—$1 per hour, class "B"—88 cents, class "C"—75 cents, first year 65 cents; in part 2: (no class "A"), scratch polishers, spinners, examiners, buffers, belt workers, frosters, sand polishers and draughtsmen class "B"—83 cents, class "C"—70 cents, first year 60 cents; silverers' helpers, spray painter class "B"—76 cents, class "C"—65 cents, first year 55 cents; shippers (full time) class "B"—93 cents, class "C"—77 cents, first year 65 cents; packer class "B"—81 cents, class "C"—70 cents, first year 60 cents; truck drivers class "B"—86 cents, class "C"—72 cents, first year 60 cents; warehousemen's and setters' helpers class "B"—78 cents, class "C" 68 cents, first year 60 cents. The progression of employees to a higher classification is determined in part I by the apprenticeship periods completed and length of experience in their trade and in part 2 by the length of experience in their trade or occupation. (The minimum rates shown above in part 1 for class "A" employees is 10 cents per hour higher than the maximum range previously in effect and 6 cents higher in part 2 for class "B" employees; rates shown for first year employees in parts 1 and 2 are similar to the rates previously in effect and formerly indicated as the minimum range.)

Construction

Building Trades, Hull.

An Order in Council, dated March 7, and gazetted March 24 extends the term of the previous Orders in Council for this industry (L.G., Jan., 1950, p. 78, April, p. 517, Nov., p. 1905; Jan., 1951, p. 64, March, p. 358) to November 12, 1951.

Another Order in Council, dated April 12, and gazetted April 21, further amends the previous Orders in Council for this industry.

Minimum hourly wage rates in zone I: rates for bricklayers, masons are increased from $1.55 to $1.70 per hour; painters from $1.10 to $1.22; common labourers until May 1, 1951, 85 cents (an increase of 10 cents), after May 1, 1951, 90 cents per hour. All urgent or special work which cannot be done during the daily working period may be carried out at any other time of the day, subject to notice to Parity Committee. This work is payable at regular rates plus 10 cents per hour, but the employees shall not work during the day.

Building Trades, Three Rivers.

An Order in Council, dated March 7, and gazetted March 24, amends the previous Orders in Council for this industry (L.G., March, 1947, p. 370, Nov., p. 1661; Jan., 1948, p. 51, Aug., p. 873; Sept., 1949, p. 1116; Feb., 1950, p. 209, Nov., p. 1905, and previous issues).

Minimum hourly wage rates: in accordance with a *cost-of-living* wage adjustment provided for in a previous amendment (L.G., Nov., 1950, p. 1906) the minimum rates for all employees of zone I governed by this agreement, with the exception of apprentices, are increased by 5 cents per hour effective from September 25, 1950, inclusive.

Building Trades, Montreal.

An Order in Council, dated March 28, and gazetted April 7, extends the term of the previous Orders in Council for this industry (L.G., June, 1950, p. 874, Oct., p. 1679, Nov., p. 1904, Dec., p. 2067, Feb., 1951, p. 233) to June 1, 1951.

Building Trades, Joliette.

An Order in Council, dated April 4, and gazetted April 14, amends the previous Orders in Council for this industry (L.G., Aug., 1947, p. 1175; June, 1948, p. 620; June, 1949, p. 736; July, 1950, p. 1053, Nov., p. 1905, and previous issues).

Minimum hourly wage rates for selected classifications: bricklayer, sprinkler fitter, $1.25 per hour in zones I and II; carpenter-joiner, asbestos coverer, pipe insulation mechanic, roofer (slate, tile), roofer (composition, sand, gravel, asphalt), millwright, tile, asphalt and terrazzo layer, marble layer, pipe welder (acetylene and electricity) and rigger (hand and machine) $1.25 in zone I, $1.15 in zone II; electrician $1.30 in zone I, $1.25 in zone II; tinsmith, roofer, sheet metal worker (shop or job), plumber, steamfitter, pipe mechanic, oil burner mechanic $1.25 in zone I, $1.20 in zone II; power shovel operator $1.30 in zone I, $1.20 in zone II; cement finisher, blacksmith (on job), drill operator and blaster $1.20 in zone I, $1.15 in zone II; tractor operator, lather (metal or composition), reinforcing steel erector $1.10 in zones I and II; painter and decorator, pile driver (wood or concrete) $1.10 in zone I, $1 in zone II; bulldozer operator, grader operator, roller operator $1.05 in zones I and II; fireman (construction) compressor operator $1.05 in zone I, $1 in zone II; lather (wood) $1 in zone I, 95 cents in zone II; truck driver 95 cents in zone I, 85 cents in zone II; machinist, labourer (brick, block, mortar, etc.) 95 cents in zone I, 90 cents in zone II; labourer (common), boilerman 85 cents in zone I, 80 cents in zone II; watchmen employed also as fireman and required to hold a fourth class certificate, boiler fireman required to hold fourth class certificate 93 cents in zone I, 83 cents in zone II; watchmen on the job (night or day) 65 cents in zones I and II; asphalt raker 85 cents in zone I, 75 cents in zone II. Foremen in charge of a group of 3 or more men shall be paid 10 cents per hour more than the rate established for the trade concerned. Minimum rates for those apprentices to trades requiring an apprenticeship period of 4 years range from 70 cents per hour in the first year to 95 cents in the fourth year in zone I, 65 cents to 90 cents in zone II; rates for apprentices to trades requiring an apprenticeship period of 3 years (includes apprentice bricklayers) range from 65 cents in first year to $1 in third year in zone I, 60 cents to $1 in zone II. (The minimum rates shown above are from 10 cents to 20 cents per hour higher than those which were formerly in effect.)

Vacation: employees continuously in the service of one employer during the vacation-with-pay credit period, May 1 of one year to April 30 of next, are entitled to 7 consecutive days vacation. All employers must, at the end of each regular pay period, place in his employee's vacation-with-pay stamp book vacation-with-pay credit stamps in an amount equal to 2 per cent of the gross amount of such pay. Vacation-with-pay credit stamps are redeemable from the Minimum Wage Commission after April 30 each year. (Provision governing vacation with pay is a new one.)

Building Trades, Sherbrooke.

An Order in Council, dated April 4, and gazetted April 14, amends the previous Orders in Council for this industry (L.G., Nov., 1947, p. 1661; Dec., 1948, p. 1421; Feb., 1949, p. 178; Feb., 1950, p. 209, Nov., p. 1905). This agreement shall apply to all operations of construction, installation, rebuilding, repair, maintenance, demolishing, permanent addings to and moving of buildings, roads, water works, sewers, canals, tunnels, bridges, sustaining or ornamentation walls; it also covers levelling, earthwork or other work subject to the Electricians and Electrical Installations Act or digging for foundations or similar operations. Road operations carried out for any department of the Provincial Government already governed by the Fair Wage Schedule under Order in Council No. 800 of April 24, 1929 as amended, are not subject to the provisions of the present agreement.

Hours: 8 per day Monday through Friday, 4 hours on Saturday, a 44-hour week; in the city of Granby and within a radius of 5 miles from its limits, 9 hours Monday through Thursday, 8 hours on Friday, a 44-hour week, no work on Saturday. However, pipe mechanics, tinsmith-roofers and electricians may answer emergency calls. (The above hours represent a reduction of 4 hours per week.) Hours for permanent maintenance employees remain unchanged at 48 per week.

Minimum hourly and weekly wage rates: bricklayer, mason, plasterer, stonecutter $1.35 in zone I, $1.30 in zone II, $1.25 in zone III; mason (foundation rough masonry), tile layer $1.25 in zone I, $1.20 in zone II, $1.15 in zone III; painter, paper hanger, tractor and compressor operator, drill operator and blaster $1.05 in zone I, $1 in zone II, 95 cents in zone III; sprayman, electrician, stationary or portable steam enginemen (cranes and mixers) $1.10 in zone I, $1.05 in zone II, $1 in zone III; carpenters-joiner, pipe mechanic, steamfitter, pipe welder, tinsmith or sheet metal worker and roofer $1.15 in zone I, $1.10 in zone II, $1.05 in zone III; steam boiler fireman (fourth class certificate), ornamental iron erector, terrazzo polisher (dry or wet), floor polisher, fireman (power shovel), junior journeymen (first year) $1 in zone I, 95 cents in zone II, 90 cents in zone III; stationary or portable gasoline engine operator (mixer and crane), truck driver, stationary or portable electric machines and crane or mixer operators, marble and terrazzo layer 95 cents in zone I, 90 cents in zone II, 85 cents in zone III; labourer 90 cents in zone I, 85 cents in zone II, 80 cents in zone III; night watchmen (56 hour week) 60 cents in zone I, 55 cents in zone II, 50 cents in zone III; blacksmiths $1.05 in zone I, $1 in zones II and III. Rates for apprentice electricians and painters range from 60 cents per hour in the first year to 90 cents in the fourth year in zone I, 57½ cents to 87½ cents in zone II, 55 cents to 85 cents in zone III; apprentice bricklayers, etc., from 70 cents in the first year to $1 in the fourth year in zone I, from 65 cents to 95 cents in zone II, from 60 cents to 90 cents in zone III; apprentice carpenters from 65 cents in the first year

85256—5½

to 95 cents in fourth year in zone I, from 62½ cents to 92½ cents in zone II, from 60 cents to 90 cents in zone III; apprentice pipe mecahnics, steamfitters, pipe welders, tinsmith sheet metal workers and roofers (excepting those employed in the city of Sherbrooke and within a radius of 2 miles from its limits) from 60 cents in the first year to 75 cents in fourth year in zone I, from 57½ cents to 72½ cents in zone II, from 55 cents to 70 cents in zone III. (The above minimum rates represent an increase of 10 cents per hour over those previously in effect.) Rates for power shovel operator $55.20 per week in zones I and II, $50.20 in zone III and for apprentice pipe mechanics, steamfitters, pipe welders, tinsmith sheet metal worker and roofer (in the city of Sherbrooke and within a radius of 2 miles from its limits) from 55 cents in the first year to 70 cents in the fourth year are unchanged. The following new classifications are added to the wage scale—asphalt raker $1.25 in zones I, II and III; asphalt roller driver $1.20 in all 3 zones; asphalt raker's helper $1 in all 3 zones; asphalt shoveller 90 cents in all 3 zones; rigger $1.05 in zones I and II, $1 in zone III; grader driver $1.30 in all 3 zones; shovel operator's helper $44 per week in zones I and II, $39.60 in zone III. Minimum weekly wage rates for permanent maintenance employees are increased by $2.40 per week and are as follows: journeymen $28.80 in zone I, $26.80 in zone II, $24.80 in zone III; labourer $24.80 in zone I, $22.80 in zone II and $20.80 in zone III.

The above minimum rates include the increase of 5 cents per hour made January 15, 1951, in pursuance of the escalator clause.

Vacation: employees continuously in the service of one employer during the vacation-with-pay period (May 1 of one year to April 30 of next), are entitled to 7 consecutive days vacation. Employers must, at the end of each pay period, affix in his employee's vacation-with-pay stamp book, stamps in an amount equal to 2 per cent of the gross amount of such pay. Vacation-with-pay credit stamps are redeemable from the Minimum Wage Commission after April 30 each year. (Provision governing vacations is a new one.)

Apprenticeship regulations are included in this amendment.

Construction lump sum contracts granted and signed before the coming into force of the present amendment are not bound by its provisions with the exception of that provision governing vacations-with-pay.

Transportation and Public Utilities

Water Transportation

FREIGHT HANDLERS (LONGSHOREMEN) (INLAND AND COASTAL NAVIGATION), MONTREAL HARBOUR.

An Order in Council, dated March 22, and gazetted March 31, amends the previous Orders in Council for this industry (L.G., April, 1943, p. 490; June, 1948, p. 621, Nov., p. 1249; Dec., 1950, p. 2068) by increasing the minimum wage rates to $1.07 per hour for work done between 7 a.m. and 7 p.m. and to $1.12 for work between 7 p.m. and 7 a.m., which is an increase of 7 cents per hour.

Trade

WHOLESALE AND RETAIL STORES, RIMOUSKI.

An Order in Council, dated March 22, and gazetted March 31, amends the previous Orders in Council for this industry (L.G., March, 1949, p. 303; March, 1950, p. 346).

Minimum weekly wage rates to be in effect from January 29, 1951: in most cases the minimum wage rates for male employees are increased by $3 per week and for female employees by $1.25 per week.

Escalator clause: for each variation of one point in the cost-of-living index, based on 171·1 points, an upward or downward readjustment of 35 cents per week for male employees and 15 cents per week for female employees. This readjustment shall apply only after a variation of 3 points in the index but there shall be no reduction in wages if the federal cost-of-living index does not lower to or below the 160-point mark.

Industrial Standards Acts, Etc.

Schedules of Wages and Hours Recently Approved by Provincial Orders in Council In Ontario and Alberta

Recent proceedings under the Industrial Standards Acts, etc.* include five new schedules, all summarized below.

ONTARIO

Manufacturing

Textiles and Clothing

MILLINERY WORKERS, PROVINCE OF ONTARIO.

An Order in Council, dated March 15, and gazetted March 31, makes binding the terms of a new schedule for millinery workers in the Ontario zone, to be in effect from April 10, 1951, during pleasure.

* In six provinces—Nova Scotia, New Brunswick, Ontario, Manitoba, Saskatchewan and Alberta—legislation provides that following a petition from representatives of employers and employees in any (or specified) industries, the provincial Minister charged with the adminstraton of the Act may himself or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carryng out the provisions of the Act and the regulations. References to the summaries of these Acts and to amendments to them are given in the LABOUR GAZETTE, April 1950, page 518.

Hours: 8 per day, a 40-hour week in the counties of Halton, Ontario, Peel, Wentworth and York; 9 per day, a 45-hour week in all other parts of Ontario.

Overtime: time and one-half for work done in excess of the regular working periods throughout the province but is restricted to 10 hours overtime per week, during the 2-hour period immediately following a regular working-day and the 4-hour period between 8 a.m. and noon Saturday. This overtime may be done only during a 6-week period between January 15 to May 15 and between July 15 and November 15 all inclusive. Overtime work on 3 of 7 specified holidays (4 of which are *paid holidays* after one month of service) is payable at the rate of double time. No overtime work to be performed without a permit from the advisory committee.

Minimum hourly wage rates in counties of Halton, Ontario, Peel, Wentworth and York: class "A"—hand blockers $1.45 per hour, class "B"—blocker and presser (hand and machine) $1.34, class "C"—cutters, operators $1.30, class "D"—drapers 93 cents, class "E"—trimmers 74 cents, class "F"—general hand 50 cents; in all other parts of Ontario: class "A"—hand blockers $1.31 per hour, class "B"—blocker and presser $1.23, class "C"—cutters, operators $1.17, class "D"—drapers 84 cents, class "E"—trimmers 67 cents, class "F"—general hands 45 cents.

The advisory committee is authorized to set lower minimum rates for workers who perform work included in more than one classification of employees, for those workers whose work is only partly subject to the provisions of this schedule, or for those workers who are handicapped.

Each employer is assessed an amount equal to one-half per cent of his payroll and each employee one-half per cent of his wages to be paid to the advisory committee for the enforcement of the schedule.

Construction

Carpenters, Ottawa.

An Order in Council, dated February 15, and gazetted March 3, makes binding the terms of a new schedule for carpenters in the Ottawa zone, to be in effect from March 13, 1951, during pleasure.

Hours: 8 per day, Monday through Friday, a 40-hour week. Work that cannot be performed during regular daily working hours may be done at night if an employee does not work in excess of 8 hours, this work to be known as *night work*. Work performed in 2 or more shifts, if an employee works not more than 8 hours in any 24-hour period, employee shall be deemed to be employed during a regular working-day. Only one shift will be known as a day-shift.

Overtime is payable at double time except that 4 hours' overtime may be added to any regular working day at time and one-half. Work on Saturday between 8 a.m. and 12 noon is also payable at time and one-half. Except in cases of extreme necessity where life or property is in danger or on repairs to buildings where the work must be done to prevent loss of employment to those regularly employed therein, no work shall be done on Saturday, Sunday or any of 5 specified holidays without a permit issued by the advisory committee.

Minimum hourly wage rates: $1.30 per hour for work during regular working periods and for *night work*. Employees working on night shifts receive 8 hours' pay for 7 hours' work. (The rate shown above is unchanged from that formerly in effect.)

The advisory committee is authorized to fix a lower minimum rate of wages for handicapped workers.

Painters and Decorators, Kingston.

An Order in Council, dated March 29, and gazetted April 14, makes binding the terms of a new schedule for the painting and decorating industry in the Kingston zone, to be in effect from April 24, 1951, during pleasure.

Hours: 8 per day, Monday through Friday, a 40-hour week. Work that cannot be performed during regular daily hours may be done during other hours and this work will be known as *night work* except when performed on a job completed in a 20-hour period. Employees working 8 hours in any 24-hour period shall be deemed to be employed during a regular working day. No employee shall work more than 12 hours in any 24-hour period.

Overtime: time and one-half for work performed during the 7-hour period following a regular working day (8 a.m. to 5 p.m.) and during the 4-hour period following 8 hours of *night work;* double time for all other overtime work and for work on Saturdays, Sundays and 7 (previously 5) specified holidays. No overtime work on Labour Day without a permit from the advisory committee.

Minimum hourly wage rates: spray painters $1.35, painters and decorators $1.25. The advisory committee is authorized to fix a lower minimum rate for handicapped workers.

ALBERTA

Manufacturing

Metal Products

Garages and Service Stations, Lethbridge.

An Order in Council, dated February 26, and gazetted March 15, makes binding the terms of a new schedule for the automotive repair and gasoline service station industry in the Lethbridge zone, to be in effect from March 25, 1951, for a period of 12 months, thereafter during pleasure.

Hours: 46½ hours per week of 5½ days (a reduction of 1½ hours).

Overtime: time and one-half; double time for work on Sundays and 7 specified statutory holidays to all employees except front end men, floor service men, night watchmen, storage attendants and/or gas service men working on their usual shifts Sundays and/or statutory or public holidays who if not granted a day off in lieu thereof within 7 days will be paid time and one-half.

Minimum wage rates: mechanics $1.10 and $1.20 per hour; front end men, greasemen, washmen, undercoatmen, night men, floor men (under 21 years of age) provincial minimum wages, (over 21 years of age) from $25 per week in first 6 months to $30 per week after one year; parts room employees (over 21 years of age) from $25 per week in first 6 months (on probation) to $140 per month second year.

Vacation: after one year's continuous service with one employer automotive mechanics, washmen, greasemen, undercoatmen,

parts technicians, parts room employees, front end men, floor men, night watchmen and others covered by this schedule shall receive 2 weeks vacation with pay. In case of cessation of employment the provisions of Holidays with Pay Regulations or Order of the Board of Industrial Relations shall apply.

Apprentices are governed by the terms of the Apprenticeship Act.

Trade

DAIRY INDUSTRY, CALGARY.

An Order in Council, dated February 26, and gazetted March 15, makes binding the terms of a new schedule for the dairy industry in the Calgary zone, to be in effect from March 25, 1951, for a period of 12 months, thereafter during pleasure.

Hours for male and female employees: 8 per day, 44-hours per week (previously 9 per day, 48 per week); hours for drivers on commission remain unchanged at 9 per day, 48-hours per week.

Overtime for work in excess of regular hours and on weekly day of rest as previously in effect is payable at time and one-half the ordinary rate paid (for salesmen one and one-half times the basic wage paid); double time as above for work on any of 8 specified paid holidays, subject to alternative provisions which may be adopted by the employers.

Minimum monthly wage rates: plant, male —special dairy help $155.80 per month, experienced dairy help $150.80, inexperienced dairy help (first 90 days) $135.80; (second 90 days) $143.30; plant, female—experienced plant $115.80, inexperienced plant (first 90 days) $100.80; (second 90 days) $108.30. (The above rates are $25.80 per month higher for male employees, and for experienced plant females $35.80 per month higher than those formerly in effect.) Minimum rates for retail drivers $154.80 plus commission, route reliefman $185.80 plus commission, wholesale route driver $144.80 plus commission, route helpers (experienced) $145.80 per month. (Rates for salesmen range from $25.74 per month to $45.80 higher than those previously in effect.) Commission rates are specified with certain readjustments in comparison to those previously in effect.

Vacation: one week of vacation with pay for employees who have one year's service at May 1 of each year; two weeks to those employees with 2 years or more of service at May 1; those employees with less than one year of service at May 1 of each year are entitled to one-half day for each 23 days worked. Employees leaving the service of an employer after 30 days' employment but less than one year are entitled to (in lieu of vacation) an amount equal to 2 per cent of their regular pay for the period of employment; 4 per cent in the case of an employee in his second or subsequent year of employment.

Temporary summer help employed from May 1 to September 30 shall not be governed by this schedule.

Employers paying higher wages than this schedule provides for or working their employees less hours are prohibited from decreasing the wages or increasing the hours during the term of this schedule.

Changes in Wage Rates and Hours of Work in Recent Collective Agreements

Examination of some 307 collective agreements signed during the first four months of 1951, and which have been received in the Economics and Research Branch of the Department of Labour, shows that almost all agreements include some provision for an increase in wage rates. Non-wage items including hours of work were altered in a lesser number of cases. Among the agreements received, eighteen out of every twenty indicated a wage advance, but only one out of every ten agreements included a change in hours. Wage advances for the most part amounted to five cents or more an hour, but changes in hours were relatively small.

The contents of the new wage clauses in the agreements can be summarized as follows:—

No change in wages	17
Changes in hourly wage rates	156
Changes in piece rates	1
Changes in weekly rates	40
Changes in monthly rates	57
New agreements	36
Total agreements received	307

The wage clauses providing advances in weekly or hourly rates can be combined and expressed in hourly equivalents as is done in Table I. The result indicates that the greatest number of weekly and hourly advances were between five and ten cents an hour. More workers, however, benefited by the slightly lesser number of increases ranging from ten to fifteen cents. This difference is largely attributable to the presence in the second group of some 32,000 British Columbia logging and wood products workers, all covered under a single master agreement.

Industrially, the manufacturing group has the largest number of wage changes, concentrated between the five and fifteen cent levels. Although no precise pattern is evident, in the industry group as a whole or in its sub-groups, the wage advances tend to cluster around the ten cent level.

A portion of the agreements providing wage advances are continuing to include escalator clauses providing for periodic wage adjustments in accord with changes in the

TABLE I.—HOURLY WAGE INCREASES IN COLLECTIVE AGREEMENTS RECEIVED IN THE DEPARTMENT OF LABOUR AND COMING INTO EFFECT DURING THE FIRST FOUR MONTHS OF 1951*

Amount per Hour	No. of Agreements								Workers Covered
	Logging	Mining	Mfg.	Construction	Transportation and Communications	Public Utilities	Trade Finance Service	Total	
No Change	.....	.....	6	.....	5	1	5	17	2,200
Less than 5 cents	.....	.....	3	.....	1	.....	5	9	900
5— 9·9 cents	1	.....	56	1	8	5	10	81	33,400
10—14·9 cents	1	7	50	3	1	4	9	75	56,800
15 cents or over	.....	6	12	7	3	.....	3	31	9,200
New Agreement	1	2	8	2	5	1	17	36	2,300
Total	3	15	135	13	23	11	49	249	104,800

* Weekly increases are expressed on an hourly basis. Where increases varied within a plant a weighted average was adopted. Monthly increases omitted (57 agreements covering 9,100 workers). Piece rates omitted (1 covering 1,500).

official cost-of-living index. Such clauses appear in one out of every seven agreements but the agreements including these clauses usually cover more than the average number of workers in the agreements received.

There is a wide variety in the formulae contained in the escalator clauses for linking wages and the cost of living.* The plan most frequently found last year provided for a twenty-five cent a week wage bonus for each rise of one point in the index. The current plans are giving more attention to specified changes in hourly wage rates following changes in the index. One of the formulae found most frequently in the agreements examined provides for a one cent increase in hourly rates for every 1·3 points rise in the index. This and other formulae in current agreements are shown in Table II.

During the first four months of 1951 bargaining over wage increases for workers in the running trades on Canadian railways was completed. In the agreements signed the wage increases are shown by increases in the rates paid for each hundred miles worked in accord with the practice of paying workers on a mileage basis. The increases shown *are not included in* Table I and are as follows:—

	Increase (100 miles)		
	Passenger	Freight	Yard
Engineers	1.01	1.12	1.12
Firemen, helpers and hostlers	1.16	1.16	1.16**
Conductors, Trainmen and Baggagemen	.77*	1.16	....
Yardsmen and Switch Tenders	....	....	1.16**

* $34.80 added to monthly guarantee.
** per day of 8 hours.

A reduction in standard working hours is indicated by clauses contained in some thirty-one agreements covering approximately four thousand workers. Such reductions were small, usually affecting workers with relatively long hours, and in all cases the employee's take-home pay was more than maintained as a result of the wage rate increase.

Since little information is contained on standard hours in some thirty-eight agreements indicating monthly wage increases, the hourly equivalent of the wage advance for the three thousand workers affected cannot be computed. These agreements are mainly in water transportation. The increases vary widely since they are based on job classifications and no fixed pattern appears to have been followed.

Press reports disclose that agreements between major pulp and paper companies in New Brunswick, Quebec, and Ontario, and several TLC-AFL unions have been concluded in Montreal and Toronto. Twelve firms and approximately 12,000 workers are said to be affected.

In the Montreal negotiations covering approximately 5,000 workers wage increases of 15 cents an hour for hourly-paid employees, 10 per cent with a maximum of 15 cents an hour for paper makers, and six cents an hour for mechanics and helpers were reported to have been agreed upon. At Toronto reports indicate that the agreement signed affecting between 6,000 and 7,000 workers provided increases ranging from 11 to 24 cents an hour. A five-day, forty-hour week proposed by the unions was postponed.

*See below for summaries of representative clauses.

TABLE II.—COST OF LIVING ADJUSTMENT FORMULAE IN COLLECTIVE AGREEMENTS

An analysis of clauses contained in 46 agreements out of 307 Agreements signed and received in the Department of Labour during the first four months of 1951

Formula	Equivalent in Cents Per Hour per Point	No. of Agreements
1 cent per hour per point	1 cent	2
5 cents per hour per 5 points	1 cent	1
40 cents per week per point (a 45-hour week)	.89 cent	1
40 cents per week per point (a 48-hour week)	.83 cent	6

FAIR WAGES CONDITIONS IN DOMINION GOVERNMENT CONTRACTS

The Fair Wages Policy of the Dominion Government has the purpose of ensuring that all government contracts contain provisions to secure the payment of wages generally accepted as current in each trade for competent workmen in the district where the work is carried out.

There are two sets of conditions applicable to government contracts, those which apply to building and construction work, and those which apply to contracts for the manufacture of various classes of government supplies and equipment.

The practice of the different departments of the Government, before entering into contracts in the first group, is to obtain from the Department of Labour schedules setting forth the current wage rates for the different classifications of workmen required in the execution of the work. These schedules, known as fair wages schedules, are thereupon included by the department concerned in the terms of the contract.

Fair wages schedules are not issued in respect of contracts for supplies and equipment. Contracts in this group are awarded in accordance with a policy which provides that wage rates must equal those current in the district.

A more detailed account of the Dominion Government's Fair Wages Policy is given in the LABOUR GAZETTE for July, 1946, p. 932.

Schedules Prepared and Contracts Awarded During March

(1) ***Works of Construction, Remodelling, Repair or Demolition.***

During the month of March the Department of Labour prepared 147 fair wages schedules for inclusion in building and constructon contracts proposed to be undertaken by various departments of the Government of Canada in different parts of the Dominion.

During the same period a total of 60 construction contracts was awarded by the various Government departments. Particulars of these contracts appear below.

Copies of the relevant wages schedules are available to trade unions or other *bona fide* interested parties, on request.

The labour conditions of each of the contracts listed under this heading, besides stipulating working hours of not more than eight per day and forty-four per week, provide that "where, by provincial legislation, or by agreement or current practice, the working hours of any class of workers are less than forty-four per week, such lesser hours shall not be exceeded on this work except in cases of emergency as may be approved by the Minister of Labour and then only subject to the payment of overtime rates as specified by the Minister of Labour", and also specify that the rates of wages set out therein are "*minimum* rates only" and that "nothing herein contained shall be considered as exempting contractors and subcontractors from the payment of higher rates in any instance where, during the continuance of the work such higher rates are fixed by provincial legislation, by agreements between employers and employees in the district or by changes in prevailing rates".

(2) *Contracts for the Manufacture of Supplies and Equipment.*

Contracts for supplies and equipment were awarded as follows, under the policy that wage rates must equal those current in the district:—

Department	No. of contracts	Aggregate amount
Agriculture	3	$ 139,361.60
Canadian Commercial Corporation	11,741	29,549,424.15
Post Office	12	62,703.10
Public Works	1	5,450.00
R.C.M.P.	5	366,145.00

(3) *Arrears of Wages*

During the month of March the sum of $572.10 was collected from one employer who had failed to pay the wages required by the labour conditions attached to his contract. This amount was distributed by the Department to the 22 employees concerned.

Contracts Containing Fair Wages Schedules Awarded During March

(The labour conditions of the contracts marked (*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of 8 per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

Canadian Commercial Corporation

London Ont: E P A Construction Co Ltd, re-activation of hangar No 2, RCAF Station. *Rivers Man:* Maple Leaf Construction Ltd, repairs & renovation of roads, CJATC.

Department of Transport

Ottawa Ont: H J McFarland Construction Co Ltd, additional development of airport.

Labour Law

Recent Regulations Under Dominion and Provincial Legislation

For security reasons, regulations were passed under the Emergency Powers Act requiring seamen employed on Canadian vessels operating on the Great Lakes and St. Lawrence River to hold a seaman's card in order to take or continue in employment.

Minimum wage rates were raised $3 a week in Saskatchewan in line with the rise in the cost of living and are now $24 a week in the cities and larger towns and $21.50 in smaller places. Regulations were issued under the Newfoundland Workmen's Compensation Act which came into force on April 1. The annual premium payable under the British Columbia Hospital Insurance Act was raised by $9, and from June 30 a beneficiary is required to pay a portion of the hospital charges covering the first 10 days of his hospitalization. The administration of the Alberta Factories Act, the Electrical Protection Act and the Welding Act was transferred to the Department of Industries and Labour.

DOMINION

Emergency Powers Act

Great Lakes Seamen's Security Regulations

From June 1, 1951, every seaman employed on board a Canadian ship on the Great Lakes must be the holder of a seaman's card, by an Order in Council (P.C. 1439) made on March 22 and gazetted on April 11 and amended by P.C. 2101 gazetted on May 9. The term "seaman" means a person employed in any capacity on board a ship and includes the master of the vessel.

The regulations apply to all ships registered or owned in Canada, including those operated under charter or lease by a person who resides in Canada, which sail on the Great Lakes and their connecting waters and on the St. Lawrence River as far east as the lower exit of the Lachine Canal and the Victoria Bridge at Montreal.

From June 1 to July 31 a seaman may hold either an interim or a regular seaman's card but after August 1 he must possess a regular seaman's card.

No person may employ a seaman who does not hold the required card nor may a seaman without a card accept employment or act as a seaman.

It is the duty of the master of the ship to require every seaman on board to produce his card before the ship sails, and he is forbidden to leave port if a seaman on board cannot do so. Customs Officers are prohibited from granting customs clearance to a vessel unless they have been furnished with a certificate from the master stating that every seaman on board has a seaman's card. Seamen are required to produce their cards at any time on request of a Peace Officer as defined in the Criminal Code or of any person authorized to act on behalf of the Minister for the purpose of the regulations.

The regulations are administered by the Minister of Labour through the National Employment Service of the Unemployment Insurance Commission.

To obtain a card, a seaman must apply to a National Employment Office on the prescribed form and submit three passport-size photographs of himself taken within the preceding year. The applicant is also required to be fingerprinted in the presence of an officer of the National Employment Service. If the Minister is satisfied that the presence of the applicant on board a Canadian ship in the Great Lakes might prejudice the security of Canada, he may refuse to issue a seaman's card. He may also require a seaman to deliver his card to the National Employment Service for the same reason. The Minister may issue a duplicate card to a seaman who reports the loss of his card, provided that he is satisfied that the circumstances of the loss have

been satisfactorily explained. A seaman is forbidden to permit any other person to use his card.

Provision is made for hearing the appeal of any person who has been refused a card or whose card has been revoked. An appeal in writing may be made to the Minister, and within a reasonable time before hearing the appeal the Minister must inform the appellant of the grounds on which he is not allowed to hold a seaman's card, in so far as, in the Minister's opinion, it is possible to do so without prejudice to the security of Canada and the public interest. The regulations permit the appellant to be assisted by his counsel or other representative at the hearing of his appeal.

To advise him regarding appeals the Minister must appoint committees of at least three members and supply them with all available information relating to the application which he considers is not contrary to the public interest to disclose. An advisory committee is to have the powers of a commissioner under Part I of the Inquiries Act. Its chairman and members are authorized to administer oaths and the committee may accept evidence on oath, by affidavit or otherwise. The committee must report to the Minister with respect to the disposition of the appeal, and after considering the report, the Minister may grant or refuse to grant a card to the appellant. The decision of the Minister is then final.

The Minister may request the co-operation of any Government department or branch in the administration of the regulations.

A fine up to $500 or imprisonment up to three months, or both, may be imposed, on summary conviction, if any person knowingly furnishes false information in support of an application for a seaman's card or fails to comply with any provision of the regulations.

PROVINCIAL

Alberta Factories Act

From April 1, the administration of the Factories Act was transferred from the Department of Public Works to the Department of Industries and Labour by an Order in Council (O.C. 394-51), made on March 27 and gazetted on April 14. The same Order in Council also transferred the administration of the Electrical Protection Act and the Welding Act to the Department of Industries and Labour.

British Columbia Hospital Insurance Act

Important amendments, which will come into effect on June 30, were made to the regulations under the British Columbia Hospital Insurance Act (L.G., 1950, p. 1065) by three Orders in Council gazetted on March 22, April 12 and April 19. These provide for a higher hospital insurance premium with a corresponding raise in the amount of payroll deduction, require a beneficiary who is hospitalized to pay a portion of the approved daily hospital charge, and broaden the definition of "dependant" to include unmarried persons between the ages of 15 and 19 who are mainly supported by the head of the family.

The annual hospitalization premium was increased by $9. The premium to be paid by a single person is now $30 instead of $21, and that for the head of a family $42 instead of $33. The Hospital Insurance Act was amended at the 1951 session of the Legislature to raise to $42 the maximum annual amount which may be levied on a person or family for hospitalization.

Where the employer is required to deduct premiums from his employee's wages, he must deduct each month $2.50 from each single person and $3.50 from each worker who is the head of a family instead of $1.75 and $2.75, as before. An employer who has deducted monthly premium instalments applicable to the last six months of 1951 during the first six months of the year at the former rate is required, on receiving a notice from the Commissioner, to make the necessary additional deductions to collect the increased premium.

Provision was made, by an amendment to the Act in 1950, whereby a beneficiary might be required, with the approval of the Lieutenant-Governor in Council, to pay part of the cost of hospital treatment or services rendered to him. The regulations provide that a beneficiary who receives as an in-patient any of the general hospital services provided under the Act must now pay, during the first 10 days of his hospitalization, a portion of the approved daily charge made by the hospital. The portion which the beneficiary must pay is approximately one-third of the daily charge made by the hospital and ranges from $2 where the hospital charge is $8 or less to $3.50 where the hospital charge is between $10.50 and $14.

A beneficiary may not be required to pay a portion of his hospital charges for more than 10 days in a year. If a person has paid part of the hospitalization charges for one or more days of the current year he must, on any subsequent hospitalization, only be charged for part payment up to 10 days less the number of days for which he was previously required to pay. If he is confined to hospital for less than 60

consecutive days extending from one year to the next, he may not be charged for more than 10 days during the period.

No partial payment is required on behalf of an infant born to a beneficiary. The Provincial Government which pays the premium with respect to recipients of old age pensions, mothers' allowances and other social assistance must also pay the sum required to be paid for the first 10 days of hospitalization of any such recipient.

The sum of $2 must now be paid by a beneficiary who is given emergency services within 24 hours of being accidentally injured or who receives services under the Act which can normally be secured only in a hospital but is not admitted as an in-patient. Any amount in excess of $2 may, at the discretion of the Commissioner, be paid from the Hospital Insurance Fund.

The definition of dependant was amended to include an unmarried person over 15 and under 19 years who is mainly supported by the head of the family, and over whom the head of a family has custody, whether exercised jointly with another person or not. Formerly, no special provision was made for such a child and he ceased to be a dependant when he became 16 whether or not he was self-supporting. The spouse of the head of the family, children under 16, or under 21 if attending high school or university and mainly supported by the head of the family, an unmarried son or daughter over 18 years who is financially dependent on the head of the family because of mental or physical disability, and a dependent parent or grandparent who is unable to pay his own premium due to lack of sufficient funds are also classed as "dependants".

Two new sections provide that not later than one month from the date on which a person becomes head of a family he must pay the required premium and, similarly, a person who ceases to be a dependant must apply for registration not later than the first day of the month following the one in which he lost his dependent status, and pay the premium required not later than the commencement of the next hospital insurance period. If a single person or dependant becomes the head of a family or if the head of a family acquires single or dependent status, he must within one month notify the Commissioner on the prescribed form. The Commissioner must have the registration records and premium payment rates adjusted, effective from the first day of the month following the date on which the change of status occurred.

As before, if the required payment is made by or on behalf of a person on or after the first day of the hospital insurance period to which it is applicable, the person will not become a beneficiary until one month from the day on which the payment was made. In addition, the regulations now provide that when an overdue premium is paid within the last 30 days of the hospital insurance period to which it is applicable, the one-month term during which benefits are withheld will extend into the subsequent hospital insurance period regardless of the fact that the premium applicable to the next hospital insurance period is paid on or before the date on which it is due.

Newfoundland Workmen's Compensation Act

The first regulations made under the new Workmen's Compensation Act, which went into effect on April 1, 1951 (L.G., 1950, p. 2076), were gazetted on April 10. The Newfoundland regulations are very similar to those in effect under the Nova Scotia Act. They classify the industries under the Act in seven groups, govern the exclusion and inclusion of industries, minimum assessments, special obligations on an employer for whom work is undertaken by a contractor, and first aid, and provide penalties for contravention of the Act and regulations.

Exclusion and Inclusion of Industries

The industries within the scope of Part I of the Act are divided into seven classes: mining, forest products, manufacturing, construction, transportation, distribution and service, and the fishing industry. The fishing industry includes the processing, canning, handling and packing of fish and fish products and work incidental to these industries. "Fishing, including seal fishing and whaling, fish handling and fish processing" were included among the industries to which the Act applied as it was passed in 1950, but it was amended in 1951 to provide that only fish handling and processing on shore by persons other than the members of the crews of fishing vessels were to be covered by the Act.

The Act provides that the Workmen's Compensation Board, may, by regulation, exclude from the scope of Part I any industry in which fewer than a stated number of workmen are employed. The regulations, accordingly, like those of Prince Edward Island, exclude industries employing fewer than three workmen. Where two or more separate industries within the scope of Part I are carried on by the same employer or where an industry is carried on partly by the employer and partly by one or more contractors, the

industries are not excluded if three or more workmen are jointly employed at the same time.

Where not more than six workers are employed at the same time, the following industries are excluded from Part I: the cutting or splitting of firewood; power laundries; dyeing, cleaning or bleaching establishments; and mining (including prospecting and development work) except in producing mines where the workmen are in the employ of the owner, lessee or recorded holder. Cutting, hewing, piling or hauling logs, wood, or bark, logging, and bark-peeling by hand are excluded from Part I if not more than six workers are employed where these operations are carried on by an employer himself, and are also excluded where the work is done for the employer by a contractor or sub-contractor when the total of the workers employed by the main employer and those in the service of the contractor or sub-contractor is not more than six.

Unless 10 or more workmen are employed at the same time, the business of scavenging (junk-dealing) is excluded from Part I, as well as window cleaning, the operation of barber shops and beauty parlours and the taxi business.

Ships, tugs, dredges, boats or vessels owned or controlled in the Province which make voyages outside the Province are excluded from Part I, as well as those vessels or ferries engaged in carrying freight or passengers from one part of Newfoundland to another. This exclusion does not apply to ships owned or controlled by the Government of Canada or by the Government of Newfoundland.

The following are entirely excluded from Part I: hand laundering; educational institutions; services performed by doctors, dental surgeons, nurses, nurses' aides, hospital attendants, wardens, opticians and veterinaries; the work performed in a theatre or incidental to a theatre engagement by actors, artists, entertainers and members of their company (except "house employees"); and aviation and aerial transportation. Workmen in any industry under Part I are excluded while being transported by aircraft.

Industries within the scope of Part I but excluded by number or otherwise may, on written application of the employer, be brought under the Act by the Board by the mailing of an assessment notice to the employer. An industry which is not covered by the Act may also be brought under Part I by application of an employer and will be covered from the time stated in the certificate of admission or in the assessment notice.

Assessments and Returns

The minimum assessment of any employer resident in Newfoundland is $5, and that of any non-resident employer $10, unless the Board orders otherwise. A copy of the Act, regulations and any notices furnished by the Board must be posted in a conspicuous place.

A person for whom work is undertaken by a contractor must within seven days after making the contract notify the Board in writing of the name and address of the contractor, the nature of the work to be performed, the amount payable under the contract and the probable length of time for completion of the work.

Further, at the end of each year the employer must notify the Board of the names of all persons to whom contracts were given during the year, the nature of the work, amount paid and any other particulars which the Board may require. If the contractor is not assessed as an employer, then the person for whom the work is done must, if possible, furnish the Board with the correct amount of all wages paid to the workmen by the contractor, and forward the contractor's time books.

Whenever requested by the Board, an employer must submit a statement showing the amount of forest products produced by him.

An employer carrying on an industry within Part I is required to keep a time book, which must be produced on request of the Board or its officers, containing the names of his workmen, the date on which each was first employed, the total number of days for which each man is entitled to receive remuneration, the rate of wages and the total amount of wages or bonuses paid to each worker for each pay-period that he was employed where the pay-period was less than a month, allowances paid to a worker who supplies his own truck or team, and the time worked by the employer, his partner or any member of his family.

The Act requires the employer to furnish the Board on a specific date fixed by the Lieutenant-Governor in Council with an estimate of the probable amount of his payroll and any other information required by the Board for the purpose of assigning the industry to the proper class and for assessing it. The regulations provide that such a statement, signed by the employer, or an officer of the corporation if the employer is a corporation, must be submitted to the Board not later than January 31 of each year.

The statement must include the amount of wages and other remuneration paid to all employees during the previous year in

connection with each industry within the scope of Part I carried on by the employer.

Medical Aid

The regulations set out the minimum first-aid service required to be maintained according to the number of employees. The equipment and supplies for first aid which must be provided are similar to those set out under the Nova Scotia and Ontario Acts.

Penalties

Penalties are fixed for a person who hinders the Board when making an inquiry into the employer's books, for an employer who fails to pay his assessment within the prescribed time, for one who underestimates his assessment, or for an employer who fails to submit the statement of wages paid during the previous year, and for other infringements of the Act or regulations. A general penalty of not more than $100 is fixed for any person who contravenes the regulations if no penalty is otherwise set.

Prince Edward Island Public Health Act

Regulations governing the sanitary control of restaurants and other places where food is sold to the public for immediate consumption on the premises were made on March 1., gazetted on March 17 and are effective from May 1.

The regulations lay down the minimum sanitary standards which must be observed with regard to construction, equipment and maintenance of eating places, sanitary facilities and cleansing and storage of utensils, and provide for the closing down of establishments when conditions exist which are or may become dangerous to health.

Several provisions govern employees who handle or come in contact with utensils or food during its preparation, service or storage. Employees must be clean, wear clean outer garments, and be free from and not a carrier of a disease which may be spread through the medium of food. An employee is required to satisfy the medical officer of health of the municipality in which the eating place is situated that he is free from such a disease, and he must submit to a medical examination and tests as the medical officer of health or the Minister of Health may require. An operator must notify the medical officer of health immediately if he knows or has reason to suspect that an employee is suffering from an infectious or contagious disease. Persons who have any abrasion or skin condition which may contaminate food are prohibited from working in an eating establishment.

The regulations also forbid persons to sleep in any room where food is prepared, served or stored and to keep wearing apparel in any such room unless it is placed in a separate cupboard or locker.

Quebec Minimum Wage Act

General Order 4

Two changes have been made with respect to the regular workweek to which the minimum rates fixed by General Order 4 apply. The present minimum rates were established last December (L.G., 1951 p. 247).

Under Category I governing employees in industrial and commercial establishments the regular workweek is 48 hours unless otherwise specified, in which case the rates apply to a 50, 54 or 60-hour week, as indicated. By the amendment, made by an Order in Council (No. 351) of April 4, gazetted April 7, the 54-hour workweek will apply to factories where funeral caskets are made and to establishments where looms are manufactured.

Renewal of Orders

General Order 4 and the special Orders have been extended for another year to May 1, 1952, by the same Order in Council (No. 351), gazetted on April 14.

The special Orders renewed are Order 2, requiring payment of time and one-half for overtime; Order 3, providing for a week's annual holiday with pay; Order 3a, providing for an annual holiday with pay for workers in the construction industry; Order 5, governing silk textiles; 8, cotton textiles; 11, charitable institutions; 14, real estate undertakings; 19, full-fashioned hosiery; 23, taverns in Montreal; 26A, taxicabs in Montreal; 29, taxicabs in Quebec; 37, manufacturing of glass containers; 39, forest operations; 41, employees of public corporations; and 42, stationary enginemen and firemen.

Saskatchewan Health Services Act

The list of dental services which may be provided to beneficiaries under the Health Services Act was revised and is now appended to the regulations as Schedule "A". Other minor amendments were made to the regulations by an Order in Council (O.C. 586/51) of March 24, gazetted on April 7.

Saskatchewan Minimum Wage Act

Effective from May 1, the minimum rates for most full-time workers in Saskatchewan are raised by $3 a week and part-time rates

by 10 cents an hour as a result of Orders in Council (630-641/51) made on March 31 and gazetted April 14. The rates were increased in 12 of the 13 minimum wage orders in effect, Order 11, governing the lumbering industry being the only one not changed. The rates fixed in that Order were increased last year (L.G., 1950, p. 1192). The last general revision of minimum wages was made in 1949 (L.G., 1949, p. 747).

The Orders apply to all places in the Province with 300 or more people and the area within a five-mile radius of these places. Excluded from coverage of the Orders are agricultural workers, domestic servants in private homes, employees governed by the Fire Departments Platoon Act, registered nurses in hospitals and persons employed solely in a managerial capacity. By the recent amendments, cooks and cookees employed by boarding car contractors are excluded from the three Orders covering hotels, restaurants, educational institutions, hospitals and nursing homes. A further change in coverage has to do with amusement places. Employees in theatres and dance halls in cities are now under the general Order governing workplaces in cities (Order 1) and must be paid at least $24 a week. Theatres and dance halls in other centres continue to be under Order 12, the Order for amusement places. The minimum fixed by Order 12 is now 60 cents an hour (see below).

Cities and Larger Towns

The new minimum rate for all workplaces in cities and in the nine larger towns is $24 instead of $21 a week. Part-time workers must now receive a minimum of 65 cents an hour rather than 55 cents, and, as before, they must be paid for a minimum of three hours each time they are required to report for work. The three-hour minimum does not apply in the case of a student who is in full-time attendance at school and who is employed only outside of school hours. The minimum for messengers on foot or bicycle is raised from $12 to $15 a week, and from 35 cents to 45 cents an hour if they work part-time. For those who drive horse-drawn or motor vehicles the rates are raised to $27 a week for full-time, instead of $24, and 65 cents an hour for part-time, rather than 60 cents.

Smaller Places

For workplaces in the smaller towns and villages covered by the Act the new rate is $21.50 instead of $18.50. The part-time rate is increased from 45 to 55 cents an hour with a three-hour minimum of $1.65 for a worker when called to work. Messengers on foot or bicycle must now receive $13 instead of $10 a week for full-time and 40 instead of 30 cents an hour for part-time. The rates for those who drive horse-drawn or motor vehicles are the same as those fixed in the cities and larger towns, $27 a week and 65 cents an hour.

Long Distance Truckers

A similar 10 cent-an-hour increase is made in the minimum rate fixed for employees who regularly travel in the course of their duties to two or more cities, towns or villages at least 10 miles apart. These employees are covered by Order 9. If an employee operates a motor vehicle bearing a licence issued by the Highway Traffic Board designated by certain letters, he must be paid either 70 cents an hour, formerly 60 cents, or 2½ cents a mile, whichever is greater. If he does not operate a vehicle so designated, he must be paid 70 cents an hour, instead of 60 cents.

Janitors

The minimum full-time rate for janitors and caretakers in buildings used chiefly for residential purposes is raised from $27.50 to $30.50 a week. For part-time work the rate is 65 cents an hour instead of 55 cents.

Amusement Places

Persons working in billiard rooms, bowling alleys, skating or curling rinks, dance halls and theatres (except in cities), and other places where games of skill are played must be paid at least 60 cents an hour with a minimum in cities of $1.80 for each occasion on which they are required to report for duty. The former hourly minimum was 50 cents. For work done on eight specified public holidays such workers must now receive, in addition to their regular weekly wage, time and one-half the regular rate for every hour or part of an hour worked.

Summer Resorts

Workers employed in the summer resorts of Carlyle Lake, Kenosee Lake, Katepwe, Regina Beach and Waskesiu and the area within a three-mile radius of each, during the season June 15-September 15, are now to receive not less than 50 cents an hour rather than 40 cents, and at least $2 must be paid for each day on which a worker is required to report for duty instead of $1.60.

HIGHLIGHTS OF LABOUR LAWS ENACTED BY PROVINCIAL LEGISLATURES IN 1951

A survey of the legislation passed at the 1951 sessions of the provincial Legislatures indicates wide interest in labour legislation and considerable progress in improving legislative standards.

Anti-discrimination Measures

Among the most noteworthy were the Acts passed in Ontario to ban discrimination in employment on grounds of race, creed, colour, nationality, ancestry or place of origin and to require employers to pay women at the same rate as men when they are employed to do the same work in the same establishment. At the same time the Ontario Legislature passed an Act which, with suitable exemptions, permits women to serve on juries.

Employment of Children

To control the employment of children, the Nova Scotia Legislature enacted a statute prohibiting entirely the employment of a child under 14 in manufacturing, shipbuilding, electrical works, the forestry industry, construction, garages and automobile service stations, hotels and restaurants, the operation of elevators, and such amusement places as bowling alleys and pool rooms. In other occupations than the above, hours of children under 14 are limited to eight in a day or, if school is in session, to three hours, unless the child has been granted an employment certificate. Night work of children between 10 p.m. and 6 a.m. is forbidden. Inspectors may be appointed to enforce the Act.

Workmen's Compensation

Increased benefits under Workmen's Compensation Acts were provided for in six Provinces—Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island and Saskatchewan.

The Newfoundland Act which was passed in 1950 came into effect on April 1, 1951, at which time amendments were assented to laying down the benefits to be paid. A Workmen's Compensation Committee which for the past year was engaged in the necessary preparatory work prior to putting the Act into effect has been appointed to constitute the Workmen's Compensation Board.

As in most of the other Provinces, a widow in Newfoundland will receive $50 a month, together with an immediate lump sum payment of $100. The payment for a child under 16 is $10 a month or for a child without either parent, $20. In non-fatal cases, a workman is entitled to compensation at the rate of 66⅔ per cent of his average earnings, the latter to be computed on a maximum basis of $3,000 per year.

In Manitoba, a change was made with respect to the maximum annual earnings which may be taken into account. These are now to be $3,000. At the same time, the minimum compensation payable where a workman is temporarily totally disabled was raised from $12.50 to $15 a week. A worker who is disabled for seven days or more will now receive compensation dating from the day of the injury. Hitherto, unless he was disabled for 14 days he did not receive compensation for the first three days.

In New Brunswick, two changes were made to take effect on January 1, 1952. The allowance for burial expenses will be increased from $150 to $200, and compensation to a disabled worker will be higher in that the maximum annual earnings taken into account in computing compensation will be $3,000 rather than the former $2,500.

The Ontario amendments partially implement the recommendations of Mr. Justice Roach's Royal Commission report (L.G., 1951, p. 315). Two major changes which will take effect on January 1, 1952, increase from $3,000 to $4,000 the maximum yearly earnings which may be taken into account in computing compensation, and reduce the waiting period from seven to five days. The amount which may be allowed for burial expenses was considerably increased, and the lump sum payable to a widow was raised from $100 to $200.

The Prince Edward Island Legislature added several industries to those already under the Act. It reduced the waiting period, which is now four days rather than seven. It also considerably increased the benefits to dependants of a workman whose death is caused by an industrial accident or disease. These include a monthly sum of $50 to a widow instead of $40; $12.50 instead of $10 to each child under 16; and an increase from $100 to $150 in the amount allowed for funeral expenses. Exclusive of the sum allowed for burial, the maximum compensation payable in fatal cases is now 75 per cent of earnings instead of the previous 66⅔ per

cent. In cases of total disability, the minimum payment which may be made was raised from $12.50 to $15 a week. Several additional diseases were made compensable.

In Saskatchewan, effective from June 1, 1951, increased monthly benefits to a widow (from $50 to $60) and to children under 16 (from $15 to $20) were provided for; the Nova Scotia Legislature raised the monthly benefit payable to a child under 16 in the care of a parent from $12.50 to $15 and the payment to an orphan child from $22.50 to $25.

Annual Holidays with Pay

In the matter of annual vacations with pay, a change was made in Manitoba to make the vacation commensurate with length of service. In that Province, since 1947, a week's holiday has been granted after a year's employment. Henceforth, a worker who has worked continuously for an employer for three consecutive years or more will, at the end of each year of service, be granted a holiday with pay of two weeks.

The British Columbia Annual Holidays Act was declared not to apply where workers are assured of an annual holiday with pay by the terms of a collective agreement if the Minister of Labour approves the holiday provisions of the agreement. The Act provides for one week's holiday with pay after a year of employment.

Public Holidays

Legislation to provide for time off with pay on public holidays was enacted in Manitoba. The Hours of Work Act was amended to prohibit work being done on seven specified public holidays unless overtime is paid or compensatory time off is given. The amendment will apply to all industries in the Province except farming. This is the first time that provision has been made by law for the granting of public holidays to men. Under the Manitoba Minimum Wage Orders, a woman may not work on a public holiday unless her employer has obtained a permit from the Minister of Labour.

In order that November 11 may be fittingly observed, the Manitoba Legislature passed the Remembrance Day Act which prohibits work for gain or reward and the sale or purchase of goods on Remembrance Day. Certain services which are essential to the community may be carried on, and emergency work may be done under permit from the Minister of Labour. An employee, other than a watchman or janitor, who is required to work on the holiday must be given equivalent time off without loss of pay within 30 days.

Notice of Termination of Employment

New provisions in the Manitoba Hours of Work Act prohibit termination of employment without written notice. Employers must serve notice of dismissal and employees must serve notice of termination of employment. Where wages are paid once a month or oftener, the period of notice required to be given corresponds to the length of the employee's pay period.

Hours

The scope of the Saskatchewan Hours of Work Act was extended. The Act requires time and one-half the regular rate to be paid for all work done after eight hours in a day and after 44 hours in a week. It will now apply to all workplaces in the Province which are located in centres with 300 or more people, which is the jurisdiction of the Minimum Wage Act. Since its enactment in 1947, the Hours of Work Act has applied to all workplaces in cities, to all factories in the Province, and to offices and shops in towns and villages.

In two provinces, some changes were made with respect to the closing of shops. In Ontario, provision was made for municipal by-laws requiring shops to close for a full day each week, and the Vancouver City Council was empowered to permit enough grocery shops for the accommodation of the public to remain open after the closing hours fixed by by-law.

Working hours of persons employed in the construction of public works carried out under contract with the British Columbia Government may not exceed eight in a day and 44 in a week except in cases of emergency. This requirement was laid down in the new Public Works Fair Wages and Conditions of Employment Act which also requires contractors to pay fair wages on such construction jobs. "Fair wages" are those generally accepted as current in the trade for workmen in the district. Where no current rate is established, the Minister may determine a fair rate of wages. This fair wage policy by which Government contracts are awarded on condition that wage rates must equal those current in the district where the work is carried out has been in effect in British Columbia for many years.

Minimum Wages

Replacing an Act which has been in effect since 1920, a new Women's Minimum Wage Act was passed in Nova Scotia. Instead

of applying only to cities and incorporated towns, as before, the new legislation will apply to the entire Province. While it is similar in principle to its predecessor, the new Act is more in line with the Acts of other provinces. More specific provision is made for inspection of premises, and more powers are given to the Minimum Wage Board, including power to fix the time and manner in which wages must be paid and power to exempt any group of employees or employers from the Act or any Minimum Wage Order.

Labour Relations

Four Provinces—New Brunswick, Nova Scotia, Quebec and Saskatchewan—made some changes in their labour relations legislation.

The British Columbia Legislature did not see fit to amend the Industrial Conciliation and Arbitration Act, as requested by labour, but it passed an Act authorizing a Board of not more than five members to inquire into the Act and its administration and to report before the Legislature meets in 1952.

The New Brunswick Labour Relations Act was amended to permit a municipality, by resolution, to bring any group of its employees under the Act. Seeking to influence another's vote in any election held by the Labour Relations Board, whether by intimidation, coercion or by the giving of money was declared an "unfair labour practice" for which a penalty is provided under the Act.

In Quebec, it was provided that decisions of the Labour Relations Board and of councils of arbitration set up under the Trade Disputes Act should not be subject to appeal to the Courts. A further enactment regarding the duration of collective agreements permits an agreement to be made for a longer period than heretofore. Agreements may now be made for one, two, or three years, but no longer.

By an amendment to the Saskatchewan Trade Union Act, the Labour Relations Board is no longer permitted to disestablish a company-dominated union. The Act now merely gives the Board power to determine if a union is company-dominated, and makes it an unfair labour practice for an employer to bargain collectively with such an organization.

Amendments with respect to the check-off were made in Saskatchewan and Nova Scotia. In Saskatchewan, the check-off may now be revoked only on the written request of the union instead of on the written request of the employee concerned. In Nova Scotia, so far as an uncertified union is concerned, the employer is required to institute a check-off system, if a majority of employees have voted for it, only where a collective agreement is in effect or where collective bargaining is being carried on.

Safety and Health

With a view to greater safety of employees in mines, the laws regulating employment in both coal and metal mines in Nova Scotia were completely revised. Improved safety standards of boiler inspection are contained in legislation passed in both Ontario and Saskatchewan. The new Boilers and Pressure Vessels Act in Ontario is a complete revision and consolidation of earlier legislation.

In a general revision of the Factories Act of British Columbia, the schedule which listed the workplaces covered by the Act was repealed as it was found difficult to keep it up-to-date. Instead, the definition of "factory" was broadened to ensure that all types of factories, as well as shipyards, laundries, elevators, etc. are governed by the Act. One new feature of the Act is a provision designed to protect factory workers from the inhalation of harmful gases, vapours or dusts. In every factory where a process is carried on by which gases, vapours or dusts are emitted, the Inspector is authorized to direct the employer to install the proper mechanical facilities for their removal.

Hospitalization

With respect to social security legislation, the British Columbia Hospital Insurance Act was amended to raise to $42 the maximum amount which may be levied on a person or family for hospitalization. Recent regulations under the Act have fixed the payment for the head of a family at $42 and that for a single person at $30, a $9 increase over the previous premiums. An inquiry into the Act and its administration by a Board of not more than 12 persons was authorized during the session.

Old Age Pensions

As a result of the federal-provincial fiscal conference held in December, 1950, at which a contributory old-age pension plan was proposed, to be put into effect after the necessary amendments to the British North America Act had been made, the Legislatures of Alberta, Manitoba and Quebec passed Acts authorizing the Provincial Government to enter into an agreement in order to implement the plan. Under this program, the federal Government would provide a pension of $40 a month to all persons of 70 years of age and over without a means test, and the federal and

provincial Governments would bear equally the cost of providing pensions of the same amount to persons between the ages of 65 and 69 with a means test.

Rent Control

Most of the provinces made provision for taking over rent control when federal controls were abolished. The Quebec Act freezes rents at their level of April 30 until August 1 of this year. The British Columbia, Manitoba and Ontario Acts provide for the taking over by the Province of the federal rental regulations. In New Brunswick, Nova Scotia and Prince Edward Island, the legislation gives municipalities power to impose rent control.

Labour Legislation in Ontario in 1951

The Ontario Legislature adopted two important laws designed to provide "equal pay" for female employees, and to prevent discrimination in employment. Among other enactments of interest to labour, important amendments were made to the Workmen's Compensation Act.

During the 1951 session of the Ontario Legislature, which lasted from February 1 to April 5, a measure was approved by which women will be entitled to pay equal to that of men if they do the same work in the same establishment. Another equally significant Act will promote fair employment practices in Ontario. It makes discrimination against men and women in respect to their employment because of race, creed, colour, nationality, ancestry or place of origin contrary to the law of the Province. Important amendments to the Workmen's Compensation Act will further increase benefits to injured workmen and their dependants. Most of the changes are based on recommendations made by Mr. Justice Roach who was named Commissioner to inquire into the operation of the Act late in 1949. A completely revised Boilers and Pressure Vessels Act was passed bringing the Act into line with present day practice with regard to manufacture, operation and inspection of boilers and pressure vessels. The maximum workweek of full-time firefighters was reduced from 72 to 56 hours. Provision was also made, under the Factory, Shop and Office Building Act, for any class or classes of shops in a municipality to close for one full day a week. Authority was given to the Provincial Government to regulate rentals of dwelling places.

Fair Employment Practices

A new Act, the first of its kind in Canada, was passed to prohibit discrimination in employment because of race, creed, colour or place of origin. Ten States of the U.S.A. already have legislation which is similar in principle to the Ontario Act and Bills to set up fair employment practices commissions were introduced in a number of State Legislatures this year.

The Fair Employment Practices Act, which emphasizes in its preamble that such a measure is in accord with the Universal Declaration of Human Rights as proclaimed by the United Nations, forbids employers to refuse to employ, to discharge or to discriminate against any person because of race, creed, colour, nationality, ancestry or place of origin. Trade unions are prohibited from excluding from membership or from expelling or suspending or from discriminating against any member or person for any of these reasons. Expressions of discrimination in employment applications or advertisements or in written or oral inquiries in connection with prospective employment are also banned.

Employers of fewer than five persons do not come under the Act, nor do domestic servants in private homes and religious, philanthropic, educational, fraternal and social organizations which are not operated for private profit.

The Act is to be administered by a Fair Employment Practices Branch of the Department of Labour headed by a Director.

Charges of discrimination will be dealt with first by conciliation procedure and, only if that fails, by prosecution. To enquire into a written complaint of discrimination under the Act, the Minister of Labour, on the recommendation of the Director, will appoint a Conciliation Officer who is required to report his findings to the Director. If he fails to settle the matter, the Minister may appoint a Commission of one or more persons with the powers of a Conciliation Board under

the Labour Relations Act. After hearing the parties, the Commission will recommend to the Director the course which should be taken, which may include reinstatement with or without compensation for loss of earnings. The Minister, on the recommendation of the Director, will then issue whatever order he deems necessary and authorize a prosecution if he sees fit. The Act stipulates that the Director is not to recommend that prosecution proceedings be undertaken if he is satisfied that the act complained of was done for security reasons in connection with a national emergency or war.

Fines up to $50 for an individual and $100 for a corporation, trade union, employers' organization or employment agency may be imposed for failure to comply with any provision of the Fair Employment Practices Act or any order made under it.

The chief Opposition criticism of the Bill on second reading was that it failed to provide for educational activities and that it was defective in its enforcement procedures. A motion to refer it to the Select Standing Committee on Labour, with instructions to hear evidence and representations from qualified experts and interested organizations and draw up a Bill "that truly expresses the principle of non-discrimination", was defeated by a vote of 45 to 34.

When the Bill came up for third reading, an Opposition attempt to amend it by including a prohibition of discrimination on the grounds of sex was defeated by a vote of 42 to 33.

This was the second Fair Employment Practices Bill which was brought in by the Government at the 1951 session, the earlier one having been withdrawn after first reading. The principal difference between the two Bills was with respect to the administrative authority which in the earlier Bill was to have been the Labour Relations Board. A further difference was that the first measure did not ban trade unions from discriminating against their members or against other persons.

Earlier in the session the three Opposition groups also presented Fair Employment Practices Bills, none of which went beyond first reading. These were similar in principle to the Government Bill but were somewhat wider in scope. Two covered all persons employing three or more employees while the third covered all employees including domestic servants. Two of them provided for co-operation by the administrative authority with various groups in the study of problems of discrimination and in developing educational programs. All three provided for higher penalties than those fixed in the Government measure.

Equal Pay For Equal Work

A second important anti-discrimination measure was passed to ensure equal pay for men and women doing the same work in the same establishment. Effective from January 1, 1952, the Female Employees Fair Remuneration Act prohibits an employer or his agent from discriminating between male and female employees by paying a female employee at a lower rate than a male employee employed by him for the same work in the same establishment. A difference in the rate of pay between a female and a male employee based on any factor other than sex is not to be considered a breach of the Act.

The Act does not affect written contracts of employment and collective agreements which were made before March 1, 1951, but if any such contract or agreement is in effect on September 1, 1952, the Act will apply.

The machinery for dealing with charges of discrimination is the same as that established under the Fair Employment Practices Act (see above).

Fines up to $100 are provided for offences under the Act.

Opposition members criticized the terms of the Bill, particularly the provision that pay would have to be equal only when men and women were doing the "same work". A motion, which was defeated by a vote of 43 to 28, declared that legislation on equal pay for equal work "should apply to work of comparative character or on comparable operations or where comparable skills are involved, should protect workers who lodge complaints and should contain adequate enforcement procedures" and asked that the subject be referred to the Select Standing Committee on Labour and a Bill drawn up which would meet these standards.

An Opposition Bill respecting equal pay for equal work which was given first reading before the introduction of the Government measure would have prohibited employers from discriminating in wage rates between men and women in work of comparative character or work on comparable operations, or where comparable skills are involved, and would have required employers who violated this provision to pay the wages found to be due to the employee affected and an additional amount in liquidated damages.

Workmen's Compensation

Important amendments were made to the Workmen's Compensation Act, chiefly to implement some of the recommendations of the Report of Mr. Justice W. D. Roach who recently made an inquiry into the operation of the Act.

In accordance with Mr. Justice Roach's recommendations, the maximum annual earnings on which compensation is computed were increased from $3,000 to $4,000 which is a higher amount than that fixed by any other province. In Saskatchewan, and by a 1951 amendment, in Manitoba, any earnings in excess of $3,000 are disregarded and in the other provinces any earnings over $2,500 a year may not be taken into account.

The waiting period which must elapse before compensation is payable was reduced from seven to five working days. The Royal Commission Report recommended a waiting period of four days. These two amendments will not take effect until January 1, 1952.

As recommended in the Report, the maximum amount allowed for burial expenses was increased from $125 to $200, effective immediately. Where a workman's body has to be transported a considerable distance for burial, compensation includes a further sum for the necessary expenses involved. The former maximum of $125 was removed and the Workmen's Compensation Board permitted to determine the sum which may be paid. Mr. Justice Roach recommended a limit of $175.

Instead of the immediate lump sum payment of $100 to a widow or to a foster mother, $200 will now be paid. No recommendations were made in the Report with regard to this matter.

A number of minor amendments were made to the sections of the Act governing medical aid. One of these, which was recommended by the Commissioner, provides that treatment by chiropodists registered under the Chiropody Act may be included under the term "medical aid", and such persons as chiropodists and drugless practitioners will be required to submit reports to the Board with regard to an injured workman. These two amendments will take effect from January 1, 1952. Another amendment authorizes the Workmen's Compensation Board to determine questions as to the payment for medical aid as well as questions regarding the necessity, character and sufficiency of medical aid. The fees for medical aid are fixed by the Board and no action for any larger amount lies against the Board. A further amendment provides that no action in respect of such charges lies against the injured workman, his employer or against any other person. If an account for payment of medical aid is not received by the Board within the prescribed time, the Board may impose a penalty by way of a percentage reduction in the amount of the account.

The amending Act repealed as obsolete Section 6 (7) of the Act which made an employer individually liable to pay compensation for an accident that happened out of Ontario, where he had not fully contributed to the Accident Fund in respect of all the wages of his workmen who were engaged in the work in which the accident happened. Mr. Justice Roach pointed out that when an accident happens in Ontario compensation is paid out of the Accident Fund notwithstanding that the employer is in default in paying his assessments, and that there was no reason why it should not be paid out of the Fund when an accident happened out of Ontario in like circumstances. The Commissioner reported that the subsection was in conflict with other sections of the Act.

Another change which was proposed by the Commissioner and accepted by the Legislature was one which permits an employer in Schedule 2 who is individually liable to make a weekly or other periodical payment of compensation to apply to the Board to have his liability commuted by the payment of a lump sum equal to the full annual value of the periodical payments, or, as heretofore, a sum equal to 75 per cent of the annual value of the weekly or other periodical payments.

When the amending Bill came up for second reading, all Opposition groups combined to request further implementation of the Royal Commission Report. A motion was introduced that the Bill "be referred to the Standing Committee on Labour, and that the said committee be authorized to incorporate in the Bill provisions implementing the recommendations of the Hon. Mr. Justice Roach regarding accident prevention, industrial diseases, compensation for second injuries and injuries aggravated by pre-existing physical conditions, and such other recommendations of the said Mr. Justice Roach as the committee deems advisable", but the amendment was ruled out of order.

Subsequently, an Opposition Bill was introduced to implement the specific recommendations of the Commissioner with regard to accident prevention, chief of which were that accident prevention should be brought under the direct jurisdiction of the Workmen's Compensation Board and that there should be more active participa-

tion of labour in any organized system of accident prevention. This Bill was given a six months' hoist on March 7, at which time the Minister of Labour, Mr. Daley, stated that the recommendations of the Commissioner with regard to this matter were being studied by his Department.

Steam Boilers and Pressure Vessels

A new and completely revised Boilers and Pressure Vessels Act consolidates the former Steam Boilers Act which governed the inspection of steam boilers during construction, alteration and repair, and Section 57 of the Factory, Shop and Office Building Act which provided for the inspection of boilers and pressure vessels in factories, shops, restaurants, office buildings, public buildings and other places. In introducing the Bill in the Legislature, the Minister of Labour stated, "With the technical advances made in this field and the present widespread use of boilers and pressure vessels it is necessary to bring the Act into line with present day practices." The Act will come into force on Proclamation.

New sections in the Act require all inspectors, including those of boiler insurance companies, to hold certificates of competency, require the design of a boiler or pressure vessel to be submitted to and approved by the Chief Inspector before construction is begun, and provide for the registration and testing of welding operators. The Act stipulates that inspectors when carrying out their duties must refer to certain safety codes governing boilers and pressure vessels.

The Act covers boilers with a heating surface of over 30 square feet; pressure vessels for permanent use at a pressure of more than 15 pounds with an internal diameter of more than six inches (or more than 24 inches if used for storing hot water for domestic purposes or if connected in a water pumping system containing air that is compressed to serve as a cushion); and refrigeration plants with a capacity of more than three tons of refrigeration in 24 hours. Excluded from coverage are boilers used for heating buildings occupied by not more than four families, those used in connection with an open type hot water heating system, pressure vessels used exclusively for hydraulic purposes at atmospheric pressure, boilers and pressure vessels used exclusively for agricultural purposes, those used in the operation of a railway under the jurisdiction of the Board of Transport Commissioners and those subject to the Canada Shipping Act. Shipping containers subject to inspection by the Board of Transport Commissioners are also excluded.

The Lieutenant-Governor in Council may exempt any type of boiler or pressure vessel or any plant from the Act.

Qualifications of Inspectors.—A new provision requires all Government inspectors and other persons who inspect boilers, pressure vessels and plants to hold a certificate of competency. An applicant for a certificate of competency must, as before, pass examinations or tests as may be prescribed by the Minister by regulations.

Annual Inspection.—More detailed provisions are set out regarding the powers and duties of boiler inspectors. As before, an inspector must inspect at least once a year every uninsured boiler and pressure vessel used in the Province, but the Chief Inspector may order a further inspection at any time. The Minister may also require an insured boiler or pressure vessel to be inspected at any time.

The Act provides that the publications of the Canadian Standards Association, of the American Standards Association and of the American Society of Mechanical Engineers shall be deemed to contain the rules which must be referred to by the inspectors in carrying out their duties under the Act with regard to the approval of designs, and the manufacture, installation, inspection, testing or operation of boilers, pressure vessels and plants.

By written notice an inspector may require the owner or person in charge of a boiler, pressure vessel or plant to prepare it for inspection, and the owner or engineer in charge is required to carry out any orders he may issue to ensure a proper inspection. On the annual inspection, the inspector must see that the boiler, pressure vessel or plant is being operated and maintained in accordance with the Act and regulations and that the safety valves are properly set and sealed. He must also review the maximum working pressure and make any reduction in it for safe operation of the boiler having regard to its age and condition. The inspector may give oral or written instructions to the person in charge of a boiler or pressure vessel in any matter of safety regarding its installation, operation or repair. If the instructions are not carried out within the time specified, the Chief Inspector may order the boiler, pressure vessel or plant to be shut down and may cancel the inspection certificate or the certificate of approval.

As before, on the completion of the annual inspection, the inspector must report

to the Chief Inspector on the condition and operation of the boiler or pressure vessel and if it is found to be in a safe condition, an inspection certificate will be issued, on payment of the prescribed fee and expenses. The certificate is valid for one year unless it is cancelled or a shorter period specified. Where practicable, it must be posted in a conspicuous place near the boiler or pressure vessel. The maximum pressure at which a boiler or pressure vessel may be operated must be set forth in the certificate. Where a boiler, pressure vessel or plant is found to be in an unsafe condition or is being operated in a dangerous manner, the inspector must, on the instructions of the Chief Inspector, seal the boiler and take steps to remove the danger. A boiler or pressure vessel which has been so shut down may not be operated until permission in writing has been obtained from the Chief Inspector.

The owner, engineer or other person in charge of a boiler or pressure vessel must point out to the inspector during an inspection any defects he believes to exist and if between inspections he becomes aware of any defect he must notify the Chief Inspector forthwith.

Where an inspector is satisfied that a boiler or pressure vessel can no longer be used safely, he must, after notifying the Chief Inspector, seal it indicating that it is condemned and take possession of its certificate of inspection. Unless it is repaired as required by the Chief Inspector, and a new certificate of inspection issued, a condemned boiler or pressure vessel may not again be used. It may not be sold or moved to another location for re-use without the Chief Inspector's consent.

Construction of Boilers.—The Act requires the manufacturer of every boiler or pressure vessel to be constructed for use in Ontario to submit its design to the Chief Inspector for approval and registration before construction is begun and, similarly, the designs of plants must be approved and registered before installation is commenced. If a boiler or pressure vessel has been constructed without its design having been approved and registered, the Chief Inspector may approve its design, if it otherwise meets the requirements of the Act and regulations.

Inspection of boilers and pressure vessels at any stage during construction or on installation may be required by the Chief Inspector who will issue a certificate of inspection on payment of the prescribed fee if he is satisfied that they may be operated safely. No person may operate a boiler or use a pressure vessel unless a certificate of inspection or approval is in effect.

Where a boiler or pressure vessel has not been inspected during construction, the Chief Inspector may issue a certificate of approval, upon payment of the required fee, which shall authorize its operation until its annual inspection. Provision is made for allowing boilers and pressure vessels to be installed and operated if the design of a newly constructed vessel is not available for registration or if the design has been approved but the vessel is found to be defective after construction. In the latter case, the Chief Inspector may allow the vessel to be operated within such limits of safety as he may deem proper and fix a specified time for the defects to be remedied. Failing compliance, he may cancel the registration of the design.

If a boiler or pressure vessel has not been constructed in accordance with its approved design but may be safely used at a lesser pressure than its design pressure, the inspector must fix the maximum working pressure at which it may be operated. Every boiler and pressure vessel must have at least one safety valve of adequate capacity set to relieve at or below the maximum working pressure.

With respect to boilers and pressure vessels built outside of Ontario for use in that Province, the Act permits the Chief Inspector to arrange with the inspection service of the other province or country to have inspections carried out during construction.

A used boiler must be inspected and tested before being put into operation, and one previously used outside of Ontario may not be installed without the consent of the Chief Inspector, who before issuing a certificate of inspection must be provided with detailed information concerning its design, specifications and manufacture.

Before any major repairs are made to a boiler or pressure vessel, the inspector must be notified and he must inspect the work before the boiler or pressure vessel may again be used.

Insured Boilers.—Insured boilers are subject to an annual inspection by inspectors employed by boiler insurance companies and are exempt from annual inspection by Government inspectors. A copy of the report of each annual inspection made by inspectors of insurance companies must be filed with the Chief Inspector within 30 days after the inspection, and the Chief Inspector must be immediately notified when an insurance company cancels the insurance on a boiler or pressure vessel or rejects an application for insurance.

Provision is made in the Act for closer co-operation between the Department of Labour and boiler insurance companies. The Minister may permit the Chief Inspector to employ the services of an insurer or any other person qualified to inspect boilers and pressure vessels in Ontario to make an inspection required under the Act and submit a report within 14 days.

Welding Operators.—Welding operators must be registered with the Chief Inspector who is authorized to approve the procedures to be followed in welding boilers and pressure vessels.

Each time that a welder changes his employment, and as often as the Chief Inspector requires he must take a test, under the direction of an inspector to determine his competency. The inspector must give the welder written details of the test stating the degree of his efficiency and indicating the type of welding which he may do. If the welding is found to be faulty, the inspector must notify both the welder and his employer and the welder will not be allowed to weld on any boiler or pressure vessel until he has passed a further test.

Accidents.—Full details of an explosion or rupture of a boiler or pressure vessel or an accident arising from their use which injures or kills a person must be reported immediately to the Chief Inspector by telephone or telegraph. The Chief Inspector or an inspector must then investigate the accident to determine the cause. No parts of a boiler or pressure vessel in which an explosion has occurred may be moved, except as may be necessary to remove an injured person, until the permission of an inspector has been obtained.

General.—The Lieutenant-Governor in Council is empowered to issue regulations under the Act. The penalties for offences against the Act are a minimum fine of $25 and a maximum fine of $500 for each offence.

Hours of Fire Fighters

The maximum hours during which a fire fighter is required to be on duty on the average in any work week were reduced from 72 to 56, by an amendment to the Fire Departments Act. This limit applies to full-time fire fighters in municipalities having a population of not less than 10,000. The change will not take effect until January 1, 1952.

Weekly Closing of Shops

A Private Member's Bill was passed amending the Factory, Shop and Office Building Act to provide for the closing of shops for a full day each week by municipal by-law as an alternative to the half-holiday each week which was previously provided for.

A municipal council, on petition of three-quarters of the occupiers of a class of shops in the municipality must, within one month, pass a by-law requiring all shops of that class in the municipality to be closed and remain closed during such periods of the year as are named in the application on one particular day each week during the whole day and until not later than 5 a.m. of the following day.

Medical Examination of Employees of School Boards

An amendment to the Department of Education Act authorizes the Minister of Education to require employees of school boards to submit periodically to medical examination. Previously, this power could be exercised only in respect of teachers.

Mothers' Allowances

Amendments were made to the Mothers' Allowances Act with respect to the conditions of eligibility to receive an allowance.

It is now stated that a monthly allowance may be paid to a mother towards the support of one or more children if she has divorced the father of the child or children and has been awarded custody of them in proceedings in which no provision was made for their maintenance, or if the father has failed to carry out his obligations and has not been heard of for at least a year.

Allowances are normally paid until a child becomes 16 but if the child's birthday occurs during the school year and he is attending school the allowance is continued to the end of the school year. Now, however, in special cases where the Mothers' Allowances Commission is satisfied that the child's progress in school justifies payment of the allowance beyond 16 years the allowance may be continued for a further period, but only until the child reaches 18.

Similarly, if the Commission is satisfied that a child in respect of whom an allowance is paid has a mental or physical disability which justifies the continuance of the allowance after 16 years, the allowance may be paid up to the age of 18.

The required period of residence in the Province before making application for an allowance has been reduced from two years to one year. As before, a mother must be a resident of the Province at the time she applies for an allowance. The Commission is authorized to refuse payment if it believes that the mother is not a suit-

able person to receive an allowance. With these exceptions, conditions of eligibility to receive an allowance are unchanged.

Unemployment Relief

Changes were made in the section of the Unemployment Relief Act which determines the responsibility of municipalities for unemployment relief to persons who have not resided there for a full year (L.G., 1935, p. 524). The section was revised to provide for cases where new Canadians require public assistance before they establish residence in a municipality for a year, and to make it possible for the Province to pay the full cost of any relief administered.

Under the Act, municipalities are liable for direct relief to a person who is in needy circumstances, or who is unemployable because of mental or physical incapacity. A municipality which has furnished direct relief to a person who has moved there may recover the cost of the relief from the municipality where the person formerly resided, the latter municipality being liable for such relief for a period of 12 months after removal.

A new provision deals with a person who has resided outside of Ontario for the previous 12 months and who, after moving into the Province, is granted direct relief by a municipality in Ontario. In such case, the Act now states that the municipality is entitled to be reimbursed by the Province for the full amount expended on behalf of such person until he has been a resident of the municipality for 12 months. However, the municipality will not be reimbursed if such person is to be returned to his former place of residence outside of Ontario.

Rent Control

An Act, which was proclaimed in effect on April 30, was passed to continue in force in Ontario, the Dominion Wartime Leasehold Regulations after the Dominion Government vacated the rental control field.

In order that matters of rentals and tenure may be fairly dealt with and adjusted, the Lieutenant-Governor in Council was authorized to exercise all the powers of the Wartime Prices and Trade Board with respect to the Wartime Leasehold Regulations including power to administer and enforce these regulations or to revoke, amend or replace them.

During the session a select committee of the Legislature was set up to devise a system of leasehold regulations for the Province.

Bills not Passed

Five Private Members' Bills seeking to amend the Hours of Work and Vacations with Pay Act were all given a six months' hoist. These were similar to Bills introduced at the 1950 session. In them were included proposals to reduce the maximum weekly hours of work from 48 to 40 without reduction in weekly pay, to require payment at the rate of time and one-half for overtime and to limit overtime to eight hours in a week and 100 in a year. Two Bills would have provided for two weeks' vacation with pay instead of one, and another would have provided for one week's vacation with pay after one year's employment and two weeks after two years' employment or more, with vacation credits of two per cent during the first year and four per cent during the second or each subsequent year.

Another Private Member's Bill which has been introduced for the past several years proposed to establish a minimum wage of 75 cents an hour for all workers except apprentices.

A Bill to amend the Labour Relations Act sought to require employers to institute the voluntary revocable check-off of union dues. At present six provinces have a check-off provision in their industrial relations legislation—British Columbia, Alberta, Saskatchewan, Nova Scotia, Prince Edward Island and Newfoundland.

Labour Legislation in the Yukon and Northwest Territories in 1950

YUKON

In the Yukon Territory, an Ordinance was passed which requires employers to grant their employees an annual holiday of two weeks with pay after completing a year of continuous service. The Workmen's Compensation Ordinance was revised to raise the percentage rate of compensation for temporary disability from 50 to $66\frac{2}{3}$. Under the Ordinance, an employer is individually liable for the payment of compensation, and by a further amendment, he must carry accident insurance for his workmen in an approved company. Amendments were made to the Steam Boiler Ordinance, mainly to provide for the certification of welders.

Workmen's Compensation

The Workmen's Compensation Ordinance, which has been in effect since 1917 and which applies to undertakings employing five or more workmen, was changed in several particulars. Under this Ordinance, an employer is liable to pay compensation for injuries causing death or disability for three days or longer unless the injury is attributable solely to the serious and wilful misconduct or intoxication of the workman. Compensation is also payable for specified industrial diseases.

Sections similar to those in the Northwest Territories Ordinance were added requiring every employer in the Yukon Territory to enter into and maintain a contract of insurance, in an amount and with a company approved by the Commissioner, providing for payment of compensation to his employees. An employer may be exempted from this requirement only if he has made other arrangements satisfactory to the Commissioner for the protection of his workmen. If an employer fails to enter into a contract of insurance, he is liable to a maximum fine of $500 and, in addition, the Commissioner may refuse to grant him a licence to carry on business or may cancel his licence.

A further amendment raised the rate of compensation for temporary disability from 50 to 66⅔ per cent. Previously, the Ordinance provided for the payment of compensation for temporary disability, making no distinction between a total or a partial disability, at the rate of 50 per cent of average daily wages. As the Ordinance now stands, the compensation payable by the employer to the workman for a temporary total disability is 66⅔ per cent of the workman's average daily wages, and for a temporary partial disability 66⅔ per cent of the difference in his average earnings before and after the accident. As before, compensation is a weekly sum payable during disability but for not longer than 12 months.

A third amendment makes it clear that an employer is exempt from liability to pay compensation for an accident to a workman who is entitled to compensation under the legislation of any province or territory other than the Yukon Territory, as well as under any United States law, as previously.

Holidays with Pay

The Annual Holidays Ordinance, which went into effect on January 1, 1951, is the first statutory provision for holidays with pay for workers in the Yukon Territory. The Ordinance is, in general, similar to the holiday legislation in effect in six provinces and in the length of the holiday period is like that of Saskatchewan.

It provides for a holiday of two weeks with pay for all employees except those engaged in farming, ranching, market-gardening, domestic service in a private residence and family undertakings. A worker becomes entitled to an annual paid holiday after completing one year of continuous service comprising not less than 280 days of actual work.

If a public holiday occurs during the worker's vacation, one working day is to be added to the holiday period, and in addition to his regular holiday pay he must be paid the wage to which he is entitled for the public holiday.

If the employment is terminated during the working year but if the worker has performed at least 90 days' work, he must be paid the equivalent of one day's pay for each 25 days of actual work during the uncompleted working year. A period of less than 25 days of actual work will not entitle a worker to a portion of a day's pay. A worker who leaves his employment at the end of a working year and who has not been given the 14 days' holiday to which he is entitled must be paid 14 days' wages in lieu of the holiday.

The 12-months qualifying period is deemed to have begun on the latest of the following dates: (*a*) one year immediately before January 1, 1951; (*b*) the date of entering employment with the employer; (*c*) the date on which the employee became entitled to an annual holiday under any Ordinance, custom, agreement, or under his contract of service.

The Commissioner or any person authorized by him may inspect the books, payrolls and other records of the employer to ascertain whether or not the provisions of the Ordinance are complied with and he may require the employer to verify entries by statutory declaration and to furnish further information.

The Commissioner may make regulations as may be necessary for the carrying out of the Ordinance.

Penalties are provided for failure to comply with the Ordinance or regulations, for making false statements with intent to deceive and for obstructing the Commissioner or his representative in the exercise of the powers conferred by the Ordinance. For a first offence, the penalty is a fine of from $25 to $100 or, in default of payment, imprisonment from 10 to 30 days, and for a subsequent offence, not less than $50 nor more than $200 or, in default of payment, imprisonment from 30 to 90 days.

If an employer is convicted of failure to pay money to an employee as required by the Ordinance, the convicting magistrate must, in addition to levying the fine, order the employer to pay to him the amount due for transmittal to the employee.

Steam Boilers

Amendments to the Steam Boiler Ordinance provide for the examination and qualification of welders and set out a schedule of fees for inspection of steam boilers, for engineers' and welders' certificates and for the annual registration of certificates.

No person may weld on a boiler, pressure vessel or piping in a steam plant or oil still unless he holds a valid certificate under the Ordinance. Three types of welder's certificates are provided for—Class A, Class B and Provisional Welder's Certificate. A Class A Certificate permits the holder to repair boilers and fired or unfired pressure vessels by means of gas or electric welding or both. Class B permits the holder to perform such repairs without supervision only on vessels of 15 pounds p.s.i. or under; if the vessel carries a higher pressure, a holder of a Class B Certificate may only carry out the welding under direction of a person holding a Class A Certificate. A Provisional Welder's Certificate, issued for not more than six months in a year, may be granted to a person who has been employed as a welder for at least two years, permitting him to perform the type of work endorsed on the certificate.

To qualify for a Welder's Certificate, a candidate must pass an examination, conducted by the Inspector of Steam Boilers, which may include a written test. The examination includes a physical check-up, a test of the candidate's knowledge of welding sheet-steel, heavy steel and cast iron and of brazing, a test of his knowledge of the behaviour of materials under the stresses of welding and a practical test. A welder may not take the examination unless the Inspector is satisfied that he has had sufficient experience.

A schedule of fees is now appended to the Ordinance.

As before, the owner of a boiler or pressure vessel must see that it is inspected at least once a year. The Inspector must record all particulars of inspection so that the prescribed fees may be collected by the Territorial Treasurer. The inspection certificate may be withheld by the Inspector until the fees are paid.

School Attendance

A new School Ordinance raises the school-leaving age from 12 to 14 years. A parent, guardian or other person having charge of a child between 7 and 14 years resident in an area in which there is a school is required to send the child to school for the whole school year. Previously, a child between 7 and 12 years was required to attend school for at least 16 weeks in each year, eight weeks of which were consecutive.

For failure to see that a child between 7 and 14 attends school or is educated otherwise, a parent or guardian, on summary conviction before a Justice of the Peace, is liable to a fine not exceeding $5 or, in default of payment, to imprisonment for not more than five days, with or without hard labour.

A parent or guardian is not liable to penalty for failure to send a child to school if the child is unable to attend by reason of sickness or other unavoidable cause, if there is no school open which the child can attend within a mile of his residence, if the child has reached a standard of education equal to or higher than that to be attained in such school, if the parent or guardian had not the means to clothe the child adequately, or if the child's mental condition is such as to prevent his attendance at school or his application to study.

Chauffeurs' Licences

The age limit for a chauffeur's licence was raised to 18 years for men, the same as the age limit in effect for women, by an amendment to the Motor Vehicle Ordinance. Previously, an application for a chauffeur's licence was not accepted from boys under 16 and girls under 18. An applicant for a chauffeur's licence must file with the Commissioner a certificate of good character, a health certificate signed by a qualified doctor, and a certificate of competency as a driver.

Employment of Young Persons in Serving Liquor

The new Cocktail Lounge Ordinance prohibits a person who operates an establishment licensed for the sale of liquor from allowing a person whom he knows to be under 21 to dispense liquor on the premises. A penalty of $50 and costs or, in default of payment, one month's imprisonment is provided for a first offence, and for subsequent offences the penalty is $100 and costs or two months' imprisonment.

The Ordinance also authorizes the Commissioner to make regulations providing for

licensing employees of persons operating licensed premises and prescribing requirements for such employees.

Old Age Pensions

An amendment to the Old Age Pensions Ordinance provided for the payment by the Government of the Yukon Territory of a supplemental allowance of not more than $20 a month for the period from April 1 to June 30, 1949, and of not more than $10 a month thereafter to persons who are receiving old age or blind pensions.

The amendment also ratified and incorporated in the Ordinance the agreement between the Government of Canada and the Government of the Yukon Territory which was effective from July 1, 1949, providing for the payment of pensions at the new higher rate, following amendments to the Old Age Pensions Act (Canada) under which the basic monthly pension was increased from $30 to $40 a month. Of this amount the Government of Canada contributes 75 per cent and the Territory 25 per cent.

NORTHWEST TERRITORIES

Motion Picture Machine Operators

The Motion Pictures Ordinance was replaced by a new Ordinance which provides for the licensing of operators by the Commissioner of the Northwest Territories. Previously, an operator was required to hold a licence issued by one of the Provinces of Canada. The Ordinance now makes provision for either type of licence. The Commissioner is given power to make regulations providing for the examination of operators and prescribing the application for and the issue and form of operators' licences. Officers designated by the Commissioner to investigate the fire prevention facilities of theatres are authorized to demand the production of operators' licences.

As before, no one under 18 may operate a motion picture machine. An operator must thoroughly examine the machine and all wire connections before each performance. During the operation of the machine he must devote his full attention to it and must not permit any unauthorized person to enter the enclosure. He is not permitted to operate the machine while under the influence of liquor nor to smoke or light matches while working.

Chauffeurs

A revised Motor Vehicles Ordinance, which came into force on April 1, 1951, lowered the age limit for obtaining a chauffeur's licence from 18 to 16 years.

Licensing of Trades and Businesses

The Business Licence Ordinance, which repealed a 1938 Ordinance and its amendments, forbids a person to carry on any of the businesses or occupations listed in the schedule without first obtaining a licence and paying the required fee.

An applicant for a licence who is an employer of labour is required to state in his written application the arrangements he has made for the protection of his workmen in case of accident in accordance with the provisions of the Workmen's Compensation Ordinance or his reasons for not making such arrangements.

Minimum Wage Legislation in France

A recent issue of the "Revue Française du Travail", published by the Department of Labour and Social Security in France, is devoted to the recent legislation regarding minimum wages in that country. The first part of the report is a historical summary of the development of wage regulation in France up to the measures approved on February 11, 1950. The new law restores to employers and employees the right to establish wage rates by free collective bargaining. The establishment of other working conditions through collective bargaining had been permitted by legislation at the end of 1946, when the large measure of control assumed by the Government during the war was partially relaxed. The 1950 law, besides permitting free collective bargaining concerning wages, retains the State's right to establish minimum wages. The article then goes on to describe minimum wage-fixing methods under the new Act.

Earlier Wage-fixing

State intervention in the fixing of minimum wages was first introduced in 1899 when "normal" wage rates were established for workers engaged on public works. Within each particular occupation it was provided that the worker should receive a wage rate comparable to wages currently in effect in the region concerned. This step, though a beginning, only affected those workers engaged on State public works and the minimum wages thus adopted were optional as far as other public bodies were concerned.

In 1915, a minimum wage was established for female home workers in the clothing industry. In 1926, this order was extended to cover women home workers in the basket-weaving, leather-manufacturing and brush-making industries. Male home workers in the clothing industry were brought under minimum wage legislation in 1928. Minimum wage provisions were again extended in 1935 when workers in the silk and rayon-weaving industries were made subject to such measures. Legislation affecting home workers was modified somewhat in 1941 and in 1943 but without any change in principle.

Legislative measures of 1936 and 1938, regarding collective agreements between employees and employers, marked a change-over from intermittent and indirect State intervention in the minimum wage field to direct and broad wage establishment. The 1936 law made it compulsory for all collective agreements whose provisions could be extended to cover a particular region (in much the same manner as provided for in the Quebec Collective Agreement Act) to contain a clause respecting minimum wages. The 1938 measure further provided that in collective bargaining wage rates could be revised in accordance with changes in the cost-of-living index and in the economic situation of the industry concerned. In 1939 minimum wages were set for industries working on national defence contracts. In 1940 all wages were subject to government regulation.

After the liberation the Government was able to utilize its experience in the field of wage regulation to establish a basic minimum wage for all industrial occupations. The "Revue" notes that the new principle contained in the legislation of February 11, 1950, is that a statutory minimum wage should be based on an estimate of what is the minimum return required by a worker. This estimate is to be arrived at after full consultation with employers' and workers' organizations.

The New Legislation

The law of February 11 makes provision for the setting of a national statutory minimum wage. A decree of August 23, 1950, set a minimum wage for industrial workers varying according to zone, applying to all those who are covered by or are parties to a collective agreement. A second decree of October 9, 1950, extended the application of the minimum wage rate set for industrial workers to rural craftsmen *(artisans ruraux)*, certain workers in agricultural undertakings, and employees of all duly established offices and agencies connected with agriculture. For all other agricultural workers, a slightly lower minimum rate was set. Subsequent Government decrees are to set a minimum wage for those employed in the merchant marine and in the catering industry.[1] Male and female workers of 18 years of age and over who are not handicapped are covered by the new legislation. Apprentices are specifically exempted.

The Higher Committee for Collective Agreements, which was established in 1946, was authorized to provide the Government with a typical budget which would guarantee a minimum or basic standard of living. Previously, the budget method had been used in establishing salary rates for public servants. The Higher Committee for Collective Agreements is composed of representatives of Government Departments, employers and workers under the chairmanship of the Minister of Labour and Social Security.

In the National Assembly and in the Council of the Republic (Upper House) two viewpoints were predominant with respect to the establishment of minimum wages based upon a typical budget. One view was that the Government should determine minimum wage rates without having recourse to any group or organization, while the other point of view suggested that the Higher Committee for Collective Agreements should set the wage rates, with the Government merely ratifying such regulations. The result was a compromise solution whereby the Government set the rates after taking into account general prevailing economic conditions and the advice of the Higher Committee based on budget studies.

From the many studies that had been made by the Committee the Government first set minimum salaries and wages on August 23, 1950. The legislation provides for a basic minimum of 64 francs an hour. The first zone of the Paris region receives the highest minimum rate, 78 francs an hour. The minimum hourly rates in other zones are established on a sliding scale, declining from the maximum of 78 francs. However, in no region can the minimum rate differ by more than 18 per cent from the hourly wage paid in the first zone of the Paris area. The law further provides that wage-setting policies must take into account the board and lodging provided for many employees by their employers.

The administration and enforcement of this minimum wage legislation have been entrusted to the Departments of Labour

[1] A decree of November 15, 1950, set a minimum wage for the merchant marine.

and Social Security, Finance and Economic Affairs, Public Works, Interior, Transport and the Tourist Trade, Industry and Commerce, Agriculture, the Merchant Marine and the Secretary of State for Economic Affairs as it is related to each of these particular Ministries.

In advising the Government upon the establishment of minimum rates, the Higher Committee studied briefs on workers' budgets prepared by several organizations, including the Cartel Interconfédéral, the Confédération Générale du Travail—Force Ouvrière, the Mouvement Populaire des Familles, the Union National des Associations Familiales and the Confédération Française des Travailleurs Chrétiens. These briefs took account of items that were considered to be basic necessities for the worker.

On May 8, 1950, the Higher Committee after discussion with the interested labour, industry, family and social welfare groups, decided that a single worker's budget should provide for those necessities which are considered basic and indispensable. Studies were prepared by two subcommittees, one studying food items and the other, non-food necessities.

It was estimated that 7,152 francs were necessary for food purchases each month and 8,048 francs monthly for non-food items, a total of 15,200 francs. The food budget was accepted in its entirety by the committee while the non-food budget did not receive the complete support of either the sub-committee or the full committee.

The sub-committee on food items concluded that 2,897 calories per day represented a basic diet. Employer representatives suggested the figure of 2,400 calories which was the amount established in a 1935 study made by the Hygiene Commission of the League of Nations. The amount stated as necessary for food purchases was calculated on the price index published by the National Institute of Economic and Statistical Studies. In establishing the figure of 7,152 francs, the sub-committee considered those foods that always or should always enter into the monthly budget such as meat, bread, butter, margarine, oil, vegetables, fresh fruit, milk, etc. In addition, the habits and customs of the French people with regard to foods and drinks were given consideration.

Also presented, at the request of the representatives of family organizations, was a budget for a family of four, the family consisting of the father, mother and two children. In this case a total monthly expenditure of 43,776 francs was considered necessary, 22,088 francs being spent for food and 21,688 francs for other items.

The several groups present at the Committee's hearings raised many objections to the findings of the Committee. A group of French employers (Conseil National du Patronat Français) felt that the Committee's estimates were based too much upon the needs of the Parisian worker and therefore did not represent an accurate budget. It suggested instead a basic monthly minimum of 12,160 francs for a single worker. Still another employer organization (Confédération Générale des Petites et Moyennes Entreprises) raised objections on the grounds that wage increases over and above present charges upon small businesses would have a detrimental effect.

Employee groups who were represented at the meetings of the Committee felt that the monthly budget to be allowed was too small. One such group (Confédération Générale du Travail) stated that a budget of 19,000 francs a month was a more adequate sum. Two other organizations, the Confédération Générale du Travail-Force Ouvrière and the Confédération Française des Travailleurs Chrétiens suggested a compromise monthly budget of 17,500 francs.

The rural viewpoint on the part of employers was expressed by the Fédération National des Syndicats d'Exploitants Agricoles which complained that budgets based upon the needs of workers in the Paris region were out of line with rural needs.

The "Revue" contains several of the briefs submitted by the various organizations that participated in the discussions of the Higher Committee. In addition to the studies on foods, studies were prepared with respect to other expenses incurred during a month. These included such items as gas, electricity, water, fuel, fire insurance, laundry costs, transportation, clothing, home furnishings, personal items and expenses connected with leisure and cultural pursuits.

The various items considered were given a particular weight in a typical budget and were considered in terms of cost and the percentage of income expended. The various tables included in the "Revue" indicate how detailed these studies were and how often differences of opinion arose with respect to many of the items. Thus, for example, the food budget estimated that 815 grams of milk were necessary for a worker in one month. This figure was accepted in the sub-committee by a vote of 17 to 14 with employer groups opposing employee groups in accepting the amount. The monthly amounts of such ingredients

as rice, sugar, jam, salt and flour received unanimous approval while, as in the case of milk, the amount of bread needed per month (10,640 grams) was disputed and only received the approval of a majority of the representatives.

Since the publication of the "Revue" minimum wages have been increased in France. On March 23, 1951 the French cabinet announced that the minimum hourly rate in the Paris area had been set at 87 francs instead of the previous 78 francs, and at 74 francs for the provinces in place of the previous 64 francs. This increase of approximately 11½ per cent became effective on April 1, 1951.

Legal Decisions Affecting Labour

The British Columbia Court of Appeal held that the chartering of a rival local union is not prohibited by the Trades and Labour Congress constitution.

Two other cases in British Columbia relate to efforts of rival unions to represent the workers of the Consolidated Mining and Smelting Company. In the first, the Supreme Court, determining a point of law in a test case, held that payment of union dues and an initiation fee is not an essential condition for "membership in good standing". In the second case the Court ordered the Labour Relations Board to grant a rehearing of an application for certification in the light of the new court ruling.

In a case before the Nova Scotia Supreme Court, it was held that the Federal Reinstatement in Civil Employment Act does not give rise to civil actions for damages for contravention of its provisions.

The British Columbia Supreme Court's refusal of an injunction to restrain Trades and Labour Congress officers from organizing a dual union among Vancouver civic employees was upheld in Appeal Court.

The British Columbia Court of Appeal, in a judgment given January 30, 1951, dismissed the appeal of the suspended executive and certain members of Vancouver Civic Employees' Federal Labour Union, Local 28, from the judgment of Mr. Justice Wood who refused their application for an injunction (L.G., 1951, p. 11). They had applied for an injunction to restrain Carl E. Berg and Thomas Gooderham of the Trades and Labour Congress of Canada from organizing a rival local among civic employees; infringing upon the jurisdiction of Local 28; and enticing its members away.

Local 28 had been a chartered local of the Trades and Labour Congress since 1917. In 1950, as a result of a complaint from a group of its members that the union was Communist-controlled, the Trades and Labour Congress sent its vice-president Berg to look into the matter. After unsuccessful efforts to bring about an adjustment with the local, the Congress suspended two of its officers and certain of its members. It then decided to organize another union for those civic employees who wished to have nothing further to do with Local 28, and to issue a charter to the new local.

The suspended executive argued that the Congress had no power to issue a new charter. Its action in so doing, they contended, was a breach of contract, in that the chartering of their local brought it under the constitution of the Congress, the terms of which form a contract between them. They further argued that if the Congress held that the union, by letting Communists get control, itself broke the contract, the Congress could still only punish the union in ways provided by the constitution, i.e. by suspension or revocation of the charter, not by setting up a rival. Suspension or revocation of the charter requires a hearing and is subject to appeal.

On examination of the constitution of the Congress, Mr. Justice Smith pointed out that its language shows very plainly that the Congress objects strongly to the union's allowing Communists to hold

office. While it does not expressly allow suspension or revocation on that ground, he held that the power was given by Article IX, Section 4, which allows suspension or revocation if the union "has violated either the spirit or the letter of the constitution". However, the Congress did not suspend or revoke the charter, and the question was whether what they had done infringed the legal rights of Local 28.

Mr. Justice Smith stated that the appellants argued that the constitution plus the charter formed a contract which by implication gave Local 28 some sort of exclusive rights, and this could only be possible if it had been assigned some exclusive territory, or some particular class of employees. He could not accept that the charter, which simply gives leave "to constitute Vancouver Civic Employees' Federal Labour Union No. 28", assigned all the city's employees to this union, or, even assuming it did, that such jurisdiction was exclusive. Therefore, "the union can no more complain of a rival union that takes away its members than a merchant can complain of a rival store that takes away his customers". The appeal was accordingly dismissed.

In a dissenting opinion, Mr. Justice Robertson held that the appeal should be allowed until the trial of the action. In an interlocutory matter, the Court is not required to be satisfied that the plaintiffs are bound to win, but only that they have a fair question to raise as to the existence of the right which they allege, and can satisfy the Court that matters should be preserved in their present position until the questions can be disposed of. Whether or not the Congress had the right to issue a charter which would be in opposition or dual to that of Local 28 was in his view such a question. In his opinion, there were other substantial questions to be decided, and a great deal more material would have to be before the Court before a conclusion could be arrived at. *Entzminger et al* v. *Berg et al.* [1951] 1 WWR (US), 552.

Under the constitution of the United Steelworkers of America a member of a local may be "a member in good standing" even if he has not paid an initiation fee or monthly dues.

On September 19, 1950, Mr. Justice Coady of the Supreme Court of British Columbia delivered a judgment on the application of J. A. Saunders, an employee of the Consolidated Mining and Smelting Company, for a declaration that he was a member in good standing of Local 4281 of the United Steelworkers of America (CIO). Counsel for Saunders and for Billingsley, the president of the Local, and other officers of the union who defended the action, agreed upon the facts set out in the special case stated, and the opinion of the Court was requested on the point of law. In particular, the question was asked whether Saunders was a member in good standing on February 8, 1950; March 11, 1950; and May 6, 1950. (March 11 was the date on which Local 4281 applied to the British Columbia Labour Relations Board for certification as bargaining agent for a unit of employees of the Consolidated Mining and Smelting Company, and May 6 was the date on which the application was rejected by the Board.) On July 24, 1950, the defendants had ruled that Saunders was not on these dates a member in good standing.

The principal facts set out in the case were that beginning about February 1, 1950, the United Steelworkers conducted a membership campaign among the employees of the Consolidated Mining and Smelting Company at Trail. On or about February 8, 1950, Saunders signed a card agreeing to accept membership in the United Steelworkers Local Union, and a voluntary check-off authorization. A charter was issued to Local 4281 by the International Union, United Steelworkers of America, dated February 23, 1950. By the terms of the charter the Local was required to comply with the rules, regulations and laws for local unions duly adopted by the United Steelworkers of America, and the International Union agreed "to promote and assist the said Local Union in the exercise of all rights and privileges hereunder".

Article 11 (1) of the Constitution of the International Union reads as follows:—

> No applicant for membership shall be regarded as being a member in good standing until the full amount of his initiation fee has been paid and the obligation has been administered, except in such cases where the applicant has religious scruples against taking the obligation.

On March 9, 1951, a meeting of the membership of Local 4281 was held at Trail and the pledge or obligation referred to in the Constitution was duly administered to Saunders. Saunders did not pay, and was not asked to pay, the initiation fee or monthly dues, by reason of a directive from the International Secretary-Treasurer, dated February 28, 1950, authorizing the Local "to accept as members in good standing in the United Steelworkers of America all persons who sign membership application cards and

voluntary check-off authorization". The directive authorized the Local to dispense with the collection of the initiation fee; the pledge was to be administered to the applicant for membership at the time he signed the membership application card and voluntary dues check-off authorization. Article 14 (2) of the Constitution permits the International Executive Board to grant dispensations from payment of initiation fees "when in its judgment such dispensation will promote the growth or interests of the International Union".

With respect to the payment of monthly dues, Article 11 (2) of the Constitution provides as follows:—

> A member shall pay his dues promptly commencing with the month during which he shall have been admitted, and he shall continue to pay all dues, assessments and fines or other obligations promptly when due in order to be and remain in good standing.

It is further provided by Article 11 (3) that:—

> A member shall be in good standing if he is not more than three months in arrears in any of his constitutional obligations, except in respect to assessments on which he shall be not more than one month in arrears.

In the stated case, no assessments were levied.

The judge held that Saunders became a member in good standing when he took the pledge on March 9, 1950. He could not be a member until the charter was issued, and he was not a member in good standing until he complied with the formalities required by the Constitution. He was therefore not a member in good standing on February 8, 1950, but he was on March 11 and May 6. *Saunders* v. *Billingsley, et al.* [1950] 4 DLR, 685.

The Labour Relations Board of British Columbia was directed by the British Columbia Supreme Court to grant a rehearing to a rejected applicant for certification.

The British Columbia Supreme Court, on March 16, 1951, granted the application of Local 4281, United Steelworkers of America, for a writ of mandamus requiring the British Columbia Labour Relations Board to rehear the application of the Local to be appointed as bargaining authority for a group of employees of the Consolidated Mining and Smelting Company of Canada Ltd., at Trail.

The issue arose out of the Labour Relations Board's rejection of the Steelworkers' application on May 6, 1950, and its certification of Locals 480 and 651 of the International Union of Mine, Mill and Smelter Workers, which had previously represented the company's employees.

Both the Steelworkers and Mine Workers claimed as members a majority of the workers in the unit. The Board rejected the Steelworkers' application in the following words:—

> The Board has rejected the application of the United Steelworkers of America for its certification as bargaining authority for employees of Consolidated Mining and Smelting Company because the applicant has failed to prove that a majority of the employees in the bargaining unit applied for are members in good standing of the applicant union.

Counsel for Local 4281, in asking for the Court order, argued that it was not the duty of an applicant for certification to prove that it had a majority of the members of the unit, but that it was for the Board to satisfy itself by making appropriate inquiries. In regard to this argument, Mr. Justice Clyne, who gave the reasons for decision, said:—

> From a perusal of the material before me I believe that the Board satisfied itself on the evidence which it had at the time and on its construction of such evidence that the majority of the members of the unit belonged to Mine Workers. . . . I cannot refrain from observing that in a case of this kind, where there is obvious rivalry between two unions, it would appear to have been wiser to have taken a properly supervised vote by secret ballot in a democratic fashion so that the wishes of the workers could have been ascertained without immediate pressure, instead of allowing what appears to have been a disorderly scramble to obtain signatures to membership cards. . . . I have no doubt that in some cases employees signed membership cards in both unions in order to make the best of all possible worlds.

He then pointed out that the Legislature has given the Board a very wide authority and the Court could not interfere in matters within the discretion of the Board. "Unless it can be shown that the Board was not acting honestly, or was acting with improper motives, I do not think that I have any right to tell it what it ought to do in exercising the confidence reposed in it by the Legislature".

It was further argued on behalf of the Steelworkers that the Board in rendering its decision should have given reasons. Mr. Justice Clyne found nothing in the Industrial Conciliation and Arbitration Act or in the general law which would compel the Board to elaborate its decision contained in its statement of May 6, 1950, but he commented:—

> In passing it should be pointed out that Boards such as this, which are invested with very wide powers, would avoid the

criticism of acting in an arbitrary and bureaucratic manner if they gave full reasons for their decisions.

At the hearings held before the Board one of the main points of contention was whether certain employees in the unit who had not paid an initiation fee or monthly dues were in fact members in good standing of the Steelworkers' union as claimed by the Steelworkers.

Following the decision of the Board of May 6, 1950, an action was brought in the Supreme Court of British Columbia by a member of the Local to determine the point. (See *Saunders* v. *Billingsley*, above.) In a judgment given September 19, 1950, Mr. Justice Coady held that an employee may become a member in good standing in the union without payment of dues. Application was thereupon made by the Steelworkers to the Board for a reconsideration of its decision of May 6, which application the Board refused without giving a hearing.

Mr. Justice Clyne held that in refusing the hearing the Board acted in contravention of Section 55 (8) of the Act which provides as follows:—

> (8) The Board shall determine its own procedure, but shall in every case give an opportunity to all interested parties to present evidence and make representation.

Another Section, 58 (2), permits the Board to review its own decisions:—

> (2) The Board may, if it considers it advisable so to do, reconsider any decision or order made by it under this Act, and may vary or revoke any such decision or order.

In Mr. Justice Clyne's view, the point decided by Mr. Justice Coady was certainly both material and relevant to the issue before the Board. The Steelworkers applied, pursuant to the Act and the Board's regulations, for reconsideration on the basis of Mr. Justice Coady's judgment and were refused a hearing. Mr. Justice Clyne therefore concluded that,

> by virtue of Section 55 (8) the Board is bound to give the Steelworkers an opportunity to make representations in order to determine whether or not it will exercise its discretion to reconsider its decision under 58 (2), and to that extent the application herein for a writ of mandamus is granted.

In re Local 4281 of United Steelworkers of America for a writ of mandamus against Labour Relations Board, Supreme Court of British Columbia, March 16, 1951, unreported.

Provisions in Reinstatement in Civil Employment Act for a fine and for an order for payment to aggrieved person held to invalidate a civil action for damages.

On May 13, 1950, Chief Justice Ilsley of the Nova Scotia Supreme Court dismissed a claim for damages brought by a veteran against his former employer for a breach of the Reinstatement in Civil Employment Act.

The veteran had been employed by the defendant company as a salesman from early 1942 until he entered the Naval Services of Canada about April 1, 1943. He received 8 per cent of the amount of his sales as remuneration, the company paying his travelling and living expenses and providing him with a drawing allowance. In February or March of 1946 he resumed his employment with the company at a salary of $50 a week with a yearly bonus. The remuneration had been agreed upon by him and the company. He worked on this basis until he left the employ of the company at the end of August, 1948. Had he been paid during the period of his post-war service at his former rate of 8 per cent of sales, he would have received four or five thousand dollars more than he was in fact paid on a basis of salary and bonus. The plaintiff claimed this sum by way of damages. He contended that the defendant had failed to perform the duty imposed on it by Section 5 of the Reinstatement in Civil Employment Act (1946) which reads:—

> It shall be the duty of an employer by whom a person accepted for service in His Majesty's forces was employed when accepted for such service, to reinstate him in employment at the termination of his service in such occupation and position as would be consistent with the true intent and purposes of this Act and under conditions not less favourable to him than those which would have been applicable to him had he remained in the employment of the employer.

Mr. Justice Ilsley found that the plaintiff had shown that, had he not enlisted, he would have been in February or March of 1946 receiving pay on the basis of 8 per cent commission. The questions to be decided were whether the company had violated the statute and secondly, if so, did a right of action for damages arise.

With regard to the first point, Mr. Justice Ilsley held that there was a breach by the defendant of its statutory duty.

> One of the most important conditions applicable to an employee is his rate of pay. I do not see how it can be said that a pay-basis which in the result gave the plaintiff much less in pay every year than the pre-enlistment pay-basis would

85256—7½

have given him for the same work is a condition as favourable to him as the pre-enlistment pay-basis. The defendant knew its volume of sales in 1945 and doubtless had every reason to believe that it would be saving money by re-employing this salesman on salary instead of commission. This was in my opinion part of the very mischief the Act was designed to prevent, an eventuality against which the Act was designed to give the plaintiff protection.

With regard to the second point, whether the violation of the statute gave rise to a right of action by the plaintiff, Mr. Justice Ilsley noted that, on the basis of several decisions concerning an alleged breach of a statutory duty, it could be said that the plaintiff has the right to recover damages unless it can be established by considering the whole of the Act in question that no such right was intended to be given. With respect to the Reinstatement in Civil Employment Act, it appeared that it was not the intention of Parliament to give a right of action for damages. Section 9 of the Act provides that an employer found guilty of an offence under the Act is liable to a fine not exceeding $500, and in addition must, on the order of the Court, pay to the person he has failed to reinstate a sum not exceeding an amount equal to 12 weeks' pay at his pre-enlistment rate.

In view of this provision, Mr. Justice Ilsley stated that:—

> If the remedy provided by this section were only the fine, I doubt whether its provisions would be sufficient to rebut the presumption of liability for damages. But the Court is directed to order the convicted employer to pay to the person whom he has failed to reinstate, a sum not exceeding an amount equal to twelve weeks' remuneration. While this would be difficult, if not impossible, to reckon in this case, the provision for payment to the employee is a strong indication that Parliament did not intend an action for damages to lie.

He concluded that the remedies provided by the Act itself were intended to be the sole remedies available, and that the Act must be taken to exclude any civil right of action for damages. The action was therefore dismissed with costs. *Fry* v. *W. H. Schwartz & Sons, Ltd.* [1951] 2 DLR, 198.

Selected Decisions of Umpire Under the Unemployment Insurance Act

The following decision is considered to be of sufficient general interest to warrant its publication in full.

Held: (1) That the employment notified to the claimant, although in her usual occupation, was not suitable within the meaning of Section 40 (2) (b) of the Act as it was at a rate of remuneration lower than that observed by agreement between employers and employees.

(2) That Section 43 subsection (b) of the Act must be literally interpreted, enforced and given its full effect even though the meaning conveyed might prove to be inconvenient.—CU-B 644 (January 26, 1951).

DECISION

SUMMARY OF THE FACTS:

The Claimant was employed as a finisher by the Metropolitan Ladies Wear Limited, Montreal, P.Q., at a rate of pay of $30 a week from July 25, 1949 to November 25, 1949, on which latter date she was laid off due to a shortage of work. Her hours of work were from 8 a.m. to 5 p.m.—5 days a week.

She filed an initial claim for benefit on December 2, 1949, which was allowed.

On April 27, 1950, she was offered permanent employment with La Maison Camille, Montreal, P.Q., as a finisher on a piece rate basis of 60 cents a coat. The hours of work were from 9 a.m. to 5 p.m.—5 days a week.

The claimant refused this offer of employment on the ground that the wage was too low as she wanted 75 cents a coat.

The local office reported that the remuneration offered to the claimant was at the prevailing rate of pay in the district for that type of work.

The Insurance Officer disqualified her from the receipt of benefit for a period of six weeks as from April 29, 1950, because, in his opinion, she had without good cause neglected to accept a situation in suitable employment within the meaning of Section 40 (1) (*a*) of the Act.

From the decision of the Insurance Officer, the claimant, on May 17, 1950, appealed to a Court of Referees stating that she had refused the employment with La Maison Camille because her union did not allow its members to work at a wage lower than that fixed by the union (which in her case was 75 cents a coat).

The Court of Referees heard the case in Montreal, P.Q., on June 8, 1950. The claimant and a representative of her union were present at the hearing and gave evidence. The Court unanimously reversed the decision of the Insurance Officer stating in part as follows:—

> From the questions asked the claimant and Mr. Gougeon (the union's representative), it appears that La Maison Camille, where the claimant was referred to for employment, was not a closed shop. Miss Lapierre therefore was informed by her union that if she accepted work in an open shop she would *ipso facto* be liable to lose her union rights, and would in fact, violate the rules set by that organization.
>
> Consequently, after having carefully studied the case, the referees considered that Section 43 (*b*) of the Unemployment Insurance Act establishes the right for the claimant to refuse to accept employment which would make her lose her union rights.

From the unanimous decision of the Court of Referees, the Insurance Officer appealed to the Umpire contending that the Court had erred in its interpretation of Section 43 (*b*) of the Act. In his lengthy memorandum to me in support of his appeal he states in part:—

> . . . Section 43 (*b*) of the Act is not intended to cover all the rules which a union is permitted to make for the control of its members; a line of demarcation must be drawn somewhere, and we suggest that such line lies at the point where the particular aims, purposes and designs of a union are translated into rules which, although permissible, cannot be implemented under the laws which equally protect the undeniable rights of the non-organized individuals,—whether employers or employees. . . .
>
> Under such an interpretation (as given by the Court of Referees) the right of the claimant for unemployment benefit would not be fixed or determined by the provisions of the statute but by rules adopted by organizations in which the claimant has membership. Such interpretation of the statute, and as a consequence its administration in conformity to such interpretation, is clearly untenable. . . .

Subsequent to the Insurance Officer's appeal a brief was submitted to me by Mr. B. Shane, Vice-President of the International Ladies' Garment Workers' Union. The Canadian Congress of Labour in view of the principle involved in the present case also filed a brief on December 15, 1950.

Furthermore at the request of the various unions interested in the case an oral hearing was held before me in Ottawa, on December 20, 1950. The following persons attended: Messrs. J. J. Spector, K.C., and Claude Jodoin, representatives of the ILGWU, G. G. Cushing, General Secretary-Treasurer, TLC, Pat Conroy, Secretary-Treasurer, CCL, A. Andras, Assistant Research Director, CCL, S. Wolstein, T. L'Espérance, barrister, representing the CTCC and H. S. Relph, K.C., Chief Claims Officer of the Unemployment Insurance Commission.

Conclusions:

The claimant's usual occupation is that of a finisher and she was offered employment as such at a rate of pay of 60 cents a coat which, from the evidence before me, appears to be lower than that paid in the district by agreement between employers and employees to workers of her experience, i.e. 75 cents a coat. Therefore, the employment offered to her was not suitable within the meaning of Section 40 (2) (*b*) of the Act.

The Court of Referees however, basing its decision on Section 43 (*b*) of the Act, found that the claimant should not have been disqualified from the receipt of benefit by reason of her refusal to accept the employment offered as by acceptance thereof she would, in accordance with the constitution and by-laws of her union, have lost the right to continue to be a member and to observe the lawful rules of her union.

The Insurance Officer in his appeal to me has raised a very interesting point, namely, that such a literal interpretation of Section 43 (*b*) might lead to abuses in that the unions, by their rules, could indirectly dictate to the statutory authorities what is suitable employment for their members, thereby creating a discrimination in relation to the other persons insured under the Act.

I can very well appreciate the Insurance Officer's point of view. However I am bound by the terms of the Act and I cannot give to Section 43 (*b*) any other meaning than that placed thereon by the Court of Referees.

Parliament in Section 43 (*b*) used clear and unequivocal language and one of the basic rules of construction is "to intend the legislature to have meant what they actually expressed." Therefore Section 43 (*b*) must be enforced and given its full effect even though the meaning conveyed by it might prove to be inconvenient.

I am confident however that the unions which are deeply interested in social security legislation and particularly in the workings of this Act, will not take advantage of the construction placed herein on Section 43 (*b*) to further the interests of trade unionism to the detriment of other workers insured under the Act. If such ever proves to be the case, I will not hesitate to use the authority of my office to make a recommendation to the proper authorities competent to bring about amending legislation.

Under the circumstances the appeal must be dismissed.

Alfred Savard,
Umpire.

Dated at Ottawa, Ont., this 26th day of January, 1951.

GREAT LAKES SEAMEN'S SECURITY REGULATIONS

The regulations established by Order in Council P.C. 1439 (dated March 22, 1951), have been amended by Order in Council P.C. 2101 (April 26). A seaman is now required to be in possession of an interim or regular Seaman's Card before accepting employment on board a Canadian ship in the Great Lakes between June 1 and July 31, 1951 inclusive. The original date was May 1 (L.G., May, p. 626). There has been no change in the date by which regular Seaman's Cards are required, namely, August 1.

Unemployment Insurance Statistics, March 1951*

Initial and renewal claims for benefit filed in local offices of the Unemployment Insurance Commission in March, 1951, numbered 109,764, a decline of about eight per cent from last year's March total of 119,533, the monthly report on operations under the Unemployment Insurance Act, issued by the Dominion Bureau of Statistics, shows. Increases occurred in Newfoundland, the Maritimes, Quebec, Saskatchewan and British Columbia, but

* *See* Tables E-1 to E-8.

there were declines in the other provinces. In March, a total of $10,467,167 was paid in respect of 4,192,575 unemployed days, as compared with $9,589,561 paid for 3,853,024 days in February, and $15,747,725 for 6,466,268 days in March, 1950.

Ordinary claimants on the live unemployment register on March 31 numbered 184,538 (150,878 male and 33,660 female), compared with 208,039 (169,626 male and 38,413 female) on February 28, and 263,382 (213,614 male and 51,768 female) on March 31, 1950.

Claimants signing the unemployment register on the last day of the month totalled 236,395, of whom 41,932 were supplementary benefit claimants.

Initial and renewal claims adjudicated during the month totalled 111,819. Of these, 68,001 were considered entitled to benefit and 43,818 not entitled. In addition, there were 13,741 supplementary and revised claims not entitled to benefit. The main reason for non-entitlement was insufficient contributions on the part of regular claimants (34,906). Total disqualifications imposed on claimants numbered 15,791, in respect of which the chief reasons were: "voluntarily left employment without just cause", 5,817 cases; "not unemployed", 3,215 cases; and "refused offer of work and neglected opportunity to work", 1,844 cases.

A total of 68,445 persons commenced receipt of benefit payments during the month, compared with 79,421 in February, and 91,646 in March, 1950.

For the week March 31-April 6, a total of $2,184,959 was paid to 147,162 beneficiaries for 873,101 proven unemployed days, compared with $2,331,336 to 158,045 persons for 936,027 days covering the week February 24-March 2, and $3,162,185, 219,711 persons and 1,297,370 days for the week March 25-31, 1950.

The average daily rate of benefit for the week March 31-April 6 was $2.50, compared with $2.49 for the week February 24-March 2, and $2.44 for the week March 25-31, 1950. The average duration for all weeks under review was 5·9 days.

Supplementary Benefit

Since the period for which supplementary benefit was payable expired on March 31, claims received on and after March 22 (unless ante-dated) were not forwarded for consideration under the supplementary benefit provisions of the Act. Thus, of the 34,906 regular claims disallowed during the month, only 34,353 were considered for supplementary benefit. In addition, renewal supplementary benefit claimants for the month totalled 1,329.

Of the 36,089 claims adjudicated, 27,154 were entitled to benefit. Claimants unable to qualify under any one of the four classes (L.G., Dec., 1950, p. 2031) numbered 6,862. There were 4,297 claims still pending at the end of the month.

Benefit payments amounted to $1,671,257.

Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission showed that during the month of March, 1951, insurance books were issued to 4,214,469 employees who had made contributions to the Unemployment Insurance Fund at one time or another since April 1, 1950. This was an increase of 52,664 since February 28, 1951.

As at the end of March, there were 243,524 employers registered, representing an increase of 253 during the month.

WAGE RATES AND HOURS OF LABOUR IN BUILDING CONSTRUCTION AND MUNICIPAL GOVERNMENT SERVICE, OCTOBER 1950*

Wage rates in Building Construction and Municipal Government Service increased during the year ending October 1, 1950, in most of the localities for which information is available. The wage changes were more general for workers in Building Construction than for Municipal Government employees. There was little change in the normal weekly hours of work for either of these two groups of employees, but in a few localities the work week was reduced.

* The information in this article, except for wage rates in the Building Construction Industry, was prepared from data obtained in the annual survey of wage rates and working conditions for 1950 conducted by the Economics and Research Branch of the Department of Labour. In this survey employees were asked to report on wage rates and normal hours of work in their establishments during the last pay period preceding October 1, 1950.

The data on wage rates in Building Construction were obtained from the minimum fair wage schedules prepared by the Industrial Relations Branch of the Department of Labour. The wage rates in these schedules are based on those generally accepted as current in the localities concerned.

Building Construction

The index of wage rates in the Building Construction Industry increased 5·3 per cent during the year ending October 1, 1950, 94 per cent above comparable rates in 1939. This index is calculated from wage rates for seven skilled and one unskilled occupation in 29 major cities.

Table 1 shows the wage rates and predominant weekly hours in 43 Canadian localities, immediately prior to October 1, 1950.[1] Information for St. John's, Newfoundland is presented in this table for the first time. Table 2 indicates the trend of wage rates in the Building Construction Industry since 1939 by individual occupations, and Table 3 contains index numbers for each of the cities used in the calculation of the Canada index.

Of all rates shown for the skilled trades in Table 1, only about 12 per cent were less than $1 per hour; and almost all these lower rates were in the smaller centres. While rates do not appear to vary in close relationship with the size of the city or town, the tendency nevertheless is along these lines. In Montreal the lowest skilled rate was $1.30; in Toronto, $1.35; in Vancouver, $1.40; and in Winnipeg, $1.10. In all four cases the rates named are for painters. In Charlottetown five of the seven skilled occupations were paid 80 to 85 cents per hour and in St. Hyacinthe journeymen in three of the seven categories received 95 cents per hour and in one other, 85 cents.

Generally speaking, the highest paid trade was bricklayer, with 32 of the 43 centres shown in Table 1 having rates of $1.50 or more per hour. In Toronto the bricklayers' rate was $2 per hour. The rate for labourers ranged mostly between 70 and 85 cents per hour, but rates as high as $1 per hour were paid in some cities.

In the period 1939 to 1950 there was a general similarity in the percentage increases among the skilled occupations. It is interesting to note, however, that the greatest percentage increase of 97 per cent was for painters—generally the lowest paid in the skilled group. Rates for bricklayers, on the other hand, increased by only 82 per cent. In comparison to the skilled occupations, the rate for Construction labourers increased by 115 per cent in the same period. During 1950, percentage increases ranged from 2 per cent for bricklayers to 7 per cent for painters, a similar relationship to the entire period. The increase for labourers was about 6 per cent.

In 11 of the 29 cities for which indices are shown in Table 3, the increases since 1939 were 100 per cent or over. Five more centres had increases of between 90 and 100 per cent, seven had increases of between 80 and 90 per cent, and of the remaining six localities, five showed gains of over 70 per cent. In the year ending October 1, 1950, percentage increases by locality ranged from less than 1 per cent to 8 per cent.

Predominant Weekly Hours.—The predominant normal work week for tradesmen in the Building Construction Industry ranged from 40 hours in more than half of the localities shown in Table 1 to 54 hours in St. John's and Chicoutimi. In Ontario, the three Prairie Provinces and British Columbia, almost all of the localities had a predominant work week of 40 hours. In some of these centres, however, certain trades were normally working somewhat longer hours. The 48-hour week was predominant in Quebec, the 44-hour week in New Brunswick and the 40-hour week in the two Nova Scotia localities. Some trades in Charlottetown, Prince Edward Island, were normally working 44 hours a week and others were working 48 hours.

In most of the localities the labourers were normally working the same weekly hours as the tradesmen, and where the tradesmen were working two different schedules of hours the labourers normally worked those of the longer group. In the two cities in Nova Scotia, the labourers were working 48 hours a week, as compared with 40 hours for the tradesmen.

The predominant weekly hours of tradesmen and labourers in this industry showed little change in 1950 when compared with the predominant hours in 1949.

Municipal Government Service

Wages for Municipal Government employees were increased in many Canadian localities in 1950, but there were very few changes in the normal hours of work. Table 4 shows the maximum basic annual salaries of police constables and firefighters, the hourly rates of civic labourers, and the normal weekly hours of these three classes of employees in 64 municipalities.

[1] Comparable information on wage rates in 1949 is contained in the article "Wage Rates in the Construction Industry, 1949", THE LABOUR GAZETTE, April 1950, p. 545. Similar information for previous years is published in the *Annual Report on Wage Rates and Hours of Labour in Canada.*

Wages and Salaries.—The "maximum basic salary" for police constables and firefighters is the salary paid after the probationary and training period has been completed, frequently from three to five years, but before long-term service increases are obtained. It includes cost-of-living bonuses, wherever paid, but does not include allowances for free uniforms, boots and transportation, or other like benefits. In almost every instance, the salaries listed are those received by the majority of the police constables or firefighters in each of the communities.

The hourly wage rates shown for labourers apply to Works Department employees. In some cases where ranges of rates are given, the lower figure represents the starting wage rate and the higher one the maximum rate paid to labourers, generally to those engaged in more arduous or difficult work or to those who have received a length of service increment.

There was a marked tendency for wages to be higher in the larger centres for all three job categories, but this trend was by no means universal and many exceptions were evident.

Salaries for police constables ranged from $1,872 per year in Charlottetown to $3,036 in Toronto. The majority of the municipalities covered in this comparative study reported paying their police constables an amount somewhere between $2,100 and $2,800 a year. More communities paid their constables between $2,500 and $2,600 per year than any other equivalent range.

Firefighters' salaries varied from $2,017 a year in Brandon to $3,155 in Toronto, but were most commonly between $2,100 and $2,700 in the other centres. Seventeen communities paid their firemen the same annual salaries as their police constables.

Civic labourers were paid wages which varied from 65 cents an hour, the basic rate in St. Hyacinthe, to $1.23, the maximum rate for labourers in Vancouver.

Over one-half of the communities covered in this analysis reported higher salaries for their firefighters and police constables in 1950 than in 1949, and over one-third, higher wage rates for their labourers.

The amount of such increases varied considerably for the first two classes of workers. Police constables in Lethbridge and firefighters in London gained $10 per year, whereas similar workers in Verdun received additions to their 1949 salaries of $349 and $449 respectively. The most frequently reported increases were between $100 and $200 a year. In the case of labourers, increases in wage rates varied from two cents an hour in Port Arthur and Regina to ten cents in Peterborough and Woodstock, but generally amounted to four or five cents an hour in the other 18 communities where they were granted.

Normal Weekly Hours.—There were very few changes in the standard weekly hours of Municipal Government employees during the year ending October 1, 1950. The work week of police constables, excluding those in localities where both police and firefighting duties were performed by the same persons, ranged from 40 hours in some of the Western cities to 60 hours in two Quebec centres. In Alberta and British Columbia the 40-hour week was predominant for police constables, whereas in the remaining provinces the 44- or 48-hour week was most common.

With but two exceptions, the normal work week for firefighters in 1950 ranged from 48 to 72 hours. The predominant hours were 48 a week in the Western provinces and 56 or 72 a week in the Eastern provinces. Most firefighters work under the two-platoon system, 10 hours on the day shift and 14 hours on the night shift, but the average number of hours normally worked per week depends upon the period of rotation. In Alberta the three-platoon system of three 8-hour shifts is in general operation.

Civic labourers generally worked 44 or 48 hours a week in 1950, except in Alberta and British Columbia. In most of the cities of these latter provinces shown in Table 4 the normal work week was one of 40 hours.

TABLE I.—WAGE RATES AND HOURS OF LABOUR IN THE BUILDING CONSTRUCTION INDUSTRY, OCTOBER 1, 1950

(1) Higher rates for married men.
(2) Drivers of apparatus only; others on call.
(3) Both police and firefighting duties performed by same men.

Employment Conditions

An analysis of the current employment situation prepared by the Economics and Research Branch, Department of Labour, on the basis of returns from the National Employment Service, reports from the Dominion Bureau of Statistics, and other official information.

April 1951 . . .

. . . benefited by the usual spring renewal of work in construction, on the farms and in transportation. Workers released for the inactive winter months were returning to their jobs in steadily increasing numbers. The slow seasonal upswing in Quebec and the Maritimes was giving way to more rapid expansion by the end of April as employment in logging stabilized and other industries underwent their usual spring upswing.

Emphasis in labour market activities which had centred around the demands of the defence industries during the winter, turned during April to the requirements of the seasonal industries which involve many thousands of workers. During April, the manpower needs of these industries were easily met out of the surplus of workers which developed during the winter months. Live applications on file at National Employment Service offices, which at March 29, 1951, totalled 290,300 dropped to 217,500 at May 3, a decline of 72,800 during the five weeks. Some of this decrease, however, could be attributed to the lapse of registrations of persons claiming supplementary unemployment insurance benefits since such benefits were no longer available after March 31.

The need for skilled tradesmen in the machine shop trades continue to be an important characteristic of the labour market scene and will become even more so as defence production reaches its anticipated level in shipbuilding, aircraft plants, and ammunitions manufacturing. In most cases, however, the shortages have not interrupted production, since material scarcities and uncertainties in allocation of defence contracts are still the major factors in shaping production schedules.

Registration of male workers at Employment Service offices in the skilled and semi-skilled metalworking occupations numbered 4,100, at May 3. Many of these workers are not fully qualified and a large proportion are in the older age group; as a result, employers are looking more to immigration to fill their needs, and through various means are endeavouring to recruit these types of workers in the United Kingdom at the present time.

The usual spring drop in logging employment was less steep this year as, with the strong world demand for lumber and pulp and paper products, cutting is being carried on throughout the summer months. The spring drive was beginning in the east in April and cutters were being transferred to this work instead of experiencing short lay-offs. At the end of April, pulp and paper companies in the east were employing five times as many woods workers as they did last year at the same time. Many loggers, nevertheless, were moving out of the industry voluntarily, some into the cities to await the opening of other job opportunities, and others returning to farm work. Employment in woodswork in British Columbia was increasing in April, and shortages of men, both skilled and labourers, were developing.

The demand for farm workers was strong in April, although the season was just beginning and cold and wet weather held up work. There was difficulty in meeting this demand, partly because some farmers wanted men for only a month or so but also because of attractive openings in other industries. In anticipation of farm labour shortages, more farmers than last year were seeking help through immigration sources. During April, over 1,200 farm labourers were brought to Canada under the group movements from other countries arranged by the Federal Departments of Labour and of Citizenship and Immigration. This additional help was by no means sufficient to meet all requirements, however, and it was reported that in some cases farmers had curtailed operations or had mechanized the work to the extent that it could be carried out by themselves and their families without outside assistance.

Construction work was also in early stages of seasonal activity and held up by weather conditions. Shortages of quali-

fied men were already reported, however. The volume of employment provided by the industry is estimated at about 10 per cent over 1950 levels, although costs are up as much as 25 per cent. Steel shortages have exerted a limiting influence on employment expansion, although neither steel restrictions nor the cut-backs in residential lending have yet had a dampening effect on the industry's program for the year. Contracts awarded continue to be at record heights, the April total of $147,000,000 being $32,000,000 above April, 1950.

Expansion in the manufacturing industries continued in April, both in employment and plant capacity. The monthly DBS index of manufacturing employment at February 1, 1951, was 184·4 (1939=100), as compared to the figure of 174·0 one year previously. The heavy plant building program currently under way in the industry should create upwards of 15,000 new jobs this year, concentrated largely in the central provinces. During April, lay-offs were low, although production was frequently interrupted by material shortages, particularly of steel. Sawmills were beginning their year's work and pulp and paper companies were taking on seasonal workers, such as boomworkers, longshoremen and boat crews. In textiles the dress industry was in a dull period but primary mills were busy. Scarcity of qualified tradesmen still plagued the metalworking plants, shortages being greatest among such occupations as machinists, moulders, sheet metal workers and lathe operators.

Regional Analysis

In ***Newfoundland***, fishing was slowly opening up, although inshore fisheries were still awaiting the disappearance of ice floes except along the south shore. A few vessels began the first trip to coastal points with summer supplies for the outports, and others were preparing to start; but the anticipated shortage of lumber for return cargoes may make the coastal trade unprofitable for some owners. In many instances, sawmill operators along the east and northeast coast have been kept short of logs by the inability of loggers to get their winter cuts out of the woods. Registrations with National Employment Service offices declined from 12,400 at March 29, to 10,400 at May 3, 12,000 lower than a year earlier.

Seasonal expansion of employment in ***Maritimes*** fishing, fish processing, construction and pulp and paper made slow headway during April. Bad weather and poor fish runs reduced landings and caused reductions in hours for fish handlers in the larger plants; the confectionery industry remained slack; shipbuilding expansion was hindered by slow deliveries of steel; and highway load limits still hampered deliveries of logs to sawmills. The prospect of employment on the Quebec North Shore and Labrador Railway induced workers in a number of areas to hold back from jobs offered locally; while, despite the apparent shortage of bush workers for summer cutting in New Brunswick, a number were signed up by recruiting agents for the British Columbia logging industry. The prospect of some 6,000 construction jobs opening up shortly at Goose Bay, Labrador, where U.S. firms will be working on defence installations, suggests a heavy drain on manpower surpluses in the Atlantic region. Active job applications with NES offices totalled 28,300 at May 3, a drop of 5,900 during the month and of 26,100 over the year.

Seasonal unemployment in the ***Quebec*** region declined rapidly during the latter half of the month, as reflected in a decline of 21,200, to a May 3 total of 74,400, in job applications over the month—70,600 lower than a year ago. The relatively slow start of farming, prospecting and construction, together with continued slackening in woods employment at the end of winter cutting and hauling, resulted in only a slow pick-up until about mid-April; but hiring for the river drives and for summer cutting, and the re-opening of St. Lawrence navigation, sparked an accelerating improvement from then till the beginning of May. Concurrently with further expansion in the production of chemicals, electrical apparatus and aluminum, and with capacity operations in the pulp and paper industry, and hirings for shipbuilding contracts, there were scattered lay-offs and short-time work in metalworking, textile and rubber products plants. These were brought on, or aggravated, by continuing shortages of iron and steel, nylon and woollen yarns, natural and synthetic rubber. Seasonal slackness in many secondary textiles and clothing firms was aggravated by high customer inventories, said to be the result of the effects of the recent federal budget provisions on consumer buying. Footwear firms were using their seasonal slack period for stock-taking.

Continuing shortages of skilled manpower and of essential materials cast shadows across the generally bright April manufacturing picture in the ***Ontario*** region. Qualified machine shop workers, foundry workers and aircraft sheet metal workers remained very scarce; and shortages of wool, hides, iron and steel, brought short-time and lay-offs to textile mills, tanneries

and machinery plants, and held up shipyard expansion. The impact of the new federal budget slowed down the movement of washing machines and refrigerators, causing production and staff cut-backs. Very light livestock deliveries kept packing-houses unseasonally slack. Wet weather delayed planting and seeding in most farming areas, but the strong demand for year-round farm help was only partially eased by the arrival of some 300 displaced persons for farm employment. As in other eastern regions, woods operators are planning extensive summer cuts, some of which were already under way alongside river drive operations. British mine workers arrived during the month to help alleviate the sustained demand for experienced manpower arising out of the steadily increasing output of mines in both precious and base metals, as well as other minerals. Shortages of structural and reinforcing steel joined with unfavourable weather to limit expansion in construction activity. Movements of both tradesmen and labourers from northern parts of Ontario and Quebec offset, to some extent, developing shortages of construction manpower in areas of south-western Ontario. Active job applications with Ontario National Employment Service offices dropped a further 12,500 during April, the May 3 total of 44,200 being 33,800 below that of a year earlier.

During April, the annual upswing in seasonal activities in the ***Prairie*** region was well under way, with an accelerated decline in the number of jobless. Job applications with the National Employment Service dropped 16,000 during the month, to a total of 33,600 at May 3. The opening of lake navigation and the start of railway maintenance absorbed hundreds of workers, and additional employment gains were made in agriculture although spring planting was not yet general. A large number transferred to these activities from bush work, leaving a continued scarcity of labour to carry out the higher level of production in the woods this summer. The upswing in construction is reflected in a decline of one-third in the number of active applications with the NES from construction workers. In this industry, the extensive rehabilitation and expansion of training facilities for the armed forces will more than offset the expected decline in residential building. Current and proposed construction is particularly intensive in the Edmonton area.

With improved weather conditions, unemployment in the ***Pacific*** region during April continued its characteristically rapid seasonal decline, owing mainly to the rehiring of workers in the forest industries. Applications at NES offices dropped 15,200 during the month to 26,600 at May 3; this is 12,700 less than the total a year earlier. As yet, the supply of labour was sufficient to meet the early demands of construction and agriculture, but shortages of skilled labour were beginning to develop in the mining industry and in logging operations. Shortages of logging skills may be expected to become more general as the season progresses, following the record level of demand for lumber and the expanding pulp and plywood capacity of the region. At Prince Rupert, site of a new pulp mill, there was already a strong demand for all types of logging labour. In this area also, construction camps for work on the Aluminum Company of Canada hydro project have been established, and hiring in volume is expected to take place in June. The large highway and railway construction programs will absorb considerable numbers of men and, in addition, there is a strong demand for both construction workers and miners from the extensive base metal developments in the same area. The labour requirements for the many activities in this northern section of the province will necessitate the transfer in of a great many workers from other centres.

Employment Service Activities

With the upswing in seasonal activity, employers filed many more orders for help at Employment Service offices during April and placements increased accordingly. By the week ending May 3, placements of men totalled 15,000 and women 5,000, contrasting with the average weekly February level of about 10,000 and 4,000 respectively. The number of placements effected continued to be substantially higher than a year ago; this increase was apparent for both men and women, for handicapped persons and for workers being transferred from one area to another to fill jobs.

The increase in hirings resulted in a sharp decline in the number of applications for work remaining on file during April. By May 3, registrations in the live file had dropped to 217,500 a decline of almost 73,000 from March 29. A corresponding decrease occurred among claimants for unemployment insurance, the 184,100 active at the beginning of April falling to 104,500 at the month-end.

The supplementary unemployment insurance benefit program ended for the year at March 31 with 38,000 persons in receipt of benefit. In addition, 4,000 more were waiting adjudication of their claims. During its three months of operation, 112,000

claims were considered for supplementary benefit; initial payment began on 66,000 and renewal payment on 1,100.

A total of $2,451,000 was disbursed under the program from January to March with payments heaviest in February when they were well beyond the million dollar mark. Some 45 per cent of the benefits were paid to claimants in Quebec; 21 per cent to persons in Ontario. Most of the persons claiming supplementary benefit had exhausted their ordinary benefit rights during the past year and were in this way entitled to supplementary assistance; 33,000 claims, however, or 39 per cent of those allowed were granted because claimants had not worked sufficient days in insurable employment to receive ordinary benefits.

When the program closed at March 31, there was roughly one woman claiming to every four men. Women on claim at that date numbered 9,000 and men 33,000.

An age-breakdown of applicants registered at April 26 showed that 11 per cent were under 20 years of age, 57 per cent were between the ages of 20 and 44, 24 per cent were 45 to 64 years of age and 8 per cent were 65 years of age and over. In actual numbers, there were fewer persons 45 years of age and over registered for work than a year ago, but proportionately, the percentage in this age group was higher not only than last year, but also in comparison with any other post-war year.

PRICES AND THE COST OF LIVING*

Cost-of-Living Index

The Dominion Bureau of Statistics cost-of-living index increased slightly from 181·8 to 182·0 between April 2 and May 1. This advance of 0·2 point or 0·1 per cent was principally due to increases in clothing, home furnishings and miscellaneous items, which were largely offset by a decline in the food index. This index moved from 238·4 to 235·4 as a sharp drop in the price of butter was only partially counterbalanced by scattered increases in other foods, the most important of which were eggs and beef. Decreases were also registered by pork, oranges and cabbage.

The index of clothing prices advanced from 198·8 to 201·5 following increases in men's clothing and footwear. Increases were general in the home furnishings and services group and the index advanced 4·2 points to 194·9. Within this group, furnishings, floor coverings and electrical equipment showed the most important changes. The fuel and light index declined 0·5 point to 146·2. Seasonal decreases in anthracite coal in eastern Canada were partially balanced by higher electricity rates in British Columbia. An increase in the miscellaneous index of 0·9 point to 140·7 was largely due to higher prices for tires, cigarettes and tobacco. Rents were not surveyed during April and the index remained unchanged at 137·6.

From August 1939 to May 1951, the increase in the cost-of-living index was 80·6 per cent.

Cost of Living in Eight Cities

Cost-of-living indexes for the eight regional cities all advanced between March 1 and April 2, coinciding with the upward movement in the Dominion urban index. Reflecting mainly a sharp rise in butter prices, food indexes were higher at all centres and accounted for the major part of the composite increases. Clothing, home furnishings and services and miscellaneous items registered narrow increases at certain centres, while fuel costs were higher at Toronto. Rents were not surveyed in April and the indexes remained unchanged.

Between March 1 and April 2 composite changes were as follows: Vancouver, from 179·2 to 182·6; Halifax, 167·1 to 169·2; Saint John, 174·8 to 176·9; Montreal, 184·3 to 186·3; Winnipeg, 173·6 to 175·6; Toronto, 176·4 to 178·3; Edmonton, 172·8 to 174·7; and Saskatoon, 177·8 to 178·9.

Wholesale Prices, March, 1951

The General Wholesale Price Index rose 1·4 per cent to 241·8 (1935-1939=100) in March, 1951. All of the eight major groups, with the exception of Non-ferrous Metals, moved up between February and March, but the group gains were generally smaller than in the earlier months of 1951. Textile Products again led in the advance with a rise of 4·0 per cent to 327·1; raw wool, worsted yarns, woollen cloth, knit goods and carpets being mainly responsible for the increase. Sharp upturns in butter prices combined with smaller advances in other animal products, notably livestock, fresh meats, and eggs to move the Animal Products index up 2·7 per cent to 302·4. Chemical Products rose 0·9 per cent to 184·8 as increases for hydrochloric acid,

* *See* Tables F-1 to F-6.

sodium bicarbonate, tartaric acid and wood alcohol outweighed a decline in shellac. Wood Products rose 0·9 per cent to 289·0 in response to increases in fir, spruce, cedar and hemlock lumber. Eastern grains, rubber products and cocoa beans were mainly responsible for an increase of 0·7 per cent to 220·6 in the Vegetable Products index. Increases in coke, cement and coal tar were major components in an advance of 0·6 per cent to 169·3 in Non-metallic Minerals. A small increase in cast iron scrap raised Iron Products less than 0·1 per cent to 201·5. In Non-ferrous Metals a decline of 0·6 per cent to 174·4 was due to a drop in tin ingot prices from January and February highs, coupled with lesser declines in other metals.

Among important commodity price increases between February and March the following were recorded: worsted cloth yarn, 4 ply, 40·7 per cent, butter, Calgary, 34·5 per cent, onions, Toronto, 33·8 per cent, tartaric acid 31·6 per cent, butter, Winnipeg, 26·7 per cent, binder twine 22·3 per cent, eggs, Grade A large, Winnipeg, 21·8 per cent, raw wool, Australian, 21·2 per cent, Axminster rugs 20·0 per cent, raw wool, domestic, eastern bright, 20·0 per cent, linen thread 18·9 per cent. Among commodity price decreases were the following: tin ingots 16·9 per cent, beaver skins 15·2 per cent, tallow 12·0 per cent, solder 10·4 per cent, men's cotton combinations 8·9 per cent, sheepskins 8·6 per cent, potatoes, Montreal, 6·5 per cent, raw cotton 5·5 per cent, veal carcass, Toronto, 5·0 per cent, shellac 4·8 per cent.

The index of Canadian Farm Products prices at terminal markets rose 4·1 per cent to 264·2 between February and March. Animal Product price changes contributed the greater part of the increase with an advance of 5·3 per cent to 347·2, as raw wool, butterfat, eggs and livestock moved higher. The Field Products index, influenced mainly by eastern grains and potatoes rose 1·9 per cent to 181·2.

STRIKES AND LOCKOUTS

Canada, April, 1951*

There was little strike idleness during the month. Since the beginning of the year the monthly time loss has been low, and shows a substantial decline as compared with the same period last year. Fifteen new stoppages began in April but the majority involved few workers and caused little time loss.

Preliminary figures for April, 1951, show 19 strikes and lockouts, involving 2,647 workers, with a time loss of 9,673 man-working days, as compared with 27 strikes and lockouts in March, 1951, with 4,754 workers involved and a loss of 15,135 days. In April, 1950, there were 24 strikes and lockouts, involving 2,869 workers, and a loss of 15,272 days.

For the first four months of 1951 preliminary figures show 68 strikes and lockouts, involving 17,482 workers, with a time loss of 60,449 days. In the same period in 1950 there were 47 strikes and lockouts, with 12,135 workers involved and a loss of 103,772 days.

Based on the number of non-agricultural wage and salary workers in Canada, the time lost in April, 1951, was 0·01 per cent of the estimated working time, as compared with 0·02 per cent in March, 1951, April, 1950, and for the first four months of 1951; and 0·03 per cent for the first four months of 1950.

Of the 19 strikes and lockouts in existence during the month, five were settled in favour of the employers, one was a compromise settlement and five were indefinite in result, work being resumed pending final settlement. At the end of the month eight strikes and lockouts were recorded as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes and lockouts about which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Strikes of this nature which are still in progress are: compositors, etc., at Winnipeg, Man., which commenced on November 8, 1945, and at Ottawa and Hamilton, Ont., and Edmonton, Alta., on May 30, 1946; electrical apparatus factory workers at Vancouver, B.C., May 11, 1950; cotton and rayon underwear factory workers at Sherbrooke, P.Q., May 11, 1950; laundry machinery factory workers at Toronto, Ont., June 16, 1950; cleaners and dyers at Toronto, Ont., October 4, 1950; and bookbinders at Toronto, Ont., February 20, 1951.

* See Tables G-1 and G-2.

Great Britain and Other Countries

The latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. Statistics given in the annual review issued as a supplement to the LABOUR GAZETTE for April, 1951, and in this article are taken, as far as possible, from the government publications of the countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in February, 1951, was 119 and 19 were still in progress from the previous month, making a total of 138 during the month. In all stoppages of work in progress in the period there were 57,800 workers involved and a time loss of 340,000 working days was caused.

Of the 119 disputes leading to stoppages of work which began in February, 17, directly involving 34,500 workers, arose out of demands for advances in wages, and 44, directly involving 3,000 workers, on other wage questions; one, directly involving 200 workers, on a question as to working hours; 13, directly involving 5,000 workers, on questions respecting the employment of particular classes or persons; 38, directly involving 4,300 workers, on other questions respecting working arrangements; five, directly involving 2,100 workers on questions of trade union principle; and one, directly involving 2,400 workers was in support of workers involved in another dispute.

Australia

Figures for the first three quarters of 1950 on industrial disputes causing stoppages of work are now available. For the first, second and third quarters there were respectively: 321, 254, and 395 industrial disputes, directly involving 76,084, 90,900 and 66,286 workers with a time loss of 310,146, 191,140 and 206,399 working days.

Norway

During 1950, there were 30 work stoppages involving 4,399 workers and causing a time loss of 42,000 man-working days. Comparable figures for 1949 are 47 work stoppages with 9,010 workers involved and a time loss of 105,000 days.

United States

Preliminary figures for March, 1951, show 350 strikes and lockouts beginning in the month, in which 140,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 2,300,000 man-days. Corresponding figures for February, 1951, are 400 strikes and lockouts, involving 220,000 workers with a time loss of 1,700,000 days.

FATAL INDUSTRIAL ACCIDENTS IN CANADA*

First Quarter of 1951

There were 246[1] industrial fatalities in Canada in the first quarter of 1951 according to the latest reports received by the Department of Labour. This marks a decrease of 100 fatalities over the previous quarter in which 346 accidents were recorded including 32 in a supplementary list.

The industrial fatalities recorded are those fatal accidents which involved persons gainfully employed and which occurred during the course of, or which arose out of their employment. These include deaths which resulted from industrial diseases as reported by provincial Workmen's Compensation Boards.

Statistics on industrial fatalities are compiled from reports received from the various provincial Workmen's Compensation Boards, the Board of Transport Commissioners, and certain other official sources. Newspaper reports are used to supplement these data. For those industries not covered by workmen's compensation legislation, newspaper reports are the Department's only source of information. It is possible therefore that coverage in such industries as agriculture, fishing and trapping and certain of the service groups is not as complete as in those industries which are covered by compensation legislation.

* See Tables H-1 and H-2.

1 The number of industrial fatalities that occurred during the first quarter of 1951 is probably greater than the figure now quoted. Supplementary lists compiled from reports received in subsequent quarters, generally revise upwards the figures for previous periods.

During the quarter under review there were five accidents which resulted in three or more industrial fatalities in each case. On February 7, there were two separate accidents which resulted in multiple deaths. At St. Paul L'Ermite, Quebec, five munitions workers were killed when a large shell which was being filled exploded and an aircraft crash at Calmar, Alberta, cost the lives of the pilot, a foundry manager and a salesman employed by a wholesale hardware firm. Four employees of a cartage firm were killed at Winnipeg, Manitoba, on February 20, when the truck in which they were riding was struck by a train. On March 2, at Shakespeare, Ontario, two employees of the Department of Highways, and a truck driver, were killed, when the truck crashed through a group of road-workers and then struck another vehicle. Three crew members of a tugboat perished in Saint John Harbour, New Brunswick, on March 20, following a collision between the tugboat and a freighter.

Grouped by industries the largest number of fatalities, 50, was recorded in the transportation industry; during the previous quarter there were 66 in this industrial group. There were 41 fatalities in manufacturing in the first quarter of 1951; 15 of these were in the wood products group and 8 in the iron and steel industry. During the fourth quarter of 1950 there were 54 fatalities in manufacturing, 22 of which occurred in the iron and steel products group.

There were 37 fatalities in the logging industry during the first quarter of 1951 as compared with 52 in the previous three months, and 47 in the first quarter of 1950.

In the construction industry there were 33 accidental deaths as compared with 39 in the last quarter of 1950, and 28 in the first quarter of that year.

During the quarter under review there were 30 fatalities in the mining industry as compared with 54 in the previous quarter. Accidents in the metal mining industry numbered 20, the same figure as that recorded in the preceding three months. Fatal accidents involving workers in coal mining accounted for 7 fatalities as compared with 19 in the previous quarter.

In the various branches of the service industry there were 28 accidental deaths as compared with 30 in the previous three months, and 20 during the first quarter of 1950.

There were 10 industrial deaths in trade, three less than the number recorded in the preceding three months.

As mentioned above, information in regard to accidents in agriculture is available only from newspaper reports. Only 9 fatal accidents were reported in the first quarter of 1951, four less than the 13 recorded in the previous quarter.

An analysis of the causes of fatal industrial accidents which occurred during the quarter show that 88 or 35·8 per cent were caused by moving trains, watercraft or other vehicles. "Falling objects" were the cause of 42 fatalities while industrial diseases, strains and infections were responsible for 29 of the 42 deaths reported under the heading "Other Causes". "Falls of persons" resulted in 22 or 8·9 per cent of the period's fatalities, while the classification "dangerous substances", in which is included electric current, accounted for 20 or 8·1 per cent of the industrial deaths recorded.

The largest number of industrial fatalities was recorded in Ontario, where there were 96. In Quebec there were 41 and in British Columbia 38.

During the quarter under review there were 86 fatalities in January, 90 in February, and 70 in March.

SELECTED PUBLICATIONS RECEIVED RECENTLY IN LIBRARY OF DEPARTMENT OF LABOUR*

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed, free of charge, by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the LABOUR GAZETTE.

NOTE.—Latest figures subject to revision. Many of the statistical data in this table are included in the Canadian Statistical Review issued by the Dominion Bureau of Statistics.

† Comparable statistics are not available.

[1] Population figures given are as at June 1 for 1949, 1944 and 1939.

[2] Labour Force survey figures given are as at March 3, 1951, March 4, 1950, March 5, 1949. Detailed figures for March 1951 will be found in tables A4–A8 of this issue.

[3] Real earnings computed by dividing index of average weekly earnings of wage-earners in manufacturing by the cost-of-living index; base: average 1946=100.

[4] Newfoundland is included after April 1, 1949.

[5] Average 1935-39=100.

[6] Year-end figures.

[7] Figures for 1939-44 are production data rather than shipments.

[8] Includes ordinary live claimants plus claimants for supplementary benefit.

TABLE C-4.—HOURS AND EARNINGS IN MANUFACTURING

(Hourly-Rated Wage-Earners) SOURCE: Man-Hours and Hourly Earnings, D.B.S.

Tables C-4 to C-6 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3 They relate only to wage-earners for whom statistics of hours of work are also available, whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

TABLE C-7.—EARNINGS, HOURS AND REAL EARNINGS FOR WAGE EARNERS IN MANUFACTURING INDUSTRIES IN CANADA

SOURCE: Hours Worked and Hourly and Weekly Wages D.B.S. Real Wages Computed by the Economics and Research Branch, Department of Labour

Date	Average Hours Worked per Week	Average Hourly Earnings	Average Weekly Earnings	Index Numbers (Av. 1946=100)		
				Average Weekly Earnings	Cost of Living	Average Real Weekly Earnings
		cts.	$			
Monthly Average 1945	44·3	69·4	30.71	102·8	96·7	106·3
Monthly Average 1946	42·7	70·0	29.87	100·0	100·0	100·0
Monthly Average 1947	42·5	80·3	34·13	114·3	109·6	104·3
Monthly Average 1948	42·2	91·3	38.53	129·0	127·8	100·9
Monthly Average 1949	42·3	98·6	41.71	139·6	129·6	107·7
Monthly Average 1950	42·5	103·6	44.03	147·4	134·7	109·5
Week Preceding:						
March 1, 1950	42·5	101·4	43.10	144·3	132·4	109·0
April 1, 1950	42·8	101·7	43.53	145·7	132·7	109·8
May 1, 1950	42·4*	102·5	43·46*	145·5	132·7	109·6
June 1, 1950	42·0·	103·5	43.47	145·5	133·8	108·7
July 1, 1950	42·5	103·9	44.16	147·8	135·5	109·1
August 1, 1950	42·5	104·2	44·29	148·3	136·3	108·8
September 1, 1950	41·9	104·4	43.74	146·4	137·4	106·6
October 1, 1950	42·9	105·3	45.17	151·2	138·1	109·5
November 1, 1950	43·0	106·4	45.75	153·2	138·1	110·9
December 1, 1950	43·1	107·8	46.46	155·5	138·4	112·4
January 1, 1951	43·0*	109·0	46.87*	156·9	139·6	112·4
February 1, 1951	42·9	110·4	47.36	158·6	141·7	111·9
March 1, 1951 (1)	42·3	111·4	47.12	157·8	145·4	108·5

NOTE: Average Real Weekly Earnings were computed by dividing the index of the Cost of Living into an index of the average weekly earnings, both indexes having been calculated on a similar base (Average 1946=100).

* Figures adjusted for holidays. The actual figures are: May 1, 1950, 42·6 hours, $43.67; January 1, 1951, 40·1 hours, $43.71.

Cumulative totals	47		12,135		103,772	0·03

* Preliminary figures.

‡ Strikes unterminated at the end of the previous year are included in these totals.

† The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and these figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, APRIL, 1951[1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars[2]
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to April, 1951				
MANUFACTURING—				
Textiles, Clothing, etc.—				
Silk and rayon factory workers, Dunnville, Ont.	1	20	100	Commenced March 22; alleged discrimination in dismissal of four workers; terminated April 6; return of workers pending certification of union as bargaining agency; indefinite.
Miscellaneous Wood Products—				
Furniture factory workers, Kitchener, Ont.	1	88	2,000	Commenced March 12; for union recognition and agreement providing for extension of vacation plan, payment for statutory holidays, overtime rates, sickness and accident insurance, following reference to conciliation board; unterminated.
Furniture factory workers, Waterloo, Ont.	1	31	400	Commenced March 14; alleged discrimination in lay-off of nine workers; terminated April 21; return of workers and replacement; in favour of employer.
TRADE—				
Wholesale grocery warehouse workers, Sault Ste. Marie, Ont.	1	.....	.....	Commenced March 24; alleged discrimination in dismissal of one worker; terminated March 31; return of workers pending reference to provincial conciliation, indefinite.
SERVICE—				
Business and Personal—				
Hotel employees, Windsor, Ont.	1	58	1,200	Commenced March 12; for a union agreement providing for increased wages; unterminated.
Strikes and Lockouts Commencing During April, 1951				
MINING—				
Coal miners, River Hebert, N.S.	1	59	1,060	Commenced April 2; dispute *re* cleaning off wall before end of shift; unterminated.
Coal miners, Springhill, N.S.	1	500	540	Commenced April 3; misunderstanding over removal of one miner from longwall face; terminated April 4; return of workers pending settlement; indefinite.
Coal miners, Drumheller, Alta.	1	175	175	Commenced April 24; against dismissal of a miner for loading dirty coal; terminated April 25; return of workers pending settlement; indefinite.
MANUFACTURING—				
Vegetable Foods, etc.—		[3]		
Bakery workers, St. John's, Nfld.	1	70	630	Commenced April 2; for a new agreement providing for increased wages and reduced hours; terminated April 11; return of workers pending reference to conciliation board; indefinite.
Tobacco and Liquors—				
Tobacco products factory workers, Hamilton, Ont.	1	382	600	Commenced April 12; protesting lay-off of 34 workers until new excise stamps available; terminated April 13; return of workers; in favour of employer.
Textiles, Clothing, etc.—				
Hat and cap factory workers, Montreal, P.Q.	1	5	40	Commenced April 4; for union recognition and agreement, following reference to arbitration board; terminated April 13; return of workers; in favour of employer.

TABLE G-2.—STRIKES AND LOCKOUTS IN CANADA, APRIL, 1951 [1]

Industry, Occupation and Locality	Number Involved		Time Loss in Man-Working Days	Particulars [2]
	Establishments	Workers		
Strikes and Lockouts Commencing During April, 1951—*Concluded*				
Miscellaneous Wood Products—				
Sash and door factory workers, Victoria, B.C.	1	10	160	Commenced April 9; for acceptance of master agreement providing for increased wages and cost-of-living bonus retroactive to March 1, 1951; unterminated.
Lumber mill workers, Sarnia, Ont.	1	64	50	Commenced April 30; for a union agreement providing for increased wages, reduced hours and union security pending report of conciliation board; unterminated.
Metal Products—				
Auto body factory workers, Windsor, Ont.	1	260	180	Commenced April 2; protest against alleged excessive fumes in body-paint division; terminated April 2; negotiations; in favour of employer.
Machine and tool factory workers, Ingersoll, Ont.	1	325	1,200	Commenced April 2; for increased wages; terminated April 5; return of workers pending further negotiations; indefinite.
Motor vehicle factory workers, painters, Windsor, Ont.	1	[4] 25	12	Commenced April 18; dispute over rest period; terminated April 18; return of workers; in favour of employer.
Dry battery factory workers, Toronto, Ont.	1	131	590	Commenced April 24; for increased wages and cost-of-living bonus; unterminated.
Refrigerator factory workers, Hamilton, Ont.	1	19	76	Commenced April 25; alleged discrimination in lay-off of four workers; unterminated.
Sheet metal products factory workers, Toronto, Ont.	1	360	270	Commenced April 30; for a new agreement providing for increased wages, reduced hours, cost-of-living escalator clause and annual improvement factor; unterminated.
TRADE—				
Brewery warehouse and retail stores workers, Windsor, Ont.	8	65	390	Commenced April 20; for a new agreement providing for increased wages, or increased wages plus cost-of-living bonus, following reference to conciliation board; terminated April 26; negotiations; compromise, increased wages with retroactive pay, plus cost-of-living bonus.

(1) Preliminary data based where possible on reports from parties concerned, in some cases incomplete; subject to revision for the annual review.

(2) In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

(3) 52 indirectly affected; (4) 3,000 indirectly affected.
